Brief Reviews: A Commentary on Muscle Mechanics. Bernard C. Abbott and Donald G. Gordon ................................................................. 1

Control of Cardiac Sarcolemmal Adenylate Cyclase and Sodium, Potassium—Activated Adenosine-5'-triphosphatase Activities. Michihiko Tada, Madeleine A. Kircher-berger, Jo-Anna M. Iorio and Arnold M. Katz ........................................... 8

Comparison of 85 Krypton and 113 Xenon Cerebral Blood Flow Measurements before, during, and following Focal, Incomplete Ischemia in the Squirrel Monkey. E. Jerome Hanson, Jr., Robert E. Anderson and Thoralf M. Sundt, Jr. ............................................................. 18

Contractility in Mammalian Heart Muscle: Calcium and Osmolality. Mark A. Goethals, Simone M. Adele, and Dirk L. Brutsaert ................................................................. 27

Anoxia-Induced Release of Prostaglandins in Rabbit Isolated Hearts. Alan J. Block, Harold Feinberg, Krystyna Herbacynska-Cedro and John R. Vane ................................. 34

Motion of the Tricuspid Valve Annulus in Anesthetized Intact Dogs. Anastasios G. Tsakiris, Douglas D. Mair, Shuji Seki, Jack L. Titus, and Earl H. Wood ............................................... 43

Intimal Injury and Regrowth in the Rabbit Aorta: Medial Smooth Muscle Cells as a Source of Neointima. Theodore H. Spaet, Michael B. Stemerman, Frank J. Veith, and Ilze Lejnieks ................................................................. 58

Static and Dynamic Components in the Vascular Myogenic Response to Passive Changes in Length as Revealed by Electrical and Mechanical Recordings from the Rat Portal Vein. Börje Johansson and Stefan Mellander ................................................................. 76

In Vivo Electrophysiological Effects of Lidocaine in Canine Acute Myocardial Infarction. Joel Kupersmith, Elliott M. Antman, and Brian F. Hoffman ................................. 84

A Mechanism for the Electrocardiogram Response to Left Ventricular Hypertrophy and Acute Ischemia. Pierre S. Thiry, Reinhardt M. Rosenberg, and Joseph A. Abbott ................................................................. 92

Localization of Heart Vectors Produced by Epicardial Burns and Ectopic Stimuli: Validation of a Dipole Ranging Method. Raymond E. Ideker, Jack F. Bandura, Richard A. Larsen, John W. Cox, Jr., Francis W. Keller, and Daniel A. Brody ................................. 105

Prior Receptor Occupancy as a Determinant of the Pressor Activity of Infused Angiotensin II in the Rat. Herbert Thurston and John H. Laragh ................................................................. 113

Increased Plasma Catecholamine Concentrations and Vas Deferens Norepinephrine Biosynthesis in Men with Elevated Blood Pressure. Vincent DeQuattro, Yukio Miura, Arthur Lurvey, Malcolm Cosgrove, and Robert Mendez ................................................................. 118

Time Course for Reversal of Electrophysiological and Ultrastructural Abnormalities in Subendocardial Purkinje Fibers Surviving Extensive Myocardial Infarction in Dogs. Peter L. Friedman, John J. Fenoglio, Jr., and Andrew L. Wit ................................................................. 127

Effect of Alterations of Arterial Blood Pressure and Heart Rate on Segmental Dyskinesis during Acute Myocardial Ischemia and following Coronary Reperfusion. Richard E. Kerber and Francois M. Abboud ................................................................. 145

No. 2 (February)

Brief Reviews: Angiotensin I Converting Enzyme. Ervin G. Erdös               | 247  |
Arterial Fibrous Proteins in Cynomolgus Monkeys after Atherogenic and Regression Diets. Mark L. Armstrong and Majorie B. Megan | 256  |
Influence of Carotid Baroreceptors on Vascular Responses to Carotid Chemoreceptor Stimulation in the Dog. Giuseppe Mancia | 270  |
Functional and Hemodynamic Adaptation to Progressive Renal Ablation. Joel M. Kaufman, Norman J. Siegel, and John P. Hayslett | 286  |
Sphingomyelin and Other Phospholipid Metabolism in the Rabbit Atheromatous and Normal Aorta. Shiv K. Seth and Howard A. I. Newman | 294  |
CONTENTS OF VOLUME 36

