Circulation Research
SUBJECT INDEX

VOLUME XXXI

A

Acetoacetate synthesis
cholesterol and cholesterol biosynthesis, 899
Acetylcholine
mitral complex, 417
Acidosis
chemoreflex and circulatory control, 431
Actinomycin D
ornithine decarboxylase in cardiac hypertrophy, 699
Action potentials
abnormal automaticity in Purkinje fibers, 158
catecholamine-induced calcium channels, 932
in chick atria, 379
electrophysiology of sinoatrial perinodal fibers, 490
excitation-contraction coupling of cardiac fibers with disrupted sarcolemmas, 203
mitral ultrastructure and physiology, 417
spread of excitation in AV node of isolated rabbit hearts, 602
Actomyosin
isometric tension and ATP hydrolysis, 740
Adenosine
dehaminase, 779
presence in human term placenta, 779
uptake by canine heart, 767
Adenosine triphosphatase (ATPase)
endocardial control of cardiac myosin ATPase in rats, 397
isometric tension and ATP hydrolysis, 740
phosphorylation of cardiac sarcoplasmic reticulum, 308
Adrenal cortex
plasma aldosterone in anephric man, 473
Adrenal glands
effects of 6-hydroxydopamine in dogs, 207
hormonal control of cardiac myosin ATPase in rats, 397
Adrenalectomy
effects of mineralocorticoids, sodium and, on urinary kallikrein, 857
regulation of blood pressure, 617
Adrenergic transmission
angiotensin II and, 348
effects of 6-hydroxydopamine in dogs, 207
radioimmunoassay and clearance of dopamine-β-hydroxylation, 444
Afferent activity
of canine aortic and sinus nerves, 557
central nervous system control of baroreceptor reflexes, 637
Aging
alteration of spontaneous hypertension in rats, 1
Aldosterone
adrenal responsiveness to sodium and angiotensin, 728
increased plasma aldosterone concentration in response to hemodialysis in nephrectomized man, 473
physiological variations measured by radioimmunoassay or double-isotope dilution, 387
Alpha receptors
renal blood flow during exercise, 881

Amino acids
isometric tension and myocardial protein synthesis, 317
Anastomoses
pial arterial microcirculation pressures during changes in systemic arterial blood pressure, 229
Anemia
blood flow distribution, 811
vicoty considerations in determination or regional circulatory adjustments, 811
Angina pectoris
spontaneous, 1066
Angiotensin
adrenal responsiveness to sodium and angiotensin, 728
and adrenergic transmission in guinea pigs, 348
bioassay of, renin in dog serum and tissues, 65
effect of sodium uptake on renal vascular responses to norepinephrine and, 750
effects of angiotensin II and some analogues on vascular permeability, 923
pharmacology of antagonists of angiotensin I and II, 672
plasma aldosterone in anephric man, 473
purification and properties of angiotensin-converting enzyme from hog lung, 356
sodium intake and vascular reactivity in rabbits, 758
Angiotensinase
renin in dog serum and tissues, 65
Animals
cats
applicability of Hill model to heart muscles, 590
cardiac fibers with disrupted sarcolemmas, 293
cardiac muscle models, 589
muscle length and force-velocity relationship of tetanized cardiac muscle, 195
pial arteries
effect of norepinephrine on diameter of pial arterioles and, 248
neurogenic control of, 257
potassium and pH as determinants of pial arterial diameter, 240
pressures, 229
chicks
catecholamine-induced calcium channels, 932
tetrodotoxin and embryonic development, 379
dogs
abnormal automaticity in Purkinje fibers, 158
adenosine uptake, 767
afferent activity of aortic and sinus nerves, 557
alterations in preload and myocardial mechanics in dog and man, 83
bradykinin, eledoisin and prostaglandins, 36
circulatory responses to graded stimulation of carotid chemoreceptors, 431
coronary circulation in conscious dog with cardiac neural ablation, 129
early renal hypertension, 653
effects of 6-hydroxydopamine, 207
effects of renal arterial infusion of sodium and potassium on renin secretion, 719
experimental acute renal failure induced by uranyl nitrate, 682
feedback mechanism responsible for fixed coupling in parasystole, 846
focal lesions in His bundle, 531
Frank-Starling mechanism in exercise, 868
hypokalemia and vascular resistance, 165
interatrial pathway in dogs, 18
intracardiac blood and VCG, 95
mechanism of renin release in dogs with thoracic caval constriction, 339
mitral complex, 417
neurogenic control of pial vessels, 257
partition of baroreceptor response, 831
potassium canrenoate to suppress ouabain-induced ventricular arrhythmias, 915
pulmonary red cell transit, 590
pulmonary vascular volume, 218
reflex coronary responses, 5
release of prostaglandine E-like substance by bradykinin, 36
renal blood flow during exercise, 881
renal changes after renal artery constriction, 530
renin in dog serum and tissues, 65
splanchnic blood volume, 105
sympathetic control of cerebral blood flow, 267
velocity development in aorta, 328
frogs
cardioc fibers with disrupted sarcotemas, 293
coldemia following microocclusion, 953
guinea pigs
angiotensin and adrenergic transmission, 348
restoration of atrial activity during hypothermia, 507
hamsters
effects of oxygen on vasculature, 481
hogs
angiotensin-converting enzyme from hog lung, 356
lams
development of baroreflex activity in fetal and neonatal lambs, 710
pigeons
regression of atherosclerotic lesions, 664
rabbits
angiotensin antagonists, 863
angiotensin II and vascular permeability, 923
AV nodal activation, 602
cardiac fibers with disrupted sarcotemas, 293
central nervous system control of baroreceptor reflexes, 837
cholesterol and cholesterol biosynthesis, 899
effect of potassium ion on calcium movements in rabbit aorta, 672
electrophysiological properties of sinoatrial periodical fibers, 490
isometric tension and ATP hydrolysis, 740
isometric tension and myocardial protein synthesis, 517
renin in rats with spontaneous hypertension, 876
training and detraining effects on tissue composition, 908
sheep
radioimmunoassay and clearance of circulating dopamine-β-hydroxylase, 444
snakes
angiotensin antagonists, 863
toads
healing over and muscle contraction, 389
turtles
substrate preference and metabolic activity of aerobic and hypoxic turtle heart, 453
Antibodies
aldosterone excretion measurements, 367
Antihypertensive drugs
alteration of course of hypertension in spontaneously hypertensive rats, 1
Aortas
constriction
ornithine decarboxylase in cardiac hypertrophy, 690
effect of potassium ion on calcium movements in rabbit aortic smooth muscle, 672
pigeons, regression of atherosclerotic lesions, 664
sodium intake and vascular reactivity in rabbits, 758
velocity development in ascending and descending, 528
Aortic nerves
afferent activity of sinus nerves and, 557
central nervous system control of baroreceptor reflexes, 637
Arterioles
substrate preference and metabolic activity of atherosclerotic aorta, 952
Arterial resistance
early experimental renal hypertension, 653
Arteriolar resistance
norepinephrine and pial arteries, 248
potassium and pH effects on pial arteries, 240
Arterioles
effect of oxygen on vasculature, 481
reactive hyperemia in capillaries and, of frog skeletal muscle following microocclusion, 952
Atherosclerosis
angiotensin II and vascular permeability, 923
effects of hypertension on lipid composition or rat aortic intima-media, 410

