Use of Radioiodinated Fatty Acid for Photoscans of the Heart. John R. Evans, Ramsay W. Cunton, Robert G. Baker, Donald S. Beanlands, and John C. Spears

Cardiac Arrhythmias Following Condenser Discharges Led Through an Inductance: Comparison with Effects of Pure Condenser Discharges. Bohumil Pelška

Influence of Cooling the Heart on Reactive Hyperemia of the Coronary Bed in the Heart-Lung Preparation. Henry S. Badeer

Cerebral Blood Flow Determined by Saturation and Desaturation with Krypton\textsuperscript{85}: An Evaluation of the Validity of the Inert Gas Method of Kety and Schmidt. Niels A. Lassen and Axel Klee

Children at High Altitude: Pulmonary and Renal Abnormalities. Richard L. Naeye

Regional Distribution of Catecholamines in the Dog Heart. Evangelos T. Angelakos

Hemodynamic Determinants of the Amplitude of the First Heart Sound. Tsuguya Sakamoto, Reizo Kusukawa, Donald M. MacCanon, and Aldo A. Luisada

Oxidative Capacity of Atherosclerotic Tissue of Rabbit and Dog. With Special Reference to Succinic Dehydrogenase and Cytochrome Oxidase. Nelicia Maier and Henry Haimovici

Effect of Prolonged Hypoxia Upon Granularity of Renal Juxtaglomerular Cells. William J. Oliver and Gerald L. Brody

News from the American Heart Association

Contributors to this Issue

Transfer of Carbon Monoxide and Nitrous Oxide in the Artificially Perfused Sheep Placenta. James Metcalfe, Waldemar Moll, Heinz Bartels, Peter Hilpert, and Julian T. Parer

Systemic and Coronary Energetics in the Resting Unanesthetized Dog. Donald E. Gregg, Edward M. Khouri, and Claudia R. Rayford
CONTENTS OF VOLUME XVI

Coronary Inflow and Oxygen Usage Following Cardiac Sympathetic Nerve Stimulation in Unanesthetized Dogs. Lino Granata, Ray A. Olsson, Andrew Huvos, and Donald E. Gregg .................................................. 114

Hemodynamic Changes in Trained Dogs During Experimental Renal Hypertension. Frederick Olmsted and Irvine H. Page .......................................................... 134

Hemodynamic Aspects of Prolonged Infusion of Angiotensin into Unanesthetized Dogs. Frederick Olmsted and Irvine H. Page .................. 140

Cardiac Action of Vasoactive Polypeptides in the Rat. I. Bradykinin. Ramon Rosas, Drogo Montague, Michael Gross, and David F. Bohr. II. Angiotensin. Michael Gross, Drogo Montague, Ramon Rosas, and David F. Bohr .......................................................... 150

Induced Pressure Gradients Across Infundibular Zone of Right Ventricle in Normal Dogs. John R. Tobin, Jr., Peter E. Blundell, Ralph C. Goodrich, and H. J. C. Swan .......................................................... 162

Comparative Cardiovascular Effects of Tyramine, Ephedrine, and Noradrenaline in Man. Jay N. Cohn .......................................................... 174

News from the American Heart Association .......................................................... 183

Contributors to this Issue .......................................................... 186

No. 3

Oxygen Consumption of Arterioles and Venules as Studied in the Cartesian Diver. Rufus O. Howard, David W. Richardson, Morris H. Smith, and John L. Patterson .......................................................... 187

Spontaneous Bundle Branch Block in Rhesus Monkeys. J. David Bristow and Manuel Rene Malinow .......................................................... 210

Lipolytic Activity of Post-Heparin Plasma in Hyperlipemia and Hypolipemia. Peter T. Kuo, David R. Bassett, Angelo M. DiGeorge, and Cary C. Carpenter .......................................................... 221

Effect of Thiamine Deficiency on Potential Myocardial Contractility. Earl E. Aldinger .......................................................... 238

Differences in Cardiac Hypertrophy in Exercise and in Hypoxia. Edward J. Van Liere, Barbara Baugh Krames, and David W. Northup .................. 244

Analysis of Ventricular Dimension in the Unanesthetized Dog. Ishio Ninomiya and Michael F. Wilson .......................................................... 249

