Circulation Research

AN OFFICIAL JOURNAL OF THE AMERICAN HEART ASSOCIATION

No. 1

Editorial: Circulation Research and Biochemistry. Niels Haugaard

Observations on the Circulation of Domestic Cattle. J. T. Doyle

J. L. Patterson, Jr., J. V. Warren, and David K. Detweiler

Prolonged \( \Delta \)-Cholestenone Feeding in Birds. C. W. Nichols, S. Ledingham, D. D. Chapman, and I. L. Chaikoff

Effects of Experimental Regional Ischemia and Levarterenol on the RS-T Segment and Baseline of Ventricular Surface Electrocardiograms Obtained by Direct-Coupled Amplification. A. H. Katcher, G. Peirce, and J. J. Sayen

Influence of Polyvinyl Chloride Tubing on the Isolated Perfused Rat's Heart. F. L. Meyler, A. F. Willbrands, and D. Durrer

Plateau of the Action Potential of the Frog Ventricle. W. V. McFarlane

Local Effects of Sodium, Calcium and Magnesium Upon Small and Large Blood Vessels of the Dog Forelimb. F. J. Haddy

Further Studies on Experimental Atherosclerosis and Dietary Pyrimidines. L. C. Philcox, C. Naito, S. E. Andrus, and A. M. Roach

Effect of 18-Norandrostenedione on Experimentally-Induced Atheroma in Cockerels. L. C. Philcox, C. Naito, S. E. Andrus, and A. M. Roach

Influence of Boundary Conditions on the Amplitude of R and Other Accession Potentials in Leads from the Ventricular Wall. L. L. Conrad and T. B. Cuddy

Experimental Atheromatosis. A. J. Bollet, C. Wang, and D. Adlerberg

Components of the “Central” Blood Volume in the Dog. R. J. Marshall, Y. Wang, and J. T. Shepherd

Further Studies of the Effects on Myocardial Energy Utilization. T. D. Darby and E. E. Aldinger

Electrocardiogram of the Normal and Hypertensive Rat. M. P. Sambhi and F. N. White

Effect of Hemorrhage on the Cardiac Output and Its Distribution in the Rat. L. C. Philcox, C. Naito, S. E. Andrus, and A. M. Roach

Measurement of Flow in Single Blood Vessels Including Cardiac Output by Local Thermolysis. A. Pronk and V. Ganz

Left Ventricle as a Mixing Chamber. H. Irisawa, M. P. Wilson, and R. F. Rubner

Metabolism of Ischemic Cardiac Muscle. J. P. Kaltenbach and R. B. Jennings

Comparative Analysis of Molar Sodium Lactate and Other Agents in Treatment of Induced Hypokalemia in Nephrectomized Dogs. S. Greenstein, W. P. Goldburgh, S. V. Guzman, and S. Bellet

Immediate Effects of Intravenous Endotoxin on Serotonin Concentrations and Blood Platelets. R. B. Davis, W. R. Meeker, and D. G. McQuarrie
Effect of Tetraethylpyrophosphate on the Transmembrane Potentials of Pacemaker and Non-pacemaker Fibers of Isolated Rabbit Atrium. M. Kleinfield, J. Magin, and E. Stein ................................................................. 240
Quinidine and Unidirectional Cation Fluxes in Atria. R. L. Klein, W. C. Holzad, and B. Tinsley ................................................................. 246
Cineradiographic Study of the Snake Heart. K. Johansen and R. Hol. .... 253
Influence of Experimentally Induced Atherosclerosis on the Sulfate Content of the Aortic Wall. D. T. Forman, D. S. McCann, R. E. Mosher, and A. J. Boyle............................ 267
Atherosclerosis in Rats Induced by Repeated Breeding, ACTH and Unilateral Nephrectomy. B. C. Wexler, T. E. Brown, and B. F. Miller ................. 278
Histochemical Studies in Atherogenesis. F. T. Zugibe and K. D. Brown ........... 287
News from the American Heart Association ............................................ 296
Contributors to This Issue .................................................................. 298

