Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

Volume XXIV

January-June

1969

No. 1 (January)

The Elastic Symmetry of Arterial Segments in Dogs. Dali J. Patel and Donald L. Fry .............................................................. 1

Biochemical Correlates of Cardiac Hypertrophy: II. Increased Rate of RNA Synthesis in Experimental Cardiac Hypertrophy in the Rat. Tadashi Koide and Murray Rabinowitz .............................................. 9

Development of the Action Potential of the Prenatal Rat Heart. James R. Couch, Theodore C. West, and Hebbel E. Hoff .................... 19

Cardiovascular Performance of Alaska Sled Dogs during Exercise. Robert L. Van Citters and Dean L. Franklin ............................. 33

Effects of Hypothermia and Pronethalol on Ionic Correlates of Ouabain Arrhythmias in Dogs. S. B. I. El-Fiky and B. G. Katzung .................. 43

Factors Contributing to the Reversible Pulmonary Hypertension of Patients with Acute Respiratory Failure Studied by Serial Observations during Recovery. A. S. Abraham, R. B. Cole, I. D. Green, R. B. Hedworth-Whitty, S. W. Clarke, and J. M. Bishop .................................................. 51

Fine Structural Localization of Acetylcholinesterase at a Cholinergic Vasodilator Nerve-Arterial Smooth Muscle Synapse. Christopher Bell 61

Distribution of Norepinephrine in the Failing Bovine Heart: Correlation of Chemical Analysis and Fluorescence Microscopy. John H. K. Vogel, David Jacobowitz, and Charles A. Chidsey .................................................. 71

Synthesis and Turnover of Norepinephrine in the Heart of the Spontaneously Hypertensive Rat. William J. Louis, Sydney Spector, Ryo Tabei, and Albert Sjoerdsma .................................................. 85

Certain Histological and Chemical Responses of the Vascular Interface to Acutely Induced Mechanical Stress in the Aorta of the Dog. Donald L. Fry .............................................................. 93

Reflex Regulation of Arterial Pressure during Sleep in Man: A Quantitative Method of Assessing Baroreflex Sensitivity. Harley S. Smyth, Peter Sleight, and George W. Pickering ............................................. 109

Incorporation of Oleic Acid into Lipid by Foam Cells in Human Atherosclerotic Lesions. Mark L. Wahlqvist, Allan J. Day, and Ronald K. Tume 123

Classic Pages ................................................................. 32, 92, 122

News from the American Heart Association .................................. 131

Author Index ............................................................................ 135
CONTENTS OF VOLUME XXIV

No. 2 (February)

**Force-Velocity-Length-Time Relations of the Contractile Elements in Heart Muscle of the Cat.** Dirk L. Brutsaert and Edmund H. Sonnenblick .................................................. 137

**Activation of Adenyl Cyclase by Glucagon in Cat and Human Heart.** Gerald S. Levey and Stephen E. Epstein ............................................. 151

**Effect of Replacement of Potassium by Rubidium on the Transmembrane Action Potential and Contractility of Human Papillary Muscle.** Kailash Prasad and John C. Callaghan ........................................... 157

**Effects of Glucagon on Atrioventricular Conduction and Ventricular Automaticity in Dogs.** Charles Steiner, Andrew L. Wit, and Anthony N. Damato ........................................ 167

**Effect of Prolonged Cold Storage on the Contractile Response of Strips of Rabbit Aorta to Various Agents.** Shoji Shibata ........................................ 179

**Conformational Changes in Myocardial Nuclei of Rats.** S. Bloom and P. A. Cancilla ........................................................................ 189

**Interstitial Pressure of the Lung.** Robert B. Mellins, O. Robert Levine, Richard Skalak, and Alfred P. Fishman ........................................ 197

**Hepatic Clearance of Renin in Canine Experimental Models for Low- and High-Output Heart Failure.** Edward G. Schneider, James O. Davis, Charles A. Robb, and John S. Baumber ........................................ 213

**Application of the Theory of Heat Exchangers to the Transfer of Inert Materials in Placentas.** J. Job Faber ................................................................. 221

**Refractory Period of the Dog's Ventricular Myocardium Following Sudden Changes in Frequency.** M. J. Janse, A. B. M. van der Steen, R. Th. van Dam, and D. Durrer ........................................ 251

**Inhibition of Binding of Tritiated Digoxin to Myocardium by Sodium Depletion in Dogs.** Carlos E. Harrison, Jr., and Khalil G. Wakim ........................................ 263

**Left Ventricular Filling and Diastolic Pressure-Volume Relations in the Conscious Dog.** Mark I. M. Noble, Eric N. C. Milne, R. Jon Goerke, Erik Carlsson, Raul J. Domenech, Kenneth B. Saunders, and Julien I. E. Hoffman ........................................ 269

**Effect of Changes in Heart Rate on Left Ventricular Performance in Conscious Dogs.** Mark I. M. Noble, Jane Wyler, Eric N. C. Milne, Diana Trenchard, and Abraham Guz ........................................ 285

**Classic Pages** .................................................................................. 150, 178, 188, 220, 284, 296

