Correction to: Novel Risk Markers and Risk Assessments for Cardiovascular Disease

In the article by Thomas and Lip, “Novel Risk Markers and Risk Assessments for Cardiovascular Disease,” which published in the January 6th issue of the journal (*Circ Res.* 2017;120:133–149. DOI: 10.1161/CIRCRESAHA.116.309955), a correction was needed.

The authors inadvertently misstated the results of a recent study. The error has been corrected as follows: “The intracoronary burden of neutrophil extracellular traps is positively associated with myocardial infarct size.”

The authors apologize for the error.

This correction has been made to the current online version of the article, which is available at <http://circres.ahajournals.org/content/120/1/133>.
