Circulation Research

SUBJECT INDEX

VOLUME XIV JANUARY-JUNE, 1964

Acetylcholine, depressant effect on skeletal muscle, 525
Actin, cardiac, sulfhydryl groups, effect of calcium, magnesium, and ATP, 345
Adenosine triphosphate (ATP), sulfhydryl reactivity of cardiac actin, 345
Adhesiveness of blood elements during hypotension, determined by screen filtration, 97
Adrenal steroids, sodium retention and extra-adrenal factor, 17
Adrenergic nerve, effects on ventricular vulnerability, 516
Aggregation of red cells, causes of, 1
of platelets and other blood elements during hypotension, 97
Aldosterone
   hyperaldosteronism, 218, 471
   hypersecretion in high-output cardiac failure, 471
   renal sodium retention, 17
   renin release in secondary hyperaldosteronism, 218
All-or-none law of the heart, 139
Alloxan diabetes, vascular reactivity, catecholamines, and angiotensin, 494
Anemia, posthemorrhagic, effect on renal circulation, 414
Anesthesia
   depressant effect of pentobarbital, 228
   myocardial glycogen in the rat, 202
Angiotensin
   chronotropic effects in the myocardium, 337
   coronary circulation, resistance changes, 191
   increased renin release in lymph in secondary hyperaldosteronism, 218
   inotropic effects in the myocardium, 191, 337
   myocardial actions of, 191, 337
   production of in renal hypertension, 150
   reaction to in alloxan diabetes, 494
Aorta
   alterations of impedance in and performance of ventricles, 283
   in atherosclerosis, lipids, cholesterol, and fatty acids, 61
   collagen fibers, 400
   elastin network, 400
   flow patterns, 103
   hypertension produced by stenosis and ischemic kidney extracts, 150
   lipoprotein lipase in relation to species, age, sex, and blood pressure, 357
   oxygen uptake, cyclic changes in female rats, 364
   sound recording in, 105
   stenosis, hypertension produced by, 150
   structural components, 400
   valve closure, timing of, relation to incisura and second heart sound, 387
   wall, "two-phase" material, 400
Aortic-caval fistula, aldosterone hypersecretion in cardiac failure, 471
Aortic incisura, valve closure, relation to second heart sound and hemodynamics, 387
Aortic stenosis, hypertension produced by, 150
Arteries
   atherosclerosis
      aortic lipoprotein lipase in, 357
      cholesterol in baboons, 367
      experimental, lipid classes, 61
      hormones in female rats, 364
   carotid, effect of occlusion on renal function, 301
   coronary
      atherosclerosis in breeder rats, 32
      autoregulation of blood flow, 250
      drainage into left circumflex artery, 245
      left anterior atrial, drainage into left atrium, 245
      left circumflex, drainage into left coronary, 245
      Thbesian drainage, 245
   Arteriosclerosis, in breeder rats, number of litters and, 32
   Arteriovenous fistula, aldosterone hypersecretion in cardiac failure, 471
   Arteritis, produced by kidney extracts, 150
   Atherosclerosis
      aortic lipoprotein lipase in, 357
      cholesterol in baboons, control variations and experiment design, 367
      effects of hormones in female rats, 364
      experimental, serum lipids, lipid classes, and fatty acids, 61
   Atrial fibrillation
      multiple recording during, 117
      ventricular dysrhythmia in, 447
   Atrium
      fibrillation
         multiple recording during, 117
         ventricular dysrhythmia in, 447
      multiple recording during fibrillation, 117
      Thbesian drainage into, 245
      Automaticity, ectopic, effects of angiotensin in the myocardium, 337
   Autoradiography, electron microscopic, localization of digoxin in myocardium, 236
   Autoregulation
      of blood flow in skeletal muscle, venous O2, and denervation, 126
      of coronary blood flow, 250
   Baboons, cholesterol in serum, variations and experiment design, 367
   Bacterial endotoxin, thrombosis and hypercoagulability, 486
   Barbiturates, depressant effect of pentobarbital on central nervous system, 228
   Barium sulfate, lung embolism, cardiorespiratory effects, 546
   Baroreceptors, See Baroreceptors
   Baroreceptors
      influence on renal function, 301
      stimulation, effect on forelimb vascular bed, 392
   Blood
      alteration during hypotension, 97

