NEWS

From the American Heart Association

63rd Scientific Sessions
Program Announced

The American Heart Association’s 63rd Scientific Sessions, to be held November 12–15, 1990, in Dallas, will provide three and one-half days of comprehensive education in the pathophysiology, diagnosis, treatment, and prevention of cardiovascular disease.

New developments in clinical and basic research will be presented in simultaneous sessions on adult and pediatric cardiology, surgery, radiology, and nursing, with focus on coronary heart disease, cardiopulmonary medicine, hypertension, stroke, renal disease, thrombosis, and preventive medicine. State-of-the-art lectures by experts will cover topics important to both the practitioner and the researcher.

Sessions are designed to improve medical care of the cardiovascular patient by providing members of the medical and allied health professions with an educational program that will enhance their knowledge, advance their skills, and apprise them of the latest developments in medical research. Abstracts of original research are reviewed and graded for scientific merit and designated for oral or poster presentation. More than 3,000 presentations are planned for this year’s meeting.

Sunday Afternoon Programs

The AHA’s scientific councils are sponsoring seven simultaneous Sunday afternoon programs. A separate registration fee is required.

The Cardiopulmonary Council is sponsoring “Critical Care for the Cardiologist,” an update on noncardiac medical issues in intensive and cardiac care units that are relevant to practicing cardiologists, internists, and pulmonologists. Richard K. Albert and B. Taylor Thompson are program chairmen. Topics include hemodynamic management of septic shock, nutritional support in critical illness, hemodynamic emergencies, assessment of O₂ delivery in the intensive care unit, lytic therapy for peripheral and pulmonary thrombosis, and hospital-acquired pneumonia.

The Council for High Blood Pressure Research and the Nutrition Committee are sponsoring “Insulin-Hypertension and Obesity,” which will explore the relation between hypertension, obesity, and insulin resistance. The program, designed for specialists in hypertension, metabolism, and diabetes, will be chaired by Theodore Kotchen and Jeffrey A. Cutler. Topics include clustering of obesity, hyperlipidemia, and hypertension; familial dyslipidemic hypertension; obesity, insulin resistance, and salt sensitivity; therapeutic implications; and sympathetic nervous system, hypertension, and hyperinsulinemia.

The Council on Cardiovascular Nursing is sponsoring “Issues in Cardiac Care: 1990 Update—Ventricular Arrhythmia Management,” which is designed to further attendees’ knowledge of current issues relevant to management of patients with myocardial ischemia. Julia A. Purcell and Masood Akhtar are chairmen of the program, which is aimed at cardiovascular nurses and physicians. Topics include supraventricular versus ventricular tachycardia; ventricular arrhythmias: risk stratification; current and future pharmacologic therapies; use of pacing and automatic implantable cardioverters-defibrillators; role of catheter ablation; surgical treatment for ventricular arrhythmias; and managing psychosocial aspects of ventricular arrhythmias and their therapies.

The program “Molecular Biology for the Clinician” is sponsored by the Councils on Arteriosclerosis, Basic Science, Cardiovascular Disease in the Young, Cardiovascular Radiology, Circulation, Clinical Cardiology, and Thrombosis, the Cardiopulmonary Council, and the Council for High Blood Pressure Research. Clinicians will be introduced to terminology, techniques, and recent advances in molecular biology. Chairmen are Gary L. Stiles and Howard E. Morgan. Topics include unique features of molecular biology for cardiac research, essentials of cloning and its applications, transgenic animal models, and molecular genetics.

The Council on Clinical Cardiology is sponsoring “New Therapies and Technologies for Cardiac Disease,” an update on the most recent advances in diagnosis and treatment of cardiac disease. Michael H. Crawford and Gerald M. Pohost will chair the program. Topics are primary angioplasty for acute myocardial infarction, thrombolytic therapy for acute myocardial infarction, controversies in the management of the postthrombolysis patient, lessons from the CAST Study, current status of left
ventricular assist devices, and role of stents, atherectomy, and lasers in angioplasty.