**News from the American Heart Association** ........................................ 297

**Author Index** .................................................................................. 301

No. 3 (March)

**Effect of Enhanced Contractility on the Left Ventricular Response to Vagus Nerve Stimulation in Dogs.** Matthew N. Levy and Harrison Zieske ........................................ 303

(Continued)
CONTENTS OF VOLUME XXIV

Bilateral Carotid Sinus Control of Ventricular Performance in the Dog. Paul J. Martin, Matthew N. Levy, and Harrison Zieske .............................................................. 321

Range of the Sympathetic Control of the Dog Femoral Artery. Mária Gerová and Ján Gero .............................................................. 349

Preservation of Ventricular Function by Adrenergic Influences during Metabolic Acidosis in the Cat. Jose M. Rocamora and S. Evans Downing .............................................................. 373

Mechanism of Hydrocortisone Potentiation of Responses to Epinephrine and Norepinephrine in Rabbit Aorta. Stanley Kalsner .............................................................. 383

Relative Roles of Sympathetic and Parasympathetic Nervous Systems in the Carotid Sinus Reflex in Dogs. Walter D. Berkowitz, Benjamin J. Scherlag, Emanuel Stein, and Anthony N. Damato .............................................................. 447

Anatomical and Ultrastructural Study of the Electrophysiological Atrioventricular Node of the Rabbit. Louis J. DeFelice and Cyril E. Challice .............................................................. 457

A Study on the Healing-over of Myocardial Cells of Toads. W. C. de Mello, O. E. Motta, and M. Chapeau .............................................................. 475

Books Received .............................................................. 487

Classic Pages .............................................................. 312, 338, 348, 360, 382, 396, 408, 446, 456

News from the American Heart Association .............................................................. 489

Author Index .............................................................. 492

No. 4 (April)

Factors Affecting Shunting in Experimental Atrial Septal Defects in Dogs. John E. Douglas, Judith C. Rembert, Will C. Sealy, and Joseph C. Greenfield, Jr. .............................................................. 493

Depressed Adenyl Cyclase Activity in the Failing Guinea Pig Heart. Burton E. Sobel, Philip D. Henry, Alice Robison, Colin Bloor, and John Ross, Jr. .............................................................. 507

(Circulation Research, Vol. XXIV, June 1969)
Reduced Cardiac Myosin Adenosinetriphosphatase Activity in Dogs with Spontaneously Occurring Heart Failure. Robert J. Luchi, Eve Marie Kritcher, and Per T. Thyrum .......................... 513

Effects of Altered Loading on Contractile Events in Isolated Cat Papillary Muscle. William W. Parmley, Dirk L. Brutsaert, and Edmund H. Sonnenblick .................. 521

Change of Cardiac Rhythm in the Rabbit after an Atrial Premature Beat. Felix I. M. Bonke, Lemart N. Bouman, and Henry E. van Rijn ....... 533

Catecholamine Synthesis in Rabbits with Neurogenic Hypertension. Vincent DeQuattro, Toshiharu Nagatsu, Robert Maronde, and Natalie Alexander ...................... 545

Effects of Changes in Carbon Dioxide Pressure and Arterial Pressure on Blood Flow in Ischemic Regions of the Brain in Dogs. Kyuya Kogure, Masatoshi Fujishima, Peritz Scheinberg, and Oscar M. Reinmuth .......... 557

Comparison of Calculations of Left Ventricular Wall Stress in Man from Thin-Walled and Thick-Walled Ellipsoidal Models. William P. Hood, Jr., Walter J. Thomson, Charles E. Rackley, and Ellis L. Rolett .......... 575

News from the American Heart Association .................................. 583

Author Index ........................................................................... 587

Classic Pages ................................................................. 506, 520, 556, 566, 574

No. 5 (May)

Calcium Exchange in a Single Layer of Rat Cardiac Cells Studied by Direct Counting of Cellular Activity of Labeled Calcium. G. A. Langer, E. Sato, and M. Seraydarian ..................... 589

Association between Autoregulation and Pressure Dependency of Renal Vascular Responsiveness in Dogs. John L. McNay and Taketoshi Kishimoto ...................................... 599

Cutaneous Venoconstrictor Response to Local Cooling in the Dog: Unexplained by Inhibition of Neuronal Re-uptake of Norepinephrine. Michael M. Webb-Peploe .................. 607

Effect of Exogenous Adenosine Triphosphate on the Metabolic State of the Excised Hypothermic Dog Heart. Margita Fedelesová, Attila Ziegelhofer, Ernst-Georg Krause, and Albert Wollenberger ............... 617

Evidence Suggesting a Multigenic Origin of Membranous Septal Defect in Rats. Marjorie Hopkins Fox ................................................. 629

Electrophysiological Actions of Lidocaine on Canine Ventricular Muscle and Purkinje Fibers. L. D. Davis and J. V. Tente ............ 639

Dynamic Characteristics of the Cardiovascular Autonomic Effects during Severe Arterial Hypoxia in the Unanesthetized Rabbit. Paul I. Korner and John B. Uther ........................................ 671