Circulation Research, Volume XIV, June 1964

563
coagulation
and bacterial endotoxin, 486
as function of velocity gradient, 1
hypercoagulability, 436, 486
thrombin generation in cardiac patients under stress, 436
viscosity determined by rotational viscometer, 1
erythrocytes
causes of aggregation, 1
change in concentration in anemia, 414
hypercoagulability
in cardiac patients under stress, 436
thrombosis and endotoxin, 486
platelets, in hypotension, 97
thixotropy, coagulation as function of velocity gradient, 1
venous oxygen, autoregulation of blood flow, 126
viscosity, coagulation in thrombosis and, 1

Blood flow
aortic patterns, 105
autoregulation
of coronary flow, 250
in skeletal muscle, 126
comparison of direct with hydrogen gas measurement, 164
coronary
autoregulation of, 250
and indicator dilution curves, 270
forelimb, effect of baroreceptor stimulation on, 392
myocardial, measurement with gaseous hydrogen, 164
renal
effect of posthemorrhagic anemia, 414
measurement with gaseous hydrogen, 164
skeletal muscle
autoregulation of, 126
depressant effect of vasodilator drugs, 525
measurement with gaseous hydrogen, 164
venous, indicator dilution measurements, 377
Blood pressure
aortic lipoprotein lipase activity, 357
aortic elastin network, collagen fibers, and, 400
hypertension
aortic lipoprotein lipase activity, 357
malignant, produced by endocrine kidney, 150
renal, 357
hypertension
alteration of blood during, 97
cardiac function reduced by, 327
systemic, changes produced by reflex from right ventricle, 461
Blood vessels
coronary, arteriosclerosis in breeder rats, 32
epicardial, arteriosclerosis in breeder rats, 32
forelimb, effect of baroreceptor stimulation on, 392
functional deterioration from hypotension, 327
myocardial, arteriosclerosis in breeder rats, 32
reactivity in diabetes mellitus, 494
subendocardial, arteriosclerosis in breeder rats, 32

Books received, 355

Bradykinin, circulatory effects in man, 351

C
Calcium
frequency of calcification in epicardial arteries in arteriosclerosis in female breeder rats, 32
sulfhydryl reactivity of cardiac actin, 345
California hagfish, innervation of systemic heart of, 212
Cardiac cycle, intramural myocardial shear during, 536
Cardiac disease, thrombin generation in stress, hypercoagulability, 436
Cardiac failure
aldosterone hypersecretion, arteriovenous fistula, 471
sodium retention and extra-adrenal factor, 17
Cardiac muscle, See Heart muscle and Myocardium
Cardiac rate, dromotropic effects of epinephrine on intraventricular conduction time, 318
Cardiac sounds
cause and conduction of mitral sound in the heart, 426
second heart sound, valve closure and aortic insufficiency, 387
Cardiac valves, degenerative changes in coronary arteriosclerosis, 32
Cardiovascular system, effects of pentobarbital on hypothalamus and medulla, 228
Carotid artery occlusion, effect on renal function, 301
Carotid sinus, stimulation, effect on forelimb vascular bed, 392
Catecholamines, See also Epinephrine and Norepinephrine in cardiac tissues of California hagfish, 212
reaction to, increased by alloxan diabetes, 494

Cells
death of following changes in tissue electrolyte levels in myocardial ischemia, 260
red causes of aggregation, 1
change of concentration in anemia, 414
Central nervous system, depressant effects of pentobarbital, 228
Cervical vagotomy, modification of renal response to stellate ganglion stimulation, 301
Chloride, changes in concentration with myocardial ischemia, 260
Chloroform, effect on ventricular refractory period, 44
cholesterol, serum and tissue lipids and fatty acids in experimental arteriosclerosis, 61
variations in baboons, experiment design, 367
Chronotropic action, of angiotensin in myocardium, 537
Circulation, effects of bradykinin in man, 351
Clotting, of blood. See Coagulation
Coagulation
endotoxin and hypercoagulability, 486
as function of velocity gradient, 1
hypercoagulability
in cardiac patients under stress, 436
thrombosis and endotoxin, 486
thrombin generation in cardiac patients under stress, 436
and viscosity in thrombosis and coronary occlusion, 1
Collagen, aortic, elastin network, pressure changes, and, 400

