miR-210 Enhances Atherosclerotic Plaque Stability
Eken et al. page 633

Role of Epac1 in Ischemia/Reperfusion Injury
Fazal et al. page 645

CIRCULATION RESEARCH (ISSN 0009-7330 print / 1524-4571 online) is published semimonthly for 24 total issues a year by Wolters Kluwer Health, Inc. at 14700 Citicorp Drive, Bldg 3, Hagerstown, MD 21742. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. Individuals may subscribe for their personal use at the following rates for print subscriptions: $225 for AHA/ASA Domestic and International Members (excluding General Membership level), or $790 for domestic non-members and $937 for international non-members. AHA membership information can be found online at professional.heart.org. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to Circulation Research, American Heart Association, Wolters Kluwer Health, Inc., PO Box 1610, Hagerstown, MD 21740.
**Viewpoints**

**How Common Is Residual Inflammatory Risk?**
Paul M Ridker .......................................................... 617

**Targeting LncRNAs in Cardiovascular Disease: Options and Expeditions**
Stefan Haemming, Mark W. Feinberg .......................... 620

**“Attack of the Clones”: Commonalities Between Cancer and Atherosclerosis**
Daniel DiRenzo, Gary K. Owens, Nicholas J. Leeper .......... 624

**Cardiomyocyte Proliferation: Teaching an Old Dogma New Tricks**
Katherine E. Yutzey ..................................................... 627

**Mammalian Heart Regeneration: The Race to the Finish Line**
Stefanie A. Doppler, Marcus-Andre Deutsch, Vahid Serpooshan, Guang Li, Elda Dzilic, Rüdiger Lange, Markus Krane, Sean M. Wu ............... 630

**Molecular Medicine**

- **MicroRNA-210 Enhances Fibrous Cap Stability in Advanced Atherosclerotic Lesions**
  Suzanne M. Eken, Hong Jin, Ekaterina Chernogubova, Yuhuang Li, Nancy Simon, Changyan Sun, Greg Korzunowicz, Albert Busch, Alexandra Bäcklund, Cecilia Österholm, Anton Razauaev, Thomas Renné, Hans Henning Eckstein, Jaroslav Pelísek, Per Eriksson, Maria González Díez, Ljubica Perisic Matic, Isabel N. Schellinger, Uwe Raaz, Nicholas J. Leeper, Göran K. Hansson, Gabrielle Paulsson-Berne, Ulf Hedin, Lars Maegdefessel ......... 633

**Cellular Biology**

**Multifunctional Mitochondrial Epac1 Controls Myocardial Cell Death**
Loubina Fazal, Marion Laudette, Silvia Paula-Gomes, Sandrine Pons, Caroline Conte, Florence Tortosa, Pierre Sicard, Yannis Sainte-Marie, Malik Bissierier, Olivier Lairiez, Alexandre Lucas, Jérôme Roy, Bijan Ghaleh, Jérémy Fauchon, Jeanne Mialet-Perez, Frank Lezoualc’h ............................ 645

**Integrative Physiology**

**Contribution of K\(_{\text{v}}\)1.5 Channel to Hydrogen Peroxide–Induced Human Arteriolar Dilation and Its Modulation by Coronary Artery Disease**
Yoshinori Nishijima, Sheng Cao, Dawid S. Chabowski, Ankush Korishettar, Alyce Ge, Xiaodong Zheng, Rodney Sparapani, David D. Guterman, David X. Zhang .................................................... 658

**Clinical Track**

- **Effects of Transendocardial Delivery of Bone Marrow–Derived CD133+ Cells on Left Ventricle Perfusion and Function in Patients With Refractory Angina: Final Results of Randomized, Double-Blinded, Placebo-Controlled REGENT-VSEL Trial**
Hemodynamic Support With a Microaxial Percutaneous Left Ventricular Assist Device (Impella) Protects Against Acute Kidney Injury in Patients Undergoing High-Risk Percutaneous Coronary Intervention

Reviews
Roles of Vascular Oxidative Stress and Nitric Oxide in the Pathogenesis of Atherosclerosis
Ulrich Förstermann, Ning Xia, Huige Li

Neutrophil Extracellular Traps in Atherosclerosis and Atherothrombosis
Yvonne Döring, Oliver Soehnlein, Christian Weber

Letters to the Editor
Letter by Rask-Madsen et al Regarding Article, “Selective Enhancement of Insulin Sensitivity in the Endothelium In Vivo Reveals a Novel Proatherosclerotic Signaling Loop”
Christian Rask-Madsen, Kyoungmin Park, Qian Li, George L. King

Response by Viswambharan and Kearney to Letter Regarding Article, “Selective Enhancement of Insulin Sensitivity in the Endothelium In Vivo Reveals a Novel Proatherosclerotic Signaling Loop”
Hema Viswambharan, Mark T. Kearney

Correction
Correction to: miR-143 Activation Regulates Smooth Muscle and Endothelial Cell Crosstalk in Pulmonary Arterial Hypertension

In December 2016, the average time from submission to first decision for all original research papers submitted to Circulation Research was 13.4 days.

On the Cover: Composite of brightfield and fluorescent images of a human cardiac fibroblast treated with exosomes isolated from human pediatric cardiac progenitor cells. Exosomes (stained with Acridine Orange; red) can be seen in the cytoplasm of the cell. The nucleus was stained with DAPI (blue). See related article, page 701.
