CIRCULATION RESEARCH (ISSN 0009-7330 print / 1524-4571 online) is published semimonthly for 24 total issues a year by Lippincott Williams & Wilkins at 16522 Hunters Green Parkway, Hagerstown, MD 21740. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. In the US, individuals may subscribe in print for their personal use at the following annual rates: $339 for members of any American Heart Association (AHA) scientific council or $717 for nonmembers. International: $399 for AHA members or $850 for nonmembers. Online-only and other additional rates can be found online at http://www.circres.org. AHA membership information can be found online at http://my.americanheart.org/membership. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to Circulation Research, American Heart Association, Lippincott Williams & Wilkins, 16522 Hunters Green Parkway, Hagerstown, MD 21740.

Correction Online Only

In April 2015, the average time from submission to first decision for all original research papers submitted to Circulation Research was 13.84 days.

On the Cover: Exosomes promote p-histone 3+ cardiomyocytes in the heart. Image shows a p-histone 3 and sacromeric actin double-labeled myocyte in the heart that received exosomes derived from mouse embryonic stem cells at day 5 after myocardial infarction. p-histone 3 (green), sacromeric actin (red), and nuclei (blue). Scale bar=20 μm. See related article, page 52.