“Pediatric Heart Transplantation” is the title of the program sponsored by the Council on Cardiovascular Disease in the Young. An overview of the status of pediatric cardiac transplantation will be given, with special emphasis on areas requiring further investigation. The target audience includes doctors, nurses, and other health professionals who care for children with heart transplants. David Baum and F. Jay Fricker will chair the program. Topics include selection of pediatric heart transplant recipients, immunosuppression and its complications, neonatal cardiac transplantation, heart/lung and lung transplantation, and psychosocial issues in pediatric heart transplantation.

The Cardiopulmonary Council and the Councils on Arteriosclerosis, Basic Science, Kidney, and Thrombosis and the National Heart, Lung, and Blood Institute Programs of Excellence in Molecular Biology will sponsor “Signaling and Transport in the Cardiovascular System.” Recent major molecular biological advances in signaling and transport mechanisms of the cardiovascular system will be presented to basic scientists and clinicians who wish to improve their understanding of signaling and transport mechanisms of the cardiovascular system. Chaired by Robert D. Rosenberg and Gerald Lingrel, topics include acetyl low-density lipoprotein receptor, glucose transporters, platelet-derived and fibroblast growth factor receptors, the fibroblast growth factor gene family in embryonic development, calcium ion channels, and calcium adenosine triphosphatase.

Plenary Sessions

Thirteen plenary sessions are planned to provide physicians, scientists, and nurses with new and broad concepts in cardiovascular medicine. Plenary sessions are topic-oriented and state of the art. Recognized experts will discuss the spectrum of council interests, including basic and clinical science.

Plenary Session I, “Women, Hormones, and Heart Disease,” will cover risk factors after menopause; women, lipoproteins, and diet; oral contraceptives and replacement estrogen; and impact of the current social role of women.

Plenary Session II, “Ischemic and Postischemic Ventricular Dysfunction: New Insights,” will discuss myocardial stunning and hibernation, detection of viable myocardium in patients, whether inhibition of free radical injury helps salvage myocardium during ischemia, and therapeutic interventions to minimize dysfunction after ischemia.

Plenary Session III is titled “Anti hypertensive Therapy and the Heart.” Topics include hypertension hypertrophy and cardiovascular risk, myocardial infarction and antihypertensive treatment, antihypertensive treatment and atherosclerosis, cardiac hypertrophy and its regression, and cardiac arrhythmias and antihypertensive treatment.

“Thromboembolism and Atrial Fibrillation” is the subject of Plenary Session IV. Topics include mechanisms of thromboembolism and cerebral thromboembolism and atrial fibrillation.

“Diagnostic Approaches and Treatment Strategies in Peripheral Vascular Disease” is the title of Plenary Session V. Specific topics include diagnosis of carotid disease, venous disease, and peripheral artery disease by ultrasound; intravascular ultrasound; and the need for judgment: Is any intervention warranted?

Plenary Session VI is titled “Reversal of Coronary Artery Stenosis” and will cover long-term follow-up of the Cholesterol Lowering Atherosclerosis Study (CLAS), results of the Familial Atherosclerosis Treatment Study (FATS), improvement in stenos geometry with regression, and pathologic changes after regression of coronary artery stenoses.

“Management of Life-Threatening Arrhythmias” is the subject of Plenary Session VII. Topics include clinical features of patients with life-threatening arrhythmias, role of antiarrhythmic drugs, ventricular tachycardia surgery, catheter ablation, and antitachycardia devices.

Plenary Session VIII is titled “Effect of Therapy on Survival in Heart Failure” and includes inotropic agents, converting enzyme inhibitors in early heart failure, direct-acting vasodilators, and cardiac transplantation.

“Cardiovascular Risk Assessment for Noncardiac Surgery” is the topic of Plenary Session IX, which will cover noninvasive preoperative evaluation, when cardiac catheterization and revascularization is necessary, risks of cerebrovascular events, changing surgical strate-
gies, and reducing mortality of perioperative myocardial infarction.

"Aortic Dissection: Diagnosis and Management" is the title of Plenary Session X. Topics include clinical diagnosis and medical management, newer radiologic diagnostic aspects, transesophageal echocardiography color flow echo/Doppler diagnosis, and aggressive surgical approach for acute aortic dissections.