Demonstration that the Atria, Ventricles, and Lungs Each Are Responsible for a Tonic Inhibition of the Vasomotor Center in the Dog. Giuseppe Mancia and David E. Donald .......................................................... 310

Red Cell Permeability Effect on the Mean Transit Time of an Indicator Transported through an Organ by Red Cells and Plasma. William Perl ....................................................... 352

Letters to the Editor ........................................................................... 358

News from the American Heart Association ...................................... 360

No. 3 (March)

Brief Reviews: Mitochondria and Cardiac Hypertrophy. Murray Rabinowitz and Radovan Zak .......................................................... 367

Manganese and Electrogenic Phenomena in Canine Purkinje Fibers. Perry M. Hogan and Kenneth W. Spitzer ......................................................... 377

Dissociations between Changes in Myocardial Cyclic Adenosine Monophosphate and Contractility. Philip D. Henry, James G. Dobson, Jr., and Burton E. Sobel ............... 392

Catecholamine-Dependent Cyclic Adenosine Monophosphate and Renin in the Dog Kidney. Nama Beck, Kwang Sup Kim, and Bernard B. Davis ................................................ 401

Comparative Uptake of Rat and Human Serum Low-Density and High-Density Lipoproteins by Rat Aortic Smooth Muscle Cells in Culture. Olga Stein and Yechezkiel Stein ......................................................... 436

Disorders of Cellular Electrophysiology Produced by Ischemia of the Canine His Bundle. Ralph Lazzara, Nabil El-Sherif, and Benjamin J. Scherlag ......................... 444

Hemodynamic and Humoral Characteristics of Hypertension Induced by Prolonged Stellate Ganglion Stimulation in Conscious Dogs. Jean-Francois Liard, Robert C. Tarazi, Carlos Maria Ferrario, and William M. Manger ............... 455

News from the American Heart Association ...................................... 465

No. 4 (April)

Brief Reviews: Brain Amines and Models of Experimental Hypertension. J. P. Chalmers .............................................................................. 469

Hypothermic Arrest and Potassium Arrest: Metabolic and Myocardial Protection during Elective Cardiac Arrest. David J. Hearse, David A. Stewart, and Mark V. Braimbridge .............................................................................. 481

A One-Dimensional Viscoelastic Model of Cat Heart Muscle Studied by Small Length Perturbations during Isometric Contraction. Louis Loeffler, III, and Kiichi Sagawa ......................................................... 498
A Renin Inhibitor from Rabbit Kidney: Conversion of a Large Inactive Renin to a Smaller Active Enzyme. Brenda J. Leckie and Anne McConnell .............................................. 513
The Heart as a Target Organ in Systemic Allergic Reactions: Comparison of Cardiac Anaphylaxis In Vivo and In Vitro. Norine Capurro and Roberto Levi .................................................. 520
Continuous Inhibition of Renin Release in Dogs by Vagally Innervated Receptors in the Cardiopulmonary Region. Giuseppe Mancia, J. Carlos Romero, and John T. Shepherd .................................................................................................................. 529
Baroreceptor Reflex Effects on Transient and Steady-State Hemodynamics of Salt-Loading Hypertension in Dogs. Allen W. Cowley, Jr., and Arthur C. Guyton ......................................................... 536
In Vitro Acetylcholine Biosynthesis in Normal and Failing Guinea Pig Hearts. Robert Roskoski, Jr., Phillip G. Schmid, Howard E. Mayer, and Francois M. Abboud .............................................................................................................. 547
Arterial Lysosomes and Connective Tissue in Primate Atherosclerosis and Hypertension. Harvey Wolinsky, Sidney Goldfischer, Marie M. Daly, Lisa E. Kasak, and Bernice Coltoff-Schiller ................................................................. 553
News from the American Heart Association .......................................................... 562

No. 5 (May)