No. 2
Part I

Editorial: Central Nervous Control of the Circulation. Carl F. Schmidt ........ 301
Special article: Hemodynamic Effects of Ganglion Blocking Drugs. Domingo M. Aviado ........... 304
Behavior of the Right Ventricle Following Acute Constriction of the Pulmonary Artery. A. C. Taquini, J. D. Fermon, and P. Aramendia............. 315
Pattern of Cholesterol Ester Fatty Acids in Serum in Normal Subjects and in Patients with Essential Hypercholesterolemia. Per Bjorntorp and Bertil Hood 319
Cardiopulmonary Effects of Pulmonary Venous Hypertension with Special Reference to Pulmonary Lymphatic Flow. Erwin R. Rabin and Edward C. Meyer .... 324
Mineralocorticoid Hypertensive Cardiovascular Disease Induced in Hypophysectomized Rats. C. E. Hall, O. Hall, and E. G. Rennells .................. 336
Frequency Analysis of the Electrocardiogram. Allen M. Scher and Allan C. Young ............................................................... 344
Early Stages in the Development of Collateral Circulation to the Lung in the Rat. Ewald R. Weibel .......................................................... 353
Importance of Myocardial Reserve in Determining Changes in Heart Rate during Levodopa Infusion. Louis A. Soloff, Felix Cortez, and William L. Winters, Jr. .................................................. 377
Variability of the Viscoelastic Constants Along the Aortic Axis of the Dog. Richard W. Lawton .......................................................... 381
Action of Long-Chain Polymers on Kidney Juxtaglomerular Cells and Connective Tissue Mast Cells. Aldo N. Corbascio .................. 399
Indirect Induction of Vascular Damage by X-Irradiation. Charles K. Levy 399
Studies on the Production of Intravascular Thrombi and Their Treatment with Fibrinolysis. A. H. Freiman, N. U. Bang, and E. E. Clifton ........... 409
Effect of Increased Fibrinogen Concentration on the Lysis of In Vivo Thrombi. N. U. Bang, A. H. Freiman, and E. E. Clifton ......................... 419
Butter, Corn Oil and Fibrinolysis in Rats. Roosevelt L. Tillman, Robert M. O'Neal, Wilbur A. Thomas, and Barbara Bartels Hixon ............. 423
Comparison of Two Types of Mechanical Assistance in Experimental Heart Failure. Peter F. Salisbury, Cecil E. Cross, P. Andre Rieben, and Richard J. Lewin .......................................................... 431
Pressure Variation in Small Veins in the Hindleg of the Dog. Mary P. Wiedemann .......................................................... 440
CONTENTS OF VOLUME VIII

Vascular Muscle Reactivity. W. Alan Dodd and Edwin E. Daniel .......................... 446
Electrolytes and Arterial Muscle Contractility. W. Alan Dodd and Edwin E. Daniel ........ 451
Effect of Addition and Removal of a Kidney Transplant in Renal and Adrenocortical Hypertensive Rats. A. H. Gomez, S. W. Hoobler, and P. Blaquier ........................................ 464
Relative Effect of Chronic Ischemia and a Myocardial Revascularization Procedure on the Ventricular Fibrillation Threshold. Lloyd D. MacLean and Clifford M. Phipps .......................... 473
Electrocardiographic Changes Produced by Potassium and Other Ions Injected into the Coronary Arteries of Intact Dogs. Louis A. Soloff, Guido Asepio de los Santos, and M. J. Oppenheimer ................. 479
News from the American Heart Association ......................................................... 485
Contributors to This Issue ............................................................................... 487

Part II

Selected List of Research Training Programs Supported by the National Heart Institute

