Editorials:

The Cost of Scientific Communication: The Scientist As Ad-Man. Michael R. Rosen and Brian F. Hoffman .................................................. 1

Special Article: The Unidentified Information Content of the Electrocardiogram. J. A. Abildskov, Mary Jo Burgess, Paul M. Urie, Robert L. Lux, and Roland F. Wyatt ......................... 3

A Possible Molecular Mechanism of the Action of Digitalis: Ouabain Action on Calcium Binding to Sites Associated with a Purified Sodium-Potassium-Activated Adenosine Triphosphatase from Kidney. Andre Gervais, Lois K. Lane, Beatrice M. Anner, George E. Lindenmayer, and Arnold Schwartz ........................................ 8

Separation of Primary and Secondary Cardiovascular Events in Systemic Anaphylaxis. James H. Zavecz and Roberto Levi .................................................. 15

The Mechanical Characteristics of Hypertrophied Rabbit Cardiac Muscle in the Absence of Congestive Heart Failure: The Contractile and Series Elastic Elements. Burt B. Hamrell and Norman R. Alpert .................................................. 20

Cardiac Lysosomal Derangements in Mouse Heart after Long-Term Exposure to Non-metabolizable Sugars. Kern Wildenthal, Jane H. Dees, and L. Maximilian Buja .......................... 26

The Effect of Indomethacin Blockade of Prostaglandin Synthesis on Blood Pressure of Normal Rabbits and Rabbits with Renovascular Hypertension. J. Carlos Romero and Cameron G. Strong ................................................. 35

Recuperative Potential of Cardiac Muscle following Relief of Pressure Overload Hypertrophy and Right Ventricular Failure in the Cat. Richard L. Coulson, Shahriar Yazdanfar, Emir Rubio, Alfred A. Bove, Gerald M. Lemole, and James F. Spann ................................................. 41

The Intrinsic Innervation of the Canine Heart: A Functional Study. Donald V. Priola, Harold A. Spurgeon, and W. Peter Geis .................................................. 50

Quantification of Apolipoprotein B in Grossly Normal Human Aorta. Henry F. Hoff, Carol L. Heideman, John W. Gaubatz, Antonio M. Gotto, Jr., Ethel E. Erickson, and Richard L. Jackson .................................................. 56

Chronic Labile Hypertension Produced by Lesions of the Nucleus Tractus Solitarii in the Cat. Marc A. Nathan and Donald J. Reis .................................................. 72

Paradoxical Dynamic Interaction of Heart Period and Vagal Activity on Atrioventricular Conduction in the Dog. Paul Martin .................................................. 81

Sarcolemmal Sodium Permeability and Contractile Force of Guinea Pig Papillary Muscle: Effects of Germitrine. Peter Honerjäger and Melchior Reiter ................................................. 90

CONTENTS OF VOLUME 40

Effects of Extracellular Potassium on Ventricular Automaticity and Evidence for a Pacemaker Current in Mammalian Ventricular Myocardium. Bertram G. Katzung and James A. Morgenstern ................................................................. 105

Instructions to Authors .......................................................................................................... 112

News from the American Heart Association ........................................................................... 115

No. 2 (February)

Brief Review: Calcium Release from the Sarcoplasmic Reticulum. Alexandre Fabiato and Françoise Fabiato ................................................................. 119

Hemodynamic Effects of Rapid Atrial Stimulation in Adult and Young Dogs.
Nestor J. Truccone and Ehud Krongrad .................................................................................. 130

Effect of Physical Training on Calcium Transport by Rat Cardiac Sarcoplasmic Reticulum.
Somsong Penpargkul, Doris I. Repke, Arnold M. Katz, and James Scheuer ......................... 134

Steady State Aldosterone Dose-Response Relationships. David B. Young and
Arthur C. Guyton ..................................................................................................................... 138

Change in Liver Blood Flow and Blood Content in Dogs during Direct and Reflex Alteration of Hepatic Sympathetic Nerve Activity. João J. Carneiro and David E. Donald ................................................................. 150

Regional Myocardial Function and Dimensions Early and Late after Myocardial Infarction in the Unanesthetized Dog. Pierre Theroux, John Ross, Jr., Dean Franklin, J.W. Covell, C.M. Bloor, and Shigetake Sasayama ................................................................. 158

Stimulation of Cholesterol Esterification in Rhesus Monkey Arterial Smooth Muscle Cells.
Richard W. St. Clair, Beth P. Smith, and Leonard L. Wood ....................................................... 166

Effect of Intrarenal Angiotensin II Blockade on Renal Function in Conscious Dogs.
Houston M. Kimbrough, Jr., E. Darracott Vaughan, Jr., Robert M. Carey, and Carlos R. Ayers ......................................................................................................................... 174

