Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 48
January-June 1981

No. 1 (January)

Brief Reviews: Lipid-Membrane Interactions and the Pathogenesis of Ischemic Damage in the Myocardium.
Arnold M. Katz and Frank C. Messineo ............................................................... 1

Role of Changes in Microsomal Calcium Uptake in the Effects of Reperfusion of Ca\textsuperscript{2+}-Deprived Rat Hearts.
Lauri E. Alto and Naranjan S. Dhalla ................................................................. 17

Reduction of Maximal Coronary Vasodilator Capacity in Conscious Dogs with Severe Right Ventricular Hypertrophy.
Paul A. Murray and Stephen F. Vatner ............................................................... 25

Decreased Vascular and Increased Adrenal and Renal Sensitivity to Angiotensin II in the Newborn Lamb.
Sharon R. Siegel .................................................................................................. 34

\textit{pH}-Dependent Electrophysiological Effects of Quinidine and Lidocaine on Canine Cardiac Purkinje Fibers.
Stanley Nattel, Victor Elharrarr, Douglas P. Zipes, and John C. Bailey ................. 55

Effects of Cholinergic Nerves on Cerebral Blood Flow in Cats. David W. Busija and Donald D. Heistad ................................................................. 62

Effects of Intra coronary Administration of Bradykinin on the Impulse Activity of Afferent Sympathetic Unmyelinated Fibers with Left Ventricular Endings in the Cat. Federico Lombardi, Paolo Della Bella, Rodolfo Casali, and Alberto Malliani ................................................................. 69

Regional Myocardial Blood Flow during Exercise in Dogs with Chronic Left Ventricular Hypertrophy.

Intravenous Bovine Testicular Hyaluronidase Depolymerizes Myocardial Hyaluronic Acid in Dogs with Coronary Artery Occlusion. Robert A. Wolf, Lee-Yuh Chaung, James E. Muller, Robert A. Kloner, and Eugene Braunwald ................................................................. 88

Inhibition by Free Radical Scavengers and by Cyclooxygenase Inhibitors of Pial Arteriolar Abnormalities from Concussive Brain Injury in Cats. Enoch P. Wei, Hermes A. Kontos, W. Dalton Dietrich, John T. Povlishock, and Earl F. Ellis ................................................................. 95

Regulation of the Postsynaptic \textalpha-Adrenergic Receptor in Rat Mesenteric Artery. Effects of Chemical Sympathectomy and Epinephrine Treatment. Wilson S. Colucci, Michael A. Gimbrone, Jr., and R. Wayne Alexander ................................................................. 104

\textbeta-Adrenergic Regulation of Total Systemic Intravascular Volume in the Dog. David L. Rutlen, Edward N. Supple, and Wm. John Powell, Jr ................................................................. 112

Regional Edema Formation in Isolated Perfused Dog Lungs. Charles A. Hales, David J. Kanarek, Bhagwat Aihulwala, Alexander Latty, John Erdmann, Shahrokh Javaheri, and Homayoun Kazemi ................................................................. 121

Instructions to Authors ....................................................................................... 149

News from the American Heart Association ........................................................ 152

No. 2 (February)

Brief Reviews: Role of the Intrarenal Renin-Angiotensin System in the Control of Renal Function.
Nigel R. Levens, Michael J. Peach, and Robert M. Carey ........................................ 157

Mechanism of Generation of Body Surface Electrocardiographic P-Waves in Normal, Middle, and Lower Sinus Rhythms. William J. Elffer, Emilio Macchi, Hendrik Jan Ritsema van Eck, B. Milan Horacek, and Pentti M. Rautaharju ................................................................. 166

Effects of Angiotensin II on the Blood Flow and Its Distribution in Fetal Lambs. Harriet S. Iwamoto and Abraham M. Rudolph ................................................................. 183

Characteristics of Sarcomere Shortening in Single Frog Atrial Cardiac Cells during Lightly Loaded Contractions. Merrill Tarr, John W. Trank, and Paul Leiffer ................................................................. 189

