Circulation Research

SUBJECT INDEX

VOLUME XXIII  JULY-DECEMBER, 1968

Acetylcholine
and autonomic innervation of the uterine artery, 279
response of atrial plateau fibers, 387
Acetylcholinesterase
and autonomic innervation of the uterine artery, 279
kidney nerve fibers containing, 645
Actinomycin D, effects on RNA synthesis and labeling, 137
Action potentials
atrial
effects of diphenylhydantoin, 463
plateau fibers, 387
delayed conduction in the right bundle branch, 753
Purkinje and ventricular, potassium effects, 717
Purkinje and ventricular, potassium effects, 717
tetrodotoxin effects in sinus node, 501
Adenosine triphosphate
dynamic and electrocardiographic effects, 519
hydrolysis, anesthetics and the calcium pump, 597
Adrenal medulla, tetrodotoxin effects on nerves to, 553
Adrenal steroid, effects of withdrawal on chronic renovascular hypertension, 803
Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25
Anemometer, hot film, for study of aortic velocity fields, 789
Anesthesia
and the cardiac calcium pump, 597
effects on local cerebral blood flow, 313
Angiotensin
cardiovascular reactivity, 709
pressor agent in human stable plasma protein solution, 397
Animal models, for epidemiologic and genetic studies of congenital heart disease, 171
Anoxia, myocardial; high-energy phosphates, dynamics, and electrocardiogram, 519
Antipyrine-125I, estimation of coronary blood flow by washout, 259
Aorta
artificial pressure waves in, dispersion and attenuation, 539
atherosclerosis in, lipid changes in the eye, 633
compressibility of, 61
velocity fields in, 789
Arginine vasotocin, and inhibition of renin release, 605
Arrhythmias
antiarrhythmic action of diphenylhydantoin, 463
following ventricular defibrillation, 343
atrial wall
comparability of, 61
viscoelasticity in vivo, 111
Arteries
arterial wall
comparability of, 61
viscoelasticity, 111
blood pressure regulation, 415

Circulation Research, Volume XXIII, December 1968
INDEX

Diastole

cardiac muscle compliance, 291
depolarization, atrial plateau fibers, 387
variations of left ventricular end-diastolic pressure, volume, and ejection fraction, 213
Diffusible indicators, xenon and antipyrine in estimation of coronary blood flow, 259
digestion, systemic and regional hemodynamic changes during, 687
dilatation. See vasodilatation
diphenylhydantoin, effects on electrical properties of atria, 463
disappearance curves, for $^{133}$Xe and antipyrine-125, mathematical analysis, 259
dispersion, of small artificial pressure waves in the aorta, 539
distention, pulmonary arterial; pulmonary hemodynamics, 401
doctors, epidemiologic and genetic studies of congenital heart disease in, 171
dye dilution. See indicator dilution
editorial comment, on "Some Mechanical Properties of Isolated Mammalian Cardiac Muscle," 290
ejection fraction, variations in left ventricle with changes in outflow resistance, 213
elasticity
compressibility of the arterial wall, 91
viscoelasticity of arteries in vivo, 111
electrical stimulation
excitability of atrioventricular nodal cells, 69
paired stimulation of isolated mammalian cardiac muscle, 291
of the sciatic nerve, segmental vascular responses, 1
of the stellate ganglion
effects on ventricular automaticity, 249
patterns of epicardial innervation in the dog, 165
electroanalog
effects of high-energy phosphate depletion and repletion, 519
reconstruction of QRS complexes, computer simulation, 203
electromagnetic flowmeter, blood flow measurements, 11, 223
end-diastolic variations of left ventricular pressure, volume, and ejection fraction, 213
endothelial cells, possibility of replacement by myointimal cells, 671
energy, metabolism in the myocardium following coronary artery occlusion, 429
enzymes, myocardial, following coronary artery occlusion, 429
epicardium, innervation patterns in the left ventricular plexus of the dog, 165
epidemiology, congenital heart disease in the dog, 171
epinephrine
effects on atrial plateau fibers, 387
in the fetal, neonatal, and adult rabbit heart, 25
excitability, electrical, of atrioventricular nodal cells, 469
excitation
of intracardiac nerves by countershock, 731
propagation process in the ventricles, computer simulation, 203
excitation-contraction coupling, anesthetics, and the calcium pump, 597
exercise, effect on vasodilator response to sympathetic stimulation, 45
eye, lipid changes concomitant with atherosclerosis in the aorta, 633

