Mechanical Manifestations of Activation in Cardiac Muscle

Lincoln E. Ford ................................................................. 621

Release of Atrial Natriuretic Factor During Selective Cardiac α- and β-Adrenergic Stimulation, Intracoronary Ca2+ Infusion, and Aortic Constriction in Pigs

Geir Christensen, Gunnar Aksnes, Aamfinn Ilbeek, and Fredrik Kiil ................................................................. 638

Effect of Aging and Hypertension on Myosin Biochemistry and Gene Expression in the Rat Heart

Peter Buttrick, Ashwani Malhotra, Steven Factor, David Geenen, Leslie Leinwand, and James Scheuer ................................................................. 645

Two Components of Use-Dependent Block of Na+ Current by Disopyramide and Lidocaine in Guinea Pig Ventricular Myocytes

Akihiko Sunami, Zheng Fan, Jun-ichi Nitta, and Masayasu Hiraoka ................................................................. 653

Postnatal Maturation of Excitation-Contraction Coupling in Rat Ventricle in Relation to the Subcellular Localization and Surface Density of 1,4-Dihydropyridine and Ryanodine Receptors

Maurice Wibo, Guadalupe Bravo, and Théophile Godfraind ................................................................. 662

Effects of a Chronic Treatment by Nisoldipine, a Calcium Antagonistic Dihydropyridine, on Arteries of Spontaneously Hypertensive Rats

Théophile Godfraind, Stanislav Kazda, and Maurice Wibo ................................................................. 674

Direct Vasoconstriction Evoked by A1-Adenosine Receptor Stimulation in the Cutaneous Microcirculation

Kenneth G. Proctor and Igor Stojanov ................................................................. 683

Contribution of cAMP-Phosphodiesterase Inhibition and Sensitization of the Contractile Proteins for Calcium to the Inotropic Effect of Pimobendan in the Failing Human Myocardium

Michael Böhm, Ingo Morano, Burkert Pieske, Johann Caspar Rüegg, Michael Wankerl, Rainer Zimmermann, and Erland Erdmann ................................................................. 689

Effects of Dibutyryl Cyclic AMP, Ouabain, and Xanthine Derivatives on Crossbridge Kinetics in Rat Cardiac Muscle

Joseph F.Y. Hoh, Gunther H. Rossmanith, and Angela M. Hamilton ................................................................. 702

Fatty Acid Metabolism and Contractile Function in the Reperfused Myocardium: Multinuclear NMR Studies of Isolated Rabbit Hearts

Donald L. Johnston and E. Douglas Lewandowski ................................................................. 714

Coronary Microvascular Resistance in Hypertensive Cats

Hiroshi Kanatsuka, Kathryn G. Lamping, Charles L. Eastham, Melvin L. Marcus,† and Kevin C. Dellsperger ................................................................. 726

Expression of Collagen Binding Integrins During Cardiac Development and Hypertrophy

Louis Terracio, Kristofer Rubin, Donald Gullberg, Ed Balog, Wayne Carver, Ron Jyring, and Thomas K. Borg ................................................................. 734

Sodium-Induced Cardiac Hypertrophy: Cardiac Sympathetic Activity Versus Volume Load

Nicholas G. Fields, Xiaoxie Yuan, and Frans H.H. Leenen ................................................................. 745

Role of Nitric Oxide and Cyclic GMP as Mediators of Endothelium-Independent Neurogenic Relaxation in Bovine Mesenteric Artery

Johan Ahlner, Marie Ekstam Ljusegren, Nils Grundström, and Krister L. Axelsson ................................................................. 756

