Editorials

With or Without Langendorff: A New Method for Adult Myocyte Isolation to Be Tested With Time
Xiongwen Chen, Timothy D. O’Connell, Yang K. Xiang ......................... 888

Mesenchymal Stem Cells Drive Cardiac Stem Cell Chemotaxis, Proliferation, and Phenotype via CXCR4 and cKit Signaling
Kenneth Michael Fish ..................................................... 891

Viewpoints

Does Autophagy Mediate Cardiac Myocyte Death During Stress?
Jihoon Nah, Álvaro F. Fernández, Richard N. Kitsis, Beth Levine,
Junichi Sadoshima ...................................................... 893

The Future of Onco-Cardiology: We Are Not Just “Side Effect Hunters”
Jun-ichi Abe, James F. Martin, Edward T.H. Yeh ............................ 896

A Strategy for Genomic Research on Common Cardiovascular Diseases Aiming at the Realization of Precision Medicine: Personal Insights and Perspectives
Hiroyuki Morita, Isset Komuro ........................................... 900

The NHLBI Page

Initial Outcomes for the NHLBI K99/R00 Pathway to Independence Program in Relation to Long-Standing Career Development Programs: Implications for Trainees, Mentors, and Institutions
Drew E. Carlson, Wayne C. Wang, Jane D. Scott .................. 904

New Methods in Cardiovascular Biology

★ A Simplified, Langendorff-Free Method for Concomitant Isolation of Viable Cardiac Myocytes and Nonmyocytes From the Adult Mouse Heart
Matthew Ackers-Johnson, Peter Yiqing Li, Andrew P. Holmes, Stian-Marie O’Brien,
Davor Pavlovic, Roger S. Foo ........................................... 909
Cellular Biology

★ Stimulatory Effects of Mesenchymal Stem Cells on cKit+ Cardiac Stem Cells Are Mediated by SDF1/CXCR4 and SCF/cKit Signaling Pathways
Konstantinos E. Hatzistergos, Dieter Saur, Barbara Seidler, Wayne Balkan, Matthew Breton, Krystalenia Valasaki, Lauro M. Takeuchi, Ana Marie Landin, Aisha Khan, Joshua M. Hare ........................................ 921

★ Genetically Encoded Biosensors Reveal PKA Hyperphosphorylation on the Myofilaments in Rabbit Heart Failure
Federica Barbagallo, Bing Xu, Gopireddy R. Reddy, Toni West, Qingtong Wang, Qin Fu, Minhui Li, Qian Shi, Kenneth S. Ginsburg, William Ferrier, Andrea M. Isidori, Fabio Naro, Hemal H. Patel, Julie Bossuyt, Donald Bers, Yang K. Xiang ....................................................... 931

Microdomain-Specific Modulation of L-Type Calcium Channels Leads to Triggered Ventricular Arrhythmia in Heart Failure

Integrative Physiology

Platelet and Erythrocyte Sources of S1P Are Redundant for Vascular Development and Homeostasis, but Both Rendered Essential After Plasma S1P Depletion in Anaphylactic Shock

Clinical Track

★ Gut Microbiome Associates With Lifetime Cardiovascular Disease Risk Profile Among Bogalusa Heart Study Participants
Tanika N. Kelly, Lydia A. Bazzano, Nadim J. Ajami, Hua He, Jinying Zhao, Joseph F. Petrosino, Adolfo Correa, Jiang He ............................................................... 956

Letter to the Editor

Response by Borges et al to Editorial Regarding Article, “Role of Adiponectin in Coronary Heart Disease Risk: A Mendelian Randomization Study”
Maria Carolina Borges, Debbie A. Lawlor, Cesar de Oliveira, Jon White, Bernardo L. Horta, Aluísio J.D. Barros ......................................................... e127

In August 2016, the average time from submission to first decision for all original research papers submitted to Circulation Research was 13.98 days.

On the Cover: Mesenchymal Stem Cells Stimulate Cardiac Stem Cells. Coculture of neonatal cKitcre/creERT2;IRG mouse heart tissue (red epifluorescence) with bone marrow mesenchymal stem cells (gray, nonfluorescent) induces endogenous cKit+ cardiac stem cells (green epifluorescence) to proliferate and migrate. See related article, page 921.