Evidence That the Velocity of Sarcomere Shortening in Single Frog Atrial Cardiac Cells is Load Dependent. Merrill Tarr, John W. Trank, Paul Leiffer, and Neal Shepherd ................................................................. 199

Release of Vasodilator, Prostaglandin, PG\textsubscript{I\alpha}, from Isolated Rat Lung during Vasocostriction. Norbert F. Voeltke, John G. Gerber, Ivan F. McMurtry, Alan S. Nies, and John T. Reeves ................................................................. 207

Mechanisms Mediating the Coronary Vascular Response to Behavioral Stress in the Dog. George E. Billman and David C. Randall ................................................................. 214
CONTENTS OF VOLUME 48

No. 3 (March)

The Effect of Verapamil on Mechanical Performance of Acutely Ischemic and Reperfused Myocardium in the Conscious Dog. Lon G. Sherman, Chang-seng Liang, William E. Boden, and William B. Hood, Jr. 224

Pericardial Modulation of Right and Left Ventricular Diastolic Interaction. Joel Spadaro, Oscar H.L. Bing, William H. Gaasch, and Ronald M. Weintraub 233

Nuclear Uptake of Sex Steroid Hormones in the Cardiovascular System of the Baboon. Henry C. McGill, Jr., and Peter J. Sheridan 238

Developmental Changes in the Sensitivity of the Chick Embryo Ventricles to β-Adrenergic Agonist during Adrenergic Innervation. Dennis Higgins and Achilles J. Pappano 245

Relative Contributions of Arginine Vasopressin and Angiotensin II to Maintenance of Systemic Arterial Pressure in the Anesthetized Water-Deprived Rat. Charles E. Andrews, Jr., and Barry M. Brenner 254

Inhibitory Action of Adenosine on Histamine- and Dopamine-Stimulated Cardiac Contractility and Adenylyl Cyclase in Guinea Pigs. Gert Baumann, Jürgen Schrader, and Eckehart Gerlach 259

Partition of Carotid Sinus Baroreceptor Response in Dogs with Chronic Renal Hypertension. Esmail Koushanpour and Karlie J. Kenfield 267

Angiotensin-Converting Enzyme Activity and Its Modulation by Oxygen Tension in the Guinea Pig Fetal-Placental Unit. Dennis Davidson, S. Alex Stalcup, and Robert B. Mellins 286

Acute Hypertension after the Local Injection of Kainic Acid into the Nucleus Tractus Solitarii of Rats. William T. Talman, Mark H. Perrone, and Donald J. Reis 292

Letters to the Editor 299

News from the American Heart Association 302

No. 2 (February)

Controversies in Cardiovascular Research: Similarities of Genetic (Spontaneous) Hypertension. Man and Rat. Nick C. Trippodo and Edward D. Frohlich 309

Age Dependence of Myocardial Na⁺/K⁺-ATPase Activity and Digitalis Intoxication in the Dog and Guinea Pig. Allan J. Marsh, Brian L. Lloyd, and Roger R. Taylor 329

Leukocytes Are Required for Increased Lung Microvascular Permeability after Microembolization in Sheep. Michael R. Flick, Azriel Perel, and Norman C. Staub 344

Relaxation Properties of Mammalian Atrial Muscle. Marie M. Couttenye, Nora M. De Clerck, Marc A. Goethals, and Dirk L. Brutsaert 352

Pressure-Diameter Relations during Early Diastole in Dogs: Incompatibility with the Concept of Passive Left Ventricular Filling. Hani N. Sabha and Paul D. Stein 357

The Effect of Nitroglycerin and Nitroprusside on Intramural Carbon Dioxide Tension during Acute Experimental Myocardial Ischemia in Dogs. L. David Hillis, Carl Davis, and Shukri F. Khuri 372

Carnitine Transport in Isolated Adult Rat Heart Myocytes and the Effect of 7,8-diOH Chlorpromazine. Joseph Bahl, Thomas Navin, Albert A. Manian, and Rubin Bresser 378