Circulation Research, Vol. XVI, June 1965

Effects of Venous Pressure on Mean Capillary Pressure and Vascular Resistance in the Intestine. Paul C. Johnson 294

Books Received 301

News from the American Heart Association 303

Contributors to this Issue 307

Steroids Produced in Vitro by Adrenal Glands of Normal and Atherosclerotic Rats During and After Drug-Induced Myocardial Necrosis. Bernard C. Wexler and George W. Kittinger 322

Metabolism of Perfused $^{14}$C-Labeled Nucleosides and Bases by the Isolated Heart. K. K. Tsuboi and N. M. Buckley 343

Permeability of the Alveolar Membrane to Solutes. Aubrey E. Taylor, Arthur C. Guyton, and Vernon S. Bishop 353

Relative Roles of the Sympathetic and Parasympathetic Nervous Systems in the Reflex Control of Heart Rate. Gerald Glick and Eugene Braunwald 363

Endocardial Fibroelastosis of Large Mammals. B. Black-Schaffer, Carl E. Grinstead II, and John N. Braunstein 383

Oxidative Phosphorylation in the Failing Dog Heart-Lung Preparation. Leonard Procita, Arnold Schwartz, and Kwang Soo Lee 391

News from the American Heart Association 396

Contributors to this Issue 400

Pulmonary Vascular Impedance in the Dog. Derek H. Bergel and William R. Milnor 401

Reactive Hyperemia in Legs of Dogs: Effects of Temperature and Intra-vascular Tension. Robert J. Bache and H. E. Ederstrom 416

Spread of Excitation from the Sinus Node. Toyomi Sano and Shunichi Yamagishi 423

Responses of Coronary Smooth Muscle to Catecholamines. Ricardo C. Zuberbuhler and David F. Bohr 431
CONTENTS OF VOLUME XVI

Instantaneous Force-Velocity-Length Determinants in the Contraction of Heart Muscle. Edmund H. Sonnenblick ................. 441

Interstitial Fluid Pressure: II. Pressure-Volume Curves of Interstitial Space. Arthur C. Guyton .................................... 452

Extraction Ratio and Bone Clearance of Sr85 as a Measure of Effective Bone Blood Flow. Douglas Harold Copp and Sun Shik Shin .............. 461

Synthesis, Binding, Release, and Metabolism of Norepinephrine in Normal and Transplanted Dog Hearts. Lincoln T. Potter, Theodore Cooper, Vallee L. Willman, and David E. Wolfe ....................... 468

Measurement of Pulmonary Edema. Morton Lee Pearce, Joe Yamashita, and James Beazell .................................. 482

News from the American Heart Association .................. 489

Contributors to this Issue ........................................ 492

No. 6

Relationship of Pericardial to Pleural Pressure During Quiet Respiration and Cardiac Tamponade. Beverly C. Morgan, Warren G. Guntheroth, and David H. Dillard ......................... 493

Hemodynamic Effects of Hyperbaric Oxygenation in Experimental Acute Myocardial Infarction. Leslie A. Kuhn, Howard J. Kline, Michael Wang, Takashi Yamaki, and Julius H. Jacobson II ......................... 499

Direct Renal Vasodilatation Produced by Dopamine in the Dog. John L. McNay, Robert H. McDonald, Jr., and Leon I. Goldberg .......... 510

Effect of Coronary Artery Embolization on Ventricular Volumes. Maylene Wong, Edgardo E. Escobar, Gilberto Martinez, and Elliot Rapaport .............. 518

Biphasic Action of Acetylcholine on Ventricular Myocardium. Milton Hollenberg, Serge Carriere, and A. Clifford Barger .................. 527

Effect of Intravascular Isotope Content on the Isotopic Determination of Coronary Collateral Blood Flow. Colin M. Bloor and Lathrop E. Roberts .... 537

Estimation of Cardiac Performance and Efficiency During Aortic Occlusion and Induced Muscular Activity. Arnost Froněk and Olga Hudlická ............ 545

Some Properties of a Cardioactive Substance Isolated From Human Plasma. Winifred C. Nayler, Peter C. C. Robertson, Jocelyn M. Price, and Thomas E. Lowe ......................... 553

News from the American Heart Association .................. 582

Contributors to this Issue ........................................ 586
