Presence of Negative Inotropic Agents in Canine Plasma during Positive End-Expiratory Pressure. 
Gene A. Grindlinger, Jonah Manny, Richard Justice, Bernadette Dunham, David Shepro, and Herbert B. Hechtman .......................................................... 460
Coronary Vasoreactivity of Adenosine in the Conscious Dog. Ray A. Olsson, Edward M. Khouri, Julius L. Bednyek, Jr., and John McLean ............................................. 468
Sensitization of Isolated Canine Coronary Arteries to Calcium Ions after Exposure to Cholesterol. 
Mitsuhiko Yokoyama and Philip D. Henry .......................................................... 479
Brain Adenosine Production in the Rat during 60 Seconds of Ischemia. H. Richard Winn, Rafael Rubio, and Robert M. Berne ...................................................... 486
Effect of Acetylcholine on the Norepinephrine-Induced Positive Chronotropy and Increase in Cyclic Nucleotides of Isolated Rabbit Sinoatrial Node. Takashi Taniguchi, Motohatsu Fuijwara, Jeung Ja Lee, and Hiroyoshi Hitada .................................................. 493
Changes in Mitochondrial DNA in Cardiac Hypertrophy in the Rat. Chellam Rajamanickam, Sylvie Merten, Barbara Kwiatkowska-Patzer, Chi-Hsiang Chuang, Radovan Zak, and Murray Rubenowitz .................................................. 505
Participation of Adrenergic and Noradrenergic Neurones in Central Connections of Arterial Baroreceptor Reflexes in the Rat. John P. Chalmers, Margaret A. Petty, and John L. Reid .................................................. 516
Cardiac Atrial Myosin Adenosine Triphosphatase of Animals and Humans: Distinctive Enzymatic Properties Compared with Cardiac Ventricular Myosin. Yoshiro Yasaki, Seigo Ueda, Ryozo Nagai, and Kazuyuki Shimada .................................................. 522
Effects of the Oral Converting Enzyme Inhibitor, SQ 14225, in a Model of Low Cardiac Output in Dogs. Ronald H. Freeman, James O. Davit, Gary M. DeForrest, Jack M. DeForrest, Andrea A. Seymour, and Brian P. Rowe .................................................. 540
Hydrolase Activities in the Rat Aorta. III. Effects of Regular Swimming Activity and Its Cessation. 
Harvey Wolinsky, Sidney Goldfischer, Debra Katz, Ronald Markle, Lewis Gidez, Sylvia Wassertheil-Smoller, and Bernice Costoff-Schiller .................................................. 546
Sarcotom Length-Resting Tension Relation in Single Frog Atrial Cardiac Cells. Merrill Tarr, John W. Trank, Paul Leffer, and Neal Shepherd .................................................. 554
Decreased Cardiac β-Adrenergic Receptors in Deoxycorticosterone-Salt and Renal Hypertensive Rats. 
Elizabeth A. Woodcock, John W. Funder, and Colin I. Johnston .................................................. 560
Transient Responses of Rabbit Cerebral Blood Vessels to Norepinephrine: Correlation with Intrinsic Myogenic Tone. John A. Bevan .................................................. 566
News from the American Heart Association .................................................. 573
No. 5 (November)
Time Course of Increased Collateral Arterial and Venous Endothelial Cell Turnover after Renal Artery Stenosis in the Rat. Nenad Illich, Norman K. Hollenberg, Deborah H. Williams, and Herbert L. Abrams .................................................. 579
Intrarenal Vascular Resistance in Glycerol-Induced Acute Renal Failure in the Rat. Chen H. Hsu, Theodore W. Kurtz, and Christine E. Sands .................................................. 583
The Elasticity of Canine and Human Coronary Arteries with Reference to Postmortem Changes. Barry S. Gow and Clive D. Hadfield .................................................. 588
Phasic Effects of Vagal Stimulation on Pacemaker Activity of the Isolated Sinus Node of the Young Cat. 
John P. Chalmers, Margaret A. Petty, and John L. Reid .................................................. 595
Evoked Release of Endogenous Norepinephrine in the Canine Saphenous Vein: Inhibition by Acetylcholine. 
P.M. Vanhoutte, E.P. Coen, W.J. De Ridder, and T.J. Verbeuren .................................................. 608
Effects of Neural Stimuli on Blood Flow through Vasa Vascularis in Dogs. Donald D. Heistad, Melvin L. Marcus, and James B. Martins .................................................. 615
The Plasma Membrane of Leading Pacemaker Cells in the Rabbit Sinus Node: A Qualitative and Quantitative Ultrastructural Analysis. Mireille Masson-Pevet, Wim K. Bleeker, and Daniel Gros .................................................. 621
Serotonin Metabolism in the Normal and Failing Hamster Heart. Michael J. Sole, Andrew  Shum, and Glen R. Van Loon .................................................. 629
Modulating Effect of Regional Myocardial Performance on Local Myocardial Perfusion in the Dog. 
Mario Marzilli, Sidney Goldfischer, Hani N. Sabbah, Tennyson Lee, and Paul D. Stein .................................................. 634
Time-Dependent Shifts of the Left Ventricular Diastolic Filling Relationship in Conscious Dogs. 
Martin M. LeWinter, Robert Engler, and Richard S. Pavelec .................................................. 641
α-Adrenoceptor Attenuation of the Coronary Vascular Response to Severe Exercise in the Conscious Dog. 
Paul A. Murray and Stephen F. Vatner .................................................. 654
Cellular Thin Filament Protein Content and Force Generation in Porcine Arteries and Veins. David M. Cohen and Richard A. Murphey .................................................. 661
Cardiotoxic Activity of Aminorone—Win 40690 [S-Amino-3,4'-bipyridin-6(1H)-one]. Afadwa A. Alousi, Alfred E. Farah, George Y. Lesher, and Chester J. Opalka, Jr. .................................................. 666
Mechanism of Action of Methyldopa in the Rat: Role of 3-O-Methylated Metabolites. Frank G. Zavisca, Alan P. Breau, and Richard J. Wurtman .................................................. 684
