Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION
VOLUME XXXII
January-June
1973

No. 1 (January)

Brief Reviews: Mechanisms of Action of Antiarrhythmic Drugs. Michael R. Rosen and Brian F. Hoffman ................................................................. 1

Reflex Increases in Heart Rate Elicited by Stimulation of Afferent Cardiac Sympathetic Nerve Fibers in the Cat. Alberto Malliani, Margaret Parks, Robert P. Tuckett, and Arthur M. Brown ............... 9

Chronic Partial Occlusion of the Pulmonary Artery in Cats: Change in Ventricular Action Potential Configuration during Early Hypertrophy. Arthur L. Bassett and Henry Gelband ........................................ 15

Aortic Valve Leaflet Motion during Systole: Numerical-Graphical Determination. W. Milton Swanson and Richard E. Clark ........................................ 42

Biphasic Vasoconstriction of the Rabbit Ear Artery. Odd S. Steinsland, Robert F. Furchgott, and Sadashiv M. Kirpekar ........................................ 49

Photoelastic Stress Analysis of Silastic Poppets in Prosthetic Heart Valves. Harvey Greenfield, Thomas Hampton, Harold Gascoigne, and Willem Kolff ........................................ 59

Letters to the Editor ........................................ 117

Instructions to Authors ........................................ 120

News from the American Heart Association ........................................ 124

No. 2 (February)

Brief Reviews: Blood-Borne Humoral Factors in the Pathophysiology of Circulatory Shock. Allan M. Lefer ........................................ 129

Normal Myocardial Function and Energetics in Volume-Overload Hypertrophy in the Cat. George Cooper, IV, Francisco J. Puga, Karen J. Zuijk, Carlos E. Harrison, and Henry Neal Coleman, III ........................................ 140

(Continued)

Diffusion Bypass of Xenon in Brain Circulation. Poul Brodersen, Per Sejrsen, and Niels A. Lassen ..................................................... 363

Changes in Microvascular Diameter and Oxygen Tension Induced by Carbon Dioxide. Brian R. Duling .............................................. 370

Relationship of Stimulation Frequency to Automaticity in the Canine Purkinje Fiber during Ouabain Administration. Perry M. Hogan, Stephen M. Wittenberg, and Francis J. Klocke ............................................. 377

Effect of Calcium on Force-Velocity-Length Relations of Heart Muscle of the Cat. Dirk L. Brutsaert, Victor A. Claes, and Mark A. Goethals ......................................................... 385

Selective In Situ Parasympathetic Control of the Canine Sinoatrial and Atrioventricular Nodes. Ralph Lazzara, Benjamin J. Scherlag, Morton J. Robinson, and Philip Samet .............................................. 393

Letters to the Editor ................................................................. 402

News from the American Heart Association .................................. 403

Brief Reviews: Cyclic Adenosine Monophosphate and Cardiac Contractility. Burton E. Sobel and Steven E. Mayer ........................................ 407

Substrate Requirements for Angiotensin I Conversion In Vivo and In Vitro. Suzanne Oparil, Terry Koerner, Geoffrey W. Tregear, Benjamin A. Barnes, and Edgar Haber ........................................... 415

Impaired Atrial Receptor Responses in Dogs with Heart Failure Due to Tricuspid Insufficiency and Pulmonary Artery Stenosis. Takako T. Greenberg, William H. Richmond, Reginald A. Stocking, Purshotim D. Gupta, John P. Meehan, and James P. Henry ............................................ 424

Arterial Baroreceptor Fibers from the Aortic Region of the Dog in the Cervical Vagus Nerve. Cyril S. Ito and Allen M. Scher ......................................................... 442

Action of Manganese Ions and Tetrodotoxin on Atrioventricular Nodal Transmembrane Potentials in Isolated Rabbit Hearts. Douglas P. Zipes and Carlos Mendez ........................................... 447

Sinus Node Reentry: An In Vivo Demonstration in the Dog. Karlen L. Paulay, P. Jacob Varghese, and Anthony N. Damato ............................................. 455

Biochemical Alterations Caused by Hypoxia in the Isolated Rabbit Aorta: Correlation with Changes in Arterial Contractility. Donald H. Namm and Joan L. Zucker ......................................................... 464

