Brief Reviews: Receptors under Pressure: An Update on Baroreceptors. Arthur M. Brown

Asymmetry of Consequences of Drug Disposition Mechanisms in the Wall of the Rabbit Aorta. Rodolfo Pascual and John A. Beyan

Transmural Ventricular Distribution of Coronary Blood Flow during Coronary β-Adrenergic Receptor Activation in Dogs. Raul J. Domenech and Peter MacLellan

Neural Effects on Sinus Rate and Atrioventricular Conduction Produced by Electrical Stimulation from a Transvenous Electrode Catheter in the Canine Right Pulmonary Artery. Terry B. Cooper, Gilbert R. Hageman, Thomas N. James, and Albert L. Waldo

Evidence and Quantitation of the Vasopressin Arterial Pressure Control System in the Dog. Allen W. Cowley, Jr., Sara J. Switzer, and Meredith M. Guinn

Effects of Preload on the Transmural Distribution of Perfusion and Pressure-Flow Relationships in the Canine Coronary Vascular Bed. Avery K. Ellis and Francis J. Klocke

Responses of the Heart to Stimulation of Aortic Body Chemoreceptors in Dogs. F. Karim, R. Hainsworth, O. A. Sotto, and L. M. Wood

Alveolar Hypoxia Increases Lung Fluid Filtration in Unanesthetized Newborn Lambs. Michael A. Bressack and Richard D. Black

Effects of Tetrodotoxin, Lidocaine, Verapamil, and AHR-2666 on Ouabain-Induced Delayed Afterdepolarizations in Canine Purkinje Fibers. Michael R. Rosen and Peter Danilo, Jr.

Continuous Positive-Pressure Ventilation Decreases Right and Left Ventricular End-Diastolic Volumes in the Dog. James E. Fewell, Dana R. Abendschein, C. Jeffrey Carlson, John F. Murray, and Elliot Rapaport

Oxygen Consumption in Subepicardial and Subendocardial Regions of the Canine Left Ventricle: The Effect of Experimental Acute Valvular Aortic Stenosis. J. Vinten-Johansen and Harvey R. Weiss

Instructions to Authors

News from the American Heart Association
CONTENTS OF VOLUME 46

Effect of Acute Hypoxia on the Pulmonary Conversion of Angiotensin I to Angiotensin II in Dogs. Peter Szidon, Noel Bailey, and Suzanne Oparil .................................................. 221

Quantitative Studies on Plasmalemmal Folds and Caveolae of Rabbit Ventricular Myocardial Cells. Katherine Roscoe Levin and Ernest Page ........................................... 244

The Interrelationship among Histamine, Various Vasoactive Substances, and Macromolecular Permeability in the Canine Forelimb. George J. Greig, James J. Maciejko, Richard M. Raymond, and Daniel P. Sak ............... 264

Role of Peripheral Vasodilation in the Hypotensive Response to Left Ventriculography in Anesthetized Dogs. David D. Shaw, Gerald L. Wolf, and Harold A. Baltaxe ........................................... 276

A Comparison of Volume Conductor and Source Geometry Effects on Body Surface and Epicardial Potentials. Yoram Rudy and Robert Plonsey .................................................. 283

Mechanical Properties of Myocardium from Hypertrophied Rat Hearts: A Comparison between Hypertrophy Induced by Senescence and by Aortic Banding. Frank C. P. Yin, Harold A. Spurgeon, Myron L. Weisfeldt, and Edward G. Lakatta .................................................. 292

Letters to the Editor .................................................................................................................. 301

No. 3 (March)

The Law of Laplace: Its Limitations as a Relation for Diastolic Pressure, Volume, or Wall Stress of the Left Ventricle. Thomas F. Moriarity .................................................. 321

Ryanodine Alteration of the Contractile State of Rat Ventricular Myocardium: Comparison with Dog, Cat, and Rabbit Ventricular Tissues. John Sutko and James T. Willerson .................................................. 322

