In the article by Goichberg et al, “The Ephrin A1–EphA2 System Promotes Cardiac Stem Cell Migration After Infarction,” which was published online before print on March 17, 2011, and appeared in the April 29, 2011 issue of the journal (Circ Res. 2011;108:1071–1083. DOI: 10.1161/CIRCRESAHA.110.239459), a correction was needed.

During the course of an ongoing investigation, questions were raised about images included in Figure 1, panels E and F. In their attempt to respond to this concern, the authors have repeated the analysis using similar samples and methodology, and generated new image panels. The new figure demonstrates the same findings as the original figure, and does not change the conclusions of the published article.

Additionally, errors were found in the Western blotting examples selected to be included in Figure 1B, Figure 2E (middle row), and Figure 3B (upper rows). These errors were rectified by providing the correct examples from the corresponding immunoblots. The corrected figure panels demonstrate identical findings to the original figures, and do not change the conclusions of the published article.

The authors regret this circumstance.

The corrections have been made to the current online version of the article, which is available at http://circres.ahajournals.org/content/108/9/1071.full.
