Circulation Research
AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

VOLUME 56
January–June 1985
No. 1 (January)

Two Distinct Effects of Oxygen on Vascular Tone in Isolated Porcine Coronary Arteries.
Gabor Rubanyi and Richard J. Paul .......................................................... 1

Effects of Pressure Gradients between Branches of the Left Coronary Artery on the Pressure Axis Intercept and the Shape of Steady State Circumflex Pressure-Flow Relations in Dogs.
Louis M. Messina, Frank L. Hanley, Paul N. Uhlig, Robert W. Baer, Mark T. Grattan, and Julien I.E. Hoffman .................................................. 11

Transmission of Intrathoracic Pressure to the Intracranial Space during Cardiopulmonary Resuscitation in Dogs.
Alan D. Guerci, An-Yun Shi, Howard Levin, Joshua Tsitlik, Myron L. Weisfeldt, and Nisha Chandra .......................... 20

Relationship between Myocardial Fiber Direction and Segment Shortening in the Midwall of the Canine Left Ventricle.
Gregory L. Freeman, Martin M. LeWinter, Robert L. Engler, and James W. Covell .................................................. 31

Pulmonary Artery Constriction Produces a Greater Right Ventricular Dynamic Afterload Than Lung Microvascular Injury in the Open Chest Dog.
James E. Calvin, Jr., Robert W. Baer, and Stanton A. Glantz .. 40

Limitations of Tracer Oxygen Uptake in the Canine Coronary Circulation.
Colin P. Rose and Carl A. Goresky .......................................................... 57

The Role of Free Radical-Mediated Processes in Oxygen-Related Damage in Cultured Murine Myocardial Cells.
James A. Scott, Ban An Khaw, Elizabeth Locke, Edgar Haber, and Charles Homey .................................................. 72

The Economy of Isometric Force Development, Myosin Isoenzyme Pattern, and Myofibrillar ATPase Activity in Normal and Hypothyroid Rat Myocardium.

A Dihydropyridine (Bay k 8644) That Enhances Calcium Currents in Guinea Pig and Calf Myocardial Cells: A New Type of Positive Inotropic Agent.
Gunter Thomas, Minn Chung, and Charles J. Cohen .................................................. 87

Mechanism of Action of Angiotensin II and Bradykinin on Prostaglandin Synthesis and Vascular Tone in the Isolated Rat Kidney: Effect of Ca** Antagonists and Calmodulin Inhibitors.
Christy L. Cooper, Joel E. Shaffer, and Kajait U. Malik .................................................. 97

Vascular Adrenergic Neuroeffector Function Does Not Decline in Aged Rats.
Sue Piper Dunkles, Bart J. Carter, and Cynthia L. Williams .................................................. 109

Gabor Rubanyi and Paul M. Vanhoutte .................................................. 117

BRIEF COMMUNICATIONS

Direct Analysis of β-Adrenergic Receptor Subtypes on Intact Adult Ventricular Myocytes of the Rat.
Iain L.O. Buxton and Laurence L. Brunton .................................................. 126

Ryanodine as a Tool to Determine the Contributions of Calcium Entry and Calcium Release to the Calcium Transient and Contraction of Cardiac Purkinje Fibers.
Eduardo Marban and W. Gil Wier .................................................. 133

Significance of Quiescent Smooth Muscle Migration in the Injured Rat Carotid Artery.
Alexander W. Cloves and Stephen M. Schwartz .................................................. 139

Phospholipase D Produces Increased Contractile Force in Rabbit Ventricular Muscle.
G.A. Langer and T.L. Rich .................................................. 146

INSTRUCTIONS TO AUTHORS .................................................. 150

NEWS FROM THE AMERICAN HEART ASSOCIATION .................................................. 154
SPECIAL ARTICLE

The Accuracy of Inferring Left Ventricular Volume from Dimension Depends on the Frequency of Information Needed to Answer a Given Question.
Bryan K. Slinker and Stanton A. Glantz .................................................. 161

