SUBJECT INDEX

VOLUME XVII

Acetylcholine, cardiac pacemaker depression and, 449
Acetyl strophanthidin, cardioversion affected by, 519
Acidosis, intracellular, intracardiac effects of, 114
Action potentials
bulbo-ventricular junction, mechanism and rate, 1
myocardial, ouabain effects and contraction, 46
pacemakers
cardiac, control of, 449, 460
cells, effects of imposed pacing, 460
Purkinje fibers and ventricular muscle cells compared, 259
Actomyosin, ATPase activity and effects of histones, 555
Adenine nucleotides, effects on glucose utilization in the heart, 135
Adenosine triphosphatase, actomyosin and effects of histones, 535
Adenosine triphosphate (ATP), inhibition of cardiac glucose utilization; microsomes, 135
Adrenal cortex, aldosterone secretion, angiotensin, and plasma sodium, 386
Afferent neurons, vagal, pharmacological stimulation, 19
Aldosterone, angiotensin stimulation modified by plasma sodium concentration, 380
Alkalosis, intracellular, intracardiac effects of, 114
Angiotensin
aldosterone stimulation modified by plasma sodium, 386
arterial contraction in vitro, normal and hypertensive, 359
plasma renin assay method and, 438
Angiotensinase, plasma renin assay method and, 438
Antibodies, to fibrinogen, 131-labeled, in detection of venous thrombosis, 322
Aorta
blood flow, conduction effects on hemodynamics and, 236
during leg exercise; pressure, vascular resistance, baroreceptor response, 97
instantaneous measurements; pressure gradients and, 340
blood pressure during exercise, 97, 427
enzymes, esterase and lipase in atherosclerotic wall, 178
heart failure produced by constriction; norepinephrine depletion, 312
Arrhythmias. See also Fibrillation
induced by digitalis toxicity, cardioversion of, 519
Arteries
atherosclerosis
aortic esterase and lipase, 178
testosterone and hydrocortisone effects on, 492
caudal, in vitro hyperresponsiveness in DCA hypertension, 359
coronary arteriosclerosis in chickens; age, sex, crowding, social factors, 403
pulmonary
chronic alveolar hypoxia, effects on walls, 160
circulating changes after release of chronic constriction, 248
mechanoreceptors, 19
reflexoes, 19
resistance, bradykinin and guanethidine, 106
Arterioles, medullin and prostaglandin effects, 57
Arteriosclerosis, coronary, in chickens; age, sex, crowding, social factors, 403
Artificial pacemakers. See also Pacemakers
heart rate and drug effects, 440
Atherosclerosis
aortic esterase and lipase, 178
testosterone and hydrocortisone effects on, 492
Atherogenesis, coronary, benefit of testosterone and hydrocortisone in low-protein diet, 492
Atrial fibrillation, periodic component by autocorrelation technique, 296
Atrial tachycardia, myocardial oxygen uptake, 330
Atrioventricular conduction
bulbo-ventricular junction, mechanism and rate, 1
effects of potassium, vagal stimulation, and epinephrine, 39
Atrioventricular node
cardiac pacemaker control and, 449
conduction in bulbo-ventricular junction, mechanism and rate, 1
Atrium
baroreceptors, exercise, aortic pressure and flow, vascular resistance, 97
Bicarbonate, sodium, cardiac effects, 114
Blood
erythrocytes
hematocrit determinations in human cranial blood pool, 532
polycythemia and right ventricular hypertrophy, 30
human cranial pool, hematocrit, 532
pH, cardiac effects of changes in, 114
plasma
cholesterol in atherosclerosis, 492
gamma-labeled, in determination of hematocrit of brain blood pool, 532

Circulation Research, Vol. XVII, December 1965
renin assay method and effects of inhibitor or activator, 438
renin during Na depletion in man, 130
sodium concentration, aldosterone secretion modified by, 386
testosterone and hydrocortisone effects in atherogenesis, 492
volume expansion and diuresis, 144
removal of antibodies by antisera to detect thrombosis, 322
serum, arterial contraction in vitro, normal and hypertensive, 359

