Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION
VOLUME 35
July-December 1974
No. 1 (July)

Brief Reviews: Some Recent Advances in the Study of Hemostasis. Oscar D. Ratnoff
1

Cardiac Myosin Adenosinetriphosphatase of Rat and Mouse: Distinctive Enzymatic
Properties Compared with Rabbit and Dog Cardiac Myosin. Yoshiro Yazaki and
Maurice S. Raben ............................. 15

Effects of Obstruction of the Mitral Orifice or Distention of the Pulmonary
James M. Mason and John R. Ledsome ........................................... 24

Effect of Prolonged Alcohol Administration on Calcium Transport in Heart Muscle
of the Dog. Richard J. Bing, Harold Tillmanns, Jean-Marie Fauvel, Keith Seeler,
and James C. Mao ........................ 33

Importance of Atrial Compliance in Cardiac Performance. Hiroyuki Suga .......... 39

Protective Action of Methylprednisolone on the Myocardium during Experimental
Myocardial Ischemia in the Cat. James A. Spath, Jr., David L. Lane, and Allan M.
Lefer .................................................. 44

Kinetics of the Inhibitory Effect of Pepstatin on the Reaction of Hog Renin with
Rat Plasma Substrate. Helmut Orth, Eberhard Hackenthal, Jeffrey Lazar, Ulrike
Miksche, and Franz Gross .............................. 52

Characteristics of Aortic Diastolic Pressure Decay with Application to the
Continuous Monitoring of Changes in Peripheral Vascular Resistance. Maurice J.
Bourgeois, Barry K. Gilbert, David E. Donald, and Earl H. Wood ................... 56

Copper Content and Exchange in Mammalian Hearts. Ernest Page, Judy Starley,
Lawrence P. McCallister, and Chantal Boyd ............................. 67

Effect of Ischemia on Capillary Pressure and Equivalent Pore Radius in Capillaries of
the Isolated Dog Hind Limb. John N. Diana and M. Harold Laughlin ............. 77

Studies on the Cardiomegaly of the Spontaneously Hypertensive Rat. Barbara B.
Farmer, Robert A. Harris, Walter W. Jolly, and William J. Vail .................. 102

Changes in Coronary Venous Inosine Concentration and Myocardial Wall Thickening
during Regional Ischemia in the Pig. Jan Willem de Jong and Sidney Goldstein . . 111

Instantaneous Pressure-Volume Relationships and Their Ratio in the Excised,
Supported Canine Left Ventricle. Hiroyuki Suga and Kichi Sagaawa ................ 117

Regression of Left Ventricular Dilation and Hypertrophy after Removal of Volume
Overload: Morphological and Ultrastructural Study. John M. Papadimitriou, Barry
E. Hopkins, and Roger R. Taylor ..................................................... 127

Lipoprotein Uptake and Metabolism by Rat Aortic Smooth Muscle Cells in Tissue
Culture. Edwin L. Bierman, Olga Stein, and Yechezkiel Stein .................... 136

Instructions to Authors ......................................................... 151

News from the American Heart Association ................................... 155

No. 2 (August)

Brief Reviews: A Systems Analysis Approach to Understanding Long-Range Arterial
Blood Pressure Control and Hypertension. Arthur C. Guyton, Thomas G.
Coleman, Allen W. Cowley, Jr., R. Davis Manning, Jr., Roger A. Norman, Jr., and
John D. Ferguson ........................................... 159

Influence of Muscle Afferents on Cutaneous and Muscle Vessels in the Dog. Denis L.
Clement and John T. Shepherd ..................................................... 177

A Model of Cardiac Muscle Dynamics. Edward S. Grood, Robert E. Mates, and
Herman Falsetti .................................. 184

Right Lymphatic Duct Distribution Volume in Dogs: Relationship to Pulmonary
Interstitial Volume. Edward C. Meyer and Rosemarie Ottaviano ................. 197
CONTENTS OF VOLUME 35

Relationship of the Functional Refractory Period to Conduction in the Atrioventricular Node. Gregory R. Ferrier and Peter E. Dresel ........................................... 204

Altered Myocardial Function and Metabolism in Chronic Diabetes Mellitus without Ischemia in Dogs. Timothy J. Regan, Philip O. Ettinger, Mohammad I. Khan, Mohan U. Jesrani, Michael M. Lyons, Henry A. Oldewurtel, and Marilyn Weber .... 222

Coronary and Hemodynamic Effects of Temporary Acute Aortic Insufficiency in Intact Anesthetized Dogs. John D. Folts and George G. Rowe ...................... 238

Effect of Digitalis on Carotid Sinus Baroreceptor Activity. John A. Quest and Richard A. Gillis .......................................................... 247

Hypoxic Pulmonary Vasoconstriction: The Necessary Role of Angiotensin II. Steven Berkov .......................................................... 256

Release of Adenosine from Ischemic Brain: Effect on Cerebral Vascular Resistance and Incorporation into Cerebral Adenine Nucleotides. Robert M. Berne, Rafael Rubio, and Richard R. Curnish ....................... 262

Autonomic Nervous System and Benign Essential Hypertension: I. Usual Blood Pressure, Catecholamines, Renin, and Their Interrelationships. Jean-Louis Cuche, Otto Kuchel, Andre Barbeau, Yves Langlois, Roger Boucher, and Jacques Genest .... 281