The Effect of Hemorrhagic Hypotension on Urinary Kallikrein Excretion, Renin Activity, and Renal Cortical Blood Flow in the Pig. Manfred Maier, Michael Starlinger, Michael Wagner, Dieter Meyer, and Bernd R. Binder 386

Inhibitors of Oxidative ATP Production Cause Transient Vasostenolysis and Block Subsequent Pressor Responses in Rat Lungs. Sharon Rounds and Ivan F. McMurtry 393

Effects of Anesthesia on the Canine Carotid Chemoreceptor Reflex. Michael Zimpler, Siu Po Sit, and Stephen F. Vatner 400

Letters to the Editor 449

News from the American Heart Association 449
CONTENTS OF VOLUME 48

No. 4 (April)

Controversies in Cardiovascular Research: The Rat with Spontaneous Genetic Hypertension is Not a Suitable Model of Human Essential Hypertension. John C. McGiff and Caroline P. Quilley .................................................. 455
Diffusional Shunting in the Canine Myocardium. Allan C. Roth and Eric O. Feigl .................................................. 470
Relationship between Blood Flow Direction and Endothelial Cell Orientation at Arterial Branch Sites in Rabbits and Mice. B. Lowell Langille and S. Lee Adamson .................................................. 481
Chronic Progressive Pressure Overload of the Cat Right Ventricle. George Cooper, IV, Robert J. Tomanek, James C. Ehrhardt, and Melvin L. Marcus .................................................. 488
Phosphorylation and Adenosine Triphosphatase Activity of Myofibrils from Thyrotropic Rabbit Hearts. Raye Z. Litten, Ill, Barbara Jill Martin, Elizabeth R. Howe, Norman R. Alpert, and R. John Solaro .................................................. 496
Reflex a-Adrenergic Coronary Vasoconstriction during Hindlimb Static Exercise in Dogs. Ronald Aung-Din, Jere H. Mitchell, and John C. Longhurst .................................................. 502
Oscillatory Afterpotentials in Dog Ventricular Muscle Fibers. Masayasu Hiraoka, Yasutaka Okamoto, and Toyomi Sano .................................................. 510
Effects of Exercise on the Coronary and Collateral Vasculature of Beagles with and without Coronary Occlusion. Konrad W. Scheel, Leslie A. Ingram, and Jack L. Wilson .................................................. 523
Pacing-Induced Automaticity in Sheep Purkinje Fibers. Robert W. Wald and Menashe B. Waxman .................................................. 531
Energy Turnover and Mechanical Properties of Resting and Contracting Aortas and Portal Veins from Normo- and Spontaneously Hypertensive Rats. Anders Arner and Per Hellstrand .................................................. 539
Postnatal Development of the M-Band in Rat Cardiac Myofibrils. Piero Anversa, Giorgio Olivetti, Pier-Giovanni Bracchi, and Alden V. Loud .................................................. 561
Effects of Nitroglycerin on Regional Myocardial Ischemia Induced by Atrial Pacing in Dogs. Joseph L. Gurry, Jr., Hartzell V. Schaft, Clayton H. Kallman, and John T. Flaherty .................................................. 569
Hypertension following Arterial Baroreceptor Denervation in the Unanesthetized Dog. Cyril S. Ito and Allen M. Scher .................................................. 576
Comment: Baroreceptor Denervation Hypertension? Allen W. Cowley, Jr. .................................................. 587
Reply. Allen M. Scher .................................................. 589
Letters to the Editor .................................................. 592
News from the American Heart Association .................................................. 595

No. 5 (May)

