CIRCULATION RESEARCH (ISSN 0009-7330 print / 1524-4571 online) is published semimonthly for 24 total issues a year by Wolters Kluwer Health, Inc. at 14700 Citicorp Drive, Bldg 3, Hagerstown, MD 21742. Business offices are located at Two Commerce Square, 2001 Market Street, Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. Individuals may subscribe for their personal use at the following rates for print subscriptions: $225 for AHA/ASA Domestic and International Members (excluding General Membership level), or $833 for domestic non-members and $989 for international non-members. AHA membership information can be found online at professional.heart.org. Periodicals postage paid at Hagerstown, MD, and additional mailing offices. POSTMASTER: Send address changes to Circulation Research, American Heart Association, Wolters Kluwer Health, Inc., PO Box 1610, Hagerstown, MD 21740.

Correction

Correction to: Circulating Growth Differentiation Factor 11/8 Levels Decline With Age  
[Online Only] e3

In November 2017, the average time from submission to first decision for all original research papers submitted to Circulation Research was 11.99 days.

On the Cover: MHC-driven CCND2 overexpression activates cell cycle progression in hiPSC-CMs that results in a significantly enhanced potency of remuscularization of an injured left ventricle. A graft of human cardiomyocytes in the infarct border zone of a mouse heart is evidenced by the double staining positive of human specific cTnT (red) and human specific nuclear antigen (white), and all other nuclei (blue). See related article, page 88.
