CATHETER TIP PRESSURE TRANSUDCERS

Measure pressure at the source with high fidelity, (20KHz freq. response). Eliminate fluid plumbing and distortions. Available with up to 5 manometers plus velocity sensors for the simultaneous measurement of pressure wave phases and fluid velocities. Lumens for injection and sampling as well as electrodes for stimulation and measurement of bioelectric signals are standard options. Catheter sizes down to 3F.

EXCLUSIVE: MODEL ICT/b WITH IN VIVO ZERO AND CAL!

The World's Most Reliable Catheter Manometers

Technology Assessment Forum on Coronary Artery Bypass Surgery: Economic, Ethical and Social Issues

Guest Editors: Michael Eliastam, M.D., M.P.P.
Barbara Gastel, M.D., M.P.H.

Proceddings of the first Technology Assessment Forum sponsored by the National Center for Health Care Technology (NCHCT), a United States Public Health Service agency. This forum represented the second phase of comprehensive assessment of coronary artery bypass graft surgery, which addressed the economic, ethical and social aspects. Each forum provided an opportunity for everyone interested in a technology to participate in reviewing various aspects of it. Not only physicians and surgeons, but also representatives of the insurance industry and disability programs, and health planning, health financing, and patient and family groups participated in the Forum on CABG. The 2½ day forum consisted of commissioned papers, critiques prepared in advance by panelists, and several open forums for interaction among presenters, reviewers, and the audience.

AHA Monograph No. 92
Supplement to CIRCULATION, November 1982

100 pages (Soft cover)  Price: $5.00