Circulation Research, Vol. XXXI, December 1972
effects of regression of lesions on cholesterol esterification, 664
venous endothelium in experimental A-V fistulas, 549

Atria
action potentials in chick atria; tetrodotoxin and embryonic development, 379
excitation-contraction coupling of cardiac fibers with disrupted sarcosomes, 293
inferior interatrial pathway in dogs, 18
restoration of electrical activity during hypothermia, 507

Atrial conduction
restoration of electrical activity during hypothermia, 507

Atrioventricular block
focal lesions in His bundle and effect on ventricular excitation, 531

Atrioventricular conduction
potassium canrenoate and ouabain arrhythmias, 915
simulated ventricular preexcitation, 174

Atrioventricular node
spread of excitation in isolated rabbit heart studied by microelectrode recording, 602

Atropine
reflex coronary responses, 8
restoration of atrial activity during hypothermia, 507

Automaticity
abnormal automaticity in Purkinje fibers subjected to low concentrations of calcium, 158

Autonomic nervous system
development of baroreflex activity in fetal and neonatal lambs, 710
regulation of blood pressure, 617
sympathetic control of cerebral blood flow in dogs, 267

Autonomic reflexes
central norepinephrine and baroreceptor reflexes, 789

Autoregulation
effect of oxygen on vasculature, 481
pial arterial microcirculation pressures during changes in systemic arterial blood pressure, 229
renal blood flow during exercise, 881

Azaguanine
ornithine decarboxylase in cardiac hypertrophy, 699

B

Bachmann's bundle
interatrial conduction pathway, 18

Bainbridge reflex
acute volume loading and heart rate, 284

Baroreceptor afferents
of canine aortic and sinus nerves, 557

Baroreceptor reflexes
central nervous system control of, 637
coronary responses, 8
development in fetal and neonatal lambs, 710
effects of potassium and sodium on renin secretion, 719
feedback mechanism responsible for fixed coupling in parasympathetic, 846
participation of central noradrenergic neurons in arterial, 789
partition of, in dogs between the mechanical properties of wall and receptor elements, 831

Circulation Research, Vol. XXXI, December 1972

Beta-receptor blockade
acute volume loading and heart rate, 284
coronary circulation and cardiac denervation, 129

Bicarbonate
norepinephrine and pial arteries, 248
potassium and pH effects on pial arteries, 240

Bigeminy
feedback mechanism responsible for fixed coupling in parasympathetic, 846
potassium canrenoate to suppress ouabain-induced ventricular arrhythmias, 915

Block
atrioventricular, focal lesions in His bundle, 531
sinoatrial, 490
restoration of atrial activity during hypothermia, 507

Blood
intracardiac blood and VCG, 95
splanchnic blood volume, 105

Blood flow
adjustments in anemia, 811
aortic, velocity development in aorta, 328
cerebral multibolus technique for measuring distribution over short intervals, 889
potassium and pH effects on pial arteries, 240
sympathetic control, 267
circumflex coronary circulation and cardiac denervation, 129
coronary adenosine uptake by canine heart, 767
leg sodium intake and vascular reactivity in rabbits, 758
microvascular responses to alterations in oxygen tension, 481
regulation reactive hyperemia following microocclusion, 953
renel bradykinin, edeoidin and prostaglandins, 36
changes after renal artery constriction, 529
effect of methylprednisolone on renal function, 44
effect of sodium uptake on renal vascular responses to angiotensin and norepinephrine, 750
effects of potassium and sodium on renin secretion, 719
experimental acute renal failure, 682
regulation during severe exercise in experimental heart failure, 881
vascular response to exercise in heart failure, 186
splanchnic blood volume, 105
See also Circulation

Blood gas tensions
chemoreflex and circulatory control, 431

Blood pressure
arterial
central norepinephrine and baroreceptor reflexes, 789
pial arterial microcirculation pressures, 229
renal blood flow during exercise, 881
chemoreflex and circulatory control, 431
control afferent activity of aortic and sinus nerves, 557
by sympathetic nerve fibers and adrenal medulla in normotensive and hypertensive rats, 617
development of baroreflex activity in fetal and neonatal lambs, 710
INDEX