Blood flow
systolic
calcium, exchange kinetics in myocardium related to contraction frequency and contractility, 78
cardiac disease, role of disease of conduction system in, 236
cardiac failure, experimental, myocardial norepinephrine depletion in, 312
cardiac myosin, human, electron microscopic observations, 536
cardiac output
exercise effects in unanesthetized dogs, 427
gastrointestinal distribution, by radioisotope method, 384
left ventricular, quantitative analysis, 207

medullin and prostaglandin effects, 57
stroke volume, decreased systemic vascular resistance, release of chronic pulmonary artery constriction, 248
Cardioacceleration, exercise effects on cardiac output and left coronary arterial flow, 427
Cardioversion, digitalis, ouabain, and acetyl strophantidin effects on threshold and rhythm, 519
Cardiotonic, renoprival; renal medulla, medullin, and prostaglandin, 57

Blood pressure
arterial
autoregulation
homeometric, relation to Starling’s law of the heart, 207
metabolic, in skeletal muscle, 540
coronary
in atrial and ventricular tachycardia, 330
circulation time and blood volume, 155
effects of changes in blood pH, 114
exercise effects in unanesthetized dogs, 427
exercise effects, 97, 427
to coronary; bradykinin effects, 106
gastrointestinal organs; individuality, 304
pulmonary, interstitial edema and, 191
transmural pressure in skeletal muscle and, 540

Blood volume
myocardial, coronary blood flow and, 155
pulmonary, in assessment of pulmonary edema, 414
ventricular
effects of right ventricular volume on left ventricular function, 494
residual volumes, exercise, and denervation, 379
Body weight, vectorcardiogram dimensions and, 168
Books received, 278, 564
Bradykinin, venous tone, forearm blood flow, systemic arterial pressure, arterial resistance, 106
Brain, hematocrit of blood pool in, 532
Bulbus cordis, pacemaker potentials, 1
Bypass, right ventricular, and left ventricular function, 484

C

Calcium, exchange kinetics in myocardium related to contraction frequency and contractility, 78
Carbonate, sodium, cardiac effects of, 114
Cardiac disease, role of disease of conduction system in, 236
Cardiac failure, experimental, myocardial norepinephrine depletion in, 312
Cardiac myosin, human, electron microscopic observations, 536
Cardiac output
exercise effects in unanesthetized dogs, 427
gastrointestinal distribution, by radioisotope method, 384
left ventricular, quantitative analysis, 207

medullin and prostaglandin effects, 57
stroke volume, decreased systemic vascular resistance, release of chronic pulmonary artery constriction, 248
Cardioacceleration, exercise effects on cardiac output and left coronary arterial flow, 427
Cardioversion, digitalis, ouabain, and acetyl strophantidin effects on threshold and rhythm, 519
Cardiotonic, renoprival; renal medulla, medullin, and prostaglandin, 57

Cells
erthrocytes
hematocrit determinations in human cranial blood pool, 532
polycythemia and right ventricular hypertrophy, 30
juxtaglomerular, granularity and renin during Na depletion in man, 130
myocardial, histones in nuclei of, 555
of sinoatrial nodal, pacemaker action in, 490
Central nervous system, cephalic reflexes and myocardial contractility, 349
Cerebral circulation, hematocrit of human cranial blood pool, 532
Chemoreceptors, cephalic reflexes and myocardial contractility, 349
Chickens, coronary arterial lesions; age, sex, crowding, social factors, 403
Cholesterol, plasma testosterone and hydrocortisone effects on, 492
Cinefluoroscopy, and contrast medium to measure cardiac residual volume in exercise, 379
Circulation time, mean coronary, related to flow, 207
Cobalt, right ventricular hypertrophy and polycythemia of, 30
Cocaine, cardiac pacemaker depression and, 449, 460
Colon, blood flow in, radioisotope method, 394
Computer analysis
aortic blood flow, pressure gradients, Fry and Womersley techniques, 340
atrial fibrillation, autocorrelation technique, periodic component, 296
electromagnetic flowmeters, 340
ventricular function and cardiac output, 207
Condenser discharges, myocardial vulnerable period, cardioversion and digitalis, 519
Conduction
atrioventricular
bulbo-ventricular junction, mechanism and rate, 1
effects of potassium, vagus, and epinephrine, 39
block in sinoatrial node during imposed pacing, 460
bulbo-ventricular junction, mechanism and rate, 1
conduction system disease in heart disease, 236
sino-ventricular, through potassium-depolarized atria, 285
velocity, membrane potentials and, 1
ventricular activation sequence and hemodynamic state, 236
Congestion, pulmonary, double indicator-dilution studies, 414
Contractility
myocardial
calcium exchange kinetics, 78
histones and, 555
negative inotropic effects of vagus, 222
ouabain effects and action potential, 46
pH effects, intra- and extracellular, 114
reflex control, cephalic hypoxia, hypercapnia, ischemia, 349

