2nd Annual Symposium of the American Heart Association Council on Basic Cardiovascular Sciences
Targeting Heart Failure — New Science, New Tools, New Strategies

July 24-27, 2005
Keystone Conference Center
Keystone, CO

Sponsored by the American Heart Association Council on Basic Cardiovascular Sciences
Co-sponsored by the American Heart Association Interdisciplinary Working Group on Functional Genomics & Translational Biology and the National Heart, Lung, and Blood Institutes.

Conference Program Committee
Conference Co-Chairs: David A. Kass & Susan F. Steinberg

Advisory Board: Basic Cardiovascular Sciences Council
Hossein Ardehali, C. William Balke, Ivor J. Benjamin, Roberto Bolli, Thomas H. Hintze, Richard N. Kitsis, Eduardo Marban, Elizabeth Murphy, Michael D. Schneider, Mark B. Taubman

Heart failure remains a leading cause of death in the adult population, affecting more than 5 million individuals in the United States alone. This second annual meeting of the American Heart Association Council on Basic Cardiovascular Sciences highlights new research that has aimed at expanding our knowledge of the underlying mechanisms, diagnostic approaches, and therapeutic strategies to treat this common disorder. The meeting features both invited presentations and poster abstract presentations, with participants from 21 different countries.

Abstracts for the poster presentations are provided in this special on-line supplement.

Abstracts, lectures, and presentations from the 2nd Annual Symposium of the American Heart Association Council on Basic Cardiovascular Sciences: Targeting Heart Failure—New Science, New Tools, New Strategies are embargoed for release at the time of presentation. Information may not be released before the scheduled presentation time.