Analysis of the Pressor Sympathetic Reflex Produced by Intracoronary Injections of Bradykinin in Conscious Dogs.
Massimo Pagani, Paolo Pizzinelli, Raffaello Furlan, Stefano Guzzetti, Ornella Rimoldi, Giulia Sandrone, and Alberto Malliani .................................................. 175

Possible Mechanisms of Ventricular Arrhythmias Elicited by Ischemia Followed by Reperfusion: Studies on Isolated Canine Ventricular Tissues.
Gregory R. Ferrier, Margaret P. Moffat, and Anton Lukas .................................................. 184

Fate of Intercellular Junctions in Isolated Adult Rat Cardiac Cells.
Francoise Mazet, Beatrice A. Wittenberg, and David C. Spray .................................................. 195

Neurogenic Muscarinic Vasodilation in the Cat: An Example of Endothelial Cell-Independent Cholinergic Relaxation.
Joseph E. Brayden and John A. Bevan .................................................. 205

Angiotensin II in Rat Brain Comigrates with Authentic Angiotensin II in High Pressure Liquid Chromatography.
M. Ian Phillips and Birgitta Stenstrom .................................................. 212

Influence of Ribose, Adenosine, and "AICAR" on the Rate of Myocardial Tissue Adenosine Triphosphate Synthesis during Reperfusion after Coronary Artery Occlusion in the Dog.
M. Mauser, H.M. Hoffmeister, C. Nienaber, and W. Schaper .................................................. 220

Sodium Pump Inhibition, Enhanced Calcium Influx via Sodium-Calcium Exchange, and Positive Inotropic Response in Cultured Heart Cells.
William H. Barry, Yonathin Hasin, and Thomas W. Smith .................................................. 231

Dipyridamole Decreases Glomerular Filtration in the Sodium-Depleted Dog: Evidence for Mediation by Intrarenal Adenosine.
Lois J. Arend, Carl I. Thompson, and William S. Spielman .................................................. 242

Optimal Power Generation by the Left Ventricle: A Study in the Anesthetized Open Thorax Cat.
G.J. van den Horn, N. Weserhof, and G. Elzinga .................................................. 252

Effect of Reperfusion Late in the Phase of Reversible Ischemic Injury: Changes in Cell Volume, Electrolytes, Metabolites, and Ultrastructure.
Robert B. Jennings, Jutta Schaper, Mary L. Hill, Charles Steenbergen, Jr., and Keith A. Reimer .................................................. 262

BRIEF COMMUNICATIONS

[<sup>3</sup>H]Aminobenzyladenosine, A New Radioligand with Improved Specific Binding to Adenosine Receptors in Heart.

CONTROVERSIES IN CARDIOVASCULAR RESEARCH

No. 3 (March)

Coronary Diastolic Pressure-Flow Relation and Zero Flow Pressure Explained on the Basis of Intramyocardial Compliance.
Jos A.E. Spaan .................................................. 293

Francis J. Klocke, Robert E. Mates, John M. Canty, Jr., and Avery K. Ellis .................................................. 310

Identification and Characterization of Leukotriene C<sub>4</sub> Receptors in Isolated Rat Renal Glomeruli.
Barbara J. Ballermann, Robert A. Lewis, E.J. Corey, K. Frank Austen, and Barry M. Brenner .................................................. 324

Real-Time Kinetics of Sarcomere Relaxation by Laser Diffraction.
Yves Lecarpentier, Jean-Louis Martin, Victor Clae, Jean-Paul Chambaret, Arnold Migus, André Antonetti, and Pierre-Yves Hatt .................................................. 331

Postextrasystolic Potentiation of the Isolated Canine Left Ventricle: Relationship to Mechanical Restitution.
David T. Yue, Daniel Burkoff, Michael R. Franz, William C. Hunter, and Kiich Sagawa .................................................. 340
CONTENTS OF VOLUME 56

Mechanisms of Augmented Segment Shortening in Nonischemic Areas during Acute Ischemia of the Canine Left Ventricle.
Wilbur Y.W. Lew, Zhengyu Chen, Brian Guth, and James W. Covell .................................................. 351

Electrophysiological Study of Cardiovascular Neurons in the Rostral Ventrolateral Medulla in Rats.
D. Les Brown and Patrice G. Guyenet .......................................................... 359