Plenary Session XI will examine "Controversies in Myocardial Reperfusion," including emerging criteria for thrombolysis, choice of thrombolytics, late entry patients and approach to the elderly, role of heparin with thrombolysis, and new antiplatelet agents as adjuncts to thrombolytic intervention.

Plenary Session XII will focus on "The Angioplasty/Restenosis Cycle." Topics include definitions, incidence, and clinical identification; vascular biology of the abnormal vessel; platelet growth factors and thrombosis; plasminogen activators and antiproliferative agents; and clinical approaches to restenosis.

Plenary Session XIII is titled "Ventricular Remodeling After Myocardial Infarction." Topics include definition and hemodynamic detection, role of renin angiotensin system, noninvasive assessment of the effect of therapies, and effect of nitrate therapy.

Postgraduate Seminars

Postgraduate seminars allow physicians, nurses, and scientists an opportunity to enhance their knowledge of state-of-the-art topics. Seminar topics include molecular changes in the failing heart, new insights into ventricular fibrillation, key issues in percutaneous coronary interventions, prothrombotic states and anticoagulation, use of cardiovascular drugs in the elderly, dietary fatty acids and serum lipoproteins, molecular genetics of myocardial disease, impact of randomized trials on clinical practice, transcatheter interventions in cerebrovascular disease, primary prevention of stroke and myocardial infarction, advances in echocardiography, coronary stenosis morphology, and recent trends in cardiovascular disease mortality, morbidity, and risk factors in the United States.

Cardiovascular Conferences

Cardiovascular conferences permit physicians, scientists, nurses, and other allied health professionals to discuss everyday problems with noted authorities. Topics include proarrhythmic consequences of antiarrhythmic drug therapy, cardiac magnetic resonance imaging and spectroscopy, congenital heart disease in the adult, exercise training levels and "cardio-protection," sudden death in heart failure, treatment of hypertension in the elderly, nonischemic cardiomyopathies, coronary heart disease in the Americas, update on silent myocardial ischemia, and nonexercise stress testing.

How-to Sessions

How-to sessions allow health care professionals to discuss new techniques and therapeutic interventions with noted authorities. Topics include how to set goals for antihypertensive therapy, how to assess the role of thrombolytic drugs in peripheral circulation, how to manage complex arrhythmias in children, how to manage atrial fibrillation, how to evaluate syncope, how to manage obese patients with cardiovascular disease, how to evaluate a stroke, and how to interpret transesophageal echocardiography in congenital heart disease.

Cardiovascular Nursing Sessions

Cardiovascular nursing sessions are planned for nurses who care for patients with cardiovascular disease. In addition to nursing research abstract presentations, several evening sessions are scheduled. Postgraduate seminars will examine cardiac care of the octogenarian and response to early warning signs in acute infarction.

Cardiovascular conferences will cover impact of infection/inflammation on the child's heart, cardiovascular nursing research, long-term psychosocial outcomes in children with congenital heart disease, ethical-legal issues in exercise and cardiac rehabilitation, and exercise in special cardiovascular populations. How-to sessions will cover how to effectively use nursing case management and how to manage the elderly patient in a cardiac rehabilitation program.

In addition, the Council on Cardiovascular Nursing is cosponsoring Plenary Session I, "Women, Hormones, and Heart Disease." The seventh annual Excellence in Nursing Lecture will be presented by Kathleen Dracup at the council dinner.

The AHA is recognized by the Accreditation Council for Continuing Medical Education as an
accredited sponsor for CME activities for physicians. This program has been designated for 24 hours of credits; the Sunday afternoon program is credited for four additional hours. Continuing education credits for nurses will be available for the Sunday afternoon programs, plenary sessions, postgraduate seminars, cardiovascular conferences, how-to sessions, named lectures, and research abstract presentations.

Low-Salt Cookbook Now Available

The American Heart Association Low-Salt Cookbook, a comprehensive new cookbook and diet reference, is now in bookstores across the country.

More than 175 new recipes and two diet plans are featured, with tips on substituting ingredients, avoiding hidden sodium, and dining out. All recipes are designed to be low in fat and cholesterol as well as in sodium and are accompanied by a breakdown of nutritional contents.

