Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 43
July–December 1978

No. 1 (July)

Instructions to Authors (There are some major changes; please read carefully.) ........................................ 136

Brief Reviews: Autonomic Neural Influences on the Dysrhythmias Resulting from Myocardial Infarction. Peter B. Corr and Richard A. Gillis .......................................................................................... 1

Evidence for a Splanchnic Sodium Input Monitor Regulating Renal Sodium Excretion in Man: Lack of Dependence upon Aldosterone. Robert M. Carey ........................................................................ 19

Effect of L-Dopa on Sympathetic Nerve Activity and Blood Pressure in the Spontaneously Hypertensive Rat. William V. Judy, August M. Watanabe, David P. Henry, H.R. Besch, Jr., and Barry Aprison ................................................................. 24

The Effects of Acetylcholine on the Electrical Activity of Canine Cardiac Purkinje Fibers. David C. Gadsby, Andrew L. Wit, and Paul F. Cranefield .................................................................................. 29

Sequential Unipolar Strength-Interval Curves and Conduction Times during Myocardial Ischemia and Reperfusion in the Dog. Herbert J. Levine, Boaz Avitall, Stephen G. Pauker, and Shapur Naimi ............................................................................. 63

Morphological Changes in Isolated Perfused Dog Lungs after Acute Hydrostatic Edema. David O. DeFouw and Peter B. Berendsen ........................................................................................................... 72

Initial Myocardial Adjustments to Brief Periods of Ischemia and Reperfusion in the Conscious Dog. Massimo Pagani, Stephen F. Vatner, Hank Baig, and Eugene Braunwald ........................................................................... 83

Diastolic Coronary Artery Pressure-Flow Relations in the Dog. Ronald F. Bellamy ............................................................................................................................................................................. 92

Effects of Substrates on Tissue Metabolic Changes in the Isolated Rat Heart during Underperfusion and on Release of Lactate Dehydrogenase and Arrhythmias during Reperfusion. Owen L. Bricknell and Lionel H. Opie ................................................................................................................................. 102

Suppression of Calcific Fibrous-Fatty Plaque Formation in Rabbits by Agents Not Affecting Elevated Serum Cholesterol Levels. The Effect of Thiophene Compounds. Catherine T. Chan, Herbert Wells, and Dieter M. Kramsch ........................................................................................................... 115

The Relationship of Excitability to Conduction Velocity in Canine Purkinje Tissue. Jorge Peon, Graciela B. Ferrer, and K. Kiess ................................................................. 125

Erratum .................................................................................................................................................. 135

News from the American Heart Association ......................................................................................... 139

No. 2 (August)

Brief Reviews: Pulmonary Edema due to Increased Microvascular Permeability to Fluid and Protein. Norman C. Staub .................................................................................................................. 143

Lung Fluid Exchange after Uneven Pulmonary Artery Obstruction in Sheep. Kazuhiro Ohkuda, Kazuya Nakahara, W. Jeffrey Weidner, Andrew Binder, and Norman C. Staub ......................................................... 152

Baroreceptor Reflexes in Human Hypertension. Giuseppe Mancia, John Ludbrook, Alberto Ferrari, Luisa Gregorini, and Alberto Zanchetti ................................................................................................. 170

Ferroxyanide Protection against Uncoupling of Excitation and Contraction by Manganese in Rabbit Ventricular Myocardium. Warren G. Sanborn and Beth L. Stremel .......................................................................................... 178

Effects of Buffered Pyruvate on Regional Cardiac Function in Moderate, Short-Term Ischemia in Swine Heart. A. James Liedtke and Stephen H. Nellig ................................................................. 189

Integrated Carotid Chemoreceptor and Pulmonary Inflation Reflex Control of Peripheral Vasoactivity in Conscious Dogs. John D. Rutherford and Stephen F. Vatner ........................................................................... 198

Regulation of Lipoprotein Synthesis: Studies on the Molecular Mechanisms of Lipoprotein Synthesis and Their Regulation by Estrogen in the Cockerel. Lawrence Chan, Richard L. Jackson, and Anthony R. Means .......................................................................................................................... 209

Phase-Related Sensitivity of the Sinoatrial Node to Vagal Stimulation in the Isolated Rat Atrium. Sherry L. Stuesse, Matthew N. Levy, and Harrison Zieske ................................................................................. 217
CONTENTS OF VOLUME 43

Prostaglandin-Mediated Inhibition of the Vasococontractor Responses of the Isolated Perfused Rat Splenic Vasculature to Adrenergic Stimuli. Kafait U. Malik ...................................................... 225

Enhancement of Platelet Aggregation by Tranylcypromine in Mouse Cerebral Microvessels. William I. Rosenblum and Farouk El-Sabban ........................................... 238

Pressure-Flow Characteristics of Coronary Stenoses in Unsedated Dogs at Rest and during Coronary Vasodilatation. K. Lance Gould ................................................. 242

The Kallikrein-Kinin System and Prostaglandins in the Kidney: Their Relation to Furosemide-Induced Diuresis and to the Renin-Angiotensin-Aldosterone System in Man. Kaishi Abe, Nobuo Irokawa, Minoru Yasuijima, Masahide Seino, Satoru Chiba, Yutaka Sakurai, Kaoru Yoshinaga, and Tetsuo Saito .............. 254