Kinetics of Thallium Exchange in Cultured Rat Myocardial Cells.
David McCaII, Lawrence J. Zimmer, and Arnold M. Katz .................................................. 370

Ultrastructural Morphometric Analysis of Myocardium from Dogs, Rats, Hamsters, Mice, and from Human Hearts.
Jutta Schaper, Eckhardt Meiser, and Gerhard Stammler .................................................. 377

Changes in Cholinergic Parameters Associated with Failure of Conotruncal Septation in Embryonic Chick Hearts after Neural Crest Ablation.
Margaret L. Kirby, Robert S. Aronstam, and Jerry J. Buccafusco .................................................. 392

α-Adrenergic Receptors in Cerebral Microvessels of Normotensive and Spontaneously Hypertensive Rats.
Hideyuki Kobayashi, Akihiko Wada, Futoshi Izumi, Maria Sandra Magnoni, and Marco Trabucchi ............ 402

Interactions of Vasopressin with the Area Postrema in Arterial Baroreflex Function in Conscious Rabbits.
Karl P. Undesser, Eileen M. Hauser, Joseph R. Haywood, Alan K. Johnson, and Vernon S. Bishop .............. 410

Variables Controlling the Secretion of a Somatomedin-like Peptide by Cultured Porcine Smooth Muscle Cells.
David K. Clemmons .......................................................... 418

Calcium Sensitivity of Isometric Force in Intact and Chemically Skinned Aortas during the Development of Aldosterone-Salt Hypertension in the Rat.
E. Garwitz McMahon and R. J. Paul .............................................. 427

Structural and Electrophysiological Changes in the Epicardial Border Zone of Canine Myocardial Infarcts during Infarct Healing.
Philip C. Urech, Phyllis I. Gardner, Arline Albala, John J. Fenoglio, Jr., and Andrew L. Wit ................. 436

BRIEF COMMUNICATIONS

The Effects of Ryanodine on Calcium-Overloaded Sheep Cardiac Purkinje Fibers.
M. Valdeolmillos and D.A. Eisner .................................................. 452

Kathleen M. Nicholls, Michael D. Shapiro, Vicki J. Van Putten, Rudiger Kluge, Hsiao-Min Chung,
Daniel G. Bichet, and Robert W. Schrier .................................................. 457

Subfornical Organ: Does It Protect against Angiotensin II-Induced Hypertension in the Rat?
Cathy A. Bruner, Michael L. Mangiapane, and Gregory D. Fink .................................................. 462

NEWS FROM THE AMERICAN HEART ASSOCIATION .................................................. 467

No. 4 (April)

BRIEF REVIEWS

New Studies of the Excitatory Sodium Currents in Heart Muscle.
Harry A. Fozzard, Craig T. January, and Jonathan C. Makielski .................................................. 475

Carotid Baroreceptor Reflex Coronary Vasodilatation in the Dog.
Bruce R. Ito and Eric O. Feigl .................................................. 486

Evidence for a Specific Receptor Site for Lidocaine, Quinidine, and Bupivacaine Associated with Cardiac Sodium Channels in Guinea Pig Ventricular Myocardium.
Craig W. Clarkson and Luc M. Hondeghem .................................................. 496

Calcium-Dependent Fluxes of Potassium-42 and Chloride-36 during Norepinephrine Activation of Rat Aorta.
Jacquelyn M. Smith and Allan W. Jones .................................................. 507

Role of Adenosine in Coronary Blood Flow Regulation after Reductions in Perfusion Pressure.
William P. Dole, Nobuyuki Yamada, Vernon S. Bishop, and Ray A. Olsson ........................................ 517

Differential Effects of Antihypertensive Drug Therapy on Vascular Smooth Muscle Cell Hyper trophy, Hyperplasia, and Hyperplasia in the Spontaneously Hypertensive Rat.
Gary K. Owens .................................................. 525
The Significance of the Late Fall in Myocardial Pco2 and Its Relationship to Myocardial pH After Regional Coronary Occlusion in the Dog. 

