In the article by Zhang et al, “Independent Regulation of Cardiac Kv4.3 Potassium Channel Expression by Angiotensin II and Phenylephrine” (Circ Res. 2001;88:476–482), the paragraph on page 477 under the heading Luciferase Assay contained an error in the description of the transfection. The sentence should read, “On the third day after neonatal myocytes were prepared, cells were transfected by the calcium phosphate method with 5 μg of one of these luciferase constructs, 2 μg of pcDNA3 (Invitrogen), 0.5 μg control vector pRL-TK, and salmon sperm DNA to bring the total DNA amount to 25 μg.”
Correction