F

fatigue, of atrioventricular transmission, 69
fatty acid, incorporation into atherosclerotic lesions, 779
femoral artery, occlusion, collateral vasodilatation following, 239
fibrillation. See also arrhythmias
arrhythmias following ventricular defibrillation, 343
flow, See Blood flow
flowmeter, electromagnetic, blood flow measurements, 11, 223
foam cells, intimal, and lipid synthesis in atherosclerotic lesions, 779
food, ingestion and digestion, hemodynamic changes during, 687
fracional extraction, and transcapillary exchange during tracer administration, 235
frequency-force relationship, of atrial myocardium, effect of thyroid hormone, 743
frequency-response curves, vasoparsticorresptive responses to exercise, 45
frommeyer, Walter B., Jr., new American Heart Assn. president, 811

g

Ganglia. See stellate ganglion
ganglionic blockade, and norepinephrine storage capacity in hypertension, 479
genetics, studies of congenital heart disease in the dog, 171
Glands, submaxillary, granules containing renin and kallikrein isolated from, 507
Glucagon, and reversal of cardiodepressant action of propranolol on atrioventricular transmission, 585
Gold Heart Awards, American Heart Assn., 811, 813
graduate training grant programs, national heart institute (supplement I), 1-1-1-54

H

Halothane, effects on the calcium pump of the sarcoplasmic reticulum, 567
head motion, and regulation of arterial blood pressure, 415
heart
arrhythmias
diphenylhydantoin effects, 463
following ventricular defibrillation, 343
conduction
atrioventricular, 69, 387, 585
β-receptor blockade and glucagon effects on A-V conduction, 343
delayed, in the right bundle branch, 753
delayed, in the slow pathway, 753
diphenylhydantoin effects, 453
excitability of A-V nodal cells, 69
role of atrial plateau fibers, 387
tetrodotoxin effects, 553
ventricular excitation spread, computer simulation, 203
INDEX

I...I...

Hypotensive effect, of tetrodotoxin, 553
Hypoxia
effects on local cerebral blood flow measurements by hydrogen clearance method, 313
myocardial, and high-energy phosphates, 519

I...

Idiovenous automaticity, effects of vagal ganglion stimulation, 249
incompressibility, and compressibility of the arterial wall, 61
Indicator dilution
corrections, for washout of diffusible indicators, 379
fractional extraction and transcapillary exchange during tracer administration, 325
measurement of the hepatic arterial "space," 611
pulmonary blood flow and volume measurements, 491
Ingestion, of food, systemic and regional hemodynamic changes during, 697
Inservation
autonomic, to the uterine artery, 270
epicardial, patterns in the left ventricle of the dog, 165
sympathetic, of the fetal, neonatal, and adult rabbit heart, 25
Isoelectric response, cardiac, to countershock, 731
Input impedance, of the lung, pulsatile pressure and flow transmission, 11
Intercellular junctions, distribution of sodium-oxide-generating sodium-oxide-activating enzyme in the epithelial cell layer of the blood-brain barrier, 111
Intercritical phases, cellular mechanisms that determine the rate of sodium reabsorption in the distal convolution of the rabbit kidney, 271
Intracardial nerves, excitation in response to countershock, 731
Intramural, of the fetal, neonatal, and adult rabbit heart, 25
inhibition of release by vasopressin and vasotocin, 605
Iris, and dietary cholesterol, 633
Ischemia, myocardial, energy metabolism, 429
Isometric response, cardiac, to countershock, 731
Isoproterenol
inhibition of release by vasopressin and vasotocin, 605
fusible indicators, 259
fractional extraction and transcapillary exchange during tracer administration, 325
measurement of the hepatic arterial "space," 611
pulmonary blood flow and volume measurements, 491
Ingestion, of food, systemic and regional hemodynamic changes during, 697
Intracellular, and lipid synthesis in atherosclerotic lesions, 779

J...