C

Caffeine
catecholamine-induced calcium channels, 932

Calcium
abnormal automaticity in canine Purkinje fibers subjected to low concentrations of calcium, 158
atrial activity during hypothermia, 507
current channels induced by catecholamines in chick embryonic hearts, 889
effects of added or substituted potassium ion on calcium movements in rabbit aortic smooth muscle, 672
excitation-contraction coupling of cardiac fibers with disrupted sarcolemmas, 293
healing over and muscle contraction in toad hearts, 389
mature length and force-velocity relationship, 195
phosphorylation of cardiac sarcoplasmic reticulum, 308
tetrodotoxin and embryonic development in chick astra, 379

Capacitance elements
splanchnic blood volume, 105

Capillaries
angiotensin II and vascular permeability, 923
reactive hyperemia following microocclusion, 983

Carbohydrates
substrate preference of aerobic and hypoxic turtle heart, 453

Carbon dioxide
pial arterial pressures during changes in systemic arterial blood pressure, 229

Carboxyhemoglobin
angiotensin-converting enzyme, 356
Cardiac output
velocity development in aorta, 328
Cardiopulmonary receptors
renal nerve activity and vagal afferents, 824
Carotid chemoreceptors
circulatory responses to graded stimulation of, 431
Carotid sinus nerves
central nervous system control of baroreceptor reflexes, 657

Blood vessels
angiotensin II and vascular permeability, 923
microvascular responses to alterations in oxygen tension, 481
venous endothelium in fistulas, 546

Blood viscosity
circulatory responses to anemia, 811
renin in rats with spontaneous hypertension, 876

Blood vessels
angiotensin II and vascular permeability, 923
microvascular responses to alterations in oxygen tension, 481
venous endothelium in fistulas, 546

Blood volume
renal nerve activity and vagal afferents, 824

Books received, 966

Bothrops jararaca pentapeptide
angiotensin-converting enzyme, 356

Bradykinin
release of prostaglandin E-like substance from canine kidney by, 30

Brain
multibolus technique for measuring distribution of cerebral blood flow, 889

Caffeine
catecholamine-induced calcium channels, 932
muscle length and force-velocity relationship, 195

Calcium
abnormal automaticity in canine Purkinje fibers subjected to low concentrations of calcium, 158
atrial activity during hypothermia, 507
current channels induced by catecholamines in chick embryonic hearts, 889
effects of added or substituted potassium ion on calcium movements in rabbit aortic smooth muscle, 672
excitation-contraction coupling of cardiac fibers with disrupted sarcolemmas, 293
healing over and muscle contraction in toad hearts, 389
muscle length and force-velocity relationship, 195
phosphorylation of cardiac sarcoplasmic reticulum, 308
tetrodotoxin and embryonic development in chick astra, 379

Capacitance elements
splanchnic blood volume, 105

Capillaries
angiotensin II and vascular permeability, 923
reactive hyperemia following microocclusion, 983

Carbohydrates
substrate preference of aerobic and hypoxic turtle heart, 453

Carbon dioxide
pial arterial pressures during changes in systemic arterial blood pressure, 229

Carboxyhemoglobin
angiotensin-converting enzyme, 356
Cardiac output
velocity development in aorta, 328
Cardiopulmonary receptors
renal nerve activity and vagal afferents, 824
Carotid chemoreceptors
circulatory responses to graded stimulation of, 431
Carotid sinus nerves
central nervous system control of baroreceptor reflexes, 657

central norepinephrine and baroreceptor reflexes, 789
development of baroreflex activity in fetal and neonatal lambs, 710
partition of baroreceptor response in dogs between mechanical properties of wall and receptor elements, 831
reflex coronary responses, 8
Catecholamines
calcium current channels induced by, in chick embryonic hearts, 932
effect of sodium uptake on renal vascular responses to angiotensin and norepinephrine, 750
radioimmunoassay and clearance of dopamine-ß-hydroxylase, 444
regulation of blood pressure, 617
renal blood flow during exercise, 881
unresponsiveness of pial vessels to, 257

Cells
interstitial biochemical correlates of cardiac hypertrophy, 145
myocardial excitation-contraction coupling of isolated fibers with disrupted or closed sarcolemmas, 293

Central nervous system
control of baroreceptor reflexes in rabbits, 637
Cerebral arteriolar resistance
effect of norepinephrine on diameter of pial arterioles and arteries, 248
potassium and pH effects on pial arteries, 248
Cerebral blood flow
multibolus technique for measuring distribution over short intervals, 889
neurogenic control of pial vessels, 257
sympathetic control of, 267
Cerebral blood vessels
potassium and pH as determinants of pial arterial diameter, 240
Cerebrovascular resistance
pial arterial microcirculation pressures, during changes in systemic arterial blood pressure, 229

Cervical sympathetic chain
sympathetic control of cerebral blood flow, 267

Chemoreceptors
coronary vascular responses to stimulation of, 8

Chemoreflex
and circulatory control, 431
Chloride activation
angiotensin-converting enzyme, 356
Chloroformide
alteration of course of hypertension in rats, 1
Cholesterol
effects of regression of atherosclerotic lesions on, 694
feedback regulation of biosynthesis: studies with cholestyramine, 899
hypertension and aortic lipids, 410
training and detraining effects on tissue lipids, 908

Cholestyramine
feedback regulation of cholesterol biosynthesis, 899

Chordae tendineae
mitral complex, 417

Circulation
neurogenic control of pial vessels, 237
circulatory responses to graded stimulation of carotid chemoreceptors, 431

