No. 3 (September)

| Brief Reviews: The Relationship among Cardiac Pacemakers: Overdrive Suppression. | Mario Vassalle                                                           | 269  |
| Relation of Renal Hemodynamics to Metabolism of Angiotensin II by the Canine Kidney. | Michael D. Bailie and Suzanne Oparil                                       | 283  |
| Effects of Prostaglandin Inhibition on Intrarenal Hemodynamics in Acutely Saline-Loaded Rats. | Rainer Düssing, Bernward Melder, and Herbert J. Kramer                     | 287  |
| Circulatory Reflexes from Carotid and Extracarotid Baroreceptor Areas in Man. | Giuseppe Mancia, Alberto Ferrari, Luisa Gregorini, Romano Valentini, John Ludbrook, and Alberto Zanchetti | 309  |
| Elastin and Collagen Accumulation in Rabbit Ascending Aorta and Pulmonary Trunk during Postnatal Growth: Correlation of Cellular Synthetic Response with Medial Tension. | Donald Y. M. Leung, Seymour Glagov, and Martin B. Mathews                  | 316  |
| Parasympathetic Cholinergic Control of Cerebral Blood Flow in Dogs. | Louis G. D’Aleyc and Cynthia J. Rose                                         | 324  |
| Reflex Inputs to the Cardiovascular and Respiratory Centers from Dynamically Working Canine Muscles: Some Evidence for Involvement of Group III or IV Nerve Fibers. | Ulrich Tibes                                                               | 332  |
| Effect of Sympathetic Nerve Stimulation on Cerebral Blood Flow and on Large Cerebral Arteries of Dogs. | Donald D. Heistad, Melvin L. Marcus, Samuel Sandberg, and Francois M. Abboud | 342  |
| Total and Regional Cerebral Blood Flow during Hypotension, Hypertension, and Hypocapnia: Effect of Sympathetic Denervation in Dogs. | Shirley M. Mueller, Donald D. Heistad, and Melvin L. Marcus                | 350  |
| The Effect of Dobutamine on Cardiac Oxygen Balance, Regional Blood Flow, and Infarction Severity after Coronary Artery Narrowing in Dogs. | Ronald R. Tuttle, G. Donald Pollock, Glen Todd, Brian MacDonald, Ralmond Tust, and William Dusenberry | 357  |

Effect of Hyaluronidase and Methylprednisolone on Myocardial Function, Glucose Metabolism, and Coronary Flow in the Isolated Ischemic Rat Heart. Michael J. Rovetto .......................................................... 373

Quantitative Studies of Microcirculatory Structure and Function. III. Microvascular Hemodynamics of Cat Mesentery and Rabbit Omentum. Benjamin W. Zweifach and Herbert H. Lipowsky ......................................................... 380

Wall Shear Stress Distribution in a Model Canine Artery during Steady Flow. Robert J. Lutz, Joseph N. Cannon, Kenneth B. Bischoff, Robert L. Dedrick, Robert K. Stiles, and Donald L. Fry .................................................. 391

Intercapillary Distance and Capillary Reserve in Hypertrophied Rat Hearts Beating in Situ. Louis Henquell, Charles L. Odoroff, and Carl R. Honig .......................................................... 400

News from the American Heart Association ................................................................................. 409

No. 4 (October)

Brief Reviews: Action Potentials, Afterpotentials, and Arrhythmias. Paul F. Cranefield .......................................................... 415

Vasopressin and Renin in Glycerol-Induced Acute Renal Failure in the Rat. Karl G. Hofbauer, Arno Konrads, Kurt Bauereiss, Bärbel Möhring, Jan Möhring, and Farnz Gross .......................................................... 424

5-Hydroxytryptamine and Neurotransmitter Release in Canine Blood Vessels: Inhibition by Low and Augmentation by High Concentrations. Michael A. McGrath ............................................. 428

Triggered and Automatic Activity in the Canine Coronary Sinus. Andrew L. Wit and Paul F. Cranefield .......................................................... 435

Role of Potassium in the Transient Reduction in Vasoconstrictive Responses of Muscle Resistance Vessels during Rhythmic Exercise in Dogs. Orren Beaty, III, and David E. DonalD .......................................................... 452

Direct Demonstration of Alterations in the Microcirculation of the Hamster during and following Renal Hypertension. Roger L. Click, Joseph P. Gilmore, and William L. Joyner .......................................................... 461

The Contribution of Splanchnic Pooling to Endotoxin Shock in the Dog. Warren G. Guntheroth and Isamu Kawabori .......................................................... 467

Mechanism of Activation of Contraction in Frog Ventricular Muscle. Thomas W. Anderson, Carl Hirsch, and Frederic Kavaler .......................................................... 472

Autoregulatory Responses of Superficial Nephrons and Their Association with Sodium Excretion during Arterial Pressure Alterations in the Dog. L. Gabriel Navar, P. Darwin Bell, and Thomas J. Burke .......................................................... 487

Anomalous Responses of Tumor Vasculature to Norepinephrine and Prostaglandin E2 in the Rabbit. John H. G. Rankin, Randy Jirtle, and Terrance M. Phernetton .......................................................... 496

Effects of Catecholamines, Histamine, and Nitroglycerin on Flow, Oxygen Utilization, and Adenosine Production in the Perfused Guinea Pig Heart. Vernon T. Wiedmeier and Larry H. Spell .......................................................... 503