Circulation Research, Vol. XVII, December 196

INDEX

H

Habitat, glomerular volumes in kidneys of desert mammals, 303

Heart
adenine nucleotides, effect on glucose utilization, 135
anatomy of left ventricular inflow and outflow tracts, 123
arrhythmias induced by digitalis toxicity, cardio-vascular block
atrial, due to excess potassium, 285
potassium, vagus, and epinephrine effects, 39
in sinoatrial node during imposed pacing, 460
cardioversion of arrhythmias, 519
computer analysis of Frank-Starling law, 207
conduction
atrioventricular, 1, 39
block in sinoatrial node during imposed pacing, 460
bulbo-ventricular junction, 1
in heart disease, 236
potassium, vagus, and epinephrine effects, 39
sino-ventricular, through potassium-depolarized atria, 285
velocity, membrane potentials and, 1
ventricular activation sequence and hemodynamic state, 236
contractility
calcium exchange kinetics, 78
histones and, 555
negative inotropic effects of vagus, 222
nucleotides and microsomes, 135
pH effects, intra- and extracellular, 114
reflex control, 349
and right-heart bypass, 484
dipole moment, comparative studies, 168
disease, conduction system disease in, 236
effects of changes in blood pH, 114
failure, experimental, myocardial norepinephrine depletion, 312
fibrillation
atrial, computer analysis of periodic components, 296
ventricular, cardioversion and digitalis drugs, 519
glucose utilization, 135
homogenate; glucose utilization, effects of nucleotides and microsomes, 135
law of the heart, 207
mediol and prostataglandin effects, 57
microsomes, effect on glucose utilization, 135
nucleotides and microsomes, 135
myocardium. See Myocardium myosin, electron microscopic study, 336
nucleotides, effect on glucose utilization, 135
ouabain effects on potassium, action potential, and cardiac contractility, 46
output
exercise effects in unanesthetized dogs, 427
gastrointestinal distribution, 304
left ventricle, quantitative analysis, 207
mediol and prostataglandin effects, 57
and work after release of chronic pulmonary artery constriction, 549
pacemakers
in situ, control during imposed drive, 449
isolated nodal cell actions, 460
periodic component in atrial fibrillation, 296
potentials in bulbo-ventricular junction, 1
prostataglandin and mediol effects, 57
rate
atrial systole effects on ventricular stroke volume, 11
calcium exchange kinetics in myocardium, 78
circulating coronary blood volume and, 155
cardioversion, experimental, 449
cardioversion and digitalis drugs, 519
cardioversion and digitalis drugs, 519
cardiovascular muscle cells compared, 259
atrial systole effects on ventricular stroke volume, 11
heart rate, due to excess potassium, 285
atrial block due to, 285
vagal stimulation and epinephrine, 39
in sinoatrial node during imposed pacing, 460
Heart block, role of disease of conduction system in, 236
Heart block, atrial, due to excess potassium, 285
potassium, excess, atrial block due to, 285
and right-heart bypass, 484
disease, conduction system disease in, 236
effects of changes in blood pH, 114
failure, experimental, myocardial norepinephrine depletion, 312
Heart rate
atrial systole effects on ventricular stroke volume, 11
calcium exchange kinetics in myocardium, 78
circulating coronary blood volume and, 155
intrinsic and imposed pacemaker control, 449
Hematocrit
brain blood pool, 532
right ventricular hypertrophy due to altitude, cold, and polycythemia, 30
Hemostases, cardiac muscle function and, 555
Homeometric autoregulation, relation to Starling’s law of the heart, 207
Homogenate, myocardial; glucose utilization, effects of nucleotides and microsomes, 135
Hydrocortisone, atherosclerosis and plasma cholesterol, 492
Hydrogen ion, cardiac effects of intracellular and extracellular concentrations, 114
Hypercapnia, cephalic; myocardial contractility, reflex effects, 349
Hyperreactivity, arterial smooth muscle in DCA-hypertensive rats, 359
Hypertension
DCA, vascular hyperresponsiveness in vitro, 359
renopral; renal medulla, medullin, and prostataglandin, 57
Hypertrophy
myocardial, ventricular stroke work, chronic pulmonary artery constriction, 248
right ventricular
produced by polycythemia and hypervolemia, 30
stroke work and pulmonary artery constriction, 248
Hypervolemia
myocardial oxygen consumption predicted by multiple regression equations, 499
and polycythemia in production of right ventricular hypertrophy, 30
Hypoxia
cephalic; myocardial contractility, reflex effects, 349
polycythemia and right ventricular hypertrophy, 30
pulmonary arterial and venous walls in, 160