Autonomic Nervous System and Benign Essential Hypertension: II. Circulatory and Hormonal Responses to Upright Posture. Jean-Louis Cuche, Otto Kuchel, Andre Barbeau, Yves Langlois, Roger Boucher, and Jacques Genest ........... 290

Adenosine 3',5'-Monophosphate—Dependent Membrane Phosphorylation: A Possible Mechanism for the Control of Microsomal Calcium Transport in Heart Muscle. Paul J. LaRaia and Eugene Morkin ..................... 298

Cyclic Adenosine Monophosphate Modulation of Slow Calcium Influx Channels in Guinea Pig Hearts. August M. Watanabe and Henry R. Besch, Jr. ............... 316

Comparison of Angiotensin II Antagonist and Antiserum Infusion with Nephrectomy in the Rat with Two-Kidney Goldblatt Hypertension. Herbert Thurston and John D. Swales .................. 325

News from the American Heart Association ........................................ 330

Supplement with this issue: Cardiac Hypertrophy and Cardiomyopathy

No. 3 (September)

Brief Reviews: The Natural History of Coronary Collateral Development. Donald E. Gregg .......................................................... 335

Onset of Mechanical Activation of Mammalian Heart Muscle in Calcium- and Strontium-Containing Solutions. Dirk L. Bruusaaert and Victor A. Claes .... 345

Evidence of the Limitations of Water as a Freely Diffusible Tracer in Brain of the Rhesus Monkey. John O. Eichling, Marcus E. Raichle, Robert L. Grubb, Jr., and Michel M. Ter-Pogossian ............................ 358

Characterization and Localization of Ventricular Arrhythmias Resulting from Myocardial Ischemia and Infarction. Benjamin J. Scherlag, Nabil El-Sherif, Ronald Hope, and Ralph Lazzara ............ 372
Role of Potassium Ions in the Vascular Response to a Brief Tetanus. David E. Mohrman and Harvey V. Sparks .......................... 384

Early and Late Effects of Coronary Artery Occlusion on Canine Purkinje Fibers. Ralph Lazzara, Nabil El-Sherif, and Benjamin J. Scherlag ......................... 391

Impaired Autoregulation of Blood Flow and Glomerular Filtration Rate in the Isolated Dog Kidney Depleted of Renin. George J. Kaloyanides, Robert D. Bastron, and Gerald F. DiBona ......................... 400

Effect of Verapamil on the Sinoatrial and Atrioventricular Nodes of the Rabbit and the Mechanism by Which It Arrests Reentrant Atrioventricular Nodal Tachycardia. Andrew L. Wit and Paul F. Cranefield ......................... 413

A Protein Bound Form of Porcine Renal Renin. Graham W. Boyd ......................... 426

A Dissociation of Positive Staircase (Bowditch) from Ouabain-Induced Positive Inotropism: Use of Verapamil. John L. McCans, George E. Lindenmayer, Ronald G. Munson, Randolph W. Evans, and Arnold Schwartz ......................... 439

Recovery from Cardiac Bypass and Elective Cardiac Arrest: The Metabolic Consequences of Various Cardioplegic Procedures in the Isolated Rat Heart. David J. Hearse, David A. Stewart, and Ernst B. Chain ......................... 448

Acute Effects of Alpha-Methylodpa on Mean Blood Pressure and Plasma Renin Activity. Perry V. Halushka and Harry R. Keiser ......................... 458

Relationship of Ventricular Excitability Characteristics to Ventricular Arrhythmias in Dogs. Kenichi Harumi, John Owens, Mary Jo Burgess, and J. A. Abildskov ......................... 464

Deleterious Effects of Hypertension on the Development of Aortic and Coronary Atherosclerosis in Stumptail Macaques (Macaca Speciosa) on an Atherogenic Diet. Ruth Pick, Philip J. Johnson, and Gerald Glick ......................... 472

A Concurrent Flow Model for Extraction during Transcapillary Passage. James B. Bassingthwaighte ......................... 483

Participation of Central Serotonergic Neurons in the Control of the Circulation of the Unanesthetized Rabbit: A Study Using 5,6-Dihydroxytryptamine in Experimental Neurogenic and Renal Hypertension. Lindon M. H. Wing and John P. Chalmers ......................... 504

News from the American Heart Association ......................... 514

No. 4 (October)

Brief Reviews: Reconsideration of the Ultrastructural Basis of Cardiac Length-Tension Relations. Edmund H. Sonnenblick and C. Lynn Skelton ......................... 517

Limitation of the Coronary Vascular Response to Ischemia in the Awake Dog. Robert J. Bache, Frederick R. Cobb, and Joseph C. Greenfield, Jr. ......................... 527

Effect of Beta-Adrenergic Stimulation on Myocardial Adenine Nucleotide Metabolism. Heinz-Gerd Zimmer and Eckehart Gerlach ......................... 536

Increased Metabolic Turnover Rate and Transcapillary Escape Rate of Albumin in Essential Hypertension. Hans-Henrik Parving, Niels Rossing, and Henrik A.E. Jensen ......................... 544

Effect of Theophylline and Adrenergic Blocking Drugs on the Renin Response to Norepinephrine In Vitro. Hector L. Nolly, Ian A. Reid, and William F. Ganong .... 575

Dispersion of Indicator Measured from Microvessels of Cat Mesentery. Stephen H. Nellis and Jen-shih Lee ......................... 580

Differential Effects of an Angiotensin II Analogue on Pressor and Adrenal Receptors in the Rabbit. John M. Steele, Jr. and Jerome Lowenstein ......................... 592