James B. Herrick Award, American Heart Assn., 811, 812
Kidney
See also Renal circulation
extraction, and cardiovascular reactivity caused by renin depletion, 709
renin, 531
nephrectomy, and cardiovascular reactivity caused by renin depletion, 709
ncural, 531
nerve fibers containing acetylcholinevedrastine, 645
natriuretic peptide, 709
in granules from salivary gland, 507
inhibition of release by vasopressin and vasotocin, 605
pressure agent in human stable plasminogen-activator-esterase, 397
renal excision, 531

K...

Kalikrein, in granules isolated from salivary gland, 507
Kidney
See also Renal circulation
extraction, and cardiovascular reactivity caused by renin depletion, 709
neglectful, and cardiovascular reactivity in response to renin depletion, 709
nerve fibers containing acetylcholinevedrastine, 645
natriuretic peptide, 709
in granules from salivary gland, 507
inhibition of release by vasopressin and vasotocin, 605
pressure agent in human stable plasminogen-activator-esterase, 397
renal excision, 531

L...

Labeling, of RNA, in experimental cardiac hypertrophy, 123, 157

Circulation Research, Volume XXI11, December 1968
Lipids
changes in eyes and aorta with atherosclerosis, 633
uptake and metabolism of 14 C-labeled oleic acid
in atherosclerotic aorta, 779
Liver, the hepatic arterial "space," 611
Lungs. See also Pulmonary circulation
hypoxia
effects on local cerebral blood flow, 313
and high-energy phosphates, 519
pulmonary blood pressure and flow through, 11

M
Medulla, adrenal, tetrodotoxin effects on nerves to, 553
Metabolism
of 14 C-labeled oleic acid in atherosclerotic aorta, 779
energy, in myocardial ischemia, 429
mitochondrial, oxidative phosphorylation and myo-
cardial stress, 87
Microelectrodes, study of delayed conduction in the
right bundle branch, 753
Microspheres, radioactive, in measurement of um-
belical blood flow, 623
Mitochondria
oxidative phosphorylation
myocardial stress and, 87
in normal and failing hearts, 438
Models
animal, for epidemiologic and genetic studies of
congenital heart disease, 171
the hepatic vascular system, 611
of the ventricles; computer simulation of propaga-
tion process in excitation of ventricles, 203
Monoamine oxidase, increased activity during devel-
opment of cardiac hypertrophy, 361
Monoexponential analysis, of washout curves, 259
Multiple exponential analysis, of washout curves, 259
Muscle, cardiac, mechanical properties, 291
Myocardium
calcium uptake in sarcoplasmic reticulum, and
anesthetics, 597
catecholamine stores in the fetal, neonatal, and
adult rabbit heart, 25
clearance of xenon and antipyrine, 259
contractility in left ventricle after epicardial innervation, 165
diastolic function: computer simulation of propaga-
tion process in excitation of ventricles, 203
vasocons triction in exercise, 45
venous responses to temperature changes, 701
and ventricular automaticity, 248
Natriuresis
effect of vasopressin on, 605
intravascular hydrostatic pressure and, 371
Nerve transmission and cardiovascular excitability to de-
pletion of endogenous norepinephrine, 799
Nerves
acetylcholinesterase-containing nerve fibers in the
Kidney, 645
innervation, autonomic, of the atrial artery, 379
Outflow resistance, effects of changes in on left ven-
tricular pressure, volume, and ejection fraction, 213
Oxidative phosphorylation
in mitochondria
from chronically stressed hearts, 87
from normal and failing hearts, 439
from chronically stressed hearts, 87
from normal and failing hearts, 439
Oxygeneffects on acute vascular regurgitation, 83
reversal of pulmonary hypertension by prolonged ad-
ministration in chronic bronchitis, 147
Pacemakers, activity of atrial plateau fibers, 387
Paired stimulation, changes in diastolic compliance after, 291
Pulmonary hypertension, reversal by long-term Oa Pressor agent, in human stable plasma protein solution

