Molecular Medicine

★ Exploring the Causal Pathway From Telomere Length to Coronary Heart Disease: A Network Mendelian Randomization Study
Yiqiang Zhan, Ida K. Karlsson, Robert Karlsson, Annika Tillander, Chandra A. Reynolds, Nancy L. Pedersen, Sara Hägg .................. 214

★ Dynamin-Related Protein 1 Inhibition Attenuates Cardiovascular Calcification in the Presence of Oxidative Stress
Maximillian A. Rogers, Natalia Maldonado, Joshua D. Hutcheson, Claudia Goetsch, Shinji Goto, Iwao Yamada, Tyler Faits, Hiromi Sesaki, Masanori Aikawa, Elena Aikawa .................. 220

★ The Dendritic Cell Receptor DNGR-1 Promotes the Development of Atherosclerosis in Mice

Anti-Inflammatory Effects of OxPAPC Involve Endothelial Cell–Mediated Generation of LXA4
Yunbo Ke, Noureddine Zebda, Olga Oskolkova, Taras Afonyushkin, Evgeny Berdyshev, Yufeng Tian, Fanyong Meng, Nicolene Sarich, Valery N. Bochkov, Ji Ming Wang, Anna A. Birukova, Konstantin G. Birukov .................. 244

Integrative Physiology

★ Brain Perivascular Macrophages Initiate the Neurovascular Dysfunction of Alzheimer Aβ Peptides
Laibaik Park, Ken Uekawa, Lidia Garcia-Bonilla, Kenzo Koizumi, Michelle Murphy, Rose Pistik, Linda Younkin, Steven Younkin, Ping Zhou, George Carlson, Josef Anrather, Costantino Iadecola .................. 258

X-Box Binding Protein-1 Dependent Plasma Cell Responses Limit the Development of Atherosclerosis
Andrew P. Sage, Meritxell Nus, Jayashree Bagchi Chakraborty, Dimitrios Tsiantoulas, Stephen A. Newland, Alison J. Finigan, Leanne Masters, Christoph J. Binder, Ziad Mallat .................. 270

Reviews

PI3K and Calcium Signaling in Cardiovascular Disease
Alessandra Ghigo, Muriel Laffargue, Mingchuan Li, Emilio Hirsch .................. 282

Multimodal Regulation of Cardiac Myocyte Proliferation
Xuejun Yuan, Thomas Braun .................. 293
AHA Scientific Statement

Fundamental Cardiovascular Research: Returns on Societal Investment: A Scientific Statement From the American Heart Association

Joseph A. Hill, MD, PhD, FAHA, Chair; Reza Ardehali, MD, PhD; Kimberli Taylor Clarke, MD; Gregory J. del Zoppo, MD, FAHA; Lee L. Eckhardt, MD; Kathy K. Griendling, PhD, FAHA; Peter Libby, MD, FAHA; Dan M. Roden, MD, FAHA; Hesham A. Sadek, MD, PhD; Christine E. Seidman, MD, FAHA, Vice Chair; Douglas E. Vaughan, MD; on behalf of the American Heart Association Council on Basic Cardiovascular Sciences; Council on Clinical Cardiology; Council on Epidemiology and Prevention; Council on Functional Genomics and Translational Biology; and Stroke Council

In May 2017, the average time from submission to first decision for all original research papers submitted to Circulation Research was 12.28 days.

On the Cover: Confocal microscopy image illustrating dextran-positive perivascular macrophages (green) juxtaposed to penetrating neocortical arterioles labeled by transcardiac perfusion with the lipophilic dye DiO (red). The neocortical surface is at the top of the picture. See related article, page 258.
