Circulation Research

ORIGINAL CONTRIBUTIONS

Endothelium-Dependent Relaxation and Hyperpolarization in Aorta From Control and Renal Hypertensive Rats
Johan Van de Voorde, Bert Vanheel, and Isidoor Leusen ................................................. 1

Mechanism of Augmented Rate of Left Ventricular Filling During Exercise
Che-Ping Cheng, Yuichiro Igarashi, and William C. Little .................................................. 9

Gentamicin Effects on Renal Ischemia/Reperfusion Injury
R.A. Zager ....................................................................................................................... 20

Kinetics of Restitution of Left Ventricular Relaxation
Sumanth D. Prabhu and Gregory L. Freeman ................................................................. 29

ADP Plays an Important Role in Mediating Platelet Aggregation and Cyclic Flow Variations In Vivo
in Stenosed and Endothelium-Injured Canine Coronary Arteries
Sheng-Kun Yao, Judy C. Ober, Janice McNatt, Claude R. Benedict, Mark Rosolowsky, H. Vernon
Anderson, Kexin Cui, Jean-Pierre Maffrand, William B. Campbell, L. Maximilian Buja, and James T.
Willerson ....................................................................................................................... 39

An Electron-Microscopic Study of Smooth Muscle Cell Dye Coupling in the Pig Coronary Arteries:
Role of Gap Junctions
Jean-Louis Bény and Jean-Louis Connat ............................................................................. 49

Expression and Pharmacological Characterization of a Stimulatory Subtype of Adenosine Receptor
in Fetal Chick Ventricular Myocytes
David Xu, Haeyoung Kong, and Bruce T. Liang ............................................................... 56

κ and β Opioid Receptor Stimulation Affects Cardiac Myocyte Function and Ca2+ Release From an
Intracellular Pool in Myocytes and Neurons
Carlo Ventura, Harold Spurgeon, Edward G. Lakatta, Carlo Guarnieri, and Maurizio C. Capogrossi ....... 66

Effects of Adenine Nucleotides on the Proliferation of Aortic Endothelial Cells
P. Van Duete, A. Van Coeverden, P.P. Roger, and J.-M. Boynaems ......................................... 82

Potassium Rectifier Currents Differ in Myocytes of Endocardial and Epicardial Origin
Tetsushi Furukawa, Shinichi Kimura, Nanako Furukawa, Arthur L. Bassett, and Robert J. Myerburg ........ 91

Developmental Changes in the β-Adrenergic Modulation of Calcium Currents in Rabbit Ventricular
Cells
Toshiyuki Osaka and Ronald W. Joyner ............................................................................... 104

Smooth Muscle Tone and Rapid Resetting of Rat Aortic Baroreceptors
Michael C. Andresen and Mingyong Yang ............................................................................ 116

Mechanical Deformation of Vessel Wall and Shear Stress Determine the Basal Release of
Endothelium-Derived Relaxing Factor in the Intact Rabbit Coronary Vascular Bed
Daniel Lamontagne, Ulrich Pohl, and Rudi Busse .................................................................. 123

Cellular and Ventricular Contractile Dysfunction in Experimental Canine Mitral Regurgitation
Yoshitoshi Urabe, Douglas L. Mann, Robert L. Kent, Kiyoharu Nakano, Robert J. Tomanek, Blase A.
Carabello, and George Cooper IV ...................................................................................... 131

Chronic Nonocclusive Coronary Artery Constriction Impairs Ventricular Function, Myocardial
Structure, and Cardiac Contractile Protein Enzyme Activity in Rats
Joseph M. Capasso, Ashwani Malhotra, Peng Li, Xun Zhang, James Scheuer, and Piero Anversa .......... 148

CIRCULATION RESEARCH (ISSN 0009-7330) is published monthly by the American Heart Association, 7272
Greenville Avenue, Dallas, TX 75231-4596. For rates in Japan, contact Nankodo Co., Ltd., 42-6 Hongo 3-chome,
Bunkyo-ku, Tokyo 113, Japan. In the United States, individuals may subscribe for their personal use at the following
annual rates: $122 for members of an American Heart Association scientific council and $152 for nonmembers. Outside
the United States, add $60 for postage. Contact AHA for single copy rates and subscription rates for medical
professionals in training and for libraries, reading rooms, and other multiple-use institutions. Second class postage paid
at Dallas, Texas, and additional mailing offices. POSTMASTER: Send address changes to CIRCULATION
RESEARCH, American Heart Association, 7272 Greenville Avenue, Dallas, TX 75231-4596.
Reversibility of the Effects of Normothermic Global Ischemia on the Ryanodine-Sensitive and Ryanodine-Insensitive Calcium Uptake of Cardiac Sarcoplasmic Reticulum  
Margie D. Davis, Wendy Lebolt, and Joseph J. Feher .......................................................... 163

Naloxone Potentiates Cardiopulmonary Baroreflex Sympathetic Control in Normal Humans  
Hans P. Schobel, Ron M. Oren, Allyn L. Mark, and David W. Ferguson ................................. 172

Pulmonary Vasodilatory Action of Endogenous Atrial Natriuretic Factor in Rats With Hypoxic Pulmonary Hypertension: Effects of Monoclonal Atrial Natriuretic Factor Antibody  

Behavior of Genes Directly Injected Into the Rat Heart In Vivo  
Peter M. Buttrick, Alyson Kass, Richard N. Kitsis, Matthew L. Kaplan, and Leslie A. Leinwand .......... 193

Enhancement of Rabbit Cardiac Sodium Channels by β-Adrenergic Stimulation  
J.J. Matsuda, H. Lee, and E.F. Shibata ........................................................................ 199

BRIEF COMMUNICATION

Role of Nitric Oxide in Reactive Hyperemia of the Guinea Pig Heart  
Miloslav M. Kostic and Jürgen Schrader ........................................................................ 208

NEWS FROM THE AMERICAN HEART ASSOCIATION ................................................ A214

MEETINGS CALENDAR

Domestic ......................................................................................................................... A220
Abroad ............................................................................................................................ A229