Circulation Research, Vol. XXXI, December 1972
INDEX

981

 coronary
 with cardiac denervation, 129
 in conscious dog with cardiac neural ablation, 129
 microcirculation
 pial arterial pressures, 229
 pulmonary red cell transit, 590
 significance of recent developments, 817
 pulmonary
 pulmonary vascular volume, 218
 response to anemia, 811
 splanchnic blood volume, 105
 See also Blood flow
 Cisterna magna
 sympathetic control of cerebral blood flow, 267
 Closed-loop analysis
 central nervous system control of baroreceptor reflexes, 637
 Collagen
 labeling of myosin, nuclear DNA and, during myocardial hypertrophy, 145
 Compensatory mechanisms
 cholestyramine and cholesterol biosynthesis, 899
 Computer analysis
 feedback mechanism responsible for fixed coupling in parasystole, 846
 Computer simulation
 of conduction delay in blocked Purkinje tissue, 53
 Concealed bigeminy
 feedback mechanism in parasystole, 846
 Conduction delay
 numerical simulation in blocked Purkinje tissue, 53
 Conduction disturbances
 focal lesion in His bundle, 531
 Conduction systems
 inferior interatrial pathway in dogs, 18
 Congestive heart failure
 renal blood flow during exercise, 881
 Contractility
 alterations in preload and myocardial mechanics in dog and man, 83, 807
 applicability of Hill model to heart muscle, 580
 cardiac muscle models, 569, 580
 healing over and muscle contraction in toad hearts, 380
 influence of methylxanthines on, 805
 isometric tension and ATP hydrolysis, 740
 phosphorylation of cardiac sarcoplasmic reticulum, 308
 potassium canrenoate and ouabain arrhythmias, 915
 Coronary vascular responses
 to stimulation of chemoreceptors and baroreceptors, 8
 Corticosterone
 adrenal responsiveness to sodium and angiotensin, 728
 Cortisol
 adrenal responsiveness to sodium and angiotensin, 728
 plasma aldosterone in anephric man, 473
 Coupling interval
 feedback mechanism responsible for fixed coupling in parasystole, 846
 See also Excitation-contraction coupling
 Cyanide
 reflex coronary responses, 8
 Cyclic AMP
 calcium current channels induced by catecholamines in chick embryonic hearts, 932
 phosphorylation of cardiac sarcoplasmic reticulum, 308
 Cycloheximide
 ornithine decarboxylase in cardiac hypertrophy, 699
 D
 Denervated heart
 coronary circulation in conscious dog with cardiac neural ablation, 129
 Denervation hypersensitivity
 renal blood flow during exercise, 881
 Deoxycorticosterone
 kallikrein and mineralocorticoids, 857
 Depolarization
 electrophysiological properties of rabbit sinoatrial perinodal fibers, 490
 Depressor nerves
 afferent activity of aortic and sinus nerves, 557
 Diazoxide
 early experimental renal hypertension, 653
 Dipeptidyl carboxypeptidase
 angiotensin-converting enzyme, 356
 Dipole moment
 intracardiac blood and VCG, 95
 DNA (deoxyribonucleic acid)
 labeling of collagen, myosin and nuclear DNA during myocardial hypertrophy, 145
 Dopamine-β-hydroxylase
 radiomunnoassay and clearance of circulating DBH, 444
 Double-injection technique
 pulmonary vascular volume, 218
 Double-isotope dilution
 aldosterone excretion measurements, 387
 E
 Ectopic beats
 feedback mechanism responsible for fixed coupling in parasystole, 846
 Elastic elements
 muscle length and force-velocity relationship, 195
 Electrical activity
 healing over and muscle contraction in toad hearts, 380
 restoration of guinea pig atria during hypothermia, 507
 Electrocardiography
 development of baroreflex activity in fetal and neonatal lambs, 710
 focal lesions in His bundle, 531
 intracardiac blood and VCG, 95
 simulated ventricular preexcitation, 174
 Electrograms, bipolar
 interatrial conduction pathway, 18
 Electromechanical properties
 mitral complex, 417
 Electroneurograms
 afferent activity of aortic and sinus nerves, 557
 Electronic circuits
 simulated ventricular preexcitation, 174
 Electrophysiology
 angiotensin and adrenergic transmission, 348
 mitral ultrastructure and physiology, 417
 sinoatrial perinodal fibers of rabbits, 490
 simulated ventricular preexcitation, 174
 Electroronus in heart
 simulation of conduction delay in blocked Purkinje tissue, 53
 Eledoisin
 bradykinin, prostaglandins and, 36

Circulation Research, Vol. XXXI, December 1972
Endothelium
angiotensin II and vascular permeability, 923
venous endothelium of experimental arteriovenous fistulas in rabbits, 546

Energy utilization
isometric tension and ATP hydrolysis, 740

Environmental factors
alteration of course of hypertension in rats, 1

Enzymes
adenosine in human placenta, 779
adenosine uptake by canine heart, 767
pharmacology of antagonists of angiotensin I and II, 869
purification and properties of angiotensin-converting enzyme from hog lung, 356

Epinephrine
catecholamine-induced calcium channels, 932
healing over and muscle contraction in toad hearts, 389

erthrocyte deformability
pulmonary red cell transit following injections of hypertonic fluids, 590

Excitation
alterations resulting from lesions in His bundle, 531
in AV node of isolated rabbit hearts studied by multiple microelectrode recording, 602
excitation-contraction coupling
catecholamine-induced calcium channels, 932
of isolated cardiac fibers with disrupted or closed sarcolemmas, 293
excitatory junction potentials
angiotensin and adrenergic transmission, 348

Excitement
angiotensin and adrenergic transmission, 348

Exercise
coronary circulation and cardiac denervation, 129

coronary circulation and cardiac denervation, 129
effects of training and detraining on tissue lipids, 908
regulation of renal circulation during severe exercise in normal dogs and dogs with experimental heart failure, 881
role of Frank-Starling mechanism, 868
role of potassium in active hyperemia, 165

Extrasyntetules
abnormal automaticity in Purkinje fibers, 158

Fascicular block
focal lesions in canine His bundle, 531

Fatty acids
regression of atherosclerotic lesions, 664
substrate preference and metabolic activity of aerobic and hypoxic turtle heart, 453