Brief Reviews: Protein Synthesis and Degradation in Cardiac Stress. Sidney S. Schreiber, Carole D. Evans, Murray Oratz, and Marcus A. Rothschild .................................................. 601
The Opposing Effects of Chronic Angiotensin-Converting Enzyme Blockade by Captopril on the Responses to Exogenous Angiotensin II and Vasopressin vs. Norepinephrine in Rats. François Spertiini, Hans R. Brunner, Bernard Waeder, and Haralampos Gavros .................................................. 612
An Oscillatory Current in Sheep Cardiac Purkinje Fibers. Mario Vassalle and Alessandro Mugelli .................................................. 618
Altered Renal Hemodynamic and Urinary Prostaglandin Response to Acute Hypoxemia after Inhibition of Prostaglandin Synthesis in the Anesthetized Dog. Douglas N. Weismann .................................................. 632
The Selective Inhibition of Serotonin-Induced Contractions of Rabbit Cerebral Vascular Smooth Muscle by Calcium-Antagonistic Dihydropyridines: An Investigation of the Mechanism of Action of Nimodipine, Robertson Towart .................................................. 650
The Electrophysiological Properties of Normal Neonatal and Adult Canine Cardiac Purkinje Fibers. Robert F. Reder, Dennis S. Miura, Peter Danilo, Jr., and Michael R. Rosen .................................................. 658
Hyperemia of the Aortic Wall in Atherosclerotic Monkeys. Donald D. Heistad, Mark L. Armstrong, and Melvin L. Marcus .................................................. 669
Operational Sensitivity and Acute Resetting of Aortic Baroreceptors in Dogs. Hazel M. Coleridge, John C.G. Coleridge, Marc P. Kaufman, and Albert Dangel .................................................. 676
The Cardiocardiac Sympathetic Reflex during Coronary Occlusion in Anesthetized Dogs. Robert B. Felder and Marc D. Thames .................................................. 685
The Role of the Right Heart in Acute Cardiac Tamponade in Dogs. Roy Ditchey, Robert Engler, Martin LeWinter, Richard Pavelec, Valmik Bhargava, James Covell, William Moores, and Ralph Shabetai .................................................. 701
Phospholipid Alterations in Canine Ischemic Myocardium: Temporal and Topographical Correlations with Tc-99m-PP1 Accumulation and an in Vitro Sarcolemmal Ca++ Permeability Defect. Kenneth R. Chien, John P. Reeves, L. Maximilian Buja, Frederick Bonte, Robert W. Parkey, and James T. Willerson .................................................. 711
CONTENTS OF VOLUME 48

Afterpotentials and Triggered Activity in Hypertrophied Myocardium from Rats with Renal Hypertension.
Ronald S. Aronson .......................................................... 720

Control of Rat Renal Vascular Resistance during Alterations in Sodium Balance. Paul A. Johnston,
David B. Bernard, Nancy S. Perrin, Leonard Arbet, Wilfried Lieberthal, and Norman G. Levinsky ...... 728

Control of Rat Renal Vascular Resistance at Reduced Perfusion Pressure. Paul A. Johnston, Nancy S. Perrin,
David B. Bernard, and Norman G. Levinsky ........................................... 734

Relationship between Structure and Fatty Acid Metabolism in Mitochondria Isolated from Ischemic Rat Hearts.
Danielle Feuvray and Jean Piquet ......................................................... 740

Comparison of Microsphere and Xenon-133 Clearance Method in Measuring Skeletal Muscle and Cerebral
Blood Flow. Melvin L. Marcus, Charles J. Bischof, and Donald D. Heistad .................................................. 748

News from the American Heart Association ............................................. 762

No. 6 (June)

Brief Reviews: Hormonal and Metabolic Reactions Evoked by Acute Myocardial Infarction.
Leszek Ceremuzynski ........................................................................ 767

Effect of Carotid Occlusion and of Perfusion Pressure on Renal Function in Conscious Dogs. Rainer Gross,
Hartmut Kirchheim, and Kai Ruffmann .................................................. 777

Regional Myocardial Blood Flow and Coronary Vascular Reserve in Unanesthetized Young Calves with Severe
Concentric Right Ventricular Hypertrophy. Murli Manohar, John C. Thurmon, William J. Tranquilli,
Michael D. Devous, Sr., Michael C. Theodorakis, Richard V. Shawley, Douglas L. Feller, and
John G. Benson .............................................................................. 785