Transmural Distribution of Isomyosin in Rabbit Ventricle during Maturation Examined by Immunofluorescence and Staining for Calcium-Activated Adenosine Triphosphatase. 
Brenda R. Eisenberg, Joy A. Edwards, and Radovan Zak ........................................... 548

Fibrosis, Lipids, and Calcium in Human Atherosclerotic Plaque: In Vitro Differentiation from Normal Aortic Walls by Ultrasonic Attenuation. 
Eugenio Picano, Luigi Landini, Alessandro Distante, Antonio Benassi, Roberta Sarnelli, and Antonio L'Abbate ........................................... 556

Differential Effects of Central Angiotensin II and Substance P on Sympathetic Nerve Activity in Conscious Rats: Implications for Cardiovascular Adaptation to Behavioral Responses. 
Thomas Unger, Hans Becker, Margaret Petty, Gudrun Demmert, Bernhard Schneider, Detlev Ganten, and Rudolf E. Lang ........................................... 563

Effect of Membrane Depolarization on Binding of [3H]Nitrendipine to Rat Cardiac Myocytes. 
Frank J. Green, Barbara B. Farmer, Gail L Wiseman, Mimi J.L Jose, and August M. Watanabe ........................................... 576

Optimal Arterial Resistance for the Maximal Stroke Work Studied in Isolated Canine Left Ventricle. 
Kenji Sunagawa, W. Lowell Maughan, and Kiichi Sagawa ........................................... 586

Transient Analysis of the Canine Cerebrovascular Response to Carbon Dioxide. 
David A. Wilson, Richard J. Traysman, and Carlos E. Raelpa ........................................... 596

BRIEF COMMUNICATIONS

Failure of Atriopeptin II to Cause Arterial Vasodilation in the Conscious Rat. 

Effects of Acetylcholine on Action Potential Characteristics of Atrial and Ventricular Myocardium after Bilateral Cervical Vagotomy in the Cat. 
Richard J. Kovacs and John C. Bailey ........................................... 613

Comparative Vascular Pharmacology of the Atriopeptins. 
Korekiyo Waktani, Takeshi Oshima, Arthur D. Loewy, Sandra W. Holmberg, Barbara R. Cole, Steven P. Adams, Kam F. Fok, Mark C. Currie, and Philip Needleman ........................................... 621

Hypertension Detection and Follow-Up Program
Baseline Characteristics of the Enumerated, Screened, and Hypertensive Participants

Principal Editors: Sandra A. Daugherty, M.D., Ph.D.
George Entwisle, M.D.

Co Editors: J. David Curb, M.D.
B. Frank Polk, M.D.
James O. Taylor, M.D.

The Hypertension Detection and Follow-Up Program (HDFP) was a five-year, national, multicenter, randomized, clinical trial of the effectiveness of antihypertensive therapy in reducing all-cause mortality in hypertensives screened from the general population. The study was funded under contract by the National Heart, Lung, and Blood Institute (NHLBI).

AEROBIPHOBIA

SYMPTOMS: Sufferers cringe at the sight of tennis shoes and jogging outfits. Generally mask their fear of exercise by claiming they have no time for it. Physicians are not immune. Each day you dispense good, solid advice to your patients on the importance of regular exercise. Physician, heed thyself.

WE'RE FIGHTING FOR YOUR LIFE

American Heart Association
Money can't buy it. But a changed life-style can go a long way toward a healthier future.

Smart living includes eating right—the kinds of delicious, low-fat, low-cholesterol foods contained in the American Heart Association Cookbook. It's designed to help health-conscious people prepare foods that will help them maintain a reasonable weight, reduce the amount of fat and cholesterol in the diet, and cut salt intake.

In this fourth edition of the AHA Cookbook, you'll find the latest scientific evidence on the relationship between diet and heart health. You'll also find:

- Dietary guidelines for children—how you can start them off right with low-fat, low-cholesterol foods and still satisfy the needs of the "fast food" generation.
- A complete guide to restaurant dining
- A totally revised fat and cholesterol chart outlining the fat content of common foods
- Expanded information on the basics of microwave cookery

For a blend of good taste and good health, recommend the American Heart Association Cookbook to your patients.