Cardiac Output and Renal Blood Flow in Glycerol-Induced Acute Renal Failure in the Rat.
Chen H. Hsu, Theodore W. Kurtz, and Thomas P. Walzinger ..................................................... 178

The Distribution of Labeled Albumin across the Rabbit Thoracic Aorta in Vivo.
Robert L. Bratzler, Guy M. Chisolm, Clark K. Colton, Kenneth A. Smith, Donald B. Zilversmit, and Robert S. Lees ......................................................................................................................... 182

The Amino Acid Composition of Actin and Myosin and Ca\(^{2+}\)-Activated Myosin Adenosine Triphosphatase in Chronic Canine Congestive Heart Failure. Robert R. Raszkowski, Joseph D. Welty, and Myron B. Peterson ......................................................................................................................... 191

Effects of Angiotensin II on Steroid Metabolism and Hepatic Blood Flow in Man.
Franz H. Messerli, Wojciech Nowaczynski, Masanobu Honda, Jacques Genest, Roger Boucher, Otto Kuchel, and José Manuel Rojo-Ortega ......................................................................................................................... 204

Inhibition of Sympathetic Neurotransmission in Canine Blood Vessels by Adenosine and Adenine Nucleotides. Raymond H. Verhaeghe, Paul M. Vanhoutte, and John T. Shepherd ......................................................................................................................... 208

News from the American Heart Association ........................................................................... 216

No. 3 (March)

Characteristics of Rat Aortic Baroreceptors with Nonmedullated Afferent Nerve Fibers. Peter Thorén, William R. Saum, and Arthur M. Brown .................................................. 231

Pressor Response to 1-Sar-8-Ala-Angiotensin II (Saralasin) in Hypertensive Subjects. Gunnar H. Anderson, Jr., David H.P. Streeten, and Theodore G. Dalakos ......................... 243

The Renin-Angiotensin-Aldosterone System in Rabbits with Congestive Heart Failure Produced by Aortic Constriction. Brian J. Morris, James O. Davis, Marvin L. Zatzman, and Gary M. Williams .............................. 275

Influence of a Prostaglandin Endoperoxide Analogue on the Canine Pulmonary Vascular Bed. Philip J. Kadowitz and Albert L. Hyman .................................................. 282

The Diastolic Viscous Properties of Cat Papillary Muscle. Mark I.M. Noble .............................. 288

Mechanism of Renin Release during Acute Ureteral Constriction in Dogs. Ivar Eide, Einar Løyning, Øivind Langård, and Fredrik Kiil .................................................. 293

Role of the Thyroid Gland in the Development and Maintenance of Spontaneous Hypertension in Rats. F. Rioux and B.A. Berkowitz .................................................. 306

Prostaglandins and the Control of Blood Flow in the Canine Myocardium. Thomas H. Hintze and Gabor Kaley .................................................. 313

Platelet Aggregation in the Cerebral Microcirculation: Effect of Aspirin and Other Agents. William I. Rosenblum and Farouk El-Sabban .................................................. 320

News from the American Heart Association .......... 329

No. 4 (April)

Controversies in Cardiovascular Research: Molecular Mechanisms of Contraction. M.I.M. Noble and G.H. Pollack .................................................. 333

Distribution of Coronary Artery Flow to the Canine Right Atrium and Sinoatrial Node. Carl W. White, Melvin L. Marcus, and Francois M. Abboud .................................................. 342

Influence of Inhibitors of Prostaglandin Synthesis on Renal Vascular Resistance and on Renal Vascular Responses to Vasopressor and Vasodilator Agents in the Cat. Barry M. Chapnick, Paul W. Paustian, Larry P. Feigen, Paul D. Joiner, Albert L. Hyman, and Philip J. Kadowitz .................................................. 348

Volume Changes in Sarcoplasmic Reticulum of Rat Hearts Perfused with Hypertonic Solutions. Ernest Page and Judy Upshaw-Earley .................................................. 355
CONTENTS OF VOLUME 40

Length-Dependent Calcium Inotropism in Cat Papillary Muscle. Lee L. Huntsman and Douglas K. Stewart .......................................................... 366

Balloon-Induced Right Ventricular Outflow Obstruction: A New Approach to Control of Acute Interventricular Shunting after Myocardial Infarction in Canines and Swine.
Joseph D. Babb, John A. Waldhausen, and Robert Zelis .................................................. 372

Renal Cortical Blood Flow Distribution in Obstructive Nephropathy in Rats.
Norman J. Siegel, Robert A. Feldman, Bernard Lytton, John P. Hayslett, and Michael Kashgarian ................................................................. 379

