Effect of Tetraethylpyrophosphate on the Transmembrane Potentials of Pacemaker and Non-pacemaker Fibers of Isolated Rabbit Atrium. M. Kleinfield, J. Magin, and E. Stein .................................................. 240
Quinidine and Unidirectional Cation Fluxes in Atria. R. L. Klein, W. C. Holzad, and B. Tinsley .................................................. 246
Cineradiographic Study of the Snake Heart. K. Johansen and R. Hol. .................................................. 253
Ventricular Pressure-Volume Relationships and Oxygen Consumption in Fibrillation and Arrest. R. C. Monroe and G. French .................................................. 260
Influence of Experimentally Induced Atherosclerosis on the Sulfate Content of the Aortic Wall. D. T. Forman, D. S. McCann, R. E. Mosher, and A. J. Boyle .................................................. 267
Atherosclerosis in Rats Induced by Repeated Breeding, ACTH and Unilateral Nephrectomy. B. C. Wexler, T. E. Brown, and B. F. Miller .................................................. 278
Histochemical Studies in Atherogenesis. F. T. Zugibe and K. D. Brown .................................................. 287
News from the American Heart Association .................................................. 296
Contributors to this Issue .................................................. 298

No. 2
Part I

Editorial: Central Nervous Control of the Circulation. Carl F. Schmidt .............. 301
Special article: Hemodynamic Effects of Ganglion Blocking Drugs. Domingo M. Aviado .............. 304
Behavior of the Right Ventricle Following Acute Constriction of the Pulmonary Artery. A. C. Taquin, J. D. Femiso, and P. Aramendiá .............. 315
Pattern of Cholesterol Ester Fatty Acids in Serum in Normal Subjects and in Patients with Essential Hypercholesterolemia. Per Bjoernp and Bertil Hood .............. 319
Cardiopulmonary Effects of Pulmonary Venous Hypertension with Special Reference to Pulmonary Lymphatic Flow. Erwin R. Rabin and Edward C. Meyer .............. 324
Mineralocorticoid Hypertensive Cardiovascular Disease Induced in Hypophysectomized Rats. C. E. Hall, O. Hall, and E. G. Rennels .............. 336
Frequency Analysis of the Electrocardiogram. Allen M. Scher and Allan C. Young .............. 344
Early Stages in the Development of Collateral Circulation to the Lung in the Rat. Ewald R. Weibol .............. 353
Importance of Myocardial Reserve in Determining Changes in Heart Rate during Levarterenol Infusion. Louis A. Soloff, Felix Cortez, and William L. Winters, Jr. .............. 377
Action of Long-Chain Polymers on Kidney Juxtaglomerular Cells and Connective Tissue Mast Cells. Aldo N. Corbascio .............. 399
Indirect Induction of Vascular Damage by X-Irradiation. Charles K. Levy .............. 399
Studies on the Production of Intravascular Thrombi and Their Treatment with Fibrinolysin. A. H. Freiman, N. U. Bang, and E. E. Clifton .............. 409
Effect of Increased Fibrinogen Concentration on the Lysis of In Vivo Thrombi. N. U. Bang, A. H. Freiman, and E. E. Clifton .............. 419
Butter, Corn Oil and Fibrinolysis in Rats. Roosevelt L. Tillman, Robert M. O’Neal, Wilbur A. Thomas, and Barbara Bartels Hixon .............. 423
Comparison of Two Types of Mechanical Assistance in Experimental Heart Failure. Peter F. Salisbury, Cecil E. Cross, P. Andre Rieben, and Richard J. Lewin .............. 431
Pressure Variation in Small Veins in the Hindleg of the Dog. Mary P. Wiedeman .............. 440
CONTENTS OF VOLUME VIII