The book was edited by Rodman D. Starke, MD, the AHA’s senior vice president, Scientific Affairs, and Mary Winston, EdD, RD, the AHA’s senior nutrition science consultant. With more than 100 line drawings and large, easy-to-read type, the cookbook has been described as “the definitive diet resource for everyone with hypertension.”

Stroke Council Awards Scholarships

Each year the AHA’s Stroke Council awards 10 scholarships for study of cerebrovascular disease. The scholarships are designed to stimulate interest, knowledge, and investigative work of medical students in cerebrovascular disease.

Recipients of the 1990 scholarships are:
• University of Iowa, Iowa City
  Preceptor: Jose Biller
  Scholar: Julie E. Beattie
• University of Cincinnati, School of Medicine
  Preceptor: Keith Crutcher
  Scholar: Bruce N. Saffran
• Veterans Administration Medical Center/State University of New York Health Science Center, Syracuse
  Preceptor: Antonio Culebras
  Scholar: Bruce Rubin
• Johns Hopkins Medical Institute, Baltimore
  Preceptor: Michael Diringer
  Scholar: Kathryn Wu
• University of Illinois, Chicago
  Preceptor: Daniel B. Hier
  Scholar: Debra J. Babcock
• St. Louis University School of Medicine
  Preceptor: Camilo R. Gomez
  Scholar: Galen F.H. Chun
• University of Missouri, Columbia School of Medicine
  Preceptor: Mary Gumerlock
  Scholar: J. Charles Mace
• University of Maryland, Baltimore
  Preceptor: Daniele Rigamonti
  Scholar: Frank Hsu
• University of Kentucky Medical Center, Lexington
  Preceptors: Robert Dempsey
  Richard Schwartz
  Scholars: Carl Baker
  Mark Beatty

At Heart

• The October issue of Modern Concepts of Cardiovascular Disease is titled “Therapeutic Cardiac Catheterization, Part 1.” The authors are Carl J. Pepine, James A. Hill, and Charles R. Lambert, Gainesville, Fla.
• The October issue of Circulation features two special reports, “The Clinical Lipid Specialist” and “Strategies to Increase Federal Research Funding.”
Domestic
1990

Indicates meetings sponsored by the scientific councils of the American Heart Association.

Oct 9–11: Introduction to Doppler Echocardiography. St Louis University Medical Center. Sponsored by St Louis University School of Medicine. Inquiries: Kathleen Habermehl, St Louis University School of Medicine, Continuing Medical Education, 1402 S Grand Blvd, St Louis, MO 63104-1083. Tel 314-577-8897.

Oct 22–24: Current Trends in Cardiology. Chicago. Sponsored by Cook County Graduate School of Medicine. Stuart Rich, MD, coordinator. Inquiries: Registrar's Office, Cook County Graduate School of Medicine, 707 S. Wood St, Chicago, IL 60612. Tel 800-621-4651.

Oct 22–26: Emergency Medicine Symposium: Cardiology, Pulmonary, and Neurology. Hyatt Regency La Jolla, San Diego. Sponsored by the University of California, San Diego School of Medicine; American Institute of Postgraduate Education; and Scripps Memorial Hospital–Encinitas. Thomas J. Ruben, MD, FAAAEP, course director. Inquiries: Emergency Medicine Symposia, Office of Continuing Medical Education, University of California, San Diego, School of Medicine, M-017, La Jolla, CA 92039-0617.

Oct 25–28: 15th Annual Symposium on Cardiovascular Nursing. Sheraton Sand Key Resort, Clearwater Beach, Fla. Sponsored by the American College of Cardiology and Rogers Heart Foundation, St Petersburg, Fla. Inquiries: ACC, 9111 Old Georgetown Rd, Bethesda, MD 20814. Tel 800-253-4636 or 301-897-5400, ext 226 (Md).

