Brief Reviews: Some Recent Advances in the Study of Hemostasis. Oscar D. Ratnoff

Cardiac Myosin Adenosinetriphosphatase of Rat and Mouse: Distinctive Enzymatic Properties Compared with Rabbit and Dog Cardiac Myosin. Yoshio Yazaki and Maurice S. Raben

Effects of Obstruction of the Mitral Orifice or Distention of the Pulmonary Vein-Atrial Junctions on Renal and Hind-Limb Vascular Resistance in the Dog. James M. Mason and John R. Ledsome

Effect of Prolonged Alcohol Administration on Calcium Transport in Heart Muscle of the Dog. Richard J. Bing, Harald Tillmanns, Jean-Marie Fauvel, Keith Seeler, and James C. Mao

Importance of Atrial Compliance in Cardiac Performance. Hiroyuki Suga

Protective Action of Methylprednisolone on the Myocardium during Experimental Myocardial Ischemia in the Cat. James A. Spath, Jr., David L. Lane, and Allan M. Lefer

Characteristics of Aortic Diastolic Pressure Decay with Application to the Continuous Monitoring of Changes in Peripheral Vascular Resistance. Maurice J. Bourgeois, Barry K. Gilbert, David E. Donald, and Earl H. Wood

Copper Content and Exchange in Mammalian Hearts. Ernest Page, Judy Earley, Lawrence P. McCallister, and Chantal Boyd

Effect of Ischemia on Capillary Pressure and Equivalent Pore Radius in Capillaries of the Isolated Dog Hind Limb. John N. Diana and M. Harold Laughlin

Studies on the Cardiomegaly of the Spontaneously Hypertensive Rat. Barbara B. Farmer, Robert A. Harris, Walter W. Jolly, and William J. Vail

Changes in Coronary Venous Inosine Concentration and Myocardial Wall Thickening during Regional Ischemia in the Pig. Jan Willem de Jong and Sidney Goldstein

Instantaneous Pressure-Volume Relationships and Their Ratio in the Excised, Supported Canine Left Ventricle. Hiroyuki Suga and Kiichi Sagawa

Lipoprotein Uptake and Metabolism by Rat Aortic Smooth Muscle Cells in Tissue Culture. Edwin L. Bierman, Olgia Stein, and Yechezkiel Stein

Instructions to Authors

News from the American Heart Association

No. 2 (August)

Influence of Muscle Afferents on Cutaneous and Muscle Vessels in the Dog. Denis L. Clement and John T. Shepherd

A Model of Cardiac Muscle Dynamics. Edward S. Grood, Robert E. Mates, and Herman Falsetti

Right Lymphatic Duct Distribution Volume in Dogs: Relationship to Pulmonary Interstitial Volume. Edward C. Meyer and Rosemarie Ottaviano
CONTENTS OF VOLUME 35

Relationship of the Functional Refractory Period to Conduction in the Atrioventricular Node. Gregory R. Ferrier and Peter E. Dresel .................................................... 204

Altered Myocardial Function and Metabolism in Chronic Diabetes Mellitus without Ischemia in Dogs. Timothy J. Regan, Philip O. Ettinger, Mohammad I. Khan, Mohan U. Jesrani, Michael M. Lyons, Henry A. Oldewurtel, and Marilyn Weber .... 222

Coronary and Hemodynamic Effects of Temporary Acute Aortic Insufficiency in Intact Anesthetized Dogs. John D. Folts and George G. Rowe .................. 238

Effect of Digitalis on Carotid Sinus Baroreceptor Activity. John A. Quest and Richard A. Gillis .......................................................... 247

Hypoxic Pulmonary Vasoconstriction: The Necessary Role of Angiotensin II. Steven Berkov ............................................................................... 256

Release of Adenosine from Ischemic Brain: Effect on Cerebral Vascular Resistance and Incorporation into Cerebral Adenine Nucleotides. Robert M. Berne, Rafael Rubio, and Richard R. Curnish .................................................... 262

