Circulation Research (ISSN 0009-7330 print / 1524-4571 online) is published semimonthly for 24 total issues a year by Wolters Kluwer Health, Inc. at 14700 Citicorp Drive, Bldg 3, Hagerstown, MD 21742. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. AHA members will have online access to the journal as a benefit of membership. In the US, individuals may subscribe in print for their personal use at the annual rate of $749 for nonmembers. International: $888 for nonmembers. Online-only and other additional rates can be found online at http://www.com/circres. AHA membership information can be found online at professional.heart.org. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to Circulation Research, American Heart Association, Wolters Kluwer Health, Inc., PO Box 1610, Hagerstown, MD 21740.

In July 2016, the average time from submission to first decision for all original research papers submitted to *Circulation Research* was 13.27 days.

On the Cover: Isoproterenol-induced myocyte membrane damage can cause reversible myocyte injury or necrosis. Representative images of Evan blue dye (EBD) uptake after a single injection of 200 mg/kg isoproterenol. Membranes are stained green; EBD+ myocytes are in red. Some EBD+ myocytes showed histological features of necrosis in matched H&E-stained slides, whereas other regions with EBD uptake showed intact non-necrotic myocytes. See related article, page 865.
