SUBJECT INDEX

VOLUME XXIII JULY-DECEMBER, 1968

Acetylcholine
and autonomic innervation of the uterine artery, 279
response of atrial plateau fibers, 387

Acetylcholinesterase
and autonomic innervation of the uterine artery, 279
kidney nerve fibers containing, 945

Action potentials
atrial
effects of diphenylhydantoin, 463
plateau fibers, 387
delayed conduction in the right bundle branch, 753

Purkinje and ventricular, potassium effects, 717

tetrodotoxin effects in sinus node, 501

Adenosine triphosphate
dynamic and electrocardiographic effects, 519
hydrolysis; anesthetics and the calcium pump, 597

tetrodotoxin effects in atria, 463

Adrenal medulla, tetrodotoxin effects on nerves to, 553

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Anemometer, hot film, for study of aortic velocity fields, 789

Aneurysms
and the cardiac calcium pump, 597
effects on local cerebral blood flow, 313

Angiotensin
cardiovascular reactivity, 709
pressor agent in human stable plasma protein solution, 397

Animal models, for epidemiologic and genetic studies of congenital heart disease, 171

Anoxia, myocardial; high-energy phosphates, dynamics, and electrocardiogram, 519

Antipyrine-125I, estimation of coronary blood flow by washout, 259

Aorta
artificial pressure waves in, dispersion and attenuation, 539
brushes on, lipid changes in the eye, 833
compliance of aortic wall, 61
velocity fields in, 789

Arginine vasotocin, and inhibition of renin release, 605

Arrhythmias
sodium-lithium action of diphenylhydantoin, 463
following ventricular fibrillation, 343

Atrial wall
compliance of, 61
viscoelasticity in vivo, 111

Arteries
arterial wall
compliance of, 61
viscoelasticity, 111
blood pressure regulation, 415

coronal left, flow during coronary insufficiency, 99
myocardial energy metabolism following occlusion, 429
vasoconstriction in canine sinus node control of circulation, 223
femoral, collateral vasodilatation following occlusion, 239
the hepatic arterial "space," 611
pressure wave transmission in arterial degenerative disease, 567
pulmonary, vasodilatation due to distension of, 401
segmental responses to peripheral nerve stimulation, 251
following femoral artery occlusion, 239
viscoelasticity in vivo, 111

Atherosclerosis
eye and aortic lipids in, 633
uptake and metabolism of 14C-labeled oleic acid in, 779

ATP. See Adenosine triphosphate

Atrioventricular node
effects of beta-receptor blockade and glucagon, 585
role of atrial plateau fibers, 387
electrical excitability of cells, 60

Atrium
diphenylhydantoin effects on electrical properties of, 463

Automaticity
diphenylhydantoin effects in atria, 463
ventricular, sympathetic control of, 249

Bachmann's bundle, effective refractory period, effects of diphenylhydantoin, 463

Baroreceptors
pulmonary arterial stretch receptors, 401
reflex dynamics and regulation of arterial blood pressure, 415

Beta-receptor blockade
effects on atrioventricular transmission system, 585
propranolol in reflex control of coronary blood flow, 223

Bett, Rome A., Gold Heart Award, American Heart Assn., 812, 813

Block
in peripheral sympathetic fibers by tetrodotoxin, 553
right bundle-branch, delayed conduction, 753

Blockade
beta-receptor
effects on atrioventricular transmission, 585
in reflex control of coronary blood flow, 223
ganglion, and sympathetic storage capacity in hypertension, 479
of sinus node responses by tetrodotoxin, 501