Autonomic Nervous System and Benign Essential Hypertension: I. Usual Blood Pressure, Catecholamines, Renin, and Their Interrelationships. Jean-Louis Cuche, Otto Kuchel, André Barbeau, Yves Langlois, Roger Boucher, and Jacques Genest 281

Autonomic Nervous System and Benign Essential Hypertension: II. Circulatory and Hormonal Responses to Upright Posture. Jean-Louis Cuche, Otto Kuchel, André Barbeau, Yves Langlois, Roger Boucher, and Jacques Genest .......... 290

Adenosine 3',5'-Monophosphate–Dependent Membrane Phosphorylation: A Possible Mechanism for the Control of Microsomal Calcium Transport in Heart Muscle. Paul J. LaRaia and Eugene Morkin ........................................... 298

Cyclic Adenosine Monophosphate Modulation of Slow Calcium Influx Channels in Guinea Pig Hearts. August M. Watanabe and Henry R. Besch, Jr .......... 316

Comparison of Angiotensin II Antagonist and Antiserum Infusion with Nephrectomy in the Rat with Two-Kidney Goldblatt Hypertension. Herbert Thurston and John D. Swales ........................................................................ 325

News from the American Heart Association ........................................ 330

Supplement with this issue: Cardiac Hypertrophy and Cardiomyopathy

No. 3 (September)

Brief Reviews: The Natural History of Coronary Collateral Development. Donald E. Gregg ........................................................................... 335

Onset of Mechanical Activation of Mammalian Heart Muscle in Calcium- and Strontium-Containing Solutions. Dirk L. Bruinsma and Victor A. Claes .................. 345

Evidence of the Limitations of Water as a Freely Diffusible Tracer in Brain of the Rhesus Monkey. John O. Etchling, Marcus E. Raichle, Robert L. Grubb, Jr., and Michel M. Ter-Pogossian .................................................. 358

Characterization and Localization of Ventricular Arrhythmias Resulting from Myocardial Ischemia and Infarction. Benjamin J. Scherlag, Nabil El-Sherif, Ronald Hope, and Ralph Lazzara ....................................................... 372
Role of Potassium Ions in the Vascular Response to a Brief Tetanus. David E. Mohrman and Harvey V. Sparks ........................................... 384
Early and Late Effects of Coronary Artery Occlusion on Canine Purkinje Fibers. Ralph Lazzara, Nabil El-Sherif, and Benjamin J. Scherlag ........ 391
Impaired Autoregulation of Blood Flow and Glomerular Filtration Rate in the Isolated Dog Kidney Depleted of Renin. George J. Kaloyanides, Robert D. Bastron, and Gerald F. DiBona ......................... 400
Effect of Verapamil on the Sinoatrial and Atrioventricular Nodes of the Rabbit and the Mechanism by Which It Arrests Reentrant Atrioventricular Nodal Tachycardia. Andrew L. Wit and Paul F. Cranefield ..................... 413
A Protein Bound Form of Porcine Renal Renin. Graham W. Boyd .................. 426
Recovery from Cardiac Bypass and Elective Cardiac Arrest: The Metabolic Consequences of Various Cardioplegic Procedures in the Isolated Rat Heart. David J. Hearse, David A. Stewart, and Ernst B. Chain ....................... 448
Acute Effects of Alpha-Methylodpa on Mean Blood Pressure and Plasma Renin Activity. Perry V. Halushka and Harry R. Keiser .................... 458
Relationship of Ventricular Excitability Characteristics to Ventricular Arrhythmias in Dogs. Kenichi Harumi, John Owens, Mary Jo Burgess, and J. A. Abildskov .................. 464
Deleterious Effects of Hypertension on the Development of Aortic and Coronary Atherosclerosis in Stumptail Macaques (Macaca Speciosa) on an Atherogenic Diet. Ruth Pick, Philip J. Johnson, and Gerald Glick ....................... 472
A Concurrent Flow Model for Extraction during Transcapillary Passage. James B. Bassingthwaighte ............................................. 483
Participation of Central Serotonergic Neurons in the Control of the Circulation of the Unanesthetized Rabbit: A Study Using 5,6-Dihydroxytryptamine in Experimental Neurogenic and Renal Hypertension. Lindon M. H. Wing and John P. Chalmers ........................................ 504
News from the American Heart Association .................................. 514