Fibers
alterations in preload and myocardial mechanics in dog and man, 83

Fibers, cardiac
excitation-contraction coupling with disrupted or closed sarcolemmas, 293
isometric tension and ATP hydrolysis, 740

Fistulas
venous endothelium of experimental A-V fistulas in rabbits, 546

Force-velocity relations
alterations in preload and myocardial mechanics, 83, 897
applicability of Hill model to heart muscle, 580
cardiac muscle models, 589
effect of muscle length of tetanized cardiac muscle on, 193
Frank-Starling mechanism
role in exercise, 868

G
glomerular filtration
effect of methylprednisolone on renal function in rats, 44

Glycogen
substrate preference of aerobic and hypoxic turtle heart, 453

Glucosamine
role of potassium in active hyperemia, 165

Guanethidine
early experimental renal hypertension, 653

H
Häuschen preparations
venous endothelium in fistulas, 546

Heart failure
renal blood flow during exercise, 891
vascular response to exercise in dogs, 186

See also Congestive heart failure

Heart rate
central norepinephrine and baroreceptor reflexes, 789
development of baroreflex activity in fetal and neonatal lambs, 710
effects of 6-hydroxydopamine in dogs, 207
fixed coupling in parasyxote, 840
vascular response to exercise in heart failure, 186
volume loading and, 284

Hemoconcentration
intracardiac blood and VCG, 95

Hemodialysis
effect of hypokalemia and hypomagnesemia produced by, on vascular resistance, 165
plasma aldosterone in anephric man, 473

Hemodilution
intracardiac blood and VCG, 95

Hemodynamic studies
changes after renal artery constriction, 520
eye renal hypertension in dogs, 653

Hemorrhages
release of blood from splanchnic circulation, 105
role of vagal afferents in control of renal sympathetic nerve activity in rabbits, 824

His bundle
focal lesions and ventricular excitation, 531

His bundle recordings
interaltrial conduction pathways, 18

Hormones
endogenous control of cardiac myosin ATPase in rats, 397

Hot-film probe
temperature development in aorta, 328

Hydralazine
alteration of course of hypertension in rats, 1

Hydrolysis
isometric tension and ATP hydrolysis, 740
3-Hydroxy-3-methylglutarate
cholesterol and cholesterol biosynthesis, 899

Hydroxyamphetamine
carotenoid and chronic cardiovascular effects in dogs, 207
central norepinephrine and baroreceptor reflexes, 789
regulation of blood pressure, 617

Hydroxyproline
biochemical correlates of cardiac hypertrophy, 145

Hypercapnia
chemoreflex and circulatory control, 431

Circulation Research, Vol. XXXI, December 1972

Downloaded from http://circres.ahajournals.org/ by guest on October 17, 2017
Hyperemia
in arterioles and capillaries of frog skeletal muscle following microocclusion, 953
role of potassium in, 165
Hypertension
alteration course of, in spontaneously hypertensive rat, 1
central noradrenergic and baroreceptor reflexes, 789
effects on lipid composition of rat aortic intimamedia, 410
intracranial, 267
regulation of blood pressure by sympathetic nerve fibers and adrenal medulla in normotensive and hypertensive rats, 617
renal
ingotensin II and adrenal corticosteroid relationships during sodium deprivation, 728
renin in rats with spontaneous hypertension, 876
sodium intake and vascular reactivity in rabbits, 758
Hypertrophy
biochemical correlates, 145
isometric tension and ATP hydrolysis in glycerinated fibers from normal and hypertrophied rabbit heart, 740
and myocardial protein synthesis and amino acid transport in isolated right ventricle, 317
Hypervolemia
hormonal control of cardiac myosin ATPase in rats, 397
Hypertonic fluids
impairment of red cell transit through canine lungs following injections of, 590
Hypertrophy
biochemical correlates, 145
isometric tension and ATP hydrolysis, 740
labeling of collagen, myosin and nuclear DNA in rats, 145
ornithine decarboxylase in, 699
protein synthesis in, 829
Hypervolemia
renal nerve activity and vagal afferents, 824
Hypcholesterolemic agents
cerverolemic agents, 899
Hypokalemia
effect of hypomagnesemia and, produced by hemodialysis on vascular resistance in canine muscle, 165
Hypomagnesemia
effect of hypomagnesemia and, produced by hemodialysis on vascular resistance in canine muscle, 165
Hypothermia
restoration of electrical activity of guinea pig atria during, 507
Hypothyroidism
hormonal control of cardiac myosin ATPase in rats, 397
Hypoxanthine
adenosine in human term placenta, 779
Hypoxia
chemoreflex and circulatory control, 431
substrate preference of aerobic and hypoxic turtle heart, 453

I
Indicator-dilution techniques
pulmonary red cell transit, 580
pulmonary vascular volume, 218
Inferior vena cava
venous endothelium in fistulas, 546
Inheritance factors
alteration of course of hypertension in rats, 1
Inosine
adenosine in human term placenta, 779

Circulation Research, Vol. XXXI, December 1972

Inotropic state
alterations in preload and myocardial mechanics in dog and man, 83
Interatrial pathway
in dogs, 18
Ions, perivascular
potassium and pH effects on pial arteries, 240
Isolated perfused heart
substrate preference of aerobic and hypoxic turtle heart, 453
Isometric tension
and ATP hydrolysis in glycerinated fibers from normal and hypertrophied rabbit heart, 740
and myocardial protein synthesis and amino acid transport in isolated right ventricle, 317
Isotopic switch
applicability of Hill model to heart muscle, 580
Isoproteinol
catecholamine-induced calcium channels, 932
neurogenic control of pial vessels, 257
Isotope clearance
multibolus technique for measuring distribution of cerebral blood flow, 899

