Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 48
January-June 1981

No. 1 (January)

Brief Reviews: Lipid-Membrane Interactions and the Pathogenesis of Ischemic Damage in the Myocardium.
Arnold M. Katz and Frank C. Messineo .......................................................... 1

Role of Changes in Microsomal Calcium Uptake in the Effects of Reperfusion of Ca\(^{2+}\)-Deprived Rat Hearts.
Lauri E. Alto and Naranjan S. Dhalla ........................................................... 17

Reduction of Maximal Coronary Vasodilator Capacity in Conscious Dogs with Severe Right Ventricular Hypertrophy, Paul A. Murray and Stephen F. Valner .......................................................... 25

Decreased Vascular and Increased Adrenal and Renal Sensitivity to Angiotensin II in the Newborn Lamb. Sharon R. Siegel .................................................. 34

pH-Dependent Electrophysiological Effects of Quinidine and Lidocaine on Canine Cardiac Purkinje Fibers.
Stanley Nettel, Victor Elharrar, Douglas P. Zipes, and John C. Bailey .............. 55

Effects of Cholinergic Nerves on Cerebral Blood Flow in Cats. David W. Busija and Donald D. Heistad .......................................................... 62

Effects of Intracoronary Administration of Bradykinin on the Impulse Activity of Afferent Sympathetic Unmyelinated Fibers with Left Ventricular Endings in the Cat. Federico Lombardi, Paolo Della Bella, Rodolfo Casati, and Alberto Malliani .................................................. 69

Intravenous Bovine Testicular Hyaluronidase Depolymerizes Myocardial Hyaluronic Acid in Dogs with Coronary Artery Occlusion. Robert A. Wolf, Lee-Yuh Chaung, James E. Muller, Robert A. Klomer, and Eugene Braunwald .......................................................... 88

Inhibition by Free Radical Scavengers and by Cyclooxygenase Inhibitors of Pial Arteriolar Abnormalities from Concussive Brain Injury in Cats. Enoch P. Wei, Hermes A. Kontos, W. Dalton Dietrich, John T. Povlishock, and Earl F. Ellis .......................................................... 95

Regulation of the Postsynaptic \(\alpha\)-Adrenergic Receptor in Rat Mesenteric Artery. Effects of Chemical Sympathectomy and Epinephrine Treatment. Wilson S. Colucci, Michael A. Gimbrone, Jr., and R. Wayne Alexander .......................................................... 104

\(\beta\)-Adrenergic Regulation of Total Systemic Intravascular Volume in the Dog. David L. Rutlen, Edward N. Supple, and Wm. John Powell, Jr. .......................................................... 112

Regional Edema Formation in Isolated Perfused Dog Lungs. Charles A. Hales, David J. Kanarek, Bhagwat Aihluaula, Alexander Latty, John Erdmann, Shahrorkh Javaheri, and Homayoun Kazemi ............................................................................. 121

Instructions to Authors ............................................................................... 149

News from the American Heart Association ............................................. 152

No. 2 (February)

Brief Reviews: Role of the Intrarenal Renin-Angiotensin System in the Control of Renal Function. Nigel R. Levens, Michael J. Peach, and Robert M. Carey .......................................................... 157

Mechanism of Generation of Body Surface Electrocardiographic P-Waves in Normal, Middle, and Lower Sinus Rhythms. William J. Elffer, Emilio Macchi, Hendrik Jan Ritsema van Eck, B. Milan Horacek, and Pentti M. Rautarautu .......................................................... 166

Effects of Angiotensin II on the Blood Flow and Its Distribution in Fetal Lambs. Harriet S. Iwamoto and Abraham M. Rudolph .......................................................... 183

Characteristics of Sarcomere Shortening in Single Frog Atrial Cardiac Cells during Lightly Loaded Contractions. Merrill Tarr, John W. Trank, and Paul Leiffer .......................................................... 189

Evidence That the Velocity of Sarcomere Shortening in Single Frog Atrial Cardiac Cells is Load Dependent. Merrill Tarr, John W. Trank, Paul Leiffer, and Neal Shepherd .......................................................... 199

Release of Vasodilator, Prostaglandin, PGI\(_2\), from Isolated Rat Lung during Vasocostriction. Norbert F. Voeltzel, John G. Gerber, Ivan F. McMurry, Alan S. Nies, and John T. Reeves .......................................................... 207

Mechanisms Mediating the Coronary Vascular Response to Behavioral Stress in the Dog. George E. Billman and David C. Randall .......................................................... 214

</table>
CONTENTS OF VOLUME 48

No. 4 (April)