No. 4 (October)

Brief Reviews: Reconsideration of the Ultrastructural Basis of Cardiac Length-Tension Relations. Edmund H. Sonnenblick and C. Lynn Skelton .................. 517
Limitation of the Coronary Vascular Response to Ischemia in the Awake Dog. Robert J. Bache, Frederick R. Cobb, and Joseph C. Greenfield, Jr. ......................................................... 527
Effect of Beta-Adrenergic Stimulation on Myocardial Adenine Nucleotide Metabolism. Heinz-Gerd Zimmer and Eckehart Gerlach .................. 536
Increased Metabolic Turnover Rate and Transcapillary Escape Rate of Albumin in Essential Hypertension. Hans-Henrik Parving, Niels Rossing, and Henrik AE. Jensen ......................................................... 544
Effect of Theophylline and Adrenergic Blocking Drugs on the Renin Response to Norepinephrine In Vitro. Hector L. Nolly, Ian A. Reid, and William F. Ganong .... 575
Dispersion of Indicator Measured from Microvessels of Cat Mesentery. Stephen H. Nellis and Jen-shih Lee ............................................. 580
Differential Effects of an Angiotensin II analogue on Pressor and Adrenal Receptors in the Rabbit. John M. Steele, Jr. and Jerome Lowenstein .................. 592
CONTENTS OF VOLUME 35

Stimulation of Vascular Smooth Muscle Sodium, Potassium-Adenosinetriphosphatase by Vasodilators. Constantinos J. Limas and Jay N. Cohn ................. 601

Measured Turbulence and Its Effect on Thrombus Formation. Paul D. Stein and Hani N. Sabbah .................................................. 608

The Renin-Angiotensin System and Aldosterone Secretion during Sodium Depletion in the Rat. William S. Spielman and James O. Davis ............... 615

Central and Reflex Regulation of Sympathetic Vasoconstrictor Activity to Limb Muscles during Desynchronized Sleep in the Cat. Giorgio Baccelli, Renato Albertini, Giuseppe Mancia, and Alberto Zanchetti ............. 625

Regional and Systemic Hemodynamic Patterns in Rabbits with Neurogenic Hypertension. Natalie Alexander and Vincent DeQuattro ............... 636

Gastrointestinal and Mesenteric Hemodynamic Patterns in Neurogenic Hypertensive Rabbits. Natalie Alexander and Vincent DeQuattro ............... 646

News from the American Heart Association .................................................. 652

No. 5 (November)

Brief Reviews: Dietary Pulmonary Hypertension. Alfred P. Fishman .................. 657

Special Article: Ben Franklin and Open Heart Surgery. Julius H. Comroe, Jr. and Robert D. Dripps .................................................. 661

Site and Mechanism of Uptake of $^{3}$H-Norepinephrine by Isolated Perfused Rat Lungs. Terence E. Nicholas, Judy M. Strum, Lynne S. Angelo, and Alain F. Junod .......................... 670

Evidence in Support of Hypoxia but Against High Potassium and Hyperosmolarity as Possible Mediators of Sustained Vasodilation in Rabbit Cardiac and Skeletal Muscle. Miklos Gellai and Reed Detar ............... 681

Cholesterol Ester Synthesis in Normal and Atherosclerotic Aortas of Rabbits and Rhesus Monkeys. Peter I. Brecher and Aram V. Chobanian ............... 692

Reactive Hyperemia in the Dog Heart: Effects of Temporarily Restricting Arterial Inflow and of Coronary Occlusions Lasting One and Two Cardiac Cycles. Edwards Eikens and David E. L. Wilcken .................. 702