Computer, in study of indicator dilution curves, 270
Concealed conduction, determinant of ventricular cycle length in atrial fibrillation, 447
Conduction
concealed, determining ventricular cycle length in atrial fibrillation, 447
effects of sympathetic nerve stimulation, 86
glycogen in the conduction system, 262
intraventricular, effect of epinephrine, 318
of mitral sound in the heart, 426
Contractile force, of skeletal muscle, depression by vasodilator drugs, 525
Contractile proteins, actin of cardiac muscle, effects of calcium, magnesium, and ATP, 345
Contractility
effects of angiotensin, 337
glycogen as possible energy source, 202

Circulation Research, Volume XIV, June 1964

---

**Coronary artery—Heart**

- arteriosclerosis, subendocardial, myocardial, and epicardial, 32
- autoregulation of blood flow, 250
- common left, Thebesian drainage, 245

**Coronary circulation**

- autoregulation of blood flow, 250
- oxygen extraction, relation to peak tension, 139
- resistance changes, angiotensin and norepinephrine, 191
- and tail of indicator dilution curves, 270

**Coronary thrombosis, blood viscosity in**

- 1

**Curve fitting, indicator dilution theory**

- 502

**Cycles**

- cardiac, intramural myocardial shear during, 536
- ventricular, length of in atrial fibrillation, 447
- cyclic changes of aorta, oxygen uptake in female rats, 364

**Denervation, autoregulation of skeletal muscle blood flow**

- 126

**Desoxycorticosterone acetate (DCA)**

- renal sodium retention and, 17

**Diabetes mellitus**

- vascular reactivity, catecholamines, and angiotensin, 494

**Diaphragmatic muscle**

- cyclic changes in oxygen uptake in female rats, 364

**Diastole**

- determinants, 139
- myocardial shear during cycle in dogs, 536
- wall thickness of myocardium during cycle, 541

**Diet, in experimental atherosclerosis, lipid classes**

- 61

**Digoxin**

- localization in myocardium by electron microscopic autoradiography, 236

**Dromotropic effect, of epinephrine on intraventricular conduction**

- 318

**Dysrhythmia, ventricular, in atrial fibrillation**

- 447

**Ectopic automaticity, in myocardium, effects of angiotensin**

- 331

**Elastin, aortic, pressure affecting configuration of**

- 400

**Electrolytes**

- calcium and sulfhydryl reactivity of cardiac actin, 345
- changes in myocardial ischemia, 260
- excretion by kidney during carotid artery occlusion, 301
- magnesium and sulfhydryl reactivity of cardiac actin, 345
- potassium and hyperkalemic effect of epinephrine on intraventricular conduction time, 318
- renal sodium retention and extra-adrenal factor, 17

**Electron microscopy**

- aortic elastin network and collagen during pressure change, 400
- autoradiography, localization of digoxin in myocardium, 236

**Embolism, lung**

- humoral transmission of cardio-respiratory changes, 546

**Endocrine kidneys, hypertension produced by extracts**

- 151

**Endotoxin, thrombosis and hypercoagulability**

- 486

**Enzyme**

- lipolytic, aortic lipoprotein lipase activity, 357

**Epicardium, frequency of calcification in female breeder rats**

- 32

**Epinephrine**

- in cardiac tissues of California hagfish, 212
- dromotropic effect on intraventricular conduction, 318

**Effect on ventricular refractory period and fibrillation threshold**

- 516

**Intraventricular conduction, role of associated hyperkalemia**

- 318

**Reaction to increased by alloxan diabetes**

- 494

**Eptatretus stouti (hagfish)**

- innervation of systemic heart of, 212

**Erythrocytes**

- aggregation of, thixotropy of blood and tendency toward thrombosis, 1
- change of concentration to in anemia, 414

