NEW REVISED EDITION

SYMPOSIUM ON CONGESTIVE HEART FAILURE

Rewritten 1966 to Include Newest Advances in the Field

Edited by Herrman L. Blumgart, M.D.

(Revised from original printing in CIRCULATION, January, February, March, 1960)

“The tempo of progress is reflected in the fact that after only five years practically every chapter was drastically revised and several new ones were added.

“The pathologic physiology of congestive failure is discussed from several points of view. Salient aspects of the pathologic physiology are depicted in the chapter on hemodynamics, on myocardial metabolism, and on the role of the kidney in congestive heart failure. The clinical aspects, including unusual causes, clinical management, cor pulmonale and congestive heart failure in children and in pregnant women, are succinctly summarized. Much of this material is based on the advances during the past several years...”

—from the Foreword

CONTENTS

Foreword. Herrman L. Blumgart

Starling and the Concept of Heart Failure. Sir George Pickering

Hemodynamic Aspects of Congestive Heart Failure. I. N. Katz and A. B. Shaffer

Metabolism of the Heart in Failure. John C. Fenton, Sigmundur Gudbjarnason, and Richard J. Bing

The Kidney in Congestive Heart Failure. A. Clifford Barger, J. Alan Herd, and Harvey V. Sparks, Jr.

Unusual Causes of Heart Failure. Howard B. Burchell

Clinical Management of Congestive Heart Failure. Herrman L. Blumgart and Paul M. Zoll

A Clinical Consideration of Cor Pulmonale. Réjane M. Harvey and M. Irene Ferrer

Pediatric Aspects of Congestive Heart Failure. Alexander S. Nadas

Congestive Phenomena Occurring in Pregnant Women with Heart Disease. C. Sidney Burwell and James Metcalfe

Rehabilitation Principles in Congestive Heart Failure. Menard M. Gerlitter and Howard A. Rusk

120 PAGES