Vascular Muscle Reactivity. W. Alan Dodd and Edwin E. Daniel.................. 446
Electrolytes and Arterial Muscle Contractility. W. Alan Dodd and Edwin E. Daniel................................. 451
Effect of Addition and Removal of a Kidney Transplant in Renal and Adrenocortical Hypertensive Rats. A. H. Gomez, S. W. Hoobler, and P. Blaquier .......................................................... 464
Relative Effect of Chronic Ischemia and a Myocardial Revascularization Procedure on the Ventricular Fibrillation Threshold. Lloyd D. MacLean and Clifford M. Phibbs........................................... 473
Electrocardiographic Changes Produced by Potassium and Other Ions Injected into the Coronary Arteries of Intact Dogs. Louis A. Soloff, Guido Aseoano de los Santos, and M. J. Oppenheimer...................................................... 479
News from the American Heart Association.................................................. 485
Contributors to This Issue........................................................................... 487

Part II

Selected List of Research Training Programs Supported by the National Heart Institute

No. 3

Editorial: Brains, Data and Machines. C. W. Sheppard................................. 489
Myocardial Necrosis in Experimental Occlusion of the Portal Vein. Raúl H. Mejía.......................................................... 495
Effects of Bladder Distention on Pulmonary Vascular Bed. Alberto Agrest and Aquiles J. Romeoraoi.......................................................... 501
In Vitro Effects of Estradiol on the Aorta of Chickens. Manuel Réne Malinow...................................................... 506
Effects of Drugs on the Pulmonary Circulation and Ventilation As Refected By Changes in the Arterial Oxygen Saturation. Albert H. Niden, Benjamin Burrows, and William R. Barclay...................................................... 509
Factor Analysis of the Electrocardiogram. Test of Electrocardiographic Theory: Normal Hearts. Allen M. Scher, Allan C. Young, and William M. Meredith...................................................... 519
Influence of Sex Difference and Hormones on Elastine and Collagen in the Aorta of Chickens. José Cembrano, Manuel Lillo, José Val, and Jorge Mardones...................................................... 527
Reflex Effects of Left Ventricular Distension. Peter F. Salisbury, Cecil E. Cross, and P. Andre Rieben...................................................... 530
Effect of Liver Damage on Experimental Renal Hypertension in the Rat. Hubert F. Loyke, John J. Plucinsky, and Thomas L. Crawford...................................................... 535
Regulation of Cardiac Output Through Stroke Volume. Homer R. Warner and Alan F. Toronto...................................................... 549
Possible Reasons For Drop of Resting Potential of Mammalian Heart Preparations During Hypothermia. Jean Déléze...................................................... 553
Adrenal Medullary Secretion of Epinephrine and Norepinephrine in Dogs Subjected to Hemorrhagic Hypotension. Vincent V. Giavino, Noel Bass, and Florian Nykiel...................................................... 564
Effect of Insulin in the Induction and Regression of Atherosclerosis in the Chick. Jeremih Stanler, Ruth Pick, and Louis N. Katz...................................................... 572
Characteristics of the Frequency Spectrum in the Normal Electrocardiogram and in Subjects Following Myocardium Infarction. Paul H. Langner, Jr. and David B. Geselowitz...................................................... 577
Effects of Anoxia on the Vascular Resistance of the Dog's Hind Limb. Jerzy Litwin, Abdul Habib Dil, and Domingo M. Avisido...................................................... 585
Volume Pressure Relationships of the Pulmonary-Left Heart Vascular Segment. Evidence for a "Valve-like" Closure of the Pulmonary Veins. Robert C. Little...................................................... 594
"Unidirectional" Atrioventricular Conduction Studied by Microelectrodes. Toyomi Sano, Eiichi Ohtsuka, and Takio Shimamoto...................................................... 600
Cardiovascular Adaptation to Partial Heart-Lung Bypass. 
Pierre M. Galletti and Gerhard A. Brecher .......................... 609

General and Pulmonary Hemodynamic Effects of Pure Decapeptide Angiotensin in Normotensive Man. Salvatore M. Sanetta .......... 616

Mechanical Properties of Arteries in Vivo. Lysle H. Peterson, Roderick E. Jenson, and John Parnell ......................... 622

