SUBJECT INDEX

VOLUME XXIII JULY-DECEMBER, 1968

Acetylcholine
and autonomic innervation of the uterine artery, 279
response of atrial plateau fibers, 387

Acetylcholinesterase
and autonomic innervation of the uterine artery, 279
kidney nerve fibers containing, 645

Actinomycin D, effects on RNA synthesis and labeling, 137

Action potentials
atrial effects of diphenylhydantoin, 463
plateau fibers, 387
delayed conduction in the right bundle branch, 723
Purkinje and ventricular, potassium effects, 717
pulmonary, tetrodotoxin effects in sinus node, 501

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenergic nervous system, sympathetic innervation of the developing rabbit heart, 25

Adrenocortical eye and aortic lipids in, 633
uptake and metabolism of 14 C-labeled oleic acid in, 779

ATP. See Adenosine triphosphate

Atrioventricular node
conduction effects of beta-receptor blockade and glucagon, 585

Atrium
diphenylhydantoin effects on electrical properties of, 463
plateau fibers, 387
electrical excitability of cells, 69

Automaticity
diphenylhydantoin effects in atria, 463
ventricular, sympathetic control of, 249

Bachmann's bundle, effective refractory period, effects of diphenylhydantoin, 463

Baroreceptors
defense against arterial stretch receptors, 401
reflex dynamics and regulation of arterial blood pressure, 415

Beta-receptor blockade
effects on atrioventricular transmission system, 585
propagation in reflex control of coronary blood flow, 223

Beno, Rome A., Gold Heart Award, American Heart Assn., 812, 813

Block
in peripheral sympathetic fibers by tetrodotoxin, 553
right bundle-branch, delayed conduction, 723

Blood pressure regulation, 415

coronal flow during coronary insufficiency, 99
myocardial energy metabolism following occlusion, 429
vasoconstriction in canine sino-sinus reflex control of circulation, 233
femoral collateral vasodilatation following occlusion, 239
the hepatic arterial "spare," 611
pressure wave transmission in arterial degenerative disease, 587
pulmonary, vasodilatation due to distension of, 401
segmental responses to peripheral nerve stimulation, following femoral artery occlusion, 239
viscoelasticity in vivo, 111

Angiotensin cardiovascular reactivity, 709
pressor agent in human stable plasma protein solution, 397

Anoxia, myocardial; high-energy phosphates, dynamics, and electrocardiogram, 519

Antipyrine-125 I, estimation of coronary blood flow by washout, 259

Aorta
artificial pressure waves in, dispersion and attenuation, 539
atherosclerosis in, lipid changes in the eye, 633
compressibility of aortic wall, 61
velocity fields in, 789

Arterial wall
compressibility of, 61
viscoelasticity in vivo, 111

Arteries
arterial wall compressibility of, 61
viscoelasticity, 111
blood pressure regulation, 415

Circulation Research

VOLUME XXIII

JULY-DECEMBER, 1968
**Blood flow**
- Cerebral, local measurement by hydrogen clearance method.
- Estimation by washout of diffusible indicators.
- During food intake and digestion.
- Bacterial.

**Blood vessels**
- Collateral, vasodilatation following femoral artery occlusion.
- Elastic behavior of.
- Tetrodotoxin action.

**Blood pressure**
- Arterial, effects of head motion on regulation of.
- Pulsatile, through isolated lung.
- In blood vessels.

**Cardiovascular disease**
- See also Heart disease.

**Calcium**
- and thyroid hormone effects on frequency-force relation in atrial myocardium.
- Uptake in neuroendocrine, and endocrine systems.

**Cerebral circulation**
- Local blood flow measurement by hydrogen clearance method.

**Cerebral vasomotor center**
- Effects of tetrodotoxin.

**Chloroform**
- Effects on the calcium pump of the sarcoplasmic reticulum.

**Cholesterol**
- Estrogen, and lipid changes in eyes and aortas.
- Estrogen interaction with cholesterol.

**Cranial nerves**
- Occulomotor and trochlear nerves, distribution of unmyelinated fibers.

**Critical and Experimental Essay on the Circulation of the Blood**
- Especially as Observed in the Brain and Capillary Vessels of the Rat, by Claude Bernard.