Potential action potentials atrial, 387, 463 atrial plateau fibers, 387 delayed conduction in right bundle branch, 753 diphenylhydantoin effects, 483 Purkinje and ventricular, potassium effects, 717 tetrodotoxin effects in sinus node, 501 transmembrane

Potassium effects on Purkinje and ventricular action potentials, 717 response of atrial plateau fibers to, 387

Purkinje fibers, atrial, electrical characteristics, 387 Portal vein, and the hepatic arterial "space," 611 Potassium effects on Purkinje and ventricular action potentials, 717

Pressure waves artificial, dispersion and attenuation in the aorta, 509 changes with age and arterial degenerative disease, 507 Probes, heated-film velocity and shear probes for study of aortic velocity fields, 789 Propagation process, in excitation of ventricles, computer simulation, 503

Programmed effects on atrioventricular transmission system, 585 effects on transitional sinus reflex control of coronary blood flow, 223 Proxen, pressor agent in human plasma protein solutions, 307 Proxen synthesis, and labeling, RNA in cardiac hypertrophy, 451 Pulmonary artery, viscosity of blood due to non-Newtonian fluidity of, 401 Pulmonary circulation hypertension, reversal by p-amphetamine, 567 pulmonary hypertension, reversal by long-acting Oa administration in chronic bronchitis, 147 pulsatilie blood pressure and flow through isolated lung, 11 viscosity reduction due to non-occlusive distention of large pulmonary arteries, 401 Pulmonary blood pressure, and flow through the isolated lung, 11 Purkinje fibers conduction role in ventricular excitation spread, 203 potassium effects on action potentials, 717 Purinergic effects on RNA synthesis and labeling, 137

QRS complex, reconstruction and computer simulation, 503

INDEX

R Radioisotopes estimation of coronary blood flow by washout of diffusible indicator, 509 fractional extraction and transcapillary exchange during administration of, 509 investigation of the hepatic arterial "space," 611 Receptors baroreceptors pulmonary arterial stretch receptors, 401 relaxes dynamics and regulation of arterial blood pressure, 415 beta-receptor blockade effects on atrioventricular transmission, 585 in reflex control of coronary blood flow, 223 in canine atrial reflex control of the coronary circulation, 501 pulmonary arterial stretch receptors, 401 Vasopressin, and veins, 693, 701 Reflexes baroreceptors, in regulation of arterial blood pressure, 415 carotid sinus reflex control of coronary blood flow, 223 venous, response to temperature changes, 693, 701 Reregulation, acute valvular, effects on myocardial oxygen consumption, 33 Renal circulation hypertension, effect of adrenal steroid withdrawal, 805 intrarenal hydodynamic pressure and sodium excretion, 371 Renin secretion and cardiac hypertrophy withdrawal, 709 in granules from salivary gland, 307 and pressor agent in human stable plasma protein solutions, 397 renal secretion, 531 Renovascular hypertension, effects of withdrawal of anesthetics, 597 Realization, pressure effects in Purkinje and ventricular fibers, 717

Research Achievement Award, American Heart Assoc., 811, 812 Respiratory control, in mitochondria from normal and failing hearts, 439 Ribonucleic acid (RNA) polyenucleotide activity in cardiac hypertrophy, 451 synthesis in cardiac hypertrophy, characterization, 124 labeling, 133, 137 regulation, 137 Right bundle branch, microelectrode study of delayed conduction in, 789 RNA See Ribonucleic acid