**Estradiol**

- effect on oxygen consumption in the aorta, 364

**Estrogens**

- effect on oxygen consumption in the aorta, 364

**Excitability, nonuniform recovery in ventricular muscle**

- 44

**Excitation, ventricular, effects of cardiac sympathetic nerve stimulation**

- 86

**Experiment design, cholesterol in serum of baboons**

- 367

**Factor XI (plasma thromboplastin antecedent)**

- and thrombogenic effect of endotoxin, 486

**Fatty acids, and lipid patterns in experimental atherosclerosis**

- 61

**Fibrillation**

- atrial multiple recording during, 117
- ventricular dysrhythmia in, 447
- ventricular adrenergic effects, 516
- nonuniform recovery of excitability during refractory period, 44

**Filtration, glass wool, alteration of blood during hypotension**

- 471

**Fistula, arteriovenous, aldosterone hypersecretion in cardiac failure**

- 471

**Flow**

- See Blood flow

**Fluid retention, and extra-adrenal factor**

- 17

**Gamma variate**

- indicator transit time, 502

**Gastrocnemius**

- depressant effect of vasodilator drugs, 525

**Glass wool filtration**

- effect on alteration of blood during hypotension, 97

**Glycogen, spatial distribution in the conduction system**

- 202

**Hagfish**

- (Eptatretus stouti), innervation of systemic heart of, 212

**Heart**

- actin from muscle, sulfhydryl groups, 345
- all-or-none law, systole determinants, 139
- aortic impedance alterations on performance of ventricles, 283
- autoregulation of coronary blood flow, 250
- conduction concealed, 447
- effects of sympathetic nerve stimulation, 86
- glycerol and phosphorylase in the conduction system, 202
- intraventricular, 318
- of mitral sound, 426
- contractility effects of angiotensin, 337
- glycogen as energy source, 202
INDEX

contraction and relaxation, oxygen consumption during, 294

cycle, myocardial intramural shear during, 536
deterioration during development of hemorrhagic shock, 327
diastole determinants, 139
myocardial shear during cycle, 536
wall thickness of myocardium during cycle, 541
dynamic wall thickness in dogs, 541
failure
  aldosterone hypersecretion and arteriovenous fistula, 471
  sodium retention and extra-adrenal factor, 17
fibrillation
  atrial, 117, 447
  ventricular, 44, 516
function reduced by hypotension, 327
hagfish (Eptatretus stouti), innervation, 212
hemorrhagic shock, deterioration during, 327
hypotension, work capacity reduced by, 327
innervation in hagfish, 212
law of diastole determinants, 139
left, Thebesian drainage, 245
localization of tritiated digoxin in dog by autoradiography, 236
multiple recording during electrically induced atrial fibrillation, 117
muscle. See also Myocardium
  actin, sulfhydryl groups, 345
tension-velocity-length relationships, 73
myocardium. See Myocardium
oxygen consumption during contraction and relaxation, 294
rate, dromotropic effects of epinephrine on intraventricular conduction time, 318
sounds
  mitral, cause and conduction, 426
  second, valve closure and aortic incisura, 387
systole determinants, 139
myocardial shear during cycle, 536
wall thickness of myocardium during cycle, 541
Thebesian drainage, 245
valves, changes in arteriosclerosis, 32
ventricles. See Ventriculo
  work of capacity reduced by hypotension, 327
  with changes in aortic impedance, 283
Heart disease, thrombin generation in stress, hypercoagulability, 436
Heart failure
  aldosterone hypersecretion, arteriovenous fistula, 471
  sodium retention and extra-adrenal factor, 17
Heart muscle. See also Myocardium
  actin, sulfhydryl groups, 345
tension-velocity-length relationships, 73
Heart rate, dromotropic effects of epinephrine on intraventricular conduction time, 318
Heart sounds
  cause and conduction of mitral sound in the heart, 426
  second, valve closure and aortic incisura, 387
Heart valves, degenerative changes in coronary arteriosclerosis, 32
Hemorrhage
  alteration of blood during, 97
  cardiac deterioration in shock, 327
  renal circulation in posthemorrhagic anemia, 414
Histamine
  alteration of blood during hypotension, 97
  depressant effect on skeletal muscle, 525
Hormones
  estrogens, effect on oxygen consumption in the aorta, 364
  sodium-retaining, renal sodium retention and, 17
Hydrodynamics, of aortic flow, 105
Hydrogen gas, polarographic measurement in tissues and blood, 164
Hyperaldosteronism
  dual assay for renin in lymph, 218
  in high-output cardiac failure, 471
Hypercoagulability
  and thrombin generation in cardiac patients under stress, 436
  thrombosis and endotoxin, 486
Hyperkalemia, and dromotropic effect of epinephrine on intraventricular conduction, 318
Hypertension
  aortic lipoprotein lipase activity, 357
  malignant, produced by endocrine kidney, 150
  renal
    produced by aortic stenosis and extracts of ischemic kidneys, 150
    production of angiotensin, 150
Hypophysectomy, aldosterone hypersecretion in high-output cardiac failure, 471
Hypotension
  alteration of blood during, 97
  cardiac function reduced by, 327
  sodium-retaining, renal sodium retention and, 17
  production of angiotensin, 150
Hypoxemia, and ventricular refractory period, 44
Hypoxia, renal, effects on renal circulation, 414