Effect of Variation of Transmural Pressure on the Frequency Response of Isolated Segments of Canine Carotid Arteries. Kenneth J. Hutchison .................. 742

Activation Studies following Experimental Hemiblock in the Dog. John J. Gallagher, Andres R. Ticzon, Andrew G. Wallace, and Jackie Kasell .................. 752

Neurogenic and Humoral Factors Controlling Vascular Resistance in the Spontaneously Hypertensive Rat. Lyman T. Lais, Richard A. Shaffer, and Michael J. Brody .................. 764

Cardiac Hypertrophy in Spontaneously Hypertensive Rats. Subha Sen, Robert C. Tarazi, Philip A. Khairallah, and F. Merlin Bumpus .................. 775

Left Ventricular Stiffness Associated with Chronic Pressure and Volume Overloads in Man. William Grossman, Lambert P. McLaurin, and Miltiadis A. Stefanouros .................................................. 793

News from the American Heart Association .................................................. 801

No. 6 (December)

Brief Reviews: The Heart in Shock. Donald B. Hackel, Norman B. Ratliff, and Eileen Mikat .................. 805
CONTENTS OF VOLUME 35

Urinary Kallikrein Excretion in Hypertensive Man: Relationships to Sodium Intake and Sodium-Retaining Steroids. Harry S. Margolius, David Horwitz, John J. Pisano, and Harry R. Keiser ........................................ 820

Contribution of Recirculation and Fat Diffusion to Myocardial Washout Curves Obtained by External Counting in Man: Stochastic Versus Monoexponential Analysis. Attilio Maseri, Antonio Pesola, Antonio L'Abbate, Carlo Contini, Claudio Michelassi, and Tommaso D'Angelo .......................... 826

Contribution of Recirculation and Fat Diffusion to Myocardial Washout Curves Obtained by External Counting in Man: Stochastic Versus Monoexponential Analysis. Attilio Maseri, Antonio Pesola, Antonio L'Abbate, Carlo Contini, Claudio Michelassi, and Tommaso D'Angelo .......................... 826

Pharmacological Characterization of Adrenergic Alpha and Beta Receptors Mediating the Vasomotor Responses of Cerebral Arteries in Vitro. Lars Edvinsson and Christer Owman ................................................ 835

Relationship between Serum Dopamine-β-Hydroxylase Activity, Catecholamine Metabolism, and Hemodynamic Changes during Paroxysmal Hypertension in Quadriplegia. N. Eric Naftchi, G. Frederick Wooten, Edward W. Lowman, and Julius Axelrod ........................................ 850

Characterization of Anti-Heart Mitochondria Autoantibodies Produced in Dogs following Myocardial Infarction. Robert E. Kelley, Merle S. Olson, and R. Neal Pinckard ........................................... 862

Dimensions and Geometric Relationships of the Human Aortic Valve as a Function of Pressure. W. Milton Swanson and Richard E. Clark ........................................ 871

Influences of Physical Training on the Heart of Dogs. Horace L. Wyatt and Jere H. Mitchell .................................................. 883

Inhibition of the Vasodilator Effect of Hypercapnic Acidosis by Hypercalcemia in Dogs and Rats. Enoch P. Wei, Marc D. Thames, Hersm. A. Kontos, and John L. Patterson, Jr. ........................................ 890

Regional Myocardial Function during Acute Coronary Artery Occlusion and Its Modification by Pharmacologic Agents in the Dog. Pierre Theroux, Dean Franklin, John Ross, Jr., and William S. Kemper ........................................ 896

On the Mechanism of Idioventricular Pacemaker Suppression by Fast Drive. Daniel J. Krellenstein, Michael B. Pliam, Chandler McC. Brooks, and Mario Vassalle ............ 923

Measurement of Sinoatrial Conduction Time by Premature Atrial Stimulation in the Rabbit. Hugh C. Miller and Harold C. Strauss .......................... 935
