CIRCULATION RESEARCH (ISSN 0009-7330) is published semimonthly except one issue per month in November and December and three issues per month in January and August by Lippincott Williams & Wilkins, at 12107 Insurance Way, Hagerstown, MD 21740. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. Individuals may subscribe for their personal use at the following annual rates: Domestic: $339 for members and $680 for nonmembers. International: $399 for members of an American Heart Association scientific council and $506 for nonmembers. Contact Lippincott Williams & Wilkins for single copy rates and subscription rates for medical professionals in training and for libraries, reading rooms, and other multiple-use institutions. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to CIRCULATION RESEARCH, American Heart Association, Lippincott Williams & Wilkins, 12107 Insurance Way, Hagerstown, MD 21740.

In November 2013, the average time from submission to first decision for all original research papers submitted to Circulation Research was 14.6 days.

On the Cover: Bottom, Confocal images of classically activated M1 macrophages (Mac-1+Arginine1− cells in red) and alternatively activated M2 macrophages (Mac-1+Arginine1+ cells in orange) in murine failing heart sections (remote zone) counterstained with wheat germ agglutinin-FITC (green) to delineate cell membranes/interstitium and DAPI (blue) to label nuclei. Conjugated fluorophores: Mac-1-TRITC, Arginine1-Alexa Fluor 647. Top, Confocal images of cytoskeletal arrangement (orange-red) in murine peritoneal macrophages after M1 polarization with lipopolysaccharide and interferon-γ (left) and after M2 polarization with interleukin-4 (right) (stains used: Phalloidin-Alexa Fluor 555 to label actin, F480-FITC to label macrophages, DAPI to label nuclei). See related article, page 266.