CIRCULATION RESEARCH (ISSN 0009-7330) is published monthly by the American Heart Association, 7320 Greenville Avenue, Dallas, TX 75231-4599. For rates in Japan, contact Nankodo Co., Ltd., 42-6 Hongo 3-chome, Bunkyo-ku, Tokyo 113, Japan. In the United States, individuals may subscribe for their personal use at the following annual rates: $106 for members of an American Heart Association scientific council and $132 for nonmembers. Outside the United States, add $62 for postage. Contact AHA for single copy rates and subscription rates for medical professionals in training and for libraries, reading rooms, and other multiple-use institutions. Second class postage paid at Dallas, Texas, and additional mailing offices. POSTMASTER: Send address changes to CIRCULATION RESEARCH, American Heart Association, 7320 Greenville Avenue, Dallas, TX 75231-4599.
Involvement of a GTP-Binding Protein in Stimulating Action of Angiotensin II on Calcium Channels in Vascular Smooth Muscle Cells
Yusuke Ohyya and Nicholas Sperelakis ........................................... 763

Comparison of Crossbridge Dynamics Between Intact and Skinned Myocardium From Ferret Right Ventricle
Yusuke Saeke, Masataka Kawai, and Yan Zhao .................................. 772

Expression of Connexin43 in the Developing Rat Heart
Glenn I. Fishman, Elliot L. Hertzberg, David C. Spray, and Leslie A. Leinwand ...................................................... 782

Developmental Changes in Calcium Currents of Rabbit Ventricular Cells
Toshiyuki Osaka and Ronald W. Joyner ........................................... 788

Adenine Nucleotide Release From Isolated Perfused Guinea Pig Hearts and Extracellular Formation of Adenosine
Mathias M. Borst and Jürgen Schrader ............................................. 797

Effects of TA-3090, a New Calcium Channel Blocker, on Myocardial Substrate Utilization in Ischemic and Nonischemic Isolated Working Fatty Acid–Perfused Rat Hearts
Norman J. Davies, Jeffrey J. McVeigh, and Gary D. Lopaschuk ............... 807

Cytosolic Calcium Transients Differ Between Porcine Coronary Arterial and Aortic Smooth Muscle Cells in Primary Culture
Yoshiro Shogakiuchi, Hideo Kanaide, and Motoomi Nakamura ............... 818

Sex Difference in Presynaptic Adrenergic Inhibition of Norepinephrine Release During Normoxia and Ischemia in the Rat Heart
Xiao-Jun Du, Anthony M. Dart, Rudolph A. Riemersma, and Michael F. Oliver .......................................................... 827

Energetics of Isometric Force Development in Control and Volume-Overload Human Myocardium: Comparison With Animal Species
Gerd Hasenfuss, Louis A. Muller, Edward M. Blanchard, Christian Holabarsch, Bruce J. Leavitt, Frank Ittleman, and Norman R. Alpert ........................................ 836

Mechanisms Responsible for the Heterogeneous Coronary Microvascular Response to Nitroglycerin
Michael A. Kurz, Kathyrn G. Lamping, James N. Bates, Charles L. Eastham, Melvin L. Marcus, and David G. Harrison .................. 847

Cellular Basis of Chronic Ventricular Remodeling After Myocardial Infarction in Rats
Giorgio Olivetti, Joseph M. Capasso, Leonard G. Meggs, Edmund H. Sonnenblick, and Piero Anversa ........................................... 856

Neal L. Eigler, Helmut Schühlen, James S. Whiting, J. Martin Pfaff, Andreas Zeiher, and Shelly Gu ...................................................... 870

Platelet and Fibrin Modification by Radiographic Contrast Media
Don A. Gabriel, Marsha R. Jones, Neil S. Reece, Emily Boothroyd, and Thomas Bashore ...................................................... 881

Effect of Sympathetic Tone on Pressure–Diameter Relation of Rabbit Mesenteric Veins In Situ
Keizaburo Ozono, Zeljko J. Bosnjak, and John P. Kampine ................... 888

BRIEF COMMUNICATION

Ryanodine Does Not Affect Calcium Current in Guinea Pig Ventricular Myocytes in Which Ca\(^{2+}\) Is Buffered
C. William Balke and W. Gil Wier ............................................. 897

LETTER TO THE EDITOR

Does Load Dependence of Relaxation Differ Between Left and Right Cardiac Muscle?
Yves Lecarpentier, Denis Chemla, and Bruno Riou .......................... 903

Reply to the Preceding Letter
Joseph M. Capasso and Piero Anversa ........................................... 903