I
Impedance, aortic, and ventricular performance, 283
Impulse formation, in myocardium, effects of angiotensin, 337
Indicator dilution
  computer in study of curves, 270
  curves
    computer in study of, 270
    curve fitting, 502
    extrapolation of, 270
    mathematical representation, gamma distribution function, 502
    role of coronary circulation in, 270
    single-pass, tails and shape of, 270
    indicator transit time, statistical distribution function, gamma variate, 502
    theory, methods of curve fitting, least squares and moments, 502
    venous flow measurements, 377
Indicator transit time, statistical distribution function, gamma variate, 502
Innervation, of systemic heart of hagfish (Eptatretus stouti), 212
Inotropic action
  angiotensin
    coronary and myocardial effects, 191
    on mammalian atrial and ventricular muscle, 337
    mobilization of tension in the myocardium, 139
  Intramural shear, myocardial, during cardiac cycle in dogs, 536
  Intraventricular conduction, dromotropic effect of epinephrine and associated hyperkalemia, 318
  iodine 131 clearance, from muscle, acetylcholine and d-tubocurarine, 525
Ischemia
  myocardial
    cell death following changes in tissue electrolyte levels, 260
    effect on ventricular refractory period, 44
    renal, hypertension produced by, 150

Circulation Research, Volume XIV, June 1964
Isoproterenol, effect on intraventricular conduction time, 318

Juxtaglomerular cells, aldosterone hypersecretion in high-output cardiac failure, 471

Kidney
- anemia and renal circulation, 414
- electrolyte excretion, 301
- endocrine, hypertension produced by extracts, 150
- extracts aldosterone production and, 471
- hypertension produced by, 150
- ischemic, hypertension produced by extracts, 150
- sodium retention and extra-adrenal factor, 17
- stellate ganglion stimulation and carotid artery occlusion, 301
- water excretion during carotid occlusion, 301

Law of the heart, factors affecting, 139

Left anterior atrial artery, drainage directly into left atrium, 245

Lymph, dual assay for renin in, 218

Magnesium, sulfhydryl reactivity of cardiac actin, 345

Mast cells, disappearance from myocardium in coronary arteriosclerosis, 32

Mechanics
- mechanical behavior of the myocardium, 73
- myocardial shear during cardiac cycle in dogs, 536
- wall thickness of myocardium during cardiac cycle, 541

Medulla, effects of pentobarbital, 228

Metabolism, oxygen consumption of ventricle, 294

Mitral heart sounds, cause and conduction of, 426

Mixing, in the aorta, 105

Mucopolysaccharides, arteriosclerosis in breeder rats, 32

Multiple recording, during atrial fibrillation, 117

Muscle
cardiac actin from, sulfhydryl groups, 345
tension-velocity-length relationships, 73
diaphragmatic, cyclic changes in O2 uptake in female rats, 364
gastrocnemius, depressant effect of vasodilator drugs, 525
inotropic effects of angiotensin, 191, 337
papillary calcification in coronary arteriosclerosis, 32
ectopic automaticity, 337
inotropic effects of angiotensin, 191, 337

