Editorials

Labor Pains of New Technology: Direct Cardiac Reprogramming
Yoshinori Yoshida, Shinya Yamanaka ................................................................. 3

Critical Factors for Cardiac Reprogramming
Deepak Srivastava, Masaki Ieda ............................................................................ 5

CRACing the Cluster: Functionally Active Orai1 Channels in the Absence of Clustering With STIM1
Kimberly A. Smith, Jason X.-J. Yuan ........................................................................ 9

Stem Cell Effects at a Distance
Marc S. Penn ........................................................................................................ 12

Commentaries on Cutting Edge Science

Ruled by the Clock
Gordon F. Tomaselli .............................................................................................. 14

New Methods in Cardiovascular Biology

Noise-Free Visualization of Microscopic Calcium Signaling by Pixel-Wise Fitting
Qinghai Tian, Lars Kaestner, Peter Lipp ................................................................. 17

Molecular Medicine

Ryanodine Receptor Current Amplitude Controls Ca2+ Sparks in Cardiac Muscle
Tao Guo, Dirk Gillespie, Michael Fill ...................................................................... 28

★ Severe Hyperhomocysteinemia Promotes Bone Marrow–Derived and Resident Inflammatory Monocyte Differentiation and Atherosclerosis in LDLr/CBS-Deficient Mice
Daqing Zhang, Pu Fang, Xiaohua Jiang, Jun Nelson, Jodene K. Moore, Warren D. Kruger, Remus M. Berretta, Steven R. Houser, Xiaofeng Yang, Hong Wang ................................................. 37

Circulation Research (ISSN 0009-7330) is published semimonthly except one issue per month in November and December and three issues per month in March and August by Lippincott Williams & Wilkins, at 12107 Insurance Way, Hagerstown, MD 21740. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. Individuals may subscribe for their personal use at the following annual rates: Domestic: $240 for members and $558 for nonmembers. International: $297 for members of an American Heart Association scientific council and $697 for nonmembers. Contact Lippincott Williams & Wilkins for single copy rates and subscription rates for medical professionals in training and for libraries, reading rooms, and other multiple-use institutions. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to Circulation Research, American Heart Association, Lippincott Williams & Wilkins, 12107 Insurance Way, Hagerstown, MD 21740.
**Cellular Biology**

★ Inefficient Reprogramming of Fibroblasts into Cardiomyocytes Using Gata4, Mef2c, and Tbx5  
[Short Communication]  

★ Role of Coronin 1B in PDGF-Induced Migration of Vascular Smooth Muscle Cells  
Holly C. Williams, Alejandra San Martín, Candace M. Adamo, Bonnie Seidel-Rogol, Lily Pounkova, Srinivasan Raju Datla, Bernard Lassègue, James E. Bear, Kathy Griendling  

Platelet-Derived Growth Factor Maintains Stored Calcium Through a Nonclustering Orai1 Mechanism But Evokes Clustering If the Endoplasmic Reticulum Is Stressed by Store Depletion  
Lynn McKeown, Nicholas K. Moss, Paul Turner, Jing Li, Nikki Heath, Dermot Burke, David O’Regan, Mark S. Gilthorpe, Karen E. Porter, David J. Beech  

**Integrative Physiology**

★ Preservation of Myocardial Structure Is Enhanced by Pim-1 Engineering of Bone Marrow Cells  
Pearl Quijada, Haruhiro Toko, Kimberlee M. Fischer, Brandi Bailey, Patrick Reilly, Kristin D. Hunt, Natalie A. Gude, Daniele Avitabile, Mark A. Sussman  

Essential Role of Bone Marrow for Microvascular Endothelial and Metabolic Functions in Mice  
Sota Nakajima, Junko Ohashi, Ayuko Sawada, Kazuki Noda, Yoshihiro Fukumoto, Hiroaki Shimokawa  

**Reviews**

Assessing Cell and Organ Senescence Biomarkers  
Bruno Bernardes de Jesus, Maria A. Blasco  

Dynamical Systems Approach to Endothelial Heterogeneity  
Erzsebet Ravasz Regan, William C. Aird  

**AHA Scientific Statement**

Animal Models of Heart Failure: A Scientific Statement From the American Heart Association  
Steven R. Houser, Kenneth B. Margulies, Anne M. Murphy, Francis G. Spinale, Gary S. Francis, Sumanth D. Prabhu, Howard A. Rockman, David A. Kass, Jeffery D. Molkentin, Mark A. Sussman, Walter J. Koch, on behalf of the American Heart Association Council on Basic Cardiovascular Sciences, Council on Clinical Cardiology, and Council on Functional Genomics and Translational Biology  

**Thematic Synopses**

Circulation Research Thematic Synopsis: Stem Cells and Cardiac Progenitor Cells  
The Editors [Online Only]
Letters to the Editor

NOX4 Is a Janus-Faced Reactive Oxygen Species Generating NADPH Oxidase
Harald H.H.W. Schmidt, Kirstin Wingler, Christoph Kleinschnitz, Greg Dusting

Response to the Letter by Schmidt et al Regarding “Nox4 Is a Janus-Faced Reactive Oxygen Species Generating NADPH Oxidase”
Katrin Schröder, Sebastian Benkhoff, Anja Mieth, Rainer Pliquett, Judith Kosowski, Christoph Kruse, U. Ruth Michaelis, Stefanie Dimmeler, Ralf P. Brandes, Min Zhang, Ajay M. Shah, Peter Luedike, Norbert Weissmann

In April 2012, the average time from submission to first decision for all original research papers submitted to Circulation Research was 12.79 days.

On the cover: Two-photon fluorescence microscopy of a myocardial section from an αMHC-Cre/ROSA26mTmG neonatal transgenic mouse. (The authors would like to thank Konstantin Stark & Stefanie Doppler, German Heart Center Munich, for their help creating this image.) See related article, page 50.