Pulmonary Vasomotor Responses to Epinephrine and Norepinephrine in the Cat. Influence of the Sympathetic Nervous System. Helen N. Duke and R. D. Stedeford ............. 640

Effect of Prolonged Periods of Anoxia on Atrioventricular Conduction and Cardiac Muscle. Jay D. Coffman, F. Bruce Lewis, and Donald E. Gregg ........ 649

Hemodynamic Effects of Continuous Positive and Negative Pressure Breathing in Normal Man. Kaye H. Kilburn and Herbert O. Sieker ........ 660

News from the American Heart Association ......................... 680

Contributors to This Issue ........................................... 683

No. 4

Editorial: The Old and the New in Therapeutics. Carl F. Schmidt .......... 687

Labeled Phosphate Distribution in Working and Nonworking Myocardium. Kenneth K. Tanobi, Nancy M. Buckley, and Norman J. Zieg .......... 703

Nitrogen-Free Plasmalogen Observed in Infarcted Myocardium of the Dog. M. H. Heck and V. J. Ferrans ................................. 738

Metabolism of Cholesterol-4-C14 in Bile Duct Cannulated Chicks and Rats. Toshiro Nishida, Akira Ueno, and Fred A. Kummerow ........ 742

Effect of Treatment with Radioactive Iodine and Iodine-Deficient Diet on Development and Maintenance of Renal Hypertension in Rats. M. J. Fregly, J. F. Cennaro, Jr., and A. B. Otis .......... 749

Inhibition of Experimental Hypercholesterolemia and Atherogenesis by 4-Amino Pteroylglutamic Acid (Aminopterin). Carl Muschenheim, Seymour Advocate, and Donald W. Hoskins .......... 759

Regional Uptake of Radioactive Oxygen, Carbon Monoxide and Carbon Dioxide in the Lungs of Patients with Mitrail Stenosis. C. T. Dollery and J. B. West .............. 765

Increased Sensitivity to Corticosterone as a Possible Factor in the Development of Adrenal Regeneration Hypertension. Floyd R. Skelton .......... 772

Mechanism of S-T Segment Alteration During Acute Myocardial Injury. Werner E. Sannson and Allen M. Scher .......................... 780

Spread of Activity Through the Atrioventricular Node. Antonio Paes de Carvalho and Darcy F. de Almeida .................. 801

Effect of Ethanol on Serum Cholesterol Concentration in Dog and Man. Francisco Grande, Lyle J. Hay, H. William Heupel, and Donald S. Amatuzio ......................... 810

Factors Affecting the Filling of the Frog's Ventricle after Isotonic Contraction. Richard A. Hennacy and Eric Ogden .......... 825
CONTENTS OF VOLUME VIII

Effects of Epinephrine on Frog Ventricle. Richard A. Hennacy. ........................................... 831
Dye Dilution in Canine Heart-Lung Preparations. C. W. Sheppard, Billy L. Couch, and Bennett L. Crowder, II. ................. 837
Significance of Mesenteric Arterial Receptors in the Reflex Regulation of Systemic Blood Pressure. Garry O. Boyer and Allen M. Scher. ................................................................. 845
Ability of Serotonin and Norepinephrine to Mimic the Central Effects of Reserpine on Vasomotor Activity. J. W. McCubbin, Y. Kaneko, and Irvine H. Page. ................................................................. 849
Hemodynamic Effects of Methoxamine in Mitral Valve Disease. C. Alpheus Stanfield and Paul N. Yu. ................................................................. 859
Electrolyte Changes in Heart Tissue and Coronary Arterial and Venous Plasma Following Coronary Occlusion. John R. Cummings. ................................................................. 865
Cause of Genuine Autoregulation of the Renal Circulation. William H. Waugh and Robert G. Shanks. ................................................................. 871
Effect of Dicumarol on Blood Vascular Integrity in the Rabbit. Thomas E. Nelson, Jr. ................................................................. 889
Book Reviews ............................................................................................................................................. 897
News from the American Heart Association ........................................................................................................... 898
Contributors to This Issue ............................................................................................................................................. 903