Circulation Research, Vol. XVII, December 1965
INDICATIONS FOR CAROTID SINUS DENERVATION AND VAGOTOMY EFFECTS

Membrane potentials, Purkinje fibers and ventricular muscle cells compared, 259
Metabolic autoregulation, of skeletal muscle blood flow, 540
Metabolism, myocardial, during exercise in unanesthetized dogs, 427
Microsomes, cardiac, glucose utilization and ATP inhibition, 135
Monkey, vectorcardiograms of, comparative study, 168
Muscle
cardiac. See Myocardium
cardiac myosin, human, electron microscopic studies, 336
papillary apposition during systole, 123
membrane potentials, potassium, cycle lengths, 259
pulmonary vascular changes in hypoxia, 160
skeletal ATPase activity in cardiac muscle and, 555
autoregulation of blood flow, 540
vascular resistance and transmural pressure in, 540
smooth arterial wall in hypertensive rats, 359
ventricular, calcium exchange kinetics and contractility, 78
Myocardial infarction, age, sex, crowding, social factors, in chickens, 403
Myofibrils, ATPase activity in cardiac and skeletal muscle, 555
Myocardium and analysis of left ventricular function, 207
cardioversion, vulnerable period and digitalis toxicity, 519
circulating coronary blood volume, 155
conduction velocity, frog bulbus cordis, 1
contractility
calcium exchange kinetics and, 78
histones and, 555
negative isotropic effects of vagus, 222
ouabain effects and action potential, 46
pH effects, intra- and extracellular, 114
reflex control, cephalic hypoxia, hypercapnia, ischemia, 349
histones and function of, 555
homogenate; glucose utilization, effects of nucleotides and microsomes, 135
hypertrophy, ventricular stroke work, pulmonary artery constriction, 248
infarction; age, sex, crowding, social factors in chickens, 403
mechanical coupling between right and left, 484
metabolism during exercise in unanesthetized dogs, 427
myosin, electron microscopic study, 336
norepinephrine depletion in heart failure, 312
oxygen consumption in atrial and ventricular tachycardia, 330
equations for hypervolemia, 499
of unanesthetized dogs during exercise, 427
peripheral vascular bed, cardioversion and digitalis, 519
Muscarinic
actiomycin; ATPase activity and effects of histones on, 555
cardiac, human, electron microscopic observations, 336

Natriuresis, carotid sinus denervation and vagotomy effects, 144

Magnesium, in inhibition of cardiac glucose utilization, 135
Mechanoreceptors, pharmacology of, in pulmonary artery, 19
Mediators
cardiac pacemaker cells and imposed pacing, 460
intrinsic and extrinsic cardiac, innervation and drugs, 449
Medulla, renal, cardiovascular effects of medullin, 57
Medullin, isolation and cardiovascular effects of, 57

Circulation Research, Vol. XVII, December 1963
Nerves

- cardiac; pacemaker control, mediators, and drugs,
- sympathetic, myocardial contractility and cephalic reflexes, 449
- vagus
  - afferent fibers from pulmonary artery mechano-receptors, 19
  - and diuresis during plasma volume expansion, 144
  - myocardial contractility and cephalic reflexes, 349
  - potassium action on A-V block by, 39
  - ventricular contractility, negative inotropic effects, 222