Circulation Research, Volume XIV, June 1964
Ouabain, effect on ventricular refractory period, 44, 516

Oxygen
autoregulation of blood flow in skeletal muscle, 126
consumption
effects of estrogens, 364
myocardial, during ventricular contraction and relaxation, 394
uptake
in the aorta, cyclic changes in female rats, 364
myocardial, 139

Papillary muscle
calcification in coronary arteriosclerosis, 32
eccentric automaticity, 357
inotropic effects of angiotensin, 191, 337

Pentobarbital, depressant effects on central nervous system, 228

Peripheral vascular bed, functional deterioration as result of hypotension, 327

Phosphorus, changes in concentration with myocardial ischemia, 260

Phosphorylase, and glycogen distribution in the conduction system, 202

Pituitary gland, aldosterone hypersecretion in high-output cardiac failure, 471

Plasma thromboplastin antecedent (Factor XI), and thrombogenic effect of endotoxin, 486

Platelets, adhesiveness and aggregation determined by glass wool filtration, 97

Polarographic measurement, of local blood flow with hydrogen gas, 164

Posthemorrhagic anemia, effect on renal circulation, 414

Potassium
changes in concentration with myocardial ischemia, 202
intraventricular conduction, effect of epinephrine, 318

Pressoreceptor. See Baroreceptors

Pressure-flow curves, in autoregulation of coronary blood flow, 250

Protein
aortic lipoprotein lipase activity, 357
contractile, actin of cardiac muscle, effects of calcium, magnesium, and ATP, 345
Pulmonary embolism, humoral transmission of cardiorespiratory changes, 546

Quinidine, effect on ventricular refractory period, 44, 516

Random-walk curves, compared with single-pass indicator dilution curves in coronary circulation, 270

Recording
multiple, during atrial fibrillation, 117
sound, in the aorta, 105

Red blood cells
aggregation of and thixotropy of blood and tendency toward thrombosis, 1
change in concentration in anemia, effect on renal circulation, 414

Reflexes
presster, right ventricular, 461
skeletal muscle blood flow, autoregulation of, 126

S
Screen filtration pressure method, for determination of adhesiveness and aggregation of blood, 97

Second heart sound, valve closure, aortic insufficiency, relationships, 387

Sodium
cholesterol in experimental atherosclerosis, 61
variations in baboons, 367
lipids in experimental atherosclerosis, 61
Shear and blood viscosity, 1
myocardial, during cardiac cycle, 536
Shock, hemorrhagic, cardiac deterioration in, 327
Single-pass curves, indicator dilution technique, and coronary circulation, 270
Skeletal muscle
actin from, sulfhydryl reactivity of, 345
autoregulation, venous Ox, and denervation, 126
blood flow autoregulation of, 138
depressant effect of vasodilator drugs, 525
measurement with gaseous hydrogen, 164
contractile force, depression by vasodilator drugs, 525
D-tubocurarine and 131 clearance from, 525
changes in concentration with myocardial ischemia, 260
retention and extra-adrenal factor, 17
Sodium pentobarbital, depressant effect on central nervous system, 228

Sound
conduction of mitral sound in the heart, 426
recording in the aorta, 105
second heart sound, valve closure and aortic insufficiency, 387

Stasis thrombi, induced by bacterial endotoxin, 486
Stellate ganglion, stimulation, modification of renal response by cervical vagotomy, 301
Stenosis, aortic, hypertension produced by, 150
Steroids
adrenal, sodium retention and extra-adrenal factor, 17