Betts, Rome A., Gold Heart Award, American Heart Assn., 812, 813

Circulation Research, Volume XXIII, December 1968

Blood flow  

cerebral, local, measurement by hydrogen clearance method, 253  
during coronary insufficiency, 697  
estimation by washout of diffusible indicators, 259  
during food intake and digestion, 697  
hepatic, 631  
measurement methods  
electromagnetic flowmeter, 11, 223  
hot-film anemometer system, 789  
hydrogen clearance, 313  
indicator dilution, 386, 389, 401, 611  
radioactive microspheres, 653  
radiocardiograms, 396, 385, 611  
washout of diffusible indicators, 259  
momentum, contribution to left ventricular ejection, 609  
pulmonary  
effects of pulmonary arterial distention, 401  
possible, through isolated lung, 11  
tidal artery, following femoral artery occlusion, 239  
unahibled, in sheep placenta and fetus in utero, 623  
velocity  
heated-film anemometer system for study of, 789  
in human vein cava, 369  
Blood pressure  
artrial, effects of head motion on regulation of, 415  
blood momentum and left ventricular ejection, 663  
during food intake and digestion, 697  
est-diastolic, variations in left ventricle, 213  
hypertension  
experimental, DOCA and sodium, 301, 479  
monoamine oxidase activity in hypertension resulting from, 301  
pulmonary, reversal by long-term OS, 147  
renovascular, effect of adrenal steroid withdrawal, 601  
sodium intake and nor epinephrine storage, 479  
tissue, and sodium excretion, 371  
pulse wave transmission, 597  
pulmonary, effects of pulmonary arterial distention, 401  
pulmonary, effects of tidal artery occlusion, 239  
tidal artery, following femoral artery occlusion, 239  
Blood vessels  
capillary  
cotyledons and intercotyledonary chorion, distribution of umbilical blood flow to, 623  
capillary blood pressure and sodium excretion, 371  
transcapillary exchange and fractional extraction during tracer administration, 325  
catecholamines in, 853  
collateral, vaso dilatation following femoral artery occlusion, 239  
elastic behavior of, 509  
tetrodotoxin action, 553  
Blood volume  
est-diastolic variations in left ventricle, 213  
pulmonary, effects of pulmonary arterial distention, 401  
Blomgren, Herman L., Jennings B. Herrick Award, American Heart Assn., 811, 812  
Books received, 402, 610  

C  
Calcium  
and thyroid hormone effects on frequency-force relation in atrial myocytes, 743  
take up in sarcoplasmic reticulum, and anesthetics, 597  
Capillaries  
cotyledons and intercotyledonary chorion, 623  
renal capillary pressure and sodium excretion, 371  
transcapillary exchange and fractional extraction during tracer administration, 325  
Cardiac failure. See Heart failure  
Cardiac hypertrophy  
biophysical correlates of, 451  
monoamine oxidase activity and, 501  
RNA synthesis, 123, 137  
Cardiac muscle. See Mammalian and Vascular mechanical properties, 501  
Cardiovascular disease. See Heart disease  
Carotid sinus  
local motion and blood pressure regulation, 415  
vessel control of coronary blood flow, 223  
Catecholamines. See also Epinephrine, Isoproterenol, and Norepinephrine  
absorption of nor epinephrine storage in imipramine-treated rats, 741  
in blood vessels, 683  
effects on specialized atrial fibers, 367  
myocardial, in the developing rabbit heart, 25  
Cerebral circulation, local blood flow measurement by hydrogen clearance method, 313  
Cerebral vasomotor center, effects of tetrodotoxin, 553  
Chapman, Carleton B., Cold Heart Award, American Heart Assn., 811, 813  
Cholesterol, and lipid changes in eyes and aortas resulting from, 361  
Chloroform, effects on the calcium pump of the myocardial, in the developing rabbit heart, 25  
Chlorides and intercotyledonary chorion, distribution of umbilical blood flow to, 623  
Choline, and lipid changes in eyes and aortas with atherosclerosis, 633  
Cholesterol synthesis, 123, 137  
Class pages  
Apparatus nouveaux termes de la science humaine, by L. Baillière, 720  
Capillary supply in normal and hypertrophied hearts of rabbits, The, by R. A. Shipley, Louise J. Shipley, and Joseph T. Wearn, 86  
Deux mémoires sur les variations de couleur du sang vaisseau, by Claude Bernard, 98

Heart transplantation; statement by Executive Committee, International Society of Cardiology, 493

Hypercapnia, effect on local cerebral blood flow measurements by hydrogen clearance method, 313

Ischemia, myocardial, energy metabolism, 429

Hypotensive effect of tetrodotoxin, 553

Hyperthyroidism, effects on local cerebral blood flow measurements by hydrogen clearance method, 313

Hypercapnia, effects on local cerebral blood flow measurements by hydrogen clearance method, 313