Neurons, afferent, pharmacological stimulation, 19

Node

- atrioventricular cardiac pacemaker control and, 449
- conduction in bulbo-ventricular junction, mechanism and rate, 1
- sinoatrial cardiac pacemaker control and, 449
  - cell potentials, imposed pacing, and effects of drugs, 460
- Norepinephrine
  - arterial constriction in vitro, normal and hypertensive, 359
  - myocardial stores in heart failure, 312
  - uptake and/or retention defects in heart failure, 312
- Nucleotides, effects on cardiac glucose utilization, 135

O

Ouabain
- cardioversion affected by, 519
- effects on myocardial potassium, action potential, and contraction, 46

Outflow tract, left ventricular pressure differential, 133

Oxygen
- hypoxia
  - cephalic, myocardial contractility, reflex effects, 349
  - polycythemia and right ventricular hypertrophy, 30
- pulmonary arterial and venous walls in, 160
- myocardial uptake
  - in atrial and ventricular tachycardia, 330
  - during hypervolemia, multiple regression equations for, 499
  - of unanesthetized dogs during exercise, 427

P

Pacemakers
- cardiac
  - cell potentials, effects of imposed pacing, 460
  - in situ, control during imposed drive, 449
  - imposed pacing, 449, 460
  - periodic component in atrial fibrillation, 296
  - potential in bulbo-ventricular junction, 1
- Pancreas, blood flow in, radioisotope method, 394
- Papillary muscle
  - apposition during systole, 123
  - membrane potentials, potassium, cycle lengths, 259
- Periodic component, in atrial fibrillation, autocorrelation technique, 296
- Peripheral resistance, exercise, aortic pressure and flow, 97
- pH, coronary blood, effects of changes on the heart, 114
- Plasma
  - cholesterol in atherosclerosis, 492

Gamma-labeled, in determination of hematocrit of human cranial blood pool, 532
- renal responses following volume expansion, 144
- assay method and effects of inhibitor or activator, 438
- during Na depletion in man, 130
- sodium concentration, aldosterone stimulation modified by, 386
- testosterone and hydrocortisone effects in coronary atherogenesis, 492
- volume expansion and diuresis, 144
- Plasminogen activator, in venous thrombosis, 477
- Plethysmograph, forearm blood flow, venous tone, 106
- Polarization, bulbo-ventricular junction, mechanism and rate, 1
- Polycythemia, right ventricular hypertrophy and, 30

Potassium
- atrial spread at sinus impulses, 285
- atrioventricular block and vagal action, 39
- myocardial; ouabain effects, action potential, and contraction, 46

Potentials. See also Action potentials
- membrane, Purkinje fibers and ventricular muscle cells compared, 259
- prepotentials, pacemaker cells during imposed pacing, 460
- thoracic, bidipolar distribution and local effects, 168
- Prepotentials, pacemaker cells during imposed pacing, 460

Pressure. See also Blood pressure
- intraventricular, differential along inflow and outflow tracts, 123
- left ventricular, and right ventricular bypass or distension, 484
- subatmospheric, resistance to blood flow in skeletal muscle and, 540
- transmural, autoregulation of skeletal muscle blood flow, 540
- venous
  - interstitial edema and vascular resistance, 191
  - resistance to blood flow in skeletal muscle and, 540
- ventricular conduction effects on hemodynamics and, 236

Pressure gradient, aorta, relation to blood flow, Fry and Womersley techniques, 340
- Prostaglandin E-1, cardiovascular effects of medullin and, 57
- Prostaglandins, cardiovascular effects of medullin and, 57
- Prostigmin, cardiac pacemaker depression and, 449, 460

Proteins
- diet low in, action of testosterone and hydrocortisone in atherogenesis, 492
- histones in nuclei of myocardial cells, 555

Pulmonary artery
- chronic alveolar hypoxia, effects on walls, 160
- circulation changes after release of chronic constriction, 248
- mechanoreceptors, pharmacology of, 19
- reflexogenic zone, 19

Pulmonary circulation
- changes after release of chronic pulmonary artery constriction, 248
- hypoxia
  - pulmonary arterial and venous walls in, 160