Brief Reviews: Arterial Impedance as Ventricular Afterload. William R. Milnor .... 565
Impairment of Autonomically Mediated Heart Rate Control in Patients with Cardiac Dysfunction. Robert E. Goldstein, G. David Beiser, Morris Stampfer, and Stephen E. Epstein ........................................................................................................ 571
Intimal Ultrastructure of Human Umbilical Arteries: Observations on Arteries from Newborn Children of Smoking and Nonsmoking Mothers. Inger Asmussen and Knud Kjeldsen ........................................................................................................ 579
Hypertension, Transmural Pressure, and Vascular Smooth Muscle Response in Rats. Timothy R. Hansen and David F. Bohr ......................................................................................................................... 590
Local Cerebral Blood Volume Determined by Three-Dimensional Reconstruction of Radionuclide Scan Data. David E. Kuhl, Martin Reivich, Abass Alavi, Istvan Nyary, and Muni M. Staum ........................................................................................................ 610
A New Method of Measuring Propagation Coefficients and Characteristic Impedance in Blood Vessels. William R. Milnor and Wilmer W. Nichols ................................................................. 631
Inherited Depression of Arterial Lipoamide Dehydrogenase Activity Associated with Susceptibility to Atherosclerosis in Pigeons. Tibor Zemplenyi, David H. Blankenhorn, and Alan J. Rosenstein ........................................................................................................ 640
Histamine Potentiation of Nerve- and Drug-Induced Responses of a Rabbit Cerebral Artery. John A. Bevan, Sue Piper Duckles, and Tony J-F. Lee ...................................................................................... 647
Letters to the Editor ................................................................................................ 669
News from the American Heart Association ........................................................ 672

Responses to Type B Atrial Vagal Receptors to Changes in Wall Tension during Atrial Filling. Giorgio Recordati, Federico Lombardi, Vernon S. Bishop, and Alberto Malliani 682

Primary Role of Renal Homografts in Setting Chronic Blood Pressure Levels in Rats. Lewis K. Dahl and Martha Heine 692

Changes in Myocardial Blood Flow and S-T Segment Elevation following Coronary Artery Occlusion in Dogs. Howard J. Smith, Bramah N. Singh, Robin M. Norris, Murray B. John, and Peter J. Hurley 697

Vascular Responses to Prostaglandin F2α in Isolated Cat Lungs. Andrew J. Lonigro and Christopher A. Dawson 706

Depolarization-Induced Movement of Mn2+ across the Cell Membrane in the Guinea Pig Myocardium: Its Effect on the Mechanical Response. Jean F. Delahayes 713

Differentiation of Neurogenic and Myocardial Angiotensin II Receptors in Isolated Rabbit Atria. Alan L. Blumberg, John A. Ackerly, and Michael J. Peach 719

Inotropic Effects of Different Calcium Ion Concentrations on the Embryonic Chick Ventricle: Comparison of Single Cultured Cells and Intact Muscle Strips. William H. Barry, Roger Pitzen, Kenneth Protas, and Donald C. Harrison 735

Pressure Drop across Artificially Induced Stenoses in the Femoral Arteries of Dogs. Donald F. Young, Neal R. Cholvin, and Allan C. Roth 735

Inhibition of Coronary Blood Flow by a Vascular Waterfall Mechanism. James M. Downey and Edward S. Kirk 753

Mechanism of the Serotonin Effect on Lung Transvascular Fluid and Protein Movement in Awake Sheep. Kenneth L. Brigham and Patty Jill Owen 761

Determinants of Fast- and Slow-Pathway Conduction in Patients with Dual Atrioventricular Nodal Pathways. Delon Wu, Pablo Denes, Ramesh Dhingra, Christopher Wyndham, and Kenneth M. Rosen 782

Mesenteric Hemodynamics in Early Experimental Renal Hypertension in Dogs. Geza Simon, Motulal B. Pamnani, John F. Dunkel, and Henry W. Overbeck 791

Serotonin Transport by Cultured Bovine Aortic Endothelium. David Shepro, John C. Batbouta, Louis S. Robblee, Mary Pat Carson, and Frank A. Belamarich 799