- Controversies in Cardiovascular Research: The Rat with Spontaneous Genetic Hypertension is Not a Suitable Model of Human Essential Hypertension. John C. McGill and Caroline P. Quilloy
- Diffusional Shunting in the Canine Myocardium. Allan C. Roth and Eric O. Feigl
- Relationship between Blood Flow Direction and Endothelial Cell Orientation at Arterial Branch Sites in Rabbits and Mice. B. Lowell Langille and S. Lee Adamson
- Chronic Progressive Pressure Overload of the Cat Right Ventricle. George Cooper, IV, Robert J. Tomanek, James C. Ehrhardt, and Melvin L. Marcus
- Phosphorylation and Adenosine Triphosphatase Activity of Myofibrils from Thyrotoxic Rabbit Hearts. Raye Z. Litten, III, Barbara Jill Martin, Elizabeth R. Howe, Norman R. Alpert, and R. John Solaro
- Reflex a-Adrenergic Coronary Vasoconstriction during Hindlimb Static Exercise in Dogs. Ronald Aung-Din, Jere H. Mitchell, and John C. Longhurst
- Oscillatory Afterpotentials in Dog Ventricular Muscle Fibers. Masayasu Hiraoka, Yasutaka Okamoto, and Toyomi Sano
- Effects of Exercise on the Coronary and Collateral Vasculature of Beagles with and without Coronary Occlusion. Konrad W. Scheel, Leslie A. Ingram, and Jack L. Wilson
- Pacing-Induced Automaticity in Sheep Purkinje Fibers. Robert W. Wald and Menashe B. Waxman
- Energy Turnover and Mechanical Properties of Resting and Contracting Aortas and Portal Veins from Normotensive and Spontaneously Hypertensive Rats. Anders Arner and Per Hellstrand
- Postnatal Development of the M-Band in Rat Cardiac Myofibrils. Piero Anversa, Giorgio Olivetti, Pier-Giovanni Bracchi, and Alden V. Loud
- Effects of Nitroglycerin on Regional Myocardial Ischemia Induced by Atrial Pacing in Dogs. Joseph L. Gerry, Jr., Hartzell V. Schaft, Clayton H. Killman, and John T. Flaherty
- Hypertension following Arterial Baroreceptor Denervation in the Unanesthetized Dog. Cyril S. Ito and Allen M. Scher
- Reply. Allen M. Scher
- Letters to the Editor
- News from the American Heart Association

No. 5 (May)

- Brief Reviews: Protein Synthesis and Degradation in Cardiac Stress. Sidney S. Schreiber, Carole D. Evans, Murray Oratz, and Marcus A. Rothschild
- The Opposing Effects of Chronic Angiotensin-Converting Enzyme Blockade by Captopril on the Responses to Exogenous Angiotensin II and Vasopressin vs. Norepinephrine in Rats. François Spertiini, Hans R. Brunner, Bernard Waerbe, and Haralampos Gavros
- An Oscillatory Current in Sheep Cardiac Purkinje Fibers. Mario Vassalle and Alessandro Mugelli
- Altered Renal Hemodynamic and Urinary Prostaglandin Response to Acute Hypoxemia after Inhibition of Prostaglandin Synthesis in the Anesthetized Dog. Douglas N. Weismann
- The Selective Inhibition of Serotonin-Induced Contractions of Rabbit Cerebral Vascular Smooth Muscle by Calcium-Antagonistic Dihydropyridines: An Investigation of the Mechanism of Action of Nimodipine. Robertson Towart
- The Electrophysiological Properties of Normal Neonatal and Adult Canine Cardiac Purkinje Fibers. Robert P. Reder, Dennis S. Miura, Peter Danilo, Jr., and Michael R. Rosen
- Hypertension of the Aortic Wall in Atherosclerotic Monkeys. Donald D. Heistad, Mark L. Armstrong, and Melvin L. Marcus
- Operational Sensitivity and Acute Resetting of Aortic Baroreceptors in Dogs. Hazel M. Coleridge, John C.G. Coleridge, Marc P. Kaufman, and Albert Dangel
- The Cardiac Sympathetic Reflex during Coronary Occlusion in Anesthetized Dogs. Robert B. Felder and Marc D. Thames
- The Role of the Right Heart in Acute Cardiac Tamponade in Dogs. Roy Ditchez, Robert Engler, Martin L. Winter, Richard Pavlec, Valmik Bhargava, James Covell, William Moores, and Ralph Shabetai
- Phospholipid Alterations in Canine Ischemic Myocardium: Temporal and Topographical Correlations with Tc-99m-PP1 Accumulation and an in Vitro Sarcolemmal Ca2+ Permeability Defect. Kenneth R. Chien, John P. Reeves, L. Maximilian Buja, Frederick Bonita, Robert W. Parkey, and James T. Willerson
Afterpotentials and Triggered Activity in Hypertrophied Myocardium from Rats with Renal Hypertension.
Ronald S. Aronson ................................................................. 720