Oct 29–31: Congenital Heart Disease. Heart House Learning Center, Bethesda, Md. Sponsored by the American College of Cardiology. Saroja Bharrati, MD, FACC, and Maurice Lev, MD, FACC, directors. Inquiries: ACC, 9111 Old Georgetown

A1062

Nov 6–8: Introduction to Doppler Echocardiography. St Louis University Medical Center. Sponsored by St Louis University School of Medicine. Inquiries: Kathleen Habermehl, St Louis University School of Medicine. Continuing Medical Education, 1402 S Grand Blvd, St Louis, MO 63104-1083. Tel 314-577-8897.

Dec 11–13: Invasive Echocardiography: A Demonstration Course of Intraoperative and Transesophageal Echocardiography. The Cleveland Clinic Foundation. Inquiries: The Cleveland Clinic Educational Foundation, Department of Continuing Education, 9500 Euclid Ave, TT-31, Cleveland, OH 44195-5241. Tel 800-762-8173 or 216-444-5696.

Dec 14–16: 23rd Annual Cardiovascular Symposium: Changes, Choices, Challenges in the Management of Cardiovascular Disease. New York Hilton Hotel. Sponsored by the American College of Cardiology. Inquiries: ACC, 9111 Old Georgetown Rd, Bethesda, MD 20814. Tel 800-253-4636 or 301-897-5400, ext 228 (Maryland).

1991

Jan 1–April 1: Registration for 1991 Subspecialty Examinations in Cardiovascular Disease and Critical Care Medicine. (Examination date: Nov 5–6) Inquiries: Registration Section, American Board of Internal Medicine, 3624 Market St, Philadelphia, PA 19104. Tel 800-441-2246.

Jan 14–18: Emergency Medicine Symposium: Cardiology, Pulmonary, and Neurology. Hyatt Regency La Jolla, San Diego. Sponsored by the University of California, San Diego School of Medicine; American Institute of Postgraduate Education; and Scripps Memorial Hospital–Encinitas. Thomas J. Ruben, MD, FAAFP, course director. Inquiries: Emergency Medicine Symposia, Office of Continuing Medical Education, University of California, San Diego, School of Medicine, M-017, La Jolla, CA 92037-0617.

Feb 4–5: Angio-Interventional Radiology. Le Meridien Hotel, Coronado (San Diego), Calif. Sponsored by the University of California, San Diego School of Medicine. Joseph J. Bookstein, MD, program director. Inquiries: Dawne Ryals, Ryals & Asso-
March 4–8: **Magnetic Resonance Imaging.** Hotel del Coronado, Coronado (San Diego), Calif. Sponsored by the University of California, San Diego School of Medicine. John R. Hesselink, MD, Robert F. Mattrey, MD, and Donald S. Resnick, MD, program directors. Inquiries: Dawné Ryals, Ryals & Associates, PO Box 1925, Roswell, GA 30077-1925. Tel 404-671-9773. Fax 404-552-9859.

March 10–15: **Fifth Annual Cardiology for the Clinician: Practical Guidelines for Merging Advances in Cardiology with Bedside Medicine.** Spons. by Stanford University and the University of Illinois at Chicago College of Medicine. Inquiries: Sue Tallbert, UIC Conferences and Institutes (M/C 607), Box 6998, Chicago, IL 60680. Tel 312-996-4631. Fax 312-996-5227.

March 16–20: **Fifth Annual Magnetic Resonance Imaging Conference.** Marriott’s Camelback Inn, Scottsdale, Ariz. Sponsored by Barrow Neurological Institute of St. Joseph’s Hospital and Medical Center, Burton P. Drayer, MD, and John A. Hodak, MD, course directors. Inquiries: Kevin King, RT, Education Coordinator, Radiologic Education Center, St. Joseph’s Hospital and Medical Center, 350 W. Thomas Rd, Phoenix, AZ 85013. Tel 602-285-3956.

March 23–30: **Update: Controversies in Emergency and Primary Care.** Waiohai and Poipu Beach Hotel, Kauai, Hawaii. Sponsored by American Institute of Postgraduate Education and Scripps Memorial Hospital–Encinitas. Inquiries: Edith Bookstein, AIPPE, PO Box 2586, La Jolla, CA 92038. Tel 619-454-3212.