**Circulation Research, Volume XXIII, December 1968**

-- Downloaded from http://circres.ahajournals.org/ by guest on October 17, 2017 --
Die Änderung der Herzschlagzahl durch Änderung des arteriellen Blutdruckes erfolgt und reflektorisch durch die Vagi, von H. E. Heising, 414.

Effect of muscular contraction upon the blood flow in the arterial muscle, The, by G. V. A. A. B. Blodock, and Amil Guasqza, 44.

Exercitatio anatomica de motu cordis et sanguinis in animilibus, Francfort, Cocheloni Fitzeri, 1729, by William Harvey, 149, 212.

Fibrillar contraction of the heart, by John A. McWilliam, 51.

Form and nature of the muscular connexions between the primary divisions of the terminal nerves, The, by Arthur Keith and Martin Fluck, 752.

Handbuch der Physiologie des Menschen für Vorlesungen, by F. Millot, 610.

On hemorrhoidal layers of licaea on the churning of the blood, by E. Gorter and F. Creel, 632.

On the innervation of the heart, with special reference to the heart of the toad, by W. H. Gaskell, 605.

On the local pathology of peripheral ganglia, and on the connexion of different classes of nerve fibres with them, by J. K. Langley and W. Lee Dickinson, 552.

On the local reactions of the arterial wall to changes of internal pressure, by W. M. Bayliss, 700.

Pharmacological action of an alkaloid obtained from Rauwolfia serpentina, Benth., The, by R. N. Chopra, J. C. Gupta, and B. Mukherjee, 652.

Potassium accumulation in muscle and associated changes, by P. J. Boyle and E. J. Conway, 623.

Right bundle-branch, 753.

Sodium and dietary cholesterol, 633.

Coronary artery left flow during coronary insufficiency, 99.

Coronary circulation blood flow estimation by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

cardiac sinus nerves control of, 223.

in left coronary artery during coronary insufficiency, 165.

Atrial flutter, effects on, 743.

vascular regulation and oxygen consumption, 33.

Coeulling, venous response to, 623, 701.

Corneal, and dietary cholesterol, 633.

Coronary artery left flow during coronary insufficiency, 99.

Coronary circulation blood flow estimation by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.

Coronary collateral circulation flow blood by washout of diffusible indicators, 203.

Corticosteroids, distribution of unfiltered blood flow to, 623.

Countercheck cardiac inotropic and coronary vascular responses to, 731.

Unidirectional rectangular, arrhythmias induced by, 343.

Corticosterone, effects on dynamics and electrolyte metabolism following, 149.

vasomotion in cardiac sinus nerves control of the coronary circulation, 223.
Diastole