J
Juxtaglomerular cells
effects of potassium and sodium on renin secretion, 719

K
Kallikrein
effects of mineralocorticoids, altered sodium intake and adrenalectomy on urinary kallikrein in rats, 857
Kent bundle excitation
simulated ventricular preexcitation, 174
Kidneys
bradykinin, eledoisin and prostaglandins, 36
experimental acute renal failure induced by uranyl nitrate, 882
infusion of homologous renin, 74
mechanism of renin lease in dogs with thoracic caval constriction, 339
nonfiltering model
effects of potassium and sodium on renin secretion, 719
plasma aldosterone in anephric man, 473
renal blood flow
vascular response to exercise in heart failure, 186
in dog serum and tissues, 65
renin
in rats with spontaneous hypertension, 876

L
Left ventricle
Frank-Starling mechanism in exercise, 868
Length-force relation
mitral ultrastructure and physiology, 417
Length-tension relationship
isometric tension and ATP hydrolysis, 740
muscle length and force-velocity relationship, 195
Ligament of Marshall
interatrial conduction pathway, 18
Lipids
effects of hypertension on lipid composition of rat aortic intimamedia, 410
INDEX

984

Lipids—Norepinephrine

training and detraining effects on tissue lipids, 908
Liver
cholestyramine and cholesterol biosynthesis, 899
Lungs
impairment of red cell transit through canine lungs following injections of hypertonic fluids, 590
purification and properties of angiotensin-converting enzyme from hog lung, 356

M

Macula densa
effects of potassium and sodium on renin secretion, 719
Manganese
catecholamine-induced calcium channels, 932
Mapping experiments
Mechanical properties
methylxanthines in cardiac contractility, 805
Mechanoreceptors
development of baroreflex activity in fetal and neonatal lambs, 710
Membrane potentials
atrial activity in hypothermia, 507
tetrodotoxin and embryonic development, chick atria, 379
Mesenteric artery
blood flow, vascular response to exercise in heart failure, 188
Methylprednisolone
effects on renal function in rats, 44
Methylxanthines
influence on contractility, 805
Mevalonate
cholestyramine and cholesterol biosynthesis, 899
Microapplication studies
effect of norepinephrine on diameter of pial arterioles and arteries in cats, 248
perivascular potassium and pH as determinants of pial arterial diameter in cats, 240
Microcirculation
microscopic studies, 817
pulmonary red cell transit, 590
recent developments, 817
Microelectrode recordings
AV nodal activation, 602
Microspheres
effect of methylprednisolone on renal function in rats, 44
experimental acute renal failure, 682
Microvasculature
responses to alterations in oxygen tension, 481
Mineralocorticoids
effects on urinary kallikrein in rats, 857
Mitrval complex
ultrastructure and electromechanical properties, 417
Models
Hill model of muscle, 569
reexamination of applicability to cat myocardium, 569
muscle length and force-velocity relationship, 195
quick-stretch and quick-release experiments, 569
skeletal
early experimental renal hypertension, 853
effects of training and detraining on tissue lipids, 908
hyperemia following microocclusion, 953
vascular smooth
effect of oxygen on vascularity, 481
effect of potassium ion on calcium movement in rabbit aorta, 672
norepinephrine and pial arteries, 248
potassium and pH as determinants of pial arterial diameter in cats, 240
sodium intake and vascular reactivity in rabbits, 758
Myocardium
adenosine uptake by canine heart, 767
alteration in preload and myocardial mechanics in dog and man, 83
excitation-concentration coupling of cardiac fibers with disrupted sarcolemmas, 293
healing over and muscle contraction in toad hearts, 589
mechanics
alterations in preload and, 83, 807
isometric tension and ATP hydrolysis, 740
nitric oxide and ATPase activity, 397
metabolism
substrates of aerobic and hypoxic turtle hearts, 453
oxygen consumption
coronary circulation and cardiac denervation, 129
substrate preference and metabolic activity of aerobic and hypoxic turtle heart, 453
Myosin
hormonal control of cardiac myosin ATPase in rats, 397
labeling of collagen, nuclear DNA and, during myocardial hypertrophy, 145
metabolism in cardiac hypertrophy, 629

N

Natireness
aldosterone excretion measurements, 367
Neural ablation
coronary circulation in conscious dog with cardiac neural ablation, 129
Neural vascular control
sympathetic control of cerebral blood flow, 267
Neurogenic control
pial precapillary vessels, 257
Neuromediator release
atrial activity during hypothermia, 507
Nicotinie
reflex coronary responses, 8
Nitrogen
training and detraining effects on tissue lipids, 908
Noradrenergic neurons
participation in arterial baroreceptor reflexes of rabbits, 789
Norepinephrine
effect of 6-hydroxydopamine in dogs, 207
effect of sodium uptake on renal vascular responses to angiotensin and, 750

Circulation Research, Vol. XXXI, December 1972
effect on diameter of pial arterioles and arteries in cats, 248
hypokalemia and vascular resistance, 165
neurogenic control of pial vessels, 257
participation of central noradrenergic neurons in arterial baroreceptor reflexes, 789
regulation of blood pressure, 617
restoration of atrial electrical activity during hypothermia, 507
sodium intake and vascular reactivity in rabbits, 738

O

Occlusion, arterial
splanchnic blood volume, 105
Oleic acid
regression of atherosclerotic lesions, 664
Ornithine decarboxylase
in cardiac hypertrophy in rats, 699
Osmolality
hypokalemia and vascular resistance, 165
Ouabain
potassium canrenoate to suppress ouabain-induced ventricular arrhythmias, 915
Output. See Cardiac output
Oxygen consumption
coronary circulation and cardiac denervation, 129
microvascular responses to alterations in oxygen tension, 481