Indexed by guest on September 23, 2017 from http://circres.ahajournals.org/ Downloaded from
right ventricular hypertrophy produced by polycythemia, cobalt, and altitude, 30
Pulmonary congestion, double indicator-dilution studies, 414
Pulmonary edema
interstitial, and vascular resistance, 191
water space of lungs by indicator dilution, 414
Pulmonary engorgement, water content of extravascular water, 414
Pulmonary vein, chronic alveolar hypoxia, effects on walls, 160
Purkinje fibers, refractory period compared with that of ventricular muscle, 259

Radioisotopes
brain blood pool hematocrits measured by external counting, 532
iodine131, labeled anti-fibrinogen for detection of venous thrombosis, 322
rubidium86 extraction by gastrointestinal organs, 394
Radiorubidium clearance technique, in measurement of gastrointestinal blood flow, 394
Receptors
baroreceptors; exercise, aortic pressure and flow, vascular resistance, 97
chemoreceptors; cephalic reflexes and myocardial contractility, 349
intravascular; plasma volume expansion and diuresis, 144
mechanoceptors in pulmonary artery, pharmacology of, 19
Red blood cells
labeled, in determination of hematocrit of human cranial blood pool, 532
polycythemia and right ventricular hypertrophy, 30
Reflexes, cephalic, myocardial contractility and, 349
Reflexogenic zone, in pulmonary artery bifurcation, 19
Refractory period, Purkinje fibers and papillary muscle cells compared, 259
Regression equations, multiple, for myocardial oxygen consumption in hypervolemia, 499
Renal medulla, cardiovascular effects of medullin, 57
Renal vein, renin during Na depletion in man, 130
Renin
assay method for human plasma, 438
production during Na restriction in man, 130
Renopriaval hypertension, medullin and prostaglandin, 57
Reserpine, cardiac pacemaker depression and, 449
Respiration, reflex control, lobeline and mechanoceptors, 19
Resistance
arterial; bradykinin and guanethidine, 106
diminished norepinephrine response, 249
inhibition of pressor stimulus, 248
peripheral, in lower body during exercise, 97
systemic, after release of chronic pulmonary artery constriction, 248
vascular
bradykinin effects, 106
in lower body during exercise, 97
pulmonary edema and blood flow, 191
transmural pressure in skeletal muscle and autoregulation, 540
Rhythmicity, sino-ventricular, specialized atrial conduction pathways, 285
Rubidium86, extraction by gastrointestinal organs, 394
Sarcoplasmic reticulum, calcium exchange kinetics in the heart, 78

Scanning techniques, thrombosis localization by labeled anti-fibrinogen, 322
Scintillation scanning, thrombosis localization by labeled anti-fibrinogen, 322
Serum
esterase and lipase activity in atherosclerosis, 178
pressor activity in hypertension, 359
Shock, electric, effects of cardioversion and digitalis drugs on threshold to, 519
Sinus node
atrial cells, imposed pacing, and effects of drugs, 460
sinus sino-ventricular conduction through potassium-depolarized atria, 285
Skeletal muscle
ATPase activity in cardiac muscle and, 555
metabolic autoregulation of blood flow, 540
vascular resistance and transmural pressure in, 540
Smooth muscle
arterial wall in hypertensive rats, 359
stimulation by medullin and prostaglandin, 57
Social factors, caged chickens, coronary arterial lesions and myocardial infarction, 403
Sodium
depletion, juxtaglomerular index and renin in plasma of man, 130
plasma; aldosterone secretion, angiotensin, and, 386
Sodium bicarbonate, cardiac effects, 114
Sodium morrhuate, fibrinolytic activity on venous thrombosis, 477
Starling's law of the heart, quantitative analysis, 207
Stimuli, intrinsic and extrinsic, action on cardiac pacemaker tissue, 449
Stomach, blood flow in, radioisotope method, 394
Stroke volume
atrial systole affecting at low and high heart rates, 11
myocardial hypertrophy, release of chronic pulmonary artery constriction, ventricular stroke work, 248
Subatmospheric pressure, resistance to blood flow in skeletal muscle and, 540
Sympathectomy, ventricular volumes in exercise and, 379
Sympathetic nerves, myocardial contractility and cephalic reflexes, 349
Syneresis, actomyosin, histones, and, 555
Systole
atrial, effects on ventricular stroke volume, 11
exercise and denervation effects on end-systolic left ventricular inflow and outflow tracts during, 123

