Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION
VOLUME 45
July–December 1979
No. 1 (July)

Brief Reviews: Cardiac Contractile Proteins: Adenosine Triphosphatase Activity and Physiological Function. James Scheuer and Ashok K. Bhan ........................................................................................................................................................................... 1
Influence of Renal Prostaglandin Synthesis on Renin Control Mechanisms in the Dog. Andrea A. Seymour and John E. Zehr .................................................................................................................................................................................. 13
Hypertension following Denervation of Aortic Baroreceptors in Unanesthetized Dogs. Cyril S. Ito and Allen M. Scher .......................................................................................................................................................................................... 26
The Effect of Bending on Canine and Human Arterial Walls and on Blood Flow. Norman L. Browse, Anthony E. Young, and Michael Lea Thomas .................................................................................................................................................................................. 41
Central Neural Mechanisms of the Cerebral Ischemic Response: Characterization, Effect of Brainstem and Cranial Nerve Transsections, and Simulation by Electrical Stimulation of Restricted Regions of Medulla Oblongata in Rabbit. Roger A.L. Dampney, Mamoru Kumada, and Donald J. Reis .................................................................................................................................................................................. 48
Profound Hypotension and Abolition of the Vasomotor Component of the Cerebral Ischemic Response Produced by Restricted Lesions of Medulla Oblongata in Rabbit: Relationship to the So-Called Tonic Vasomotor Center. Mamoru Kumada, Roger A.L. Dampney, and Donald J. Reis .................................................................................................................................................................................. 63
Neither Dorsal Root nor Baroreceptor Afferents are Necessary for Eliciting the Renal Responses to Acute Intravascular Volume Expansion in the Primate Macaca fascicularis. Joseph P. Gilmore, Thomas V. Peterson, and Irving H. Zucker .................................................................................................................................................................................. 95
Correlative Electrophysiological and Anatomical Studies Concerning the Site of Origin of Escape Rhythm during Complete Atrioventricular Block in the Dog. Thomas N. James, James H. Isobe, and Ferdinand Urrthaler .................................................................................................................................................................................. 108
The Role of Fibrin in the Genesis of Pulmonary Edema after Embolization in Dogs. Asrar B. Malik, Bing C. Lee, Hoyte van der Zee, and Arnold Johnson .................................................................................................................................................................................. 120
Effects of Alterations in Aortic Input Impedance on the Force-Velocity-Length Relationship in the Intact Canine Heart. Huber Pouleur, James W. Covell, and John Ross, Jr. .................................................................................................................................................................................. 126
Comparison of the Hemodynamic Changes Produced by Electrical Stimulation of the Area Postrema and Nucleus Tractus Solitarii in the Dog. Karen L. Barnes, Carlos M. Ferrario, and John P. Conomy .................................................................................................................................................................................. 136
The Effect of Chronic Protein-Calorie Undernutrition in the Rat on Myocardial Function and Cardiac Function. Donald O. Nutter, Thomas G. Murray, Steven B. Heymsfield, and Ellen O. Fuller .................................................................................................................................................................................. 144
Instructions to Authors .................................................................................................................................................................................. 153
News from the American Heart Association .................................................................................................................................................................................. 156

No. 2 (August)

The Effects of Cocaine and Metanephrine on the Cardiac Responses to Sympathetic Nerve Stimulation in Dogs. Yasuo Matsuda, Yukitaka Masuda, and Matthew N. Levy .................................................................................................................................................................................. 180
Biochemical Determinations of Cholinergic Innervation in Cerebral Arteries. Verena M. Florence and John A. Bevan .................................................................................................................................................................................. 212
Relationship between Adenine Nucleotide Metabolism and Irreversible Ischemic Tissue Damage in Isolated Perfused Rat Heart. Thomas C. Vary, Evangelos T. Angelakos, and Stephen W. Schaffer

Dissociation between the Electrophysiological Properties and Total Tissue Cyclic Guanosine Monophosphate Content of Guinea Pig Atria. Michael J. Mirror, John C. Bailey, and August M. Watanabe

Electrophysiological Study of the Action of Angiotensin II on the Rat Myometrium. Gilles Hamon and Manuel Worcel

Unique Resistance to Guanethidine-Induced Chemical Sympathectomy of Spontaneously Hypertensive Rats: A Resistance Overcome by Treatment with Antibody to Nerve Growth Factor. Eugene M. Johnson, Jr., and Richard A. Macia

Mechanical and Morphological Properties of Arterial Resistance Vessels in Young and Old Spontaneously Hypertensive Rats. David M. Warshaw, Michael J. Mulvany, and William Halpern

Distribution, Surface Density, and Membrane Area of Diadic Junctional Contacts between Plasma Membrane and Terminal Cisterns in Mammalian Ventricle. Ernest Page and Mary Surdyk-Droske

Specific Antibody to Renal Renin and Its Application to the Direct Radioimmunoassay of Renin in Various Organs. Shigehisa Hirose, Robert J. Workman, and Tadashi Inagami

Age-Related Cardiovascular Effects of Catecholamines in Anesthetized Piglets. Nancy M. Buckley, Phyllis M. Gootman, Edward L. Yeilin, and Paul Brazeau

Increased Sheep Lung Vascular Permeability Caused by Escherichia coli Endotoxin. Kenneth L. Brigham, Ronald E. Bowers, and James Haynes

Mechanical and Structural Correlates of Contracture Induced by Metabolic Blockade in Cardiac Muscle from the Rat. Oscar H.L. Bing and Michael C. Fishbein

Letters to the Editor

No. 3 (September)

Transsinusoidal Fluid Dynamics in Canine Liver during Venous Hypertension. Glen A. Laine, Jeff T. Hall, Susan H. Laine, and Harris A. Granger

Rate of Rise of Myocardial Pco2 during Early Myocardial Ischemia in the Dog. Robert B. Case, Alexis Felix, and Frank S. Castellana

Effect of Sympathetic Stimulation on Permeability of the Blood-Brain Barrier to Albumin during Acute Hypertension in Cats. Donald D. Heistad and Melvin L. Marcus

Decreased Myocardial Contractility in Papillary Muscles from Atherosclerotic Rabbits. Darwin W. Peterson, David W. Griffith, Jr., and Charles A. Napolitano

Effects of Ischemia on Tissue Metabolites in Red (Slow) and White (Fast) Skeletal Muscle of the Chicken. Richard E. Klabunde and Steven E. Mayer

Circus Movement in Canine Right Ventricle. Jacques M. T. de Bakker, Berthold Henning, and Wolfgang Merx

Arterial Anatomical and Functional Abnormalities in Juvenile Mice with Genetic or Streptozotocin-Induced Diabetes Mellitus. H. Glenn Bohlen and Barbara A. Niggli

The Prolonged Pressor Response to Renin in the Nephrectomized Rat. Graham W. Boyd

Pulmonary Vasodilator Activity of Prostacyclin (PGI2) in the Cat. Albert L. Hyman and Philip J. Kadowitz

Diastolic Viscous Properties of the Intact Canine Left Ventricle. Hubert Poulter, Joel S. Karliner, Martin M. LeWinter, and James W. Cowell

Letters to the Editor

No. 4 (October)

Evidence from Bioassay Studies Indicating a Role for Adenosine in Cardiac Ischemic and Hypoxic Dilation in the Dog. J.B. Scott, W.T. Chen, B.T. Swindall, J.M. Dabney, and F.J. Haddy