Directional Coronary Collateral Growth with Chronic Circumflex Occlusion in the Dog.
Konrad W. Scheel, Reginald J. Rodriguez, and Leslie A. Ingram ........................................... 384

Michael R. Rosen, Allan J. Hordof, Joseph P. Ilvento, and Peter Danilo, Jr. ......................... 390

On the Mechanism Underlying the Action of D-600 on Slow Inward Current and Tension in Mammalian Myocardium.
Hermann Nawrath, Robert E. Ten Eck, Terence F. McDonald, and Wolfgang Trautwein ......................... 408

Characteristics of Left Ventricular Receptors with Nonmedullated Vagal Afferents in Cats.
Peter N. Thorén ............................................................. 415

Beneficial Effects of Arachidonic Acid during Hemorrhagic Shock in the Dog. John T. Flynn and Allan M. Lefer ............................................................ 422

Development of Left Ventricular Hypertrophy in Young Spontaneously Hypertensive Rats after Peripheral Sympathectomy.
Anthony F. Cutilletta, Lynda Erinoff, Alfred Heller, John Low, and Suzanne Oparil .................. 428

News from the American Heart Association ................................................................................. 435

No. 5 (May)

Role of Prostaglandins in the Control of Renin Secretion in the Dog. John Yun, Gerald Kelly, Frederic C. Bartter, and Harold Smith, Jr. ..................................................... 459

Differences between Proximal Left and Right Bundle Branch Block Action Potential Durations and Refractoriness in the Dog Heart. John C. Bailey, David A. Lathrop, and Dennis L. Pippenger ........................................................ 464

Isolation and Characterization of Myosin from Subjects with Asymmetric Septal Hypertrophy. Barry J. Maron, Victor J. Ferrans, and Robert S. Adelstein ........................................... 468

Contractile and Biochemical Resposes of Cardiac and Skeletal Muscle to Isoproterenol Covalently Linked to Glass Beads. William R. Ingebretsen, Jr., Eberhard Becker, William F. Friedman, and Steven E. Mayer .................................................. 474

Effects of Intermittent Pressure Loading on the Development of Ventricular Hypertrophy in the Cat. Melvin L. Marcus, Dwain L. Eckberg, James L. Braxmeier, and Francois M. Abboud .......................................................... 484

Effects of the Antibiotic Ionophore X-537A on Contractility and Ionic Exchange in Rabbit Ventricular Myocardium. Igor R. Wendt and Glenn A. Langer .................................................. 489
CONTENTS OF VOLUME 40

Partition of Xenon and Iodoantipyrine among Erythrocytes, Plasma, and Myocardium. Ronald Carlin and Shu Chien .................................................. 497

Effect of Hematocrit on the Washout of Xenon and Iodoantipyrine from Dog Myocardium Ronald Carlin and Shu Chien .............................................. 505

Effects of Physical Training on End-Diastolic Volume and Myocardial Performance of Isolated Rat Hearts. Malcolm M. Bersohn and James Scheuer ......................... 510

The Effect of Ouabain, Dinitrophenol, and Lithium on the Pacemaker Current in Sheep Cardiac Purkinje Fibers. Ronald S. Aronson and Jeremiah M. Gelles ............................. 517

Letters to the Editor ............................................................... 525

News from the American Heart Association .................................. 526

No. 6 (June)

Brief Reviews: Critical Closure Reexamined. Robert S. Alexander ......................... 531

Effect of Stellectomy and Vagotomy on Ventricular Refractoriness in Dogs. Peter J. Schwartz, Richard L. Verrier, and Bernard Lown ......................................................... 536

Histamine Receptors in the Coronary Circulation of the Dog: Effects of Mepyramine and Metiamide on Responses to Histamine Infusions. Robert W. Giles, Goeffrey Heiss and David E. L. Wilcken .................................................. 541

Voltage Clamp Analysis of the Effects of Dopamine on the Transmembrane Ionic Currents Underlying the Action Potential of Sheep Cardiac Purkinje Fibers. Jeremiah M. Gelles and Ronald S. Aronson ........................................ 561

Reflex Regulation of Sympathetic Activity in the Spontaneously Hypertensive Rat. John H. Coote and Yuko Sato ................................................................. 571

Maximum Rate of Tension Fall during Isometric Relaxation at End-Systolic Fiber Length in Canine Papillary Muscle. Kouichi Tamiya, Sho Kikkawa, Atsuaki Gunji, Motokazu Hori, and Yasuhisa Sakurai .................................................. 584

α-Adrenergic Reduction of Cyclic Adenosine Monophosphate Concentrations in Rat Myocardium. August M. Watanabe, David R. Hathaway, Henry R. Besch, Jr., Barbara B. Farmer, and Robert A. Harris