Hypertrophy, myocardial, and high-energy phosphates, 519

Hypercapnia, effects on ATP levels, 269

Hypotensive effect, of tetrodotoxin, 553

Hydrophobicity, and compressibility of the arterial wall, 61

Hypercapnia, effects on local cerebral blood flow measurements, 11

Hypovolemic shock, effect on atrial plateau fibers, 387

Hypotensive effect of tetrodotoxin, 553

Hypothyroidism, effects on local cerebral blood flow measurements by hydrogen clearance method, 313

Hypotensive effect, of tetrodotoxin, 553

Hypothyroidism, effects on local cerebral blood flow measurements by hydrogen clearance method, 313

Hypothalamic region, effect on atrial plateau fibers, 387
INDEX

M

Medulla, adrenal, tetrotodin effects on nerves to, 553
Metabolism

of \( ^{14} \)C-labeled oleic acid in atherosclerotic aorta, 779
energy, in myocardial ischemia, 429
mitochondrial, oxidative phosphorylation and myocardial stress, 87
Microelectrodes, study of delayed conduction in the right bundle branch, 753
Microspheres, radioactive, in measurement of umbilical blood flow, 623
Mitochondria

oxidative phosphorylation

myocardial calcium uptake in sarcoplasmic reticulum, and anesthetics, 597
catecholamine stores in the fetal, neonatal, and adult rabbit heart, 25
clearance of xenon and antipyrine, 259
contractility in left ventricle after epicardial inervation, 165
thyroid hormone effects on, 743
energy metabolism in ischemia, 429
hypoxia, and high-energy phosphates, 519
Multiple exponential analysis, of washout curves, 259
Muscle, cardiac, mechanical properties, 291
Myocardium
calcium uptake in sarcoplasmic reticulum, and anesthetics, 597
catecholamine stores in the fetal, neonatal, and adult rabbit heart, 25
calcium content following aortic constriction, 451
clearance of xenon and antipyrine, 259
conduction block by tetrodotoxin, 553
coronary, effects of changes in on left ventricular pressure, volume, and ejection fraction, 213
coronary resistance, effects of changes in on left ventricular pressure, volume, and ejection fraction, 213
calcium uptake in sarcoplasmic reticulum, and anesthetics, 597

N

Natriuresis
effect of vasopressin on, 655
integrated ventricular pressure and, 371

Nerves
catecholamine-containing nerve fibers in the kidney, 645
innervation autonomic, of the atrial artery, 379

O

Occlusion

aortic, blood momentum and left ventricular ejection, 663
coronary

flow in left coronary artery after, 91
myocardial energy metabolism following, 429
femoral artery, collateral vasodilatation following, 239
Oleic acid, uptake and metabolism in atherosclerotic aorta, 779
Outflow resistance, effects of changes in on left ventricular pressure, volume, and ejection fraction, 213
Oxidative phosphorylation

in myocardium from chronically stressed hearts, 87
in normal and failing hearts, 430

P

Pacemakers, activity of atrial plateau fibers, 387
Paired stimulation, changes in diastolic compliance after, 291

824

Circulation Research, Volume XXIII, December 1968

Downloaded from http://circres.ahajournals.org/ by guest on November 12, 2017
Pulmonary hypertension, reversal by long-term Oa pressor agent, in human stable plasma protein solution, 397

Potential action potentials atrial, 387, 403 atrial platen fibers, 387 delayed conduction in right bundle branch, 753 diphenylhydantoin effects, 483 Purkinje and ventricular, potassium effects, 717 transmission along from atrial fibers, diphenylhydantoin effects, 483 delayed conduction in right bundle branch, 753

Pressure agent in human stable plasma protein solution, 397

Pressor agent in human stable plasma protein solution, 397

Pressure responses and cardiovascular reactivity caused by renin depletion, 709

Pressure, See Blood pressure

Prenatal waves, artificial, dispersion and attenuation in the aorta, 203 changes with age and arterial degenerative disease, 307

Probes, heated-film velocity and shear probes for study of aortic velocity field, 789

Propagation process in excitation of ventricles, computer simulation, 303

Propranolol, effects on atrioventricular transmission, 585 effects on carotid sinus reflex control of coronary blood flow, 223