Dual Mechanism for Inhibition of Calcium-Dependent Action Potentials by Acetylcholine in Avian Ventricular Myocardium. Rebecca L. Biegon and Achilles J. Pappano .................................................. 344

Membrane Electrical Effects of Histamine on Vascular Smooth Muscle of Canine Coronary Artery. David R. Harder .................................................. 363

The Role of Vagal Afferents in the Reflex Control of the Left Ventricular Refractory Period in the Cat. Robert W. Blair, Takeshi Shimizu, and Vernon S. Bishop .................................................. 372

Renal Receptors in the Rat Sensitive to Chemical Alterations of Their Environment. Giorgio M. Recordati, Nicholas G. Moss, Simonetta Genovesi, and Paula R. Rogenes .................................................. 387

The Mechanism of α-Adrenergic Activation of the Dog Coronary Artery. Cornelis van Bree and Bette Siegel .................................................. 415

Effect of Pacing-Induced Ischemia on Left Ventricular Diastolic Pressure-Volume Relations in Dogs with Coronary Stenoses. Takashi Serizawa, Blase A. Carabello, and William Grossman .................................................. 426

Enhanced Recovery from Postischemic Acute Renal Failure: Micropuncture Studies in the Rat. William F. Finn .................................................. 430

News from the American Heart Association .................................................................. 457

No. 4 (April)

The Role of the Sodium Pump in the Control of Vascular Tone in the Rat. Stanley Lang and Mordecai P. Blaustein .................................................. 463

Stimulation by Bradykinin of Afferent Vagal C-Fibers with Chemosensitive Endings in the Heart and Aorta of the Dog. Marc P. Kaufman, David G. Baker, Hazel M. Coleridge, and John C.G. Coleridge .................................................. 476

Distribution of Lysosomal Cathepsin D in Normal, Ischemic, and Starved Rabbit Cardiac Myocytes. Robert S. Decker, A. Robin Poole, and Kern Wildenthal .................................................. 485

News from the American Heart Association .................................................................. 457
CONTENTS OF VOLUME 46

No. 5 (May)

Cardiac Responses during Stimulation of the Dorsal Motor Nucleus and Nucleus Ambiguus in the Cat. G. Steven Geis and Robert D. Wurster ......................................................... 606

The Effect of Antiarrhythmic Drugs on Depressed Conduction and Unidirectional Block in Sheep Purkinje Fibers. Robert B. Wald, Menashe B. Waxman, and Eugene Downar .......................................................... 612

Changes in Renal Vascular Reactivity at Various Stages of Deoxycorticosterone Hypertension in Rats. Kathleen H. Berecek, Martha Stocker, and Franz Gross .............................................. 619

Comparison of the Effects of Regional Ischemia, Hypoxia, Hyperkalemia, and Acidosis on Intracellular and Extracellular Potentials and Metabolism in the Isolated Porcine Heart. Hervé Moreina, Michel J. Janse, Jan W.T. Foket, Willem J.G. Krieger, Harry Crjns, and D. Durrer .............................................. 634

Effect of Exogenous Angiotensin II on Renal Hemodynamics in the Awake Rat. Chen H. Hsu, Theodore W. Kurtz, and James M. Slavicek .......................................................... 646

Metabolism of Complex Carbohydrates by Fibroblasts from Rheumatic and Normal Human Subjects. M. Mansoor Baig and Elia M. Ayoub ...................................................... 651

Electrophysiological Effects of Disopyramide and Quinidine on Guinea Pig Atria and Canine Cardiac Purkinje Fibers. Dependence on Underlying Cholinergic Tone. Michael J. Mirro, August M. Watanabe, and John C. Bailey ...................................................... 660

Membrane and Contractile Properties of Rat Vascular Tissue in Copper-Deficient Conditions. Seigo Kitano .......................................................... 681

Ontogenesis of Cholinergic Innervation in the Rat Heart. William J. Marvin, Jr., Kent Hermseymeyer, Ruth I. McDonald, Laura M. Roskoski, and Robert Roskoski, Jr. ...................................................... 690