(Continued)
CONTENTS OF VOLUME XXIV

Dopamine-Induced Alterations in Coronary Hemodynamics in Dogs. Harold L. Brooks, Paul D. Stein, James L. Matson, and John W. Hyland 699

Canine Right and Left Ventricular Cell and Sarcomere Lengths after Banding the Pulmonary Artery. Michael M. Laks, Fred Morady, and H. J. C. Swan ................................................................. 705

Human Cardiovascular Adjustments to Rapid Changes in Skin Temperature during Exercise. Loring B. Rowell, John A. Murray, George L. Brenegelmann, and Kenneth K. Kraning, II 711

Increased Myocardial Oxygen Consumption and Contractile State Associated with Increased Heart Rate in Dogs. Robert C. Boerth, James W. Covell, Peter E. Pool, and John Ross, Jr. ........................................ 725

Study of Luminal Coronary Collateral Circulation in the Beating Canine Heart. Thomas W. Moir ................................................................. 735

Effects of Halothane on Single Atrial, Ventricular, and Purkinje Fibers. Otto Hauswirth ................................................................. 745

Classic Pages ................................................................. 598, 606, 616, 628, 638, 656, 668, 698

News from the American Heart Association ................................. 751

Author Index ......................................................................................... 756

No. 6 (June)

Central Nervous Integration of the Circulatory and Respiratory Responses to Arterial Hypoxemia in the Rabbit. Paul I. Korner, John B. Uther, and Saxon W. White ................................................................. 757

Endotoxin-Induced Regional Circulatory Changes in the Unanesthetized Monkey. Felix Wyler, Ralph P. Forsyth, Alan S. Nies, John M. Nuetze, and Kenneth L. Melmon ................................................................. 777

Mechanism of Vasopressin-Induced Bradycardia in Dogs. Sarla Varma, Bhuwaneshwar P. Jaju, and Krishna P. Bhargava ................................................................. 787

Effect of Cardiotonic Lactones on Calcium Metabolism of Dog Cardiac Microsomes. Mark L. Entman, Joseph W. Cook, Jr., and Rubin Bressler ................................................................. 793

Partition of Blood Flow to the Cutaneous and Muscular Beds of the Forearm at Rest and during Leg Exercise in Normal Subjects and in Patients with Heart Failure. Robert Zelis, Dean T. Mason, and Eugene Braunwald ................................................................. 799

Inadequacy of Perivascular Edema Hypothesis to Account for Distribution of Pulmonary Blood Flow in Lung Edema. Blair C. Ritchie, Gertraud Schauberger, and Norman C. Staub ................................................................. 807

Sodium Recovery from Normal and Edematous Lungs Studied by Indicator Dilution Curves. Morton Lee Pearce ................................................................. 815

Force-Velocity Relationship of Cat Cardiac Muscle, Studied by Isotonic and Quick-Release Techniques. Mark I. M. Noble, T. Earle Bowen, and Lloyd L. Hefner ................................................................. 821

A Qualitative Distinction between the Beta-Receptor-Blocking and Local Anesthetic Actions of Antiarrhythmic Agents. Elliot Sinebourne, Roger White, and John Hamer ................................................................. 835

Sympathetic Ganglionic Transmission and the Cardiovascular Changes of the Defense Reaction in the Cat. Arthur M. Brown ................................................................. 843

(Continued)
CONTENTS OF VOLUME XXIV

Changes in the Activities of Lysosomal Enzymes in Infarcted Canine Heart Muscle. Kurt G. Ravens and S. Gudbjarnason 851

Electrical Potential Distribution Surrounding the Atria during Depolarization and Repolarization in the Dog. Madison S. Spach, Terry D. King, Roger C. Barr, David E. Boaz, Mary N. Morrow, and Scott Herman-Giddens 857

Effect of Hematocrit Value upon Electromagnetic Flowmeter Sensitivity. Jennifer Dennis and D. G. Wyatt 875

Erythrocyte Velocity and a Velocity Pulse in Minute Blood Vessels on the Surface of the Mouse Brain. William I. Rosenblum 887

Biphasic Stimulation of Aldosterone Secretion during Hemorrhage in Dogs. Louis F. Fabre, Jr., Robert W. Farmer, H. Winston Davis, George McBee, and Gordon Farrell 893

Hemodynamic Characteristics of Chronic Experimental Neurogenic Hypertension in Unanesthetized Dogs. Carlos M. Ferrario, James W. McCubbin, and Irvine H. Page 911

Hemodynamic Patterns during Desynchronized Sleep in Intact Cats and in Cats with Sinoaortic Deafferentation. Takao Kumazawa, Giorgio Baccelli, Maurizio Guazzi, Giuseppe Mancia, and Alberto Zanchetti 923

Influence of Glucose on the Transmembrane Action Potential of Guinea-Pig Papillary Muscle: Metabolic Inhibitors Ouabain, and Calcium Chloride, and Their Interaction with Glucose, Sympathomimetic Amines, and Aminophylline. K. Prasad and Don P. MacLeod 939

Effect of Ouabain on the Energy Output of Rabbit Cardiac Muscle. C. L. Gibbs and W. R. Gibson 951

Classic Pages 834, 842, 850, 874, 910, 938