No. 3

Editorial: Brains, Data and Machines. C. W. Sheppard ........................................ 489
Myocardial Necrosis in Experimental Occlusion of the Portal Vein. Raúl H. Mejía ................................................. 495
Effects of Bladder Distention on Pulmonary Vascular Bed. Alberto Agrest and Aquiles J. Roncoroni ............................................. 501
In Vitro Effects of Estradiol on the Aorta of Chickens. Manuel Réne Malino........... 506
Factor Analysis of the Electrocardiogram. Test of Electrocardiographic Theory: Normal Hearts. Allen M. Scher, Allan C. Young, and William M. Meredith .............................................. 519
Influence of Sex Difference and Hormones on Elastite and Collagen in the Aorta of Chickens. José Cembrano, Manuel Lillo, José Val, and Jorge Marcondes ...................................................... 527
Reflex Effects of Left Ventricular Distension. Peter F. Salisbury, Cecil E. Cross, and P. Andre Rieben ..................................................... 530
Effect of Liver Damage on Experimental Renal Hypertension in the Rat. Hubert F. Loyke, John J. Flucinsky, and Thomas L. Crawford .................................................... 535
Vascular Effects of Hypertonic Solutions. Raymond C. Read, John A. Johnson, James A. Vick, and Maurice W. Meyer ......................................................... 538
Regulation of Cardiac Output Through Stroke Volume. Homer R. Warner and Alan F. Toronto ..................................................... 549
Possible Reasons For Drop of Resting Potential of Mammalian Heart Preparations During Hypothermia. Jean Delèze ..................................................... 553
Adrenal Medullary Secretion of Epinephrine and Norepinephrine in Dogs Subjected to Hemorrhagic Hypotension. Vincent V. Gavianno, Noel Bass, and Florian Nykiel ............................................. 564
Effect of Insulin in the Induction and Regression of Atherosclerosis in the Chick. Jereminie Stanler, Ruth Pick, and Louis N. Katz ..................................................... 572
Characteristics of the Frequency Spectrum in the Normal Electrocardiogram and in Subjects Following Myocardium Infarction. Paul H. Langner, Jr. and David B. Geiselowitz ............................................. 577
Effects of Anoxia on the Vascular Resistance of the Dog's Hind Limb. Jerzy Litwin, Abdul Habib Dil, and Domingo M. Avisado ............................................. 585
Volume Pressure Relationships of the Pulmonary-Left Heart Vascular Segment. Evidence for a "Valvecike" Closure of the Pulmonary Veins. Robert C. Littie ............................................. 594
"Unidirectional" Atrioventricular Conduction Studied by Microelectrodes. Toyomi Sano, Eihchi Ohtsuka, and Takio Shimamoto ............................................. 600

CONTENTS OF VOLUME VIII

Effects of Epinephrine on Frog Ventricle. Richard A. Hennacy .......................... 831
Dye Dilution in Canine Heart-Lung Preparations. C. W. Sheppard, 
Billy L. Couch, and Bennett L. Crowder, II .......................... 837
Significance of Mesenteric Arterial Receptors in the Reflex Regulation of 
Systemic Blood Pressure. Garry O. Boyer and Allen M. Seher .......................... 845
Ability of Serotonin and Norepinephrine to Mimic the Central Effects of 
Reserpine on Vasomotor Activity. J. W. McCubbin, Y. Kaneko, 
and Irvine H. Page .......................... 849
Hemodynamic Effects of Methoxamine in Mitral Valve Disease. 
C. Alpheus Stanfield and Paul N. Yu ........................................ 859
Electrolyte Changes in Heart Tissue and Coronary Arterial and Venous 
Plasma Following Coronary Occlusion. John R. Cummings .......................... 865
Significance of Mesenteric Arterial Receptors in the Reflex Regulation of 
Systemic Blood Pressure. Garry O. Boyer and Allen M. Seher .......................... 845
Ability of Serotonin and Norepinephrine to Mimic the Central Effects of 
Reserpine on Vasomotor Activity. J. W. McCubbin, Y. Kaneko, 
and Irvine H. Page .......................... 849
Hemodynamic Effects of Methoxamine in Mitral Valve Disease. 
C. Alpheus Stanfield and Paul N. Yu ........................................ 859
Electrolyte Changes in Heart Tissue and Coronary Arterial and Venous 
Plasma Following Coronary Occlusion. John R. Cummings .......................... 865
Cause of Genuine Autoregulation of the Renal Circulation. 
William H. Waugh and Robert G. Shanks ................................ 871
Effect of Dicumarol on Blood Vascular Integrity in the Rabbit. 
Thomas E. Nelson, Jr .................................................. 889
Book Reviews .......................... 897
News from the American Heart Association .................................. 898
Contributors to This Issue ........................................ 903