Tachycardia
action potentials of Purkinje fibers and ventricular muscle cells compared, 259
diminished norepinephrine response, 249
effect of drugs on threshold to, 519
tachycardia, myocardial oxygen uptake, 330
atrial systole effects on ventricular stroke volume, 11
ventricular cardioversion and digitalis drugs, 519
myocardial oxygen uptake, 330
Tension, arterial wall, normal and hypertensive, 359
Testosterone, atherosclerosis and plasma cholesterol, 492
THAM, cardiac effects, 114
Thorax, potential distribution, comparative study in four species, 168
Thrombosis
experimental, in rats, types of, 477
venous detection by 113I anti-fibrinogen, 322 fibrinolytic activity in, 477
Tissue atherosclerotic, esterase and lipase activity, 178 fibrinolysis localization in thrombosis, 477 pacemaker action of intrinsic and extrinsic stimuli on, 449 reactions of isolated tissue, 490 Transmission, atrioventricular, effects of potassium, vagal stimulation, and epinephrine, 39 Transmural pressure, autoregulation of skeletal muscle blood flow, 540 Tris hydroxymethyl aminomethane (THAM), cardiac effects, 114

V Vagectomy, ventricular volumes in exercise and, 379 Vagotomy, diuresis during plasma volume expansion, 144 Vagus nerves afferent fibers and diuresis during plasma volume expansion, 144 from pulmonary artery mechanoreceptors, 19 myocardial contractility and cephalic reflexes, 349 potassium action on A-V block by, 39 ventricular contractility, negative inotropic effects, 222 Vascular hyperresponsiveness, in DCA hypertension in vitro, 359 Vascular resistance bradykinin effects, 106 in lower body during exercise, 97 pulmonary, interstitial edema and blood flow, 191 transmural pressure in skeletal muscle and autoregulation, 540 Vasodilatation arteriolar medullin and prostaglandin, 57 bradykinin effects on forearm arterial and venous beds, 106 Vasopressin, arterial contraction in vitro, normal and hypertensive, 359 Vectorcardiography, spatial, comparative studies in four species, 168 Veins fibrinolytic activity in thrombosis, 477 pulmonary, effects of chronic alveolar hypoxia on walls, 160 renal, renin and juxtaglomerular activity in Na depletion, 130 thrombosis detection by 113I-labeled anti-fibrinogen, 322 fibrinolytic activity in, 477 tone, bradykinin, and guanethidine, 106 Venous pressure in the lung, interstitial edema and vascular resistance, 191 resistance to blood flow in skeletal muscle and, 540 Venous thrombosis detection by 113I-labeled anti-fibrinogen, 322 fibrinolytic activity in, 477 Venous tone, forearm, bradykinin effects, 106 Ventricle activation sequence and hemodynamic state, 236 calcium exchange kinetics and contractility, 78 conduction in the bulbo-ventricular junction, mechanism and rate, 1 contractility calcium exchange kinetics and, 78 reflex effects of cephalic hypoxia, hypercapnia, and ischemia, 349 and right-heart bypass, 484 fibrillation, cardioversion and digitalis drugs, 519 left computer analysis of cardiac output in, 207 end-diastolic and end-systolic volumes, exercise, and denervation, 379 function affected by distension or bypass of right ventricle, 484 inflow and outflow tracts, pressure gradients, 123 oxygen consumption, equations for hypervolemia, 499 refractory period compared with that of Purkinje fibers, 259 right distension or bypass, effect on left ventricular function, 484 hypertrophy, 30, 248 stroke volume, atrial systole effects, 11 Ventricle fibrillation, cardioversion and digitalis drugs, 519 Ventricular tachycardia cardioversion and digitalis drugs, 519 myocardial oxygen uptake, 330 Vessels, coronary, atherosclerosis, testosterone and hydrocortisone effects on, 492 Volume receptors, plasma volume expansion and diuresis, 144 Vulnerable period, myocardial, cardioversion and digitalis, 519

W Water free water excretion, effect of receptors, 144 lung content in congestion and pulmonary edema, 414 Womersley method, relationship between instantaneous aortic flow and pressure gradient, 340 Work by arterial wall, normal and hypertensive, 359 heart, after release of chronic pulmonary artery constriction, 248

No supplements to CIRCULATION RESEARCH were published in Vols. XVI and XVII, 1965.