The Fate and Fibrogenic Potential of Subintimal Implants of Crystalline Lipid in the Canine Aorta: Quantitative Histological and Autoradiographic Studies. B. Greg Brown and Donald L. Fry ...................................................... 261

Sequential Changes in Left Ventricular Compliance during Acute Coronary Occlusion in the Isovolumic Working Canine Heart. Bert Y. S. Wong, Masaaki Toyama, Robert L. Reis, and Allan V. N. Goodyer ............................................. 274

The Interpretation of Thallium-201 Cardiac Scintigrams: Studies in Experimental Ischemic Heart Disease in Dogs. A. P. Selwyn, E. Welman, T. A. Pratt, J. Clark, C. McArthur, and J. P. Lavender ...................................................... 287

Blood Pressure and Vascular Resistance in Genetically Hypertensive Rats Treated at Birth with 6-Hydroxydopamine. David W. J. Clark, David R. Jones, E. Linton Phelan, and Carrick E. Devine .................. 293

Simulation Studies of the Electrocardiogram. I. The Normal Heart. Walter T. Miller, III, and David B. Geselowitz ................................................................. 301

Simulation Studies of the Electrocardiogram. II. Ischemia and Infarction. Walter T. Miller, III, and Ju David B. Geselowitz ................................................................. 315

Local Cerebral Blood Volume Response to Carbon Dioxide in Man. Jafar Alavi, Mark Reivich, David Kuhl, and Barbara Uzzell ...................................................... 324

Erratum ........................................................................................................................................... 331

Letters to the Editor .......................................................................................................................... 332

News from the American Heart Association .................................................................................. 333

No. 3 (September)

Brief Reviews: The Structural and Molecular Basis of Glomerular Filtration. Manjeri A. Venkatachalam and Helmut G. Renne ................................................................. 337

Electrotropic Interaction during Canine Ventricular Repolarization. Hideaki Toyoshima and Mary Jo Burgess ................................................................. 348

A Comparison of the Effects of 5- and 6-Hydroxydopamine on the Isolated Canine Saphenous Vein. Michael R. Goldberg and Philip J. Kadowitz ................................. 357

Diet and Sire Effects on Serum Cholesterol and Cholesterol Absorption in Infant Baboons (Papio cynocephalus). Glen E. Mott, C. Alex McMahan, and Henry C. McGill, Jr. ...................................................... 364

Failure of Chronic Aldosterone Infusion to Increase Arterial Pressure in Dogs with Angiotensin-Induced Hypertension. Thomas E. Lohmeier, Allen W. Cowley, Jr., James W. DeClue, and Arthur C. Guyton .......................... 381

Adenosine Production in the Ischemic Kidney. Wayne L. Miller, Rosemary A. Thomas, Robert M. Berne, and Rafael Rubio ................................................................. 390

Enterotoxic Shock in Rhesus Monkeys: The Role of Selected Bloodborne Factors. George W. Pettit, Tadakata Yamada, David A. Wing, and Peter B. Jahrling ...................................................... 398

Effects of a Cardiac Glycoside on Regional Function, Blood Flow, and Electrograms in Conscious Dogs with Myocardial Ischemia. Stephen F. Vatner, Hank Baig, W. Thomas Manders, and Paul A. Murray ...................................................... 413

Thrombogenicity of Angiographic Catheters. George D. Wiener, William J. Casarella, Robert Baier, and Cecilia M. Fenoglio ................................................................. 424

The Effects of Agents that Bind to Cytochrome P-450 on Hypoxic Pulmonary Vasoconstriction. J. T. Sylvester and C. McGowan ...................................................... 429

Pressor Responses to Norepinephrine in Rabbits with 3-Day and 30-Day Renal Artery Stenosis: The Role of Angiotensin II. Shuchi Ichikawa, J. Alan Johnson, Wayne L. Fowler, Jr., Charles G. Payne, Kenneth Kurtz, and W. Ford Keitzer ...................................................... 437

Inhibition of Prostaglandin Synthesis by Indomethacin Augments the Renal Vasodilator Response to Bradykinin in the Anesthetized Dog. Andrew J. Lonigro, Margarethe H. Hagemann, Alan H. Stephenson, and Cheryl L. Fry .............................. 447

Prediction of Infarct Size in Baboons: A Proposed Model for Accurately Determining the Efficacy of Therapeutic Interventions. Frank N. Faire, Gregory T. Smith, and J. Judson McNamara ...................................................... 455

Mechanism of Adenosine-Mediated Decreases in Glomerular Filtration Rate in Dogs. Hartmut Osswald, William S. Spielman, and Franklyn G. Knox ...................................................... 465

Actions of Lidocaine on Transmembrane Potentials of Subendocardial Purkinje Fibers Surviving in Infarcted Canine Hearts. J. Desmond Allen, F. James Brennan, and Andrew L. Wit ...................................................... 470

News from the American Heart Association .................................................................................. 482