Control of Rat Renal Vascular Resistance at Reduced Perfusion Pressure. Paul A. Johnston, Nancy S. Perrin, David B. Bernard, and Norman G. Levinsky .............................................................. 734

Relationship between Structure and Fatty Acid Metabolism in Mitochondria Isolated from Ischemic Rat Hearts.
Danielle Feuvray and Jean Picouet ........................................... 740

Comparison of Microsphere and Xenon-133 Clearance Method in Measuring Skeletal Muscle and Cerebral Blood Flow. Melvin L. Marcus, Charles J. Bischof, and Donald D. Heistad .................................................. 748

News from the American Heart Association .................................. 762

No. 6 (June)

Brief Reviews: Hormonal and Metabolic Reactions Evoked by Acute Myocardial Infarction.
Leszek Ceremuzynski .............................................................. 767

Effect of Carotid Occlusion and of Perfusion Pressure on Renal Function in Conscious Dogs. Rainer Gross, Hartmut Kirchheim, and Kai Ruffmann ......................................................... 777

Load-Insensitive Relaxation Caused by Hypoxia in Mammalian Cardiac Muscle. Leonard H.S. Chuck, Mark A. Goethals, William W. Parmley, and Dirk L. Brutsaert .................................................. 797

Adaptation to Prolonged β-Blockade of Rabbit Atrial, Purkinje, and Ventricular Potentials, and of Papillary Muscle Contraction: Time-Course of Development of and Recovery from Adaptation. A.E.G. Raine and E.M. Vaughan Williams .................................................. 804

Volume Loading Slows Left Ventricular Isovolumic Relaxation Rate: Evidence of Load-Dependent Relaxation in the Intact Dog Heart. Gilbert L. Raff and Stanton A. Glantz ...................................... 813

The Circulatory Effects of Acute Hypervolemia and Hemodilution in Conscious Rabbits. Irwin B. Faris, John Iannos, Glyn G. Jamieson, and John Ludbrook ...................................................... 825

Non-Steroidal Anti-Inflammatory Drugs Potentiate the Vasconstrictor Effects of Ouabain in the Dog.
Alan S. Nies and John G. Gerber ................................................ 844

The Utilization by Rabbit Aorta of Carbohydrates, Fatty Acids, Ketone Bodies, and Amino Acids as Substrates for Energy Production. Kenneth V. Chase and Richard Odessy ........................................... 850

Effects of Carnitine Isomers on Fatty Acid Metabolism in Ischemic Swine Hearts. A. James Liedtke, Stephen H. Nellis, and Larry F. Whitesell ................................................................. 859

Electrophysiological Effects of the Optical Isomers of Disopyramide and Quinidine in the Dog: Dependence on Stereochirhmy. Michael J. Mirollo, August M. Watanabe, and John C. Bailey ................................................ 867

Uneven Distribution of Postjunctional Alpha- and Alpha2-like Adrenoceptors in Canine Arterial and Venous Smooth Muscle. Jo De Mey and Paul M. Vanhoutte ........................................... 875

Influence of Secobarbital and α-Chloralose, and of Vagal and Sympathetic Interruption, on Left Ventricular Activation after Acute Coronary Artery Occlusion in the Dog. Rodolphe Ruffy, D. Eugene Lovelace, Suzanne B. Knoebel, and Douglas P. Zipes ...................................................... 884

Vascular Responses of the Perfused Intestine to Vasoactive Agents during the Development of Two-Kidney, One-Clip Goldblatt Hypertension in Dogs. Stan Greenberg ........................................... 895

The Effect of Hyphophysectomy on Experimental Endothelial Cell Regrowth and Intimal Thickening in the Rat.
Michael A. Bettmann, Michael B. Stemerman, and Bernard J. Ransil ...................................................... 907

The Significance of the NH3-NH2 Equilibrium on the Passage of 15N-Ammonia from Blood to Brain: A New Regional Residue Detection Model. Marcus E. Reischle and Kenneth B. Larson ................................................ 913

Variable Effect of Nifedipine on Myocardial Blood Flow at Three Grades of Coronary Occlusion in the Dog.
William S. Weintraub, Shigehiko Hatton, Jai Agarwal, Monty M. Bodenheimer, Vidya S. Banka, and Richard H. Helfant ................................................................. 937

News from the American Heart Association .................................. 943

Volume Author Index .............................................................. 948

Volume Subject Index ............................................................ 950

Supplement Author Index ........................................................ 956

Supplement Subject Index ....................................................... 957