No. 5

Editorial Note ........................................................................................................................................... 907
Tritium Assay by Liquid Scintillation Spectrometry: Comparison of Tritium and Deuterium Oxides as Tracers for Body Water. Jack Leibman, Frank A. Gotch, and Isidore S. Edelman. ................................................................. 907
Intestinal Perfusion in Hemorrhagic Shock. Benjamin Blattberg, Carlos Maldonado, and Matthew N. Levy. ................................................................. 920
Levels of Phosphate Compounds in Experimental Cardiac Hypertrophy. Paul Kezdi, Paul M. Zoll, and Leona R. Norman. ................................................................. 924
Persistent Hypertension in the Dog Following Disruption of the Carotid Sinus Nerves and Subsequent Unilateral Renal Artery Constriction. Paul Kezdi. ................................................................. 934
Venetrical Endomyocardial Pathology Produced by Chronic Cardiac Lymphatic Obstruction in the Dog. Albert J. Miller, Ruth Pick, and Louis N. Katz. ................................................................. 941
Cardiac Arrhythmias Induced by Minimal Doses of Epinephrine in Cyclopropane-Anesthetized Dogs. Peter E. Dresel, Keith L. MacCannell, and Mark Nickerson. ................................................................. 948
Negative Diastolic Pressure in the Isolated Hypothermic Dog Heart. Larry J. O'Brien. ................................................................. 956
Cardiographic Observations on a Fin-Back Whale. Alfred W. Sonts and John K. Kanwisher. ................................................................. 961
Effect of Ischemia and Reoxygenation on Glycolytic Reactions and Adenosinetriphosphate in Heart Muscle. William H. Danforth, Siegfried Naegle, and R. J. Bing. ................................................................. 965
Viscosity of Blood in Myocardial Infarction. Frederic Kellogg and Joseph R. Goodman. ................................................................. 972
Homodynamic Effects of a Pressor Amine (Methoxamine) with Predominant Vasoconstrictor Activity. William R. Brewster, Jr., Patricia F. Osgood, James P. Isaacs, and Leon L. Goldberg. ................................................................. 980
Condensing Enzyme Levels in the Serum after Experimental Myocardial Infarction. George W. Kosicki, Henry H. Swain, and Paul A. Srere. ................................................................. 999
Cofibrins and Fibrin-Intermediates as Indicators of Thrombin Activity in Vivo. John R. Shainoff and Irvine H. Page. ................................................................. 1013
Quantitative Analysis of the Development of Experimental Atherosclerosis in the Dog. Leroy E. Duncan, Jr., and Katherine Buck. ................................................................. 1023

Role of the Veins in Venous Return. Herbert J. Bartelstone 1059

Homeometric Autoregulation in the Heart. S. J. Sarnoff, J. H. Mitchell, J. P. Gilmore, and J. P. Remensnyder 1077

Relation Between Left Ventricular Diastolic Pressure and Myocardial Segment Length and Observations on the Contribution of Atrial Systole. R. J. Linden and J. H. Mitchell 1092

Influence of Cardiac Sympathetic and Vagal Nerve Stimulation on the Relation Between Left Ventricular Diastolic Pressure and Myocardial Segment Length. J. H. Mitchell, R. J. Linden, and S. J. Sarnoff 1100

News from the American Heart Association 1139

Contributors to This Issue 1142

No. 6

Longitudinal Waves in the Walls of Fluid-Filled Elastic Tubes. Robert L. Van Citters 1145

Effects of Fat on Coronary Circulation in Dogs. Peter T. Kuo, Arthur F. Whorvat, Arthur A. Allman, and James W. West 1157

Influence of Cardiac Sympathetic and Vagal Nerve Stimulation on the Relation Between Left Ventricular Diastolic Pressure and Myocardial Segment Length. J. H. Mitchell, R. J. Linden, and S. J. Sarnoff 1100