P waves
interatrial conduction pathway, 18
Pacemakers
feedback mechanism responsible for fixed coupling in parasystole, 846
Pacing
interatrial conduction pathway, 18
PAH clearance
effect of methylprednisolone on renal function in rats, 44
Papaverine
renin release in dogs with thoracic caval constriction, 339
Papillary muscles
cardiac muscle models, 569
Hill model, 569
reexamination of applicability to cat myocardium, 580
isometric tension and myocardial protein synthesis, 317
mitral complex, 417
muscle length and force-velocity relationships, 195
Parasympathetic nervous system control of baroreceptor reflexes, 637
Potassium
catecholamine-induced calcium channels, 932
effects of added or substituted potassium ion on 4 calcium movements in rabbit aortic smooth muscle, 672
effects of renal arterial infusion of sodium and, on renin secretion, 719
and pH as determinants of pial arterial diameter in cats, 240
plasma aldosterone in anephric man, 473
role in active hyperemia, 165
Potassium canrenoate
to suppress ouabain-induced ventricular arrhythmias in dogs, 915
Practolol
reflex coronary responses, 8
Preexcitation
electrophysiological studies in dogs using electronically simulated A-V bypass pathway, 174
Preload
alterations in preload and myocardial mechanics in dog and man, 83, 807
Frank-Starling mechanism in exercise, 868
Premature stimulation
electrophysiology of perinodal fibers, 490

Circulation Research, Vol. XXXI, December 1972
Premature ventricular contraction
fixed coupling in parasystole, 846
Pressure measurements
alterations in preload and myocardial mechanics, 83, 807
arterial
pial arterial microcirculation, 229
vascular response to exercise in heart failure, 188
See also Blood pressure
Pressure-volume characteristics
pulmonary vascular volume, 218
Proline
labeling of collagen, myosin and nuclear DNA during myocardial hypertrophy, 145
Propranolol
early experimental renal hypertension, 653
restoration of atrial activity during hypothermia, 507
Prostaglandins
angiotensin II and vascular permeability, 923
catecholamine-induced calcium channels, 932
Protein kinase
phosphorylation of cardiac sarcoplasmic reticulum, 308
Proteins
isometric tension and myocardial protein synthesis and amino acid transport in isolated right ventricle, 317
synthesis in cardiac hypertrophy, 629
Proximal tubules
effect of methylprednisolone on renal function in rats, 44
Pulmonary vascular resistance
pulmonary red cell transit, 590
Pulmonary vascular volume
recruitment versus distensibility, 218
Pulsatile flow
velocity development in aorta, 328
Purkinje fibers
abnormal automaticity in canine Purkinje fibers focally subjected to low concentrations of calcium, 158
focal lesions in canine His bundle, 531
numerical stimulation of conduction delay in blocked Purkinje tissue, 53
R
Radioactive microspheres
experimental acute renal failure, 682
See also Microspheres
Radioimmunoassay
aldosterone excretion measurements, 367
and clearance of circulating dopamine-β-hydroxylase, 444
plasma aldosterone in anephric man, 473
Radioisotopes
collagen labeling and cardiac hypertrophy, 145
Rates of shear. See Shear rates
Red cells
impairment of transit through canine lungs following injections of hypertonic fluids, 590
reactive hyperemia following micro-occlusion, 933
Regressions, cardiac
ornithine decarboxylase in cardiac hypertrophy, 699
Renal arteries
constriction in conscious dogs
renal hemodynamics and plasma renin activity, 520
effects of infusion of sodium and potassium on renin secretion in dogs, 719
Renal blood flow
bradykinin, eledoisin and prostaglandins, 36
changes after renal artery constriction, 520
effect of methylprednisolone on renal function, 44
effect of sodium uptake on renal vascular responses to angiotensin and norepinephrine, 750
effects of potassium and sodium on renin secretion, 719
experimental acute renal failure, 682
regulation during severe exercise in experimental heart failure, 881
vascular response to exercise in heart failure, 186
Renal distension
renin release in dogs with thoracic caval constriction, 339
Renal failure
experimental acute, induced by uranyl nitrate in dogs, 682
Renal hypertension. See Hypertension, renal
Renal nerves
role of vagal afferents in control of renal sympathetic nerve activity in rabbits, 824
Renal vascular responses
effect of sodium uptake on, to angiotensin and norepinephrine, 750
renal blood flow during exercise, 881
Renin
adrenal responsiveness to sodium and angiotensin, 728
changes after renal artery constriction, 520
extraction and purification of dog renin, 65
infusion of homologous renin in dogs, 74
evaluation in Coldblatt units, 74
plasma aldosterone in anephric man, 473
in rats with spontaneous hypertension, 876
secretion
effects of renal arterial infusion of sodium and potassium, 719
substrate, 65
Renin-angiotensin system
renin release in dogs with thoracic caval constriction, 339
Renin release
effects of potassium and sodium on renin secretion, 719
mechanisms regulating, in dogs with thoracic caval constriction, 339
Repolarization
abnormal automaticity in Purkinje fibers, 158
Reserpine
alteration of course of hypertension in rats, 1
Rheology
pulmonary red cell transit, 590
Rhythms
interatrial pathway in dogs, 18
Ryanodine
catecholamine-induced calcium channels, 932
S
Sarcolemmas
excitation-contraction coupling of fibers with disrupted or closed sarcolemmas, 293
Sarcoplasmic reticulum
excitation-contraction coupling of cardiac fibers with disrupted sarcolemmas, 293
incorporation of terminal phosphate of ATP into membranal protein of rabbit cardiac sarcoplasmic reticulum, 308
Serum
renin in dog serum and tissues, 65
Shear rates
velocity development in aorta, 328

Circulation Research, Vol. XXXI, December 1972
INDEX

Sinoatrial entrance block
electrophysiology of sinoatrial perinodal fibers, 490

Sinoatrial node
feedback mechanism responsible for fixed coupling
in parasystole, 846