Protein, precursor agent in human plasma protein solutions, 397

Protein, synthesis, and labeling, RNA in cardiac hypertrophy, 451 polymerase activity in cardiac hypertrophy, 451

Pulmonary artery, vascular constriction due to nonocclusive distention of, 401

Pulmonary circulation, hypertension, reversal by prolonged Oa administration in chronic bronchitis, 147 pulmonic blood pressure and flow through isolated lung, 11 vascular constriction due to nonocclusive distention of large pulmonary arteries, 401

Pulmonary hypertension, reversal by long-term Oa administration in chronic bronchitis, 147 pulmonic blood pressure and flow through isolated lung, 11

Purkinje fibers, crucial role in ventricular excitation spread, 203 potassium effects on action potentials, 717

Putrescine, effects on RNA synthesis and labeling, 137

QRS complex, reconstruction and computer simulation, 303

INDEX

R

Radioautography, uptake and metabolism of 14C-labeled oleic acid by atherosclerotic lesions, 779

Radioisotopes

estimation of coronary blood flow by washout of diffusible indicators, 209 fractional extraction and transcapillary exchange during administration of, 325 investigation of the hepatic arterial "space" 611

Receptors

beta-receptor blockade effects on atrioventricular transmission, 585 in reflex control of coronary blood flow, 223 in carotid sinus reflex control of the coronary circulation, 223 pulmonary arterial stretch receptors, 401 temperature and veins, 693, 701

Reflexes

baroreceptor, in regulation of arterial blood pressure, 415 carotid sinus reflex control of coronary blood flow, 223 venous response to temperature changes, 693, 701

Regurgitation, acute valvular, effects on myocardial oxygen consumption, 33

Renal circulation

hypertension, effect of adrenal steroid withdrawal, 805 intrarenal hydraulic pressure and sodium excretion, 371

Renin

degeneration and cardiovascular reactivity, 709 in granules from salivary gland, 307 inhibition of release by vasopressin and vasotocin, 605 and pressor agent in human stable plasma protein solutions, 397 renal secretion, 531

Renovascular hypertension, effects of withdrawal of adrenal steroid, 807

resistances in normal and failing hearts, 439

Ribonucleic acid (RNA)

polymerase activity in cardiac hypertrophy, 451 synthesis in cardiac hypertrophy, characterization, 127 labeling, 133, 137 regulation, 137

Right bundle branch, microelectrode study of delayed conduction in, 709

S

Salivary gland, granules containing renin and kallikrein isolated from, 607

Saphenous vein, responses to temperature changes, 693, 701

Sarcoplasmic reticulum, myocardial, calcium uptake and release, 397

Sciatic nerve, segmental vascular responses to stimulation, 1

Circulation Research, Volume XXIII, December 1968
Shock
- countershock induced by 343
- cardiac isometric and coronary vascular responses to, 731

Simulation
- exercise, sympathetic vasoconstrictive responses to, 45
- of ventricular excitation spread, 203

Sinus node, actions of tetrodotoxin, 301
Sodium excretion
- intrarenal hydrostatic pressure and, 371
- vasotocin effects on, 605
- intake, and norepinephrine storage during development of hypertension, 479
- tetrodotoxin effects on conductance, 501
- sodium pentobarbital, effects on the calcium pump of the sarcoplasmic reticulum, 597

Stellate ganglion
- electrical stimulation
- effects on ventricular automaticity, 249
- patterns of epicardial innervation in the dog, 165

Steroids, adrenal
- effects of withdrawal on chronic renovascular hypertension, 803

Stimulation
- electrical
- excitability of atrioventricular cells, 89
- paired, and diastolic conduction, 357
- of the saphenous nerve, vascular responses, 1
- of the stellate ganglion, 165, 349
- peripheral nerve, segmental vascular responses, 1
- sympathetic
- exercise effects on vasoconstrictive responses to, 45
- and temperature changes, 701
- sympathimimetic, during food ingestion, 687

Stress
- and compressibility of the arterial wall, 61
- myocardial contractile phosphorylation in mitochondria, 47
- relaxation, in cardiac muscle, 291