- Cardiac muscle compliance, 291
- Depolarization, atrial plateau fibers, 387
- Variations of left ventricular end-diastolic pressure, volume, and ejection fraction, 213
- Diffusible indicators, xenon and antipyrine in estimation of coronary blood flow, 259
- Digestion, systemic and regional hemodynamic changes during, 687
- Dilatation. See Vasodilatation
- Diphenylhydantoin, effects on electrical properties of atria, 463
- Disappearance curves, for $^{133}$Xe and antipyrine-$^{125}$I, mathematical analysis, 259
- Dispersion, of small artificial pressure waves in the aorta, 539
- Distention, pulmonary arterial; pulmonary hemodynamics, 401
- DOCA. See Desoxycorticosterone acetate
- Dogs, epidemiologic and genetic studies of congenital heart disease in, 171
- Dye dilution. See Indicator dilution
- Editorial comment, on "Some Mechanical Properties of Isolated Mammalian Cardiac Muscle," 280
- Ejection fraction, variations in left ventricle with changes in outflow resistance, 213
- Elasticity
  - Compressibility of the arterial wall, 61
  - Large blood vessels in the aorta, 539
  - Viscoelasticity of arteries in vivo, 111
- Electrical stimulation
  - Excitability of atrioventricular nodal cells, 69
  - Paired stimulation of isolated mammalian cardiac muscle, 291
  - Of the sciatic nerve, segmental vascular responses, of the stellate ganglion
  - Effects on ventricular automaticity, 249
- Electrophysiology
  - Effects of high-energy phosphate depletion and repletion, 519
- Electromagnetic flowmeter, blood flow measurements, 11, 223
- Foam cells, intimal, and lipid synthesis in atherosclerotic lesions, 779
- Food, ingestion and digestion, hemodynamic changes during, 687
- Fractional extraction, and transcapillary exchange during tracer administration, 355
- Frequency-force relationship, of atrial myocardium, effect of thyroid hormone, 743
- Frequency-response curves, vasoparotropic vasoconstrictive responses to exercise, 45
- Frommeyer, Walter B., Jr., new American Heart Assn. president, 811
- Ganglia. See Stellate ganglion
- Ganglionic blockade, and norepinephrine storage capacity in hypertension, 479
- Genetics, studies of congenital heart disease in the dog, 171
- Glucose, submaxillary, granules containing renin and kallikrein isolated from, 507
- Glucagon, and reversal of cardiodepressant action of propranolol on atrioventricular transmission, 585
- Gold Heart Awards, American Heart Assn., 811, 813
- Graduate Training Grant Programs, National Heart Institute (Supplement I), 1-1-1-54
- Halothane, effects on the calcium pump of the sarcoplasmic reticulum, 597
- Head motion, and regulation of arterial blood pressure, 415
- Heart
  - Atrial fibrillation
  - Diphenylhydantoin effects, 463
  - Following ventricular defibrillation, 343
  - Conduction
    - Atrioventricular, 69, 387, 585
    - $\beta$-receptor blockade and glucagon effects on A-V transmission, 385
    - Delayed, in the right bundle branch, 753
  - Excitability of atrioventricular nodal cells, 469
  - Excitation-contraction coupling, anesthetics, and the calcium pump, 597
  - Exercise, effect on vasoconstrictive response to sympathetic stimulation, 45
  - Eye, lipid changes coincident with atherosclerosis in the aorta, 633
  - Fatigue, of atrioventricular transmission, 69
  - Fatty acid, incorporation into atherosclerotic lesions, 779
  - Femoral artery, occlusion, collateral vasodilatation following, 239
  - Fibrillation. See also Arrhythmias
  - Atrioventricular conduction, 69, 387, 585
  - $\beta$-receptor blockade and glucagon effects on A-V transmission, 585
  - Delayed, in the right bundle branch, 753
  - Excitability of A-V nodal cells, 69
  - Role of atrial plateau fibers, 387
  - Venous afferent effects, 553
  - Ventricular excitation spread, computer simulation, 203

INDEX

Hypotensive effect, of tetrodotoxin, 551

Hyponxia

Effects on local cerebral blood flow measurements by hydrogen clearance method, 313

Myocardial, and high-energy phosphates, 519

I

Idioventricular automaticity, effects of stellate ganglion stimulation, 249

Incompressibility, and compressibility of the arterial wall, 61

Indicator dilution

coronary blood flow estimation by washout of diffusible indicators, 259

fractional extraction and transcapillary exchange during tracer administration, 325