May 6–10: **Emergency Medicine Symposium: Cardiology, Pulmonary, and Neurology.** San Diego Hilton Beach and Tennis Resort, San Diego. Sponsored by the University of California, San Diego School of Medicine; American Institute of Postgraduate Education; and Scripps Memorial Hospital–Encinitas. Thomas J. Ruben, MD, FAAP, course director. Inquiries: Emergency Medicine Symposium, Office of Continuing Medical Education, University of California, San Diego, School of Medicine, M-017, La Jolla, CA 92039-0617.

June 1–6: **15th International Symposium on Cerebral Blood Flow and Metabolism.** University of Miami,
Meetings Calendar

Aug 31–Sept 5: Fifth World Congress for Microcirculation. Louisville. Sponsored by the University of Louisville. Inquiries: Patrick D. Harris, PhD, Department of Physiology and Biophysics, University of Louisville, Louisville, KY 40292. Tel 502-588-5373. Fax 502-588-6239.

Sept 5–6: 1991 Subspecialty Examinations in Cardiovascular Disease and Critical Care Medicine. Registration period: Jan 1–April 1, 1991. Inquiries: Registration Section, American Board of Internal Medicine, 3624 Market St, Philadelphia, PA 19104. Tel 800-441-2246.

1992

April 12–16: 41st Annual Scientific Session of the American College of Cardiology. Dallas. Inquiries: Meeting Services Department, ACC, 9111 Old Georgetown Rd, Bethesda, MD 20814. Tel 800-253-4636 or 301-897-5400.

1993

March 14–18: 42nd Annual Scientific Session of the American College of Cardiology. Anaheim, Calif. Inquiries: Meeting Services Department, ACC, 9111 Old Georgetown Rd, Bethesda, MD 20814. Tel 800-253-4636 or 301-897-5400.

1994

March 13–17: 43rd Annual Scientific Session of the American College of Cardiology. Atlanta. Inquiries: Meeting Services Department, ACC, 9111 Old Georgetown Rd, Bethesda, MD 20814. Tel 800-253-4636 or 301-897-5400.

SAVE UP TO 40% ON ARTERIOSCLEROSIS, CIRCULATION, CIRCULATION RESEARCH, HYPERTENSION, AND STROKE.

The American Heart Association journals may be worth their weight in gold, but they certainly aren’t priced that way. Especially now, during the fortieth anniversary of Circulation, the twentieth anniversary of Stroke, and the tenth anniversary of Arteriosclerosis. You see, we’re celebrating these milestones with special subscription discounts. The longer your subscription, the more you save. Discounts range from 10% off the price of a one-year subscription to 40% off the price of a four-year subscription, if you order this year. That makes 1990 the perfect time to renew a lapsing subscription, extend a current one, or begin subscribing to any of the five American Heart Association journals. Just think of it as a chance to pick up a bargain, while you pick up knowledge that can’t be priced in dollars and cents. For subscription information, call us at 214-706-1310.

This offer is available in the United States only.
Arteriosclerosis:
A Journal of Vascular Biology and Thrombosis

is changing its name to

Arteriosclerosis and Thrombosis:
A Journal of Vascular Biology.

The new name, effective January 1, 1991 reflects an added emphasis and commitment to publishing research on the biology, prevention and impact of vascular diseases related to arteriosclerosis and thrombosis.

We invite you to take advantage of a 25% MEETING DISCOUNT

at the American Heart Association’s 63rd Scientific Sessions
November 12 – 15, 1990
Dallas, Texas

Subscribe during Scientific Sessions and receive a 25% discount! This special offer is available to new and renewal subscribers. Offer expires November 30, 1990.

ANIMAL EXERCISER & \( \text{VO}_2/\text{CO}_2 \) METABOLIC COMPUTER

- Multi-lane animal exerciser for rats and mice.
- Separate airtight chambers and exercise belts for each animal.
  Very quiet operation
- Adjustable tilt, speed etc.
- Programmed exercise schedule with automatic measurements of animal behavior.

* "Oxymax" multi-channel metabolic computers for 1, 2, 4, 8, and 16 animals.
- Can operate in conjunction with exercisers.
- Systems for very small and large animals available.
- Superior accuracy and ease of operation.