INDEX

Circulation Research, Volume XIV, June 1964
Effect of renin on activity in lymph, 218
Stress, thrombin generation in cardiac patients under, 436
Subendocardial coronary arteries, degenerative changes in coronary arteriosclerosis, 32
Sulfhydryl groups, cardiac and skeletal actin, 345
Sympathetic nervous system stimulation
  effect on ventricular refractory period and fibrillation threshold, 516
  effects on conduction in the heart, 86
Sympathomimetic amines, effect on ventricular refractory period and fibrillation threshold, 516
Systemic circulation, blood pressure response to pressor reflex from right ventricle, 461
Systole
determinants, 139
myocardial shear during cycle, 536
wall thickness of myocardium during cycle, 541
Tension
myocardial, and oxygen uptake, 139
and velocity and length relationships in cardiac muscle, 73
Therese drainage, by isotope dilution technique in left heart, 245
Thermal mixing, in the aorta, 105
Thiouracil, in atherosclerosis, cholesterol, fatty acids, and lipids, 61
Thixotropy, and viscosity of blood in thrombosis and coronary occlusion, 1
Thrombin, generation and hypercoagulability in cardiac patients under stress, 436
Thrombin generation test, clotting deviations in cardiac patients under stress, 436
Thrombophlebitis, viscosity of blood in absence of anticoagulants, 1
Thrombosis
blood viscosity and rates of shear, 1
endotoxin and hypercoagulability, 486
venous, and coronary occlusion, low rates of shear, 1
Thrombus, stasis, induced by bacterial endotoxin, 486
Tissue
cardiac, of hagfish, catecholamines in, 212
electrolyte levels, cell death following change in, 260
lips in experimental atherosclerosis, 61
polarographic measurement with hydrogen gas, 164
Transient ischemia, cell death following changes in tissue electrolyte levels in myocardium, 260
Transit time, indicator, statistical distribution function, gamma variate, 502
Tritiated digoxin, localization in dog myocardium by electron microscopic autoradiography, 236
d-Tubocurarine, and 111i clearance from skeletal muscle, 525
Turbulent flow, in the aorta, 105
"Two-phase" material, of the aortic wall, 400
V
Vagotomy, cervical, modification of renal response to stellate ganglion stimulation, 301
Vagus, pressor afferents from right ventricle, 461
Valves
aortic, detection and timing of closure, 387
cardiac, degenerative changes in coronary arteriosclerosis, 32

Vascular bed, carotid baroreceptor stimulation in forelimb of the dog, 392
Vascular disease, produced by aortic stenosis and extracts of ischemic kidneys, 150
Vascular reactivity, diabetes mellitus, 494
Vasodilator drugs, depression of muscle force by, 525
Veins
flow in, by indicator dilution method, 377
oxygen, and autoregulation of blood flow in skeletal muscle, 126
Velocity
gradient, and blood conduction, 1
tension and length relationships in cardiac muscle, 73
Venous flow, indicator dilution measurements, 377
Ventricle
angiotensin, effects in myocardium, 337
conduction of mitral heart sounds in, 426
cycle length, concealed conduction as determinant of in atrial fibrillation, 447
dysrhythmia, in atrial fibrillation, 447
epinephrine, effect on intraventricular conduction time, 318
excitability recovery, 44
excitation, sympathetic effects on, 86
fibrillation
  recovery of excitability during refractory period, 44
  threshold, adrenergic effects, 516
glycogen distribution, 202
intraventricular conduction time, effect of epinephrine, 318
left
  oxygen consumption during contraction and relaxation, 294
  wall thickness during cardiac cycle, 541
  muscle, recovery of excitability, 44
norepinephrine
  on refractory period and fibrillation threshold, 516
  on wall thickness, 541
  oxygen consumption during contraction and relaxation, 294
  performance with change in aortic impedance, 283
  phosphorylase distribution, 202
  refractory period, effect of sympathetic amines, 44, 516
right pressor reflex from, 461
vulnerable period, 516
Ventricular fibrillation
adrenergic effects, 516
recovery of excitability in muscle, 44
Viscometer, rotational cone-in-cone, for blood viscosity measurements in thrombosis and coronary occlusion, 1
Viscosity, of blood in thrombosis and coronary occlusion, 1
Vulnerable period, ventricular, adrenergic effects, 516
W
Wall
aortic, "two-phase" material of, 400
myocardial, thickness during cardiac cycle, 541
ventricular, effect of norepinephrine on thickness, 541
Water
changes in water content of myocardium with ischemia, 260
excretion of kidney during carotid occlusion, 301
Work of the heart
capacity reduced by hypotension, 327
with changes of aortic impedance, 283