S Salivary gland, granules containing renin and kallikrein isolated from, 807 Saphenous veins, responses to temperature changes, 693, 701 Sarcoplasmic reticulum, myocardial, calcium uptake and release, 455 Sciatic nerve, segmental vascular response to stimulation, 1

Circulation Research, Volume XXIII, December 1968

Pentobarbital. See Sodium pentobarbital

Phosphates energy-rich in myocardium following coronary artery occlusion, 429 high-energy, dynamics and electrophysiology, 519 Phospholipids in the atherosclerotic intima, 779 eye and aortic lipids in atherosclerotic lesions, 833 Placenta, umbilical blood flow to, 611 Plasminogen, pressor agent in human plasma protein solutions, 387 Plateau fibers, atrial, electrical characteristics, 387 Portal vein, and the hepatic arterial "space," 611 Potassium effects on Purkinje and ventricular action potentials, 717

Pressure waves artificial, dispersion and attenuation in the aorta, 509 changes with age and arterial degenerative disease, 507 Probes, heated-film velocity and shear probes for study of aortic velocity fields, 789 Propagation process, in excitation of ventricles, computer simulation, 503

Programmed effects on atrioventricular transmission system, 585 effects on transitional sinus reflex control of coronary blood flow, 223 Proxen, pressor agent in human plasma protein solutions, 307 Proxen synthesis, and labeling, RNA in cardiac hypertrophy, 451 Pulmonary artery, viscosity of blood due to non-Newtonian fluidity of, 401 Pulmonary circulation hypertension, reversal by p-amphetamine, 567 pulmonary hypertension, reversal by long-acting Oa administration in chronic bronchitis, 147 pulsatilie blood pressure and flow through isolated lung, 11 viscosity reduction due to non-occlusive distention of large pulmonary arteries, 401 Pulmonary blood pressure, and flow through the isolated lung, 11 Purkinje fibers conduction role in ventricular excitation spread, 203 potassium effects on action potentials, 717 Purinergic effects on RNA synthesis and labeling, 137

QRS complex, reconstruction and computer simulation, 503

Circulation Research, Volume XXIII, December 1968

Pentobarbital. See Sodium pentobarbital

Phosphates energy-rich in myocardium following coronary artery occlusion, 429 high-energy, dynamics and electrophysiology, 519 Phospholipids in the atherosclerotic intima, 779 eye and aortic lipids in atherosclerotic lesions, 833 Placenta, umbilical blood flow to, 611 Plasminogen, pressor agent in human plasma protein solutions, 387 Plateau fibers, atrial, electrical characteristics, 387 Portal vein, and the hepatic arterial "space," 611 Potassium effects on Purkinje and ventricular action potentials, 717

Pressure waves artificial, dispersion and attenuation in the aorta, 509 changes with age and arterial degenerative disease, 507 Probes, heated-film velocity and shear probes for study of aortic velocity fields, 789 Propagation process, in excitation of ventricles, computer simulation, 503

Programmed effects on atrioventricular transmission system, 585 effects on transitional sinus reflex control of coronary blood flow, 223 Proxen, pressor agent in human plasma protein solutions, 307 Proxen synthesis, and labeling, RNA in cardiac hypertrophy, 451 Pulmonary artery, viscosity of blood due to non-Newtonian fluidity of, 401 Pulmonary circulation hypertension, reversal by p-amphetamine, 567 pulmonary hypertension, reversal by long-acting Oa administration in chronic bronchitis, 147 pulsatilie blood pressure and flow through isolated lung, 11 viscosity reduction due to non-occlusive distention of large pulmonary arteries, 401 Pulmonary blood pressure, and flow through the isolated lung, 11 Purkinje fibers conduction role in ventricular excitation spread, 203 potassium effects on action potentials, 717 Purinergic effects on RNA synthesis and labeling, 137