Sinoatrial perinodal fibers
electrophysiological properties, 490

Sinus nerves
afferent activity of aortic and sinus nerves, 557

Skin
eye experimental renal hypertension, 653

Sodium
adrenal responsiveness to sodium and angiotensin, 728
aldosterone excretion and, 307
catecholamine-induced calcium channels, 932
effect of renal vascular responses to angiotensin and
norepinephrine, 750
effects of mineralocorticoids, altered sodium intake,
and adrenalectomy on urinary kallikrein, 857
effects of renal arterial infusion of potassium and,
on renin secretion, 719
intake and vascular smooth muscle responsiveness
to norepinephrine and angiotensin in rabbits, 758
plasma aldosterone in anephric man, 473
tetrodotoxin and embryonic development in chick
atria, 379

Sodium-potassium pump
atrial activity during hypothermia, 507

Sodium reabsorption
effect of methylprednisolone on renal function, 44

Sphincters, precapillary
effect of oxygen on vasculature, 481

Spinal fluid pressure measurements
sympathetic control of cerebral blood flow, 267

Splanchnic circulation
release of blood from, in dogs, 105

Stellate ganglion
effects of 6-hydroxydopamine in dogs, 207
sympathetic control of cerebral blood flow, 267

Steroids
aldosterone excretion measurements, 387

Stimulus-response analysis
afferent activity of aortic and sinus nerves, 557

Stimulus-response curves
central nervous system control of baroreceptor
exreflexes, 637

Strain-energy density
partition of carotid sinus baroreceptor response
between mechanical properties of wall and
receptor elements, 831

Stroke volume
Frank-Starling mechanism in exercise, 868

Strontium
healing over and muscle contraction in toad hearts,
389

Strophanthidio
restoration of atrial activity during hypothermia, 507

Substrate preference
and metabolic activity of aerobic and hypoxic turtle
heart, 453

Sympathetic nerve stimulation
splanchnic blood volume, 105
unresponsiveness of pial vessels, 257

Sympathetic nervous system
central norepinephrine and baroreceptor reflexes,
799
Frank-Starling mechanism in exercise, 868
interatrial conduction pathway, 18

Vagal afferents
in control of renal sympathetic nerve activity in
rabbits, 824

Vagal cholinergic innervation
evidence for reflex activation of, 8

Tachycardia
potassium canrenoate and ouabain arrhythmias, 915

Tachyphylaxis
sodium intake and vascular reactivity in rabbits, 758

Telemetry
renal blood flow during exercise, 881
vascular response to exercise in heart failure, 186

Temperature
healing over and muscle contraction in toad hearts,
389

Tetrodotoxin
catecholamine-induced calcium channels, 932
and embryonic development, 379

Thoracic constriction
effects of potassium and sodium on renin secretion,
719
mechanism of renin release in dogs with, 339

Thorax resistance
intracardiac blood and VCG, 95

Thymidine
biochemical correlates of cardiac hypertrophy, 145

Thyroid hormone
myosin ATPase in rats, 397

Tissues
renin in dog serum and tissues, 65
training and detraining effects on tissue lipids,
908

Transmembrane potential
AV nodal activation, 602
electrophysiology of sinoatrial perinodal fibers, 490

Triglycerides
angiotensin II and vascular permeability, 923
effects of regression of atherosclerotic lesions on
cholesterol esterification, 664
hypertension and aortic lipids, 410
substrate preference of aerobic and hypoxic turtle
heart, 453
training and detraining effects on tissue lipids,
908

Tyramine
effects of 6-hydroxydopamine in dogs, 207

U

Ultrasound
mitral complex, 417

Uranyl nitrate
experimental acute renal failure induced by, 682

Urinary excretion
kallikrein and mineralocorticoids, 857

V

Vagal afferents
in control of renal sympathetic nerve activity in
rabbits, 824

Vagal cholinergic innervation
evidence for reflex activation of, 8
Vagal efferents
central nervous system control of baroreceptor reflexes, 637
Vagus nerve
development of baroreflex activity in fetal and neonatal lambs, 710
Vas deferens
angiotensin and adrenergic transmission, 348
Vasomotor regulation
angiotensin and adrenergic transmission, 348
effect of oxygen on vasculature, 481
Vasodilation
bradykinin, eledoisin and prostaglandins, 36
coronary vascular responses to stimulation of chemoreceptors and baroreceptors, 8
Vasodilator action of acebutolol, 452
Vascular reactivity
sodium intake and vascular smooth muscle responsiveness to norepinephrine and angiotensin in rabbits, 758
Vascular smooth muscle. See Muscles, vascular smooth
Vasculature
effect of oxygen on, 481
microvascular responses to alterations in oxygen tension, 481
Vasoconstriction
angiotensin and adrenergic transmission, 348
sympathetic control of cerebral blood flow in dogs, 267
Ventricles
effect of focal lesions in canine bundle of His on ventricular excitation, 531
excitation-contraction coupling of cardiac fibers with disrupted sarcolemmas, 293
filling pressure
acute volume loading and heart rate, 284
Ventricular function
alterations in preload and myocardial mechanics in dog and in man, 93, 807
Ventricular fusion beat
simulated ventricular preexcitation, 174
Volume loading
heart rate and, 284
Volume studies
acute volume loading and heart rate, 284
Frank-Starling mechanism in exercise, 888
pulmonary vascular volume, 218
splanchnic blood volume, 105

W
Wolff-Parkinson-White syndrome
simulated ventricular preexcitation, 174
Work, cardiac
isometric tension and myocardial protein synthesis, 317

X
Xenon
changes after renal artery constriction, 520
effect of sodium uptake on renal vascular responses to angiotensin and norepinephrine, 750
experimental acute renal failure, 682
multibolus technique for measuring distribution of cerebral blood flow, 889