No. 5

Editorial Note .................................................................................. 907
Tritium Assay by Liquid Scintillation Spectrometry: Comparison of Tritium and 
Deuterium Oxides as Tracers for Body Water. 
Jack Leibman, Frank A. Gotch, and Isidore S. Edelman .......................... 907
Reflex Circulatory Effects Elicited by Hypertonic and Hypotonic Solutions Injected 
into Femoral and Brachial Arteries of Dogs. 
Richard P. Lasser, Myron R. Schoenfeld, Douglas F. Allen, and Charles K. Friedberg 
........................................ 913
Intestinal Perfusion in Hemorrhagic Shock. Benjamin Blattberg, Carlos Maldonado, 
and Matthew N. Levy .................................................. 920
Levels of Phosphate Compounds in Experimental Cardiac Hypertrophy. 
Paul R. Minton, Paul M. Zoll, and Leona R. Norman ................................ 924
Chronic Constriction of the External and Internal Carotid Arteries in Dogs: 
Its Effect on the Blood Pressure. Paul Kezdi ........................................ 930
Persistent Hypertension in the Dog Following Disruption of the Carotid Sinus 
Nerves and Subsequent Unilateral Renal Artery Constriction. Paul Kezdi .......................... 934
Ventricular Endomyocardial Pathology Produced by Chronic Cardiac Lymphatic 
Cardiac Arrhythmias Induced by Minimal Doses of Epinephrine in Cyclopropane-
Anesthetized Dogs. Peter E. Dresel, Keith L. MacCannell, and Mark Nickerson .......................... 948
Negative Diastolic Pressure in the Isolated Hypothermic Dog Heart. 
Larry J. O'Brien .................................................. 956
Cardiographic Observations on a Fin-Back Whale. 
Alfred W. Senft and John K. Kanwisher ........................................ 961
Effect of Ischemia and Reoxygenation on Glycolytic Reactions and Adenosinetriphos-
phate in Heart Muscle. William H. Danforth, Siegfried Naegle, and R. J. Bing .......................... 965
Viscosity of Blood in Myocardial Infarction. 
Frederick Kellogg and Joseph R. Goodman ........................................ 972
Hemodynamic Effects of a Pressor Amine (Methoxamine) with Predominant Vaso-
constrictor Activity. William R. Brewster, Jr., Patricia F. Osgood, James J. Isaacs, 
and Leon I. Goldberg .................................................. 980
Ventricular Nonmixing as a Source of Error in the Estimation of Ventricular Volume 
by the Indicator-Dilution Technique. H. J. C. Swan and Walter Beck ................................ 989
Condensing Enzyme Levels in the Serum after Experimental Myocardial Infarction. 
George W. Kosicki, Henry H. Swain, and Paul A. Srere .......................... 999
Effect of Digitals Glycosides on the Myocardial Sodium and Potassium Balance. 
John R. Blackmon, Herman K. Hellerstein, Louis Gillespie, Jr., and Robert M. Berne .......................... 1003
Cofibrins and Fibrin-Intermediates as Indicators of Thrombin Activity in Vivo. 
John R. Shainoff and Irvine H. Page ........................................ 1013
Quantitative Analysis of the Development of Atherosclerosis in the 
Dog. Leroy E. Dineen, Jr., and Katherine Back .................................. 1023
Study of the Relationship Between Plasma Volume and Transcapillary Protein Ex-
change Using 125I-Labeled Albumin and 15N-Labeled Globulin. 
W. Gordon Walker, Richard S. Ross, and John D. S. Hammond .......................... 1028
viii CONTENTS OF VOLUME VIII