Load-Insensitive Relaxation Caused by Hypoxia in Mammalian Cardiac Muscle. Leonard H.S. Chuck,
Mark A. Goethals, William W. Parmley, and Dirk L. Brutsaert ................................................................. 797

Adaptation to Prolonged β-Blockade of Rabbit Atrial, Purkinje, and Ventricular Potentials, and of Papillary
Muscle Contraction: Time-Course of Development of and Recovery from Adaptation. A.E.G. Raine and
E.M. Vaughan Williams ...................................................................... 804

Volume Loading Slows Left Ventricular Isovolumic Relaxation Rate: Evidence of Load-Dependent Relaxation in
the Intact Dog Heart. Gilbert L. Rafi and Stanton A. Glantz ................................................................. 813

The Circulatory Effects of Acute Hypervolemia and Hemodilution in Conscious Rabbits. Irwin B. Faris,
John Ianno, Glyn G. Jamieson, and John Ludbrook .............................................................................. 825

Role of the Prostaglandins in Norepinephrine Release during Augmented Renal Sympathetic Nerve Activity in
the Dog. Juan A. Oliver, Robert R. Sciacca, John Pinto, and Paul J. Cannon ............................................. 835

Non-Steroidal Anti-Inflammatory Drugs Potentiate the Vasocostrictor Effects of Ouabain in the Dog.
Alan S. Nies and John G. Gerber ........................................................................... 844

The Utilization by Rabbit Aorta of Carbohydrates, Fatty Acids, Ketone Bodies, and Amino Acids as Substrates
for Energy Production. Kenneth V. Chase and Richard Odessey ................................................................. 850

Effects of Carnitine Isomers on Fatty Acid Metabolism in Ischemic Swine Hearts. A. James Liedtke,
Stephen H. Neill, and Larry F. Whitesell ................................................................. 859

Electrophysiological Effects of the Optical Isomers of Disopyramide and Quinidine in the Dog: Dependence on
Stereochemistry. Michael J. Mirro, August M. Watanabe, and John C. Bailey ............................................ 867

Uneven Distribution of Postjunctional Alpha-, and Alpha-2-like Adrenoceptors in Canine Arterial and Venous
Smooth Muscle. Jo De Mey and Paul M. Vanhoucke ........................................................................... 875

Influence of Secobarbital and α-Chloralose, and of Vagal and Sympathetic Interruption, on Left Ventricular
Activation after Acute Coronary Artery Occlusion in the Dog. Rodolphe Rufty, D. Eugene Lovelace,
Suzanne B. Knoebel, and Douglas P. Zipes ..................................................................................... 884

Vascular Responses of the Perfused Intestine to Vasoactive Agents during the Development of Two-Kidney,
One-Clip Goldblatt Hypertension in Dogs. Stan Greenberg ..................................................................... 895

The Effect of Hypephosectomy on Experimental Endothelial Cell Regrowth and Intimal Thickening in the Rat.
Michael A. Bettmann, Michael B. Stemerman, and Bernard J. Ransil ......................................................... 907

The Significance of the NH₃-NH₄ Equilibrium on the Passage of ¹⁵N-Ammonia from Blood to Brain: A New
Regional Residue Detection Model. Marcus E. Raichle and Kenneth B. Larson ........................................... 913

Variable Effect of Nifedipine on Myocardial Blood Flow at Three Grades of Coronary Occlusion in the Dog.
William S. Weintraub, Shigehiko Hatton, Jai Agarwal, Monty M. Bodenheimer, Vidya S. Banka, and
Richard H. Helfant .............................................................................. 937

News from the American Heart Association ................................................................. 943

Volume Author Index ............................................................. 948

Volume Subject Index ................................................................. 950

Supplement Author Index ............................................................. 956

Supplement Subject Index ............................................................. 957