QRS complex, reconstruction and computer simulation, 503
Shock

countershock

Arrhythmias induced by, 343
cardiac inotropic and coronary vascular responses to, 713

Simulation

electrical, sympathetic vasoconstrictive responses to, 45
of ventricular excitation spread, 203
Sinus node, effects of diphenylhydantoin on rate, 501
tetrodotoxin effects on conductance, 501
Sodium pentobarbital, effects on the calcium pump of the sarcoplasmic reticulum, 597
Stellate ganglion

electrical stimulation

effects on ventricular automaticity, 249
patterns of epicardial innervation in the dog, 165
Stress

and compressibility of the arterial wall, 61
myocardial; oxidative phosphorylation in mitochondria, 87
-cardiovascular, during food ingestion, 687

Streptococci, in arteriolar smooth muscle, 291
Streech receptors, in pulmonary arteries, effects of distention, 401
Submaxillary gland, granules containing renin and kallikrein, 507
Summation

importance in atrioventricular nodal transmission, 68
Sympathetic nervous system

calcium block in peripheral fibers by tetrodotoxin, 553
control of ventricular automaticity, 249
coronary vasodilatation as component of cardiac sinus rhythm, 283
distribution of fibers in left ventricular epicardial planes of the dog, 165
innervation of the developing rabbit heart, 25
sodium intake and norepinephrine storage during development of hypertension, 476
tetrodotoxin effects on conduction, 501
Sodium pentobarbital, effects on the calcium pump of the sarcoplasmic reticulum, 597
Stellate ganglion

electrical stimulation

effects on ventricular automaticity, 249
patterns of epicardial innervation in the dog, 165
Steroids, adrenal, effects of withdrawal on chronic renovascular hypertension, 803
Stimulation

electrical

excitability of atrioventricular cells, 89
gained, and diastolic conduction, 203
do the sinus node, 501
delayed conduction in the right bundle branch, 753
Sympathetic

effects on vasoconstrictive responses to, 45
tetrodotoxin effects on conduction, 501
thyroid hormone effects on frequency-force relationship in atrial myocardium, 743
tyrotoxin effect on, 605
tyrotoxin, effect on frequency-force relationship of atrial myocardiun, 743
Tribal artery, pressure and flow following femoral artery occlusion, 529
Sympathectomy, carotid sinus reflex control of coronary blood flow, 239
Synthesis

cardiac septal

and left ventricular ejection, 683
hypotensive action of tetrodotoxin, 353
innervation of the uterine artery, 279
renal, and sodium excretion, 371
Vasopressin, inhibition of renin release by, 605
Vasotocin, inhibition of renin release by, 605
Veins
pulmonary, effects of pulmonary arterial distension, 401
renal venous pressure and sodium excretion, 371
responses to temperature changes, 693, 701
segmental responses to peripheral nerve stimulation, 1
Velocity
of blood flow and pressure in the human vena cava, 349
heated-film velocity and shear probes for study of aortic velocity fields, 789
Vena cava, velocity of human blood flow in, 349
Ventricles
action potentials, potassium effects, 717
automaticity, sympathetic control of, 249
contractility, valvular regurgitation and O2 consumption, 233
excitation spread, computer simulation, 203
left ejection, and blood momentum, 663
myocardial contractile force and epicardial innervation, 185
variations of end-diastolic pressure, volume, and ejection fraction, 243
total RNA content after aortic banding, 451
Vessel, segmental responses to peripheral nerve stimulation, 1
Viscoelasticity. See also Elasticity
of arteries in vivo, 111
Volume. See Blood volume
W
Washout curves, mathematical analysis; estimation of coronary blood flow by 133Xe and nitroglycerin-N2 clearance, 259
Wave transmission. See Pressure waves
X
Xenon-133, estimation of coronary blood flow by clearance of, 259