Effects of Sympathetic Nerves on Cerebral Vessels during Acute, Moderate Increases in Arterial Pressure in Dogs and Cats. David W. Busija, Donald D. Heistad, and Melvin L. Marcus ...................................................... 696

Tension Development and Sarcomere Length in Rat Cardiac Trabeculae. Evidence of Length-Dependent Activation. Henk E.D.J. ter Keurs, Willem H. Ruissenburger, Rob van Heuning, and Michiel J. Nagelomt ...................................................... 714

Synthesis and Pharmacology of a Noncompetitive Antagonist of Angiotensin-induced Contractions of Vascular Smooth Muscle: [Sarcosyl] [Cysteinyl (S-Methyl)]²-Angiotensin II. Richard J. Frer, James C. Sutherland, Jr., and Alan R. Day ...................................................... 714

No. 6 (June)

Effects of “Paradoxical” Systolic Fiber Stretch on Ischemic Myocardial Contracture, Compliance, and Contractility in the Rabbit. Carl S. Aspelin and J. David Ogilby ........................... 745

Role of Adenosine in Local Control of Intestinal Circulation in the Dog. Harris J. Granger and Carrie P. Norris .............................................................. 764

Basis of pH-Independent Inhibitory Effects of Lactate on Ca Movements and Responses to KCI and PGF20 in Canine Coronary Arteries. R. Kelly Hester, George B. Weiss, and James T. Willerson ................. 771

Cardiovascular Reflexes Resulting from Capsaicin-Stimulated Gastric Receptors in Anesthetized Dogs. John C. Longhurst, Juliet H. Ashton, and Gary A. Iwamoto ................................... 780

Procainamide Delivery to Ischemic Canine Myocardium following Rapid Intravenous Administration. Thomas L. Wenger, David J. Browning, Christopher E. Masterton, Mohamed B. Abou-Donia, Frank E. Harrell, Jr., Robert J. Bache, and Harold C. Strauss ...................... 789

The Dynamics of the Lung Fluid Filtration System in Dogs with Edema. Marlys H. Gee and James A. Spath, Jr. ................................................................. 796

Identification of an Angiotensin Receptor in Rabbit Renomedullary Interstitial Cells in Tissue Culture: Correlation with Prostaglandin Biosynthesis. C. Alan Brown, Randall M. Zusman, and Edgar Haber ............................. 802

Different Electrophysiological Responses of Canine Endocardium and Epicardium to Combined Hyperkalemia, Hypoxia, and Acidosis. Robert F. Gilmour, Jr., and Douglas P. Zipes .... 814

Interaction between Na+,K+ Exchanges and the Direct Inhibitory Effect of Acetycholine on Canine Femoral Arteries. Jozef G. De Mey and Paul M. Vanhoutte ........................................ 826

In Vitro Neurogenic and Musculotropic Responses to Angiotensin Peptides in Normal and Sodium-Restricted Rabbits. Edmund J. Sybertz and Michael J. Peach ........................................ 836

Chronic Liability of Arterial Pressure Produced by Destruction of A2 Catecholaminergic Neurons in Rat Brainstem. William T. Talman, David Snyder, and Donald J. Reis ........................................... 842

Protective Effects of Thromboxane Synthetase Inhibitors in Rats in Endotoxic Shock. W. Curtis Wise, James A. Cook, Perry V. Halushka, and Daniel R. Knapp............................................. 854

Effects of Atrial Pacing on Atrio-Sinus Conduction and Overdrive Suppression in the Isolated Rabbit Sinus Node. Gerhard Steinbeck, Ralph Haberl, and Berndt Luderitz ........................................ 859

Hypoxic Contraction of Isolated Canine Coronary Artery: Mediation by Potassium-Dependent Exocytosis of Norepinephrine. Leonor J. Borda, Rafael Schuchleib, and Philip D. Henry ............ 870

Lack of Nonexcretory Renal Influences on Hemodynamics and Fluid Volume Distribution after the Volume Loading of Conscious Dogs. R. Davis Manning, Jr. .............................................. 880

Letters to the Editor .............................................................................. 887