Sterech receptors, in pulmonary arteries, effects of distention, 401
Subarachnoid gland, granules containing renin and kallikrein, 507
Summation, importance in atrioventricular nodal transmission, 48
Sympathetic nervous system
- conduction block in peripheral fibers by tetrodotoxin, 553
- control of ventricular automaticity, 249
- coronary vasomotion as component of coronary sinus reflex, 293
- distribution of fibers in left ventricular epicardial plexus of the dog, 105
- innervation of the developing rabbit heart, 25
- sodium intake and noradrenaline storage in hypertensive, 479
- stimulation, effects on ventricular automaticity, 249
- exercise effects on vasoconstrictive responses to, 45
- venous responses to local temperature changes, 701

Sympathetolytic, cardiac sinus reflex control of coronary blood flow, 223
Systole, blood monotonous and left ventricular ejection, 683

Temperature, responses of cutaneous veins to changes in, 693, 701

Tension
- sympathetic vasoconstriction in exercise, 45
- thyroid hormone effects on frequency-force relationship of atrial myocardium, 743
- vascular stagnation and oxygen consumption, 37

Tetrodotoxin
- actions on sinus node, 501
- cardiovascular action of, 355

Thyroid hormone, effect on frequency-force relationship of atrial myocardium, 743

Thyroxine, effect on frequency-force relationship of atrial myocardium, 743

Tibial artery, pressure and flow following femoral artery occlusion, 579

Tracer
- fractional extraction and transcapillary exchange during administration, 325
- investigation of the hepatic arterial "space," 611
- Training Grant Programs, National Heart Institute, (Supplement L), I-1-I-54

Transcapillary exchange, and fractional extraction during tracer administration, 325

Transmembrane potentials
- from atrial fibers, effects of diphenylhydantoin, 463
- delayed conduction in the right bundle branch, 753

Transmission
- atrioventricular effects of beta-receptor blockade and phenoxybenzamine, 585
- fatigue and summation, 49
- pressure waves along the human aorta; changes with age and arterial disease, 567
- artificial, in the aorta, 530
- of pulsatile blood pressure and flow through isolated lung, 11

Transplantation, cardiac; statement by Executive Committee, International Society of Cardiology, 493

Tyramine, and cardiovascular reactivity caused by renin depletion, 709

Umbilical artery, blood flow measurement in sheep placenta and fetus in utero, 623

Urinary flow
- renal excretion of renin, 511
- sodium excretion
- intra renal hydrostatic pressure and, 371
- Vasotocin effect on, 605

Uterine artery, vasoconstrictor and vasodilator innervation, 279

V 
Valvular regurgitation, quote, effects on oxygen consumption in the heart, 59

Vasocorestriction
- innervation of the otic artery, 270
- pulmonary, due to nonocclusive distention of large pulmonary arteries, 401
- sympathetic responses during exercise- or drug-induced vasodilatation, 43

Vasodilatation
- of collateral vessels following femoral artery occlusion, 296
- exercise- or drug-induced, sympathetic vasoconstrictive responses, 45

Circulation Research, Volume XXIII, December 1968
hypotensive action of tetrodotoxin, 553
vasopressin, inhibition of renin release by, 605
Vasopressin, inhibition of renin release by, 605
Veins
renal venous pressure and sodium excretion, 371
responses to temperature changes, 693, 701
segmental responses to peripheral nerve stimulation, 1
Velocity
of blood flow and pressure in the human vena cava, 349
heated-film velocity and shear probes for study of aortic velocity fields, 789
Vena cava, velocity of human blood flow in, 349
Ventricles
action potentials, potassium effects, 717
automaticity, sympathetic control of, 249
contractility, valvular regurgitation and O2 consumption, 83
excitation spread, computer simulation, 203
left
ejection, and blood momentum, 663
myocardial contractile force and epicardial innervation, 195
variations of end-diastolic pressure, volume, and ejection fraction, 213
total RNA content after aortic banding, 451
Vessels. See also Blood vessels
segmental responses to peripheral nerve stimulation, 1
Viscoelasticity. See also Elasticity of arteries in vivo, 111
Volume. See Blood volume

W
Washout curves, mathematical analysis; estimation of coronary blood flow by
Xenon-133 and antipyrine-14C clearance, 259
Wave transmission. See Pressure waves

X
Xenon-133, estimation of coronary blood flow by
clearance of, 259
