In Memoriam

Rudi Busse (1943–2007)
Ingrid Fleming, Ulrich Pohl ................................................................. 431

Editorials

Electrophysiological Coupling of Transplanted Cardiomyocytes
Izhak Kehat, Lior Gepstein ................................................................. 433

Stoking Up BK<sub>Ca</sub> Channels in Hemorrhagic Shock: Which Channel Subunit Is Really Fueling the Fire?
Lucie H. Clapp, Nelson N. Orie .......................................................... 436

Bouncing Back From Elastin Deficiency
Pamela J. Ahmad, Lucy R. Osborne, Michelle P. Bendeck ..................... 439

Review

Angiotensin-Converting Enzyme and Vascular Remodeling
Sylvia Heeneman, Judith C. Sluimer, Mat J.A.P. Daemen ....................... 441

Molecular Medicine

Mechanism of High Glucose–Induced Angiotensin II Production in Rat Vascular Smooth Muscle Cells
Eduard N. Lavrentyev, Anne M. Estes, Kafait U. Malik .......................... 455

Protein Kinase G Phosphorylates Ca<sub>1.2</sub> α<sub>I</sub> and β<sub>2</sub> Subunits
Lin Yang, Guoxia Liu, Sergey I. Zakharov, Andrew M. Bellinger, Marco Mongillo, Steven O. Marx .................. 465

Cellular Biology

Adenoviral Expression of I<sub>Ka</sub> Contributes to Wavebreak and Fibrillatory Conduction in Neonatal Rat Ventricular Cardiomyocyte Monolayers
Viviana Muñoz, Krzysztof R. Grzeda, Thomas Desplantez, Sandeep V. Pandit, Sergey Mironov, Steven M. Taffet, Stephan Rohr, André G. Kléber, José Jalife ................................................................................................. 475

Electrophysiological Maturation and Integration of Murine Fetal Cardiomyocytes After Transplantation
Marcel Halbach, Kurt Pfannkuche, Frank Pillekamp, Agnieszka Ziomka, Tobias Hannes, Michael Reppel, Juergen Hescheler, Jochen Müller-Ehnsen .......................................................... 484

Hypersensitivity of BK<sub>Ca</sub> to Ca<sup>2+</sup> Sparks Underlies Hyporeactivity of Arterial Smooth Muscle in Shock
Guiling Zhao, Yan Zhao, Bingxin Pan, Jie Liu, Xuliang Huang, Xiaqiu Zhang, Chunmei Cao, Ning Hou, Caihong Wu, Ke-seng Zhao, Heping Cheng .................................................................................................. 493

Differential Roles of Cardiac Myosin-Binding Protein C and Cardiac Troponin I in the Myofibrillar Force Responses to Protein Kinase A Phosphorylation
Julian E. Stelzer, Jitandrakumar R. Patel, Jeffery W. Walker, Richard L. Moss .......................................................... 503
Integrative Physiology

Loss of Elastic Fiber Integrity and Reduction of Vascular Smooth Muscle Contraction Resulting From the Upregulated Activities of Matrix Metalloproteinase-2 and -9 in the Thoracic Aortic Aneurysm in Marfan Syndrome
Ada W.Y. Chung, Karen Au Yeung, George G.S. Sandor, Daniel P. Judge, Harry C. Dietz, Cornelis van Breemen ................................................................. 512

Functional Rescue of Elastin Insufficiency in Mice by the Human Elastin Gene: Implications for Mouse Models of Human Disease
Eiichi Hirano, Russell H. Knutsen, Hideki Sugitani, Christopher H. Ciliberto, Robert P. Mecham ............... 523

UltraRapid Communication

Cadherins, RhoA, and Rac1 Are Differentially Required for Stretch-Mediated Proliferation in Endothelial Versus Smooth Muscle Cells
Wendy F. Liu, Celeste M. Nelson, John L. Tan, Christopher S. Chen  ........................................... 532

Abstract  ................................................................. 532

Abstracts

Cardiovascular Repair and Regeneration: Structural and Molecular Approaches in the Cellular Era
4th Annual Symposium of the AHA BCVS Council  ................................................................. 532

Abstracts  ................................................................. 532

On the cover: Reentrant activity in cultured myocyte monolayers of cardiac origin. Left: Monolayer overexpressing the human \( I_{\text{Ks}} \) channel. Right: Littermate control. Optical mapping signal was recorded using the voltage sensitive dye Di-8-ANEPPS. See related article, page 475.
