SPECIAL REVIEW ARTICLE
The interpretation of the T wave of the electrocardiogram DENIS NOBLE AND IRA COHEN

Haemodynamic effects of supraventricular tachycardias and their alterations by electrically and verapamil induced termination MARTIN SCHLEPPER, HORST G. WEPNER, AND HARTMUT MERLE

Influence of alterations in sinus rate on determination of drug-induced changes in ventricular automaticity R. DOUGLAS WILKERSON AND JACK K. PRUETT

Vasodilator mechanism of the intracerebral (non-sympathetic) adrenergic pathway G. MITCHELL, D. MITCHELL, AND C. ROSENDORFF

Aortic input impedance and left ventricular energetics in acute isovolumic anaemia T. N. S. CLARKE, C. PRYS-ROBERTS, G. BIR, P. FOEX, AND M. J. BENNETT

Underestimation of true pulmonary blood volume by the pulmonary artery wedge injection technique in cardiac patients BERNARD F. SCHREINER, D. JOHN FARNHAM, AND DONALD C. LOGAN

Experimental right ventricular hypertrophy and failure in swine K. C. WELHAM, E. D. SILOVE, AND R. K. H. WYSE

Non-invasive electromagnetic measurement of the peripheral pulsatile blood flow: experimental study and clinical application HENRY J. L. BOCCALON, BERNARD J. L. CANDELON, HENRY G. DOLL, PIERRE F. PUEL, AND ANDRE P. ENJALBERT

Annual Subscription $49.00
Combined with British Heart Journal $104.50

All subscriptions to the United States can be ordered from CARDIOVASCULAR RESEARCH, 1172 Commonwealth Avenue, Boston, Mass. 02134. Subscriptions from all other countries should be ordered from the Subscription Manager, B.M.A. House, Tavistock Square, London, WC1H 9JR, England.

IN CARDIOVASCULAR-PULMONARY MEDICINE AND SURGERY

192 pp., soft-bound, $5.00

"Truly incredible that so much viable and exciting material could be compressed into 192 pages in such readable form... it should be read by every man of science at least once a year.

— David Boyd, Book Review Editor, Chest

28 titles, including:

What Makes the Sky Blue?
A Sea of Air
The Inside Story
Whodunit (And Why)
Feet on the Ground?
Harnessing Carbon Monoxide
EITHER—OR? Why Not Both?
Out of the Mouth of Babes
How to Make Hasenpfefler
Roast Pig and Scientific Discovery
Missed Opportunities
Publisher’s Dallile:
An Incurable Disease?
Publish and/or Perish
... the Soul of Wit
"Tell It Like It Was"
Speculation on Speculation
Lags
Inflation—1981 Model
How to Delay Progress —— Without Even Trying
The Clouded Crystal Ball
Who’s Who in World History
The Courage to Fail
Frankenstein, Pickwick and Ondine
Premature Science / Immature Lungs

• What is the role of "undirected," "basic" research in saving lives? •
How did medicine progress from complete ignorance to the conquest of major diseases? • Is it true that (to quote LBJ) "we know all that we need to know; now all we have to do is apply it"? • Julius Comroe explores these and many other questions in his fascinating new book on biomedical research — a collection of informal essays, "thought-provoking, stimulating, and delightfully written."

• • •

An ideal gift for your physician, graduate students, fellows, residents... University trustees, regents, deans... or your Congressmen.