Role of the Venas in Venous Return. Herbert J. Bartelstone .................................. 1059

Homeometric Autoregulation in the Heart. S. J. Sarnoff, J. H. Mitchell, J. P. Gilmore, and J. P. Remensnyder ................................................................. 1077

Relation Between Left Ventricular Diastolic Pressure and Myocardial Segment Length and Observations on the Contribution of Atrial Systole. R. J. Linden and J. H. Mitchell .......................................................... 1092

Influence of Cardiac Sympathetic and Vagal Nerve Stimulation on the Relation Between Left Ventricular Diastolic Pressure and Myocardial Segment Length. J. H. Mitchell, R. J. Linden, and S. J. Sarnoff .......................................................... 1100

News from the American Heart Association ................................................................ 1139

Contributors to This Issue .......................................................................................... 1142

No. 6

Longitudinal Waves in the Walls of Fluid-Filled Elastic Tubes. Robert L. Van Citters ................................................... 1145

Effects of Fat on Meals in Dogs. Peter T. Kuo, Arthur F. Whorvat, Arthur A. Allman, and James W. West .................................................... 1157

Investigation of Spontaneous Vasomotor Activity: Relation of the Sympathetic and Somatic Nervous Systems to the Occurrence of Slow Waves (Alpha and Beta) of the Plethysmogram of the Dog's Paw. Elizabeth M. Guthbertson, Rutherford S. Gilfillan, Mikel Duino ........................................... 1164

Peripheral and Ventricular Pressure. J. P. Holt, E. A. Rhode, and Helga Kines .......................... 1171

Mechanisms of Inhibition of Heart Rate by Phenytoin. Sarla Varma, S. D. Johnsen, D. E. Sherman, and W. B. Youmans ................................. 1182

Dicumarol Therapy: Some Effects of Platelets and Their Relationship to Clotting Tests. E. A. Murphy and J. F. Mustard ............................................. 1187

Electrical Activity During the P-R Interval. Brian F. Hoffman, Paul F. Crandfield, Jackson H. Stuckey, and Albin A. Bagdonas ........................................................ 1200

Intestinal Tissue Blood Flow in Shock Due to Endotoxin. Ralph R. Rayner, Lloyd D. MacLean, and Eugene Grinn ........................................... 1212

Cardiac Malformations in Rats Induced by Exposure of the Mother to Carbon Dioxide During Pregnancy. Olga M. Haring ................................................................ 1218

Mechanism by Which Serotonin, Norepinephrine and Reserpine Cause Central Vasomotor Inhibition. Y. Kaneko, J. W. McCubbin, and Irvine H. Page ........................................ 1228

Effects of Hypertensin on Arterial Pressure, Heart Work and Cardiac Oxygen Utilization. Ivan E. Forte, Louis Potgieter, and Jerry E. Schmitthenner ................................................................ 1235

Effects of Metabolic Acidosis on Ventricular Isometric Systolic Tension and the Response to Epinephrine and Levaterenol. Thomas D. Darby, Earl E. Aldinger, Richard H. Gadden, and Wendell B. Thrower ........................................ 1242

Studies on Starling's Law of the Heart: Determinants of the Relationship Between Left Ventricular End-Diastolic Pressure and Circumference. Eugene Braunwald, Robert L. Frye, and John Ross, Jr. ........................................ 1254

Electrolyte Content of Rat Heart Atria and Ventricles. J. A. Barclay, E. J. Hoiley, and Helga Houghton ....................................................... 1264

Maturation of Small Pulmonary Arteries in Puppies. Clay E. Phillips, Jr., James A. DeWeese, James A. Manning, and Earle B. Mahoney ........................................ 1268

Some Histochemical Observations on the Human Aortic Wall in Atherosclerosis. Maurice Sandier and Geoffrey H. Bourne ........................ 1274

Book Review ........................................................................................................... 1275

News from the American Heart Association ................................................................ 1281

Contributors to This Issue .......................................................................................... 1285

Volume Author Index .............................................................................................. 1286

Volume Subject Index .............................................................................................. 1288