(Continued)
Effects of Atrial Premature Systoles on Sinus Rhythm in the Rabbit. Herman O. Klein, Donald H. Singer, and Brian F. Hoffman 480

Myocardial Performance in Hemorrhagic Shock in the Dog and Primate. Francis L. Abel and David P. Kessler 492

Reversal of Ouabain-Induced Electrophysiological Effects by Potassium Canrenoate in Canine Purkinje Fibers. Billy K. Yeh and Ralph Lazzara 501

Functional Transverse Interconnections within the His Bundle and the Bundle Branches. Ralph Lazzara, Billy K. Yeh, and Philip Samet 509

Influence of Flow and Pressure on Wave Propagation in the Canine Aorta. Michael B. Histand and Max Anliker 524

Effect of Acute Isovolemic Anemia on Cardiac Output and Estimated Hepatic Blood Flow in the Conscious Dog. Gaston Chamorro, Jose A. Rodriguez, Barry Dzindzio, and Elliot Rapaport 530

Letters to the Editor 536

News from the American Heart Association 538

(No. 5 (May)

Brief Reviews: Mesenchymal Response of the Blood Vessel Wall: A Potential Avenue for Understanding and Treating Atherosclerosis. Harvey Wolinsky 543

Angiotensin as a Possible Intrarenal Hormone in Isolated Dog Kidneys. Harold D. Itskovitz, Lee A. Hebert, and John C. McGiff 550

Evidence for Uneven Alpha-Receptor Distribution in the Rat Portal Vein. Bengt Ljung, John A. Bevan, and Che Su 556

Role of the Baroreceptor Reflex in Daily Control of Arterial Blood Pressure and Other Variables in Dogs. Allen W. Cowley, Jr., Jean Francois Liard, and Arthur C. Guyton 564

Distribution of Stresses and of Strain-Energy Density through the Wall Thickness in a Canine Aortic Segment. Ramesh N. Vaishnav, John T. Young, and Dali J. Patel 577

Acute Fulminating Neurogenic Hypertension Produced by Brainstem Lesions in the Rat. Nobutaka Doba and Donald J. Reis 584

Human Serum Dopamine-β-Hydroxylase: Relationship to Hypertension and Sympathetic Activity. David Horwitz, R. Wayne Alexander, Walter Lovenberg, and Harry R. Keiser 594

Conduction Block Associated with Transient Depolarizations Induced by Acetylstrophanthidin in Isolated Canine Purkinje Fibers. James H. Saunders, Gregory R. Ferrier, and Gordon K. Moe 610

Transient Depolarizations Induced by Acetylstrophanthidin in Specialized Tissue of Dog Atrium and Ventricle. Keitaro Hashimoto and Gordon K. Moe 618

Depressed Transmembrane Potentials during Experimentally Induced Ventricular Failure in Cats. Henry Gelband and Arthur L. Bassett 625

(Continued)

Transcapillary Escape Rate of Albumin and Plasma Volume in Essential Hypertension. Hans-Henrik Parving and Finn Gyntelberg 643

Reflex Tachycardia Due to Temporary Coronary Occlusion in the Conscious Dog. D. Fred Peterson, Robert L. Kaspar, and Vernon S. Bishop 652

News from the American Heart Association 660

(No. 6 (June)

Brief Reviews: Vascular Smooth Muscle Updated. David F. Bohr 665

Total Systemic Autoregulation in the Dog and Its Inhibition by Baroreceptor Reflexes. A. James Liedtke, Charles W. Urschel, and Edward S. Kirk 673

Postnatal Changes in Rat Ventricular Function. Sidney F. Hopkins, Jr., Ernest P. McCutcheon, and David R. Wekstein 685

Comparison of the Effects of Anoxia and Whole Heart Ischemia on Carbohydrate Utilization in Isolated Working Rat Hearts. Michael J. Rovetto, Jeffrey T. Whitmer, and James R. Neely 699

Relationship between Epicardial S-T Segment Changes and Myocardial Metabolism during Acute Coronary Insufficiency. Jan Karlsson, Gordon H. Templeton, and James T. Willerson 725

Variations in Adrenergic Innervation and Contractile Responses of the Rabbit Saphenous Artery. John A. Bevan and Ralph E. Purdy 746