measurement of the hepatic arterial "space," 611

pulmonary blood flow and volume measurements, 401

Ingestion, of food, systemic and regional hemodynamic changes during, 697

Innervation

autonomic, of the uterine artery, 279

epicardial, patterns in the left ventricle of the dog, 465

sympathetic, of the fetal, neonatal, and adult rabbit heart, 25

Inotropic response, cardiac, to countershock, 731

International Society of Cardiology, statement on cardiac transplantation, 493

Intima, and dietary cholesterol, 633

Ischemia, myocardial, energy metabolism, 429

Isoproterenol

Fusible indicators, 259

K

Kallikrein, in granules isolated from salivary gland, 507

Kidney, See also Nephron, and nephron diseases

Kinin, regulation of release by vasopressin and vasodilators, 405

Labeling, of RNA, in experimental cardiac hypertrophy, 123, 157

Hypertrophy, cardiac

biochemical correlates of, 451

monooamine oxidase activity and, 361

RNA synthesis, 313, 337

Circulation Research, Volume XXII, December 1968

Hypertrophy, myocardial

high-energy phosphate effects, 519

computer reconstruction of QRS complex, 203

effects of high-energy phosphates, 519

failure

congenital, and myocardial stress, 87

high-energy phosphate effects, 419

Hypertrophy, renal

effect of renin depletion, 709

Hyperpolarization

experimental, DOCA and sodium, 361, 479

monooamine oxidase activity in hypertrophy resulting from chronic pulmonary, reversal by long-term O2 in chronic bronchitis, 147

renovascular, effect of adrenal steroid withdrawal, 803

sodium intake and norepinephrine storage during development of, 479

Hyperpolarization, metabolic

tissue

Hypertensive effect of tetrodotoxin, 551

Hyperpolarization, action potentials

Effects of intracardiac nerves, excitation in response to countershock, 731

Hypertrophy

cardiac

biochemical correlates of, 451

monooamine oxidase activity and, 361

RNA synthesis, 313, 337

Circulation Research, Volume XXII, December 1968

Heart transplantation; statement by Executive Committee, American Heart Association, 811
Lipids
changes in eyes and aortas with atherosclerosis, 633
uptake and metabolism of 14C-labeled oleic acid in atherosclerotic aorta, 779
Liver, the hepatic arterial "space," 411
Lungs. See also Pulmonary circulation
hypoxia effects on local cerebral blood flow, 313
and high-energy phosphates, 519
pulmonary blood pressure and flow through, 11

M
Medulla, adrenal, tetrodotoxin effects on nerves to, 553
Mitochondria
oxidative phosphorylation
myocardial stress and, 87
in normal and failing hearts, 439
Models
animal, for epidemiologic and genetic studies of congenital heart disease, 171
the hepatic vascular system, 611
of the ventricles; computer simulation of propagation process in excitation of ventricles, 203
Monoamine oxidase, increased activity during development of cardiac hypertrophy, 361
Monoexponential analysis, of washout curves, 259
Multiple exponential analysis, of washout curves, 259
Muscle, cardiac, mechanical properties, 291
Myocardium
calcium uptake in sarcoplasmic reticulum, and anesthetics, 597
catecholamine stores in the fetal, neonatal, and adult rabbit heart, 25
clearance of xenon and antipyrine, 259
corrugatory
in left ventricle after epicardial innervation, 185
development of cardiac hypertrophy, 361
distribution of fibers in epicardial plexus of the dog, 165
doa hypertension, 361
sodium intake and norepinephrine storage in hypertension, 479
vasoconstriction in exercise, 45
ventricular automaticity, 249
Node
atrioventricular conduction, 387, 583
electrical excitability of cells, 69
innervation autonomic, of the uterine artery, 279
and ventricular automaticity, 249
Norepinephrine
and autonomic innervation of the uterine artery, 279
and cardiovascular reactivity caused by renin depletion, 709
in the fetal, neonatal, and adult rabbit heart, 25
and monoamine oxidase activity in hypertrophy resulting from DOCA hypertension, 361
storage abnormal, in isoproterenol-treated rats, 771
and sodium intake during development of hypertension, 479
and temperature, 701
and thyroid hormone effects on frequency-force relation in atrial myocardium, 743

O
Occlusion
aortic, blood momentum and left ventricular ejection, 663
coronary
flow in left coronary artery after, 99
myocardial energy metabolism following, 429
femoral artery, collateral vasodilatation following, 239
Oleic acid, uptake and metabolism in atherosclerotic aorta, 779
Oxidative phosphorylation
in mitochondria of chronically stressed hearts, 11
and high-energy phosphates, 519

P
Pacemakers, activity of atrial plateau fibers, 387
Paired stimulation, changes in diastolic compliance after, 291
